BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS
(ISSN 0006-291X)

Published semimonthly by Academic Press, Inc., 6277 Sea Harbor Drive, Orlando, FL 32887-4900

1991: Volumes 174–181. Price: $800.00 U. S. A. and Canada; $986.00 all other countries

1992: Volumes 182–189. Price: $856.00 U. S. A. and Canada; $1054.00 all other countries

All prices include postage and handling.

Information concerning personal subscription rates may be obtained by writing to the Publishers. All correspondence and subscription orders should be addressed to the office of the Publishers at 6277 Sea Harbor Drive, Orlando, FL 32887-4900. Send notices of change of address to the office of the Publishers at least 6 to 8 weeks in advance. Please include both old and new addresses. POSTMASTER: Send changes of address to *Biochemical and Biophysical Research Communications*, 6277 Sea Harbor Drive, Orlando, FL 32887-4900.

CUMULATIVE TABLE OF CONTENTS FOR VOLUMES 174–181

Volume 174, Number 1, January 15, 1991

Inhibition of *ras*-Induced Germinal Vesicle Breakdown in *Xenopus* oocytes by *rap*-1B *Michael J. Campa, Kwen-Jen Chang, Luis Molina y Vedia, Bryan R. Reep, and Eduardo G. Lapetina* 1

Elafin Is a Potent Inhibitor of Proteinase 3 *Oliver Wiedow, Jens Lüdemann, and Bert Utecht* 6

1,25 $(OH)_2$ Vitamin D_3 Attenuates the Loss of Resistance Artery Contractile Function Associated with Incubation in Culture Media *Hong Xue, David A. McCarron, and Richard D. Bukoski* 11

Kinetics of TNF, IL-6, and IL-8 Gene Expression in LPS-Stimulated Human Whole Blood *L. E. DeForge and D. G. Remick* 18

Effects of Chronic Exposure of NG108-15 Cells to Morphine or Ethanol on Binding of Nuclear Factors to cAMP-Response Element (CRE) *Takeshi Osugi, Hideo Taniura, Mitsushi Ikemoto, and Naomasa Miki* 25

Purification of Monomeric Agmatine Iminohydrolase from Soybean *Kyung Hee Park and Young Dong Cho* 32

Hormone Controlled Phosphorylation and Degradation of CYP2B1 and CYP2E1 in Isolated Rat Hepatocytes *Inger Johansson, Erik Eliasson, and Magnus Ingelman-Sundberg* 37

Biodegradation of Triiodophenol by Cell-Free Extracts of a Pentachlorophenol-Degrading *Flavobacterium* sp. *L. Xun and C. S. Orser* 43

Basic Fibroblast Growth Factor Is a Substrate for Phosphorylation by Human Neutrophil Ecto-Protein Kinase Activity *Keith M. Skubitz and Said A. Goueli* 49

Inhibition of HIV-Reverse Transcriptase Activity by Asterriquinone and Its Analogues *Katsuhiko Ono, Hideo Nakane, Sakae Shimizu, and Saburo Koshimura* 56

Conformational Transitions of Detergent-Solubilized Na,K-ATPase Are Conveniently Monitored by the Fluorescent Probe 6-Carboxy-Eosin *Mikael Esmann* 63

Isolation and Partial Characterization of a Cystine-Rich Basic Heparin-Binding Protein from Bovine Platelets *Erzsébet Szabó and László Muszbek* 70

Inhibitory Effect of Okadaic Acid on Carbachol-Evoked Secretion of Catecholamines in Cultured Bovine Adrenal Medullary Cells *Nobuyuki Yanagihara, Yumiko Toyohira, Yoshiro Koda, Akihiko Wada, and Futoshi Izumi* 77

Isolation and Partial Characterization of the Formyl Peptide Receptor Components on Human Neutrophils *Ernesto De Nardin, Stephen J. Radel, and Robert J. Genco* 84

Sequestration of a Hepatocyte Growth Factor in Extracellular Matrix in Normal Adult Rat Liver *Aki Masumoto and Noboru Yamamoto* 90

Bone Morphogenetic Protein-2 Stimulates Alkaline Phosphatase Activity and Collagen Synthesis in Cultured Osteoblastic Cells, MC3T3-E1
Yoh Takuwa, Chizuko Ohse, Elizabeth A. Wang, John M. Wozney, and Kamejiro Yamashita 96

Effect of Substitution of Hydrogen Oxide by Deuterium Oxide on Thermotropic Transition between the Interdigitated Gel Phase and the Ripple Phase of Dihexadecylphosphatidylcholine *Kazuo Ohki* 102

Effect of Lymphokine-Activated Killer Cells on Human Retinoblastoma Cells (Y-79) *in Vitro:* Enhancement of the Activity by a Polysaccharide Preparation, Krestin *Yasuhiro Hayashida, Shinji Kurimoto, and Naoki Yamamoto* 107

Galactose-Dependent Expression of the Recombinant Ca^{2+}-Binding Photoprotein Aequorin in Yeast *Junko Nakajima-Shimada, Hidetoshi Iida, Frederick I. Tsuji, and Yasuhiro Anraku* 115

Activation of Phosphatidylinositol-3-kinase by Insulin Is Mediated by both A and B Human Insulin Receptor Types
José M. Carrascosa, Beate Vogt, Axel Ullrich, and Hans U. Häring 123

Increased Secretion of Brain Natriuretic Peptide and Atrial Natriuretic Peptide, but Not Sufficient to Induce Natriuresis in Rats with Nephrotic Syndrome
Naoto Yokota, Yoshitaka Yamamoto, Masahito Aburaya, Kazuo Kitamura, Tanenao Eto, Kenji Kangawa, Naoto Minamino, Hisayuki Matsuo, and Kenjiro Tanaka 128

Up-Regulation of Fibroblast Growth Factor (FGF) Receptor mRNA Levels by Basic FGF or Testosterone in Androgen-Sensitive Mouse Mammary Tumor Cells *Hiroshi Saito, Soji Kasayama, Haruhiko Kouhara, Keishi Matsumoto, and Bunzo Sato* 136

Isolation and Identification of C-Type Natriuretic Peptide in Chicken Brain
Jerome J. Arimura, Naoto Minamino, Kenji Kangawa, and Hisayuki Matsuo 142

Expression of Vasopressin V2 Receptor in *Xenopus laevis* Oocytes by Porcine Kidney Cell Line (LLC-PK1) Messenger RNA *Koji Kimura* 149

The Production by Alternate Splicing of Two mRNAs Differing by One Codon Could Be an Intrinsic Property of Neuroendocrine Protein 7B2 Gene Expression in Man *Luc Paquet, Claude Lazure, Nabil G. Seidah, Michel Chrétien, and Majambu Mbikay* 156

^{19}F NMR Study of the Interactions of Fluoride with Superoxide Dismutase and Hemoglobin in Erythrocytes
Marina Scarpa, Paolo Viglino, Fabio Vianello, and Adelio Rigo 163

Correlation of the Steady-State RNA Levels among the α-Subunit of Prolyl 4-Hydroxylase and the $\alpha 1$ and $\alpha 2$ Chains of the Type I Collagen during Growth of Chicken Embryo Tendon Fibroblasts
James A. Bussuk and Richard A. Berg 169

A Simple and Rapid Method for the Detection of RNA in Formalin-Fixed, Paraffin-Embedded Tissues by PCR Amplification
F. v. Weizsäcker, S. Labeit, H. K. Koch, W. Oehlert, W. Gerok, and H. E. Blum 176

Thrombin Effects on Osteoblastic Cells. II. Structure–Function Relationships
Dimitris N. Tatakis, Calogero Dolce, Rosemary Dziak, and John W. Fenton II 181

Purification and Some Properties of a Phospholipase A_2 from Bovine Platelets
Dae Kyong Kim, Pann Ghill Suh, and Sung Ho Ryu 189

Clathrin-Coated Vesicles from Human Placenta Contain GTP-Binding Proteins
James M. Lenhard, Marilyn Aach Levy, and Philip D. Stahl 197

Proteinase B Is, Indeed, Not Required for Chitin Synthetase 1 Function in *Saccharomyces cerevisiae*
Sanford J. Silverman, J. Andrew Shaw, and Enrico Cabib 204

SecA, an Essential Component of the Secretory Machinery of *Escherichia coli*, Exists as Homodimer
Mitsuru Akita, Akeo Shinkai, Shin-ichi Matsuyama, and Shoji Mizushima 211

Oxygen Radical Production during Ischemia-Reperfusion in the Isolated Perfused Rat Liver as Monitored by Luminol-Enhanced Chemiluminescence
Masahiro Okuda, Iwao Ikai, Britton Chance, and Chellappa Kumar 217

Genomic Organization of the α Chain of the Human C4b-Binding Protein Gene
Teijiro Aso, Seiichi Okamura, Tetsuya Matsuguchi, Norihiro Sakamoto, Teizo Sata, and Yoshiyuki Niho 222

Endothelin-3 Stimulates Production of Endothelium-Derived Nitric Oxide via Phosphoinositide Breakdown
Toshiaki Emori, Yukio Hirata, Kazuo Kanno, Kazuki Ohta, Satoru Eguchi, Taihei Imai, Masayoshi Shichiri, and Fumiaki Marumo 228

The Peripheral Lymph Node Homing Receptor, LECAM-1, Is Involved in CD18-Independent Adhesion of Human Neutrophils to Endothelium
R. Hallmann, M. A. Jutila, C. W. Smith, D. C. Anderson, T. K. Kishimoto, and E. C. Butcher 236

Molecular Insight into the Asymmetric Distribution of Pathogenetic Human Mitochondrial DNA Deletions
Donald R. Johns and David R. Cornblath 244

Recombinant Human Interleukin-1 Inhibits Plasminogen Activator Inhibitor-1 (PAI-1) Production by Human Articular Cartilage and Chondrocytes
Ian K. Campbell, Karena Last, Ulrike Novak, Leif R. Lund, and John A. Hamilton 251

Differential Modulation by N^4,2′-*O*-Dibutyryl Cytidine 3′:5′-Cyclic Monophosphate of Neutrophil Activation
Jürgen Ervens and Roland Seifert 258

Interleukin-1β, Tumor Necrosis Factor, and Forskolin Stimulate the Synthesis and Secretion of Group II Phospholipase A_2 in Rat Mesangial Cells
Casper Schalkwijk, Josef Pfeilschifter, Fritz Märki, and Henk van den Bosch 268

Effects of Estrogens of MCF-7 Cells: Positive or Negative Regulation by the Nature of the Ligand–Receptor Complex
George E. Swaneck and Jack Fishman 276

The Leader Sequence of Streptokinase Is Responsible for Its Post-translational Carboxyl-Terminal Cleavage
Seung Kook Park, Byeong Ryong Lee, and Si Myung Byun 282

Growth Inhibition of Human Keratinocytes by Antisense c-myc Oligomer Is Not Coupled to Induction of Differentiation
Makoto Hashiro, Kunio Matsumoto, Hidenobu Okumura, Koji Hashimoto, and Kunihiko Yoshikawa 287

Demonstration of Heat Production Associated with Spreading Depression in the Amphibian Retina *I. Tasaki and P. M. Byrne* 293

Normal Human Chromosome 5, on Which a Familial Adenomatous Polyposis Gene Is Located, Has Tumor-Suppressive Activity
Yuji Hoshino, Izumi Horikawa, Mitsuo Oshimura, and Yasuhito Yuasa 298

Homologous Recombination in Bovine Papillomavirus Shuttlevector: Effect of Relative Orientation of Substrate Sequences
Ayako Naito, Yoshihiro Kitamura, and Hiroshi Yoshikura 305

Inhibitory Effect of Porphyrins on the Proliferation of Mouse Spleen Lymphocytes *in Vitro* *H. Stepien, J. Kunert-Radek, A. Stanisz, G. Zerek-Melen, and M. Pawlikowski* 313

Demonstration of Extrinsic DNA from Immune Complexes in Plasma of a Patient with Systemic Lupus Erythematosus *Kunihiko Terada, Eiji Okuhara, Yoshihiko Kawarada, and Susumu Hirose* 323

Hepatocyte Growth Factor/Hepatopoietin A Stimulates the Growth of Rat Kidney Proximal Tubule Epithelial Cells (RPTE), Rat Nonparenchymal Liver Cells, Human Melanoma Cells, and Mouse Keratinocytes and Stimulates Anchorage-Independent Growth of SV-40 Transformed RPTE
Mikio Kan, Guohong Zhang, Raza Zarnegar, George Michalopoulos, Yoshinari Myoken, Wallace L. McKeehan, and James L. Stevens 331

Endothelin-3 Inhibits Prolactin and Stimulates LH, FSH, and TSH Secretion from Pituitary Cell Culture *Béla Kanyicska, Thomas P. Burris, and Marc E. Freeman* 338

Phosphorylase Kinase: Development of a Continuous Fluorometric Assay for the Determination of Catalytic Activity
Dean A. Malencik, Zhizhuang Zhao, and Sonia R. Anderson 344

Expression of Soluble Guanylate Cyclase Activity Requires Both Enzyme Subunits *Wolfgang A. Buechler, Masaki Nakane, and Ferid Murad* 351

P460 of Hydroxylamine Oxidoreductase of *Nitrosomonas europaea:* Soret Resonance Raman Evidence for a Novel Heme-like Structure
Kristoffer K. Andersson, Gerald T. Babcock, and Alan B. Hooper 358

Solubilization of Prostaglandin D_2 Binding Protein from Porcine Temporal Cortex
Hiroshi Morii and Yasuyoshi Watanabe 364

The B Subunit of Cholera Toxin Enhances DNA Synthesis in Rat Hepatocytes Induced by Insulin and Epidermal Growth Factor
Hiroshi Mitsui, Masao Iwamori, Naoaki Hashimoto, Haruki Yamada, Yusei Ikeda, Gotaro Toda, Kiyoshi Kurokawa, and Yoshitaka Nagai 372

Regional Expression of the Nerve Growth Factor Gene Family in Rat Brain during Development *Yoshihiko Kaisho, Asae Shintani, Yoshitaka Ono, Koki Kato, and Koichi Igarashi* 379

Quinone-Mediated Electron Transport System in the Filarial Parasite *Setaria digitata*
K. R. Santhamma and R. Kaleysa Raj 386

Differential Distribution of the mRNA Encoding Two Isoforms of the Catalytic Subunit of Calcineurin in the Rat Brain
Tomoaki Takaishi, Naoaki Saito, Takayoshi Kuno, and Chikako Tanaka 393

Development of Chicken Antibodies toward the Human Thyrotropin Receptor Peptides and Their Bioactivities
Masayuki Ohmori, Toyoshi Endo, and Toshimasa Onaya 399

Structural Analysis of a Mature *hst*-1 Protein with Transforming Growth Factor Activity *Kiyoshi Miyagawa, Sadao Kimura, Teruhiko Yoshida, Hiromi Sakamoto, Fumimaro Takaku, Takashi Sugimura, and Masaaki Terada* 404

Volume 174, Number 2, January 31, 1991

Interleukin-1 Induced Gene Expression of Neutrophil Activating Protein (Interleukin-8) and Monocyte Chemotactic Peptide in Human Synovial Cells
Deborah DeMarco, Steven L. Kunkel, Robert M. Strieter, Michael Basha, and Robert B. Zurier 411

Developmental and Tissue-Specific Expression of Rat T-Kininogen
Elizabeth A. Mann and Jerry B. Lingrel 417

Platelet-Activating Factor Affects Cytosolic Free Calcium Concentration and Prolactin Secretion in the GH_4C_1 Rat Pituitary Cells
Junping Yang and Armen H. Tashjian, Jr. 424

Substrate Specificity of Tissue-Type and Urokinase-Type Plasminogen Activators
Dingeman C. Rijken and Eleonore Groeneveld 432

A 60-kDa Phosphorylated Protein from Fetal Human Bone
Masanori Suzuki, Akiyoshi Uchiyama, Kazuhiro Kushida, Kentarou Horiuchi, Masaharu Takahashi, and Tetsuo Inoue 439

Endothelin Converting Enzyme of Bovine Carotid Artery Smooth Muscles
Yoshio Hioki, Kenji Okada, Hiromi Ito, Kenji Matsuyama, and Mitsuo Yano 446

Signal Transduction through the Vasoactive Intestinal Peptide Receptor Stimulates Phosphorylation of the Tyrosine Kinase $PP60^{C\text{-}SRC}$
Shay-Whey M. Koh 452

Molecular Cloning and Sequencing of the Epidermal Cell Differentiation Inhibitor Gene from *Staphylococcus aureus* *S. Inoue, M. Sugai, Y. Murooka, S.-Y. Paik, Y.-M. Hong, H. Ohgai, and H. Suginaka* 459

Vitronectin in the Substratum of Endothelial Cells Is Cross-Linked and Phosphorylated *David C. Sane, Tammy L. Moser, and Charles S. Greenberg* 465

Tissue Distribution and Species Difference of the Brain Type Glucose Transporter (GLUT3) *Hideki Yano, Yutaka Seino, Nobuya Inagaki, Yoshinori Hinokio, Taizo Yamamoto, Koichiro Yasuda, Kazuhiro Masuda, Yoshimichi Someya, and Hiroo Imura* 470

Expression of Protein Disulfide Isomerase in Cultured Rat Liver Epithelial Cells Is Unrelated to the Growth Inhibitory Effect of TGF-β1
Ming-Sound Tsao and Joe W. Grisham 478

Transformed Rodent Cells Exhibit Increased Resistance to the Carboxylic Ionophores, Monensin and Nigericin *Robert G. Liteplo* 483

N-Carboxymethylchitosan-*N,O*-sulfate as an Anti-HIV-1 Agent *Miguel A. Gama Sosa, Fatemeh Fazely, John A. Koch, Sharon V. Vercellotti, and Ruth M. Ruprecht* 489

Evidence for an Inactive Plasma Membrane-Associated Precursor of Active Cytoplasmic Ornithine Decarboxylase in Developing Embryos of *Musca domestica* *Stan L. Lilleberg, S. Derek Killilea, David A. Vaske, Roger A. Leopold, and Robert B. Sparks, Jr.* 497

Molecular Cloning of Rat Monocyte Chemoattractant Protein-1 (MCP-1) and Its Expression in Rat Spleen Cells and Tumor Cell Lines *Teizo Yoshimura, Motohiro Takeya, Kiyoshi Takahashi, and Edward J. Leonard* 504

Over-Expression of Superoxide Dismutase and Lack of Surface-Thiols in Spermatozoa: Inherent Defects in Oligospermia *Sumita Sinha, Pradeep Kumar G., Malini Laloraya, and Deepak Warikoo* 510

Thermal Stability of Hemoglobin Cross-linked in the T-State by Bis (3,5-dibromosalicyl) Fumarate *Thao Yang and Kenneth W. Olsen* 518

The Production of Phosphatidylinositol Trisphosphate Is Stimulated by Thrombin in Human Platelets *Roger D. Nolan and Eduardo G. Lapetina* 524

Molecular Cloning and Expression of a Human Brain Inositol 1,4,5-Trisphosphate 3-Kinase *Kazunaga Takazawa, Jason Perret, Jacques E. Dumont, and Christophe Erneux* 529

Ca^{2+}-Dependent Amylase Secretion from Pancreatic Acinar Cells Occurs without Activation of Phospholipase C-Linked G-Proteins *Philip J. Padfield, Tie-Gang Ding, and James D. Jamieson* 536

Purification of a Novel 55-kDa HeLa Cell Nuclear DNA-Binding Protein *Wei-Wei Zhang, Jaume Farrés, and Harris Busch* 542

The Protective Effect of Atrial Natriuretic Peptide (ANP) on Cells Damaged by Oxygen Radicals Is Mediated through Elevated CGMP Levels, Reduction of Calcium Inflow, and Probably G-Proteins *Raimund Pella* 549

Tissue and Subcellular Distributions of an Inhibitory GDP/GTP Exchange Protein (GDI) for *smg* p25A by Use of Its Antibody *Hidetaro Nonaka, Kozo Kaibuchi, Kazuya Shimizu, Juro Yamamoto, and Yoshimi Takai* 556

Immunocytochemical Localization of Ubiquitin-Activating Enzyme in the Cell Nucleus *James C. Cook and P. Boon Chock* 564

β-Amyloid from Alzheimer Disease Brains Inhibits Sprouting and Survival of Sympathetic Neurons *A. E. Roher, M. J. Ball, S. V. Bhave, and A. R. Wakade* 572

Inactivation of Human Placenta Glutathione S-Transferase by SH/SS Exchange Reaction with Biological Disulfides *Tsutomu Nishihara, Hideki Maeda, Kei-ichi Okamoto, Takuya Oshida, Tadashi Mizoguchi, and Tomoyuki Terada* 580

A Motif Found in Propeptides and Prohormones That May Target Them to Secretory Vesicles *John S. Kizer and Alexander Tropsha* 586

Isolation of Human Brain Protein Kinase C. Evidence for Kinase C Catalytic Fragment Modulating G Protein-GTPase Activity *Claude Sauvage, Christopher D. Cash, and Michel Maitre* 593

Low Molecular Weight GTP-Binding Proteins Associated with Zymogen Granule Membranes from Rat Pancreas *Philip J. Padfield and James D. Jamieson* 600

Influence of Lithium on Second Messenger Accumulation in NG108-15 Cells *Brigitte A. Brami, Ubaldo Leli, and George Hauser* 606

The Biosynthesis of Endothelin-1 by Human Polymorphonuclear Leukocytes *William C. Sessa, Semiko Kaw, Markus Hecker, and John R. Vane* 613

Inhibition of Methylcoenzyme M Methylreductase by a Uridine 5′-Diphospho-*N*-acetylglucosamine Derivative *Frank D. Sauer* 619

Salivary Histatin as an Inhibitor of a Protease Produced by the Oral Bacterium *Bacteroides gingivalis* *Makoto Nishikata, Takashi Kanehira, Hourei Oh, Hiroshi Tani, Mariko Tazaki, and Yoshinori Kuboki* 625

Yeast Proteins with Reactivity to Antibodies Elicited against Mammalian Apolipoproteins *G. A. Keesler, S. Moore, D. C. Usher, and L. W. Parks* 631

Specific Gangliosides Increase Rapidly in Rat Liver following Partial Hepatectomy *Jordan B. Fishman, Michael Cahill, Peter Morin, Michael McCrory, Nancy L. R. Bucher, and M. David Ullman* 638

Stimulation of Macrophage Growth and Multinucleated Cell Formation in Rat Bone Marrow Cultures by Insulin-like Growth Factor I *Ben A. A. Scheven and Nicola J. Hamilton* 647

A pH-Dependent Phospholipase A_2 Contributes to Loss of Plasma Membrane Integrity during Chemical Hypoxia in Rat Hepatocytes *D. Corinne Harrison, John J. Lemasters, and Brian Herman* 654

HMG 14 and Protamine Enhance Ligation of Linear DNA to Form Linear Multimers: Phosphorylation of HMG 14 at Ser 20 Specifically Inhibits Intermolecular DNA Ligation *Lowell G. Sheflin, Nancy W. Fucile, and Stephen W. Spaulding* 660

Identification of the NADH-Binding Subunit of Energy-Transducing NADH-Quinone Oxidoreductase (NDH-1) of Thermus Thermophilus HB-8 *Xue-Min Xu and Takao Yagi* 667

IGFBP-1, an Insulin-like Growth Factor Binding Protein, Is a Cell Growth Inhibitor *L. Liu, A. Brinkman, C. Blat, and L. Harel* 673

Deoxycytidine Is Salvaged Not Only into DNA but Also into Phospholipid Precursors. III. dCDP-Diacylglycerol Formation in Tonsillar Lymphocytes *Tatjana Spasokukotskaja, J. Taljanidisz, M. Sasvári-Székely, and M. Staub* 680

Cell Populations Synthesizing Cartilage Proteoglycan Core Protein in the Early Chick Limb Bud *Panagiotis A. Tsonis and Edwin Walker* 688

Involvement of Superoxide Dismutase in Heat-Induced Stimulation of Photosystem I-Mediated Oxygen Uptake *F. Lajkó, A. Kadioglu, and G. Garab* 696

Human Liver Alcohol Dehydrogenases Catalyze the Oxidation of the Intermediary Alcohols of the Shunt Pathway of Mevalonate Metabolism *Wing-Ming Keung* 701

A New Heparin Binding Protein Regulated by Retinoic Acid from Chick Embryo *Daniel Raulais, Odile Lagente-Chevallier, Catherine Guettet, Delphine Duprez, Yves Courtois, and Marc Vigny* 708

Amylin Activates Glycogen Phosphorylase and Inactivates Glycogen Synthase via a cAMP-Independent Mechanism *Rhonda Oetting Deems, Richard W. Deacon, and Douglas A. Young* 716

Transactivation of the Human Insulin Receptor Gene by the CAAT/Enhancer Binding Protein *Catherine McKeon and Thang Pham* 721

Lipoxygenation in Rat Brain? *Hee-Yong Kim, Shigeki Sawazaki, and Norman Salem, Jr.* 729

Mapping of Carbohydrate Sites on the Human Insulin Receptor *G. R. Hayes, J. N. Livingston, and D. H. Lockwood* 735

Delineation of Electric and Magnetic Field Effects of Extremely Low Frequency Electromagnetic Radiation on Transcription *James J. Greene, William J. Skowronski, J. Michael Mullins, Roland M. Nardone, Miguel Penafiel, and Robert Meister* 742

Somatostatin Inhibits the Nicotinic Receptor-Activated Inward Current in Guinea Pig Chromaffin Cells *Masumi Inoue and Hirosi Kuriyama* 750

Prostaglandins Antagonize Fibroblast Proliferation Stimulated by Tumor Necrosis Factor *Takamitsu Hori, Yoichi Yamanaka, Makio Hayakawa, Sayumi Shibamoto, Masafumi Tsujimoto, Naoto Oku, and Fumiaki Ito* 758

Plasma B-Cell Tropin ($ACTH_{22-39}$) Concentrations in Lean and Obese (ob/ob) Mice and Lean and Obese (fa/fa) Zucker Rats *John L. Morton, Michelle Davenport, and Simon J. Dunmore* 767

Phosphorylation of Tyrosines 1158, 1162, and 1163 on a Synthetic Dodecapeptide by the Insulin Receptor Protein-Tyrosine Kinase *Martin Dickens, Jeremy M. Tavaré, Beatrice Clack, Leland Ellis, and Richard M. Denton* 772

Phosphoramidon Inhibits the Intracellular Conversion of Big Endothelin-1 to Endothelin-1 in Cultured Endothelial Cells *Tatsuya Sawamura, Yoshitoshi Kasuya, Yohichi Matsushita, Nobuhiro Suzuki, Osamu Shinmi, Naoya Kishi, Yoshiki Sugita, Masashi Yanagisawa, Katsutoshi Goto, Tomoh Masaki, and Sadao Kimura* 779

Cross-linking of Substrates Occurs Exclusively to the p66 Subunit of Heterodimeric HIV-1 Reverse Transcriptase *Nancy Cheng, George R. Painter, and Phillip A. Furman* 785

A Calcium-Activated Protease from Alzheimer's Disease Brain Cleaves at the N-Terminus of the Amyloid β-Protein *Carmela R. Abraham, James Driscoll, Huntington Potter, William E. Van Nostrand, and Paul Tempst* 790

Induction of Putative New Cytochrome P450 Isozyme in Rat Liver by 2-Amino-1-methyl-6-phenylimidazo[4,5-*b*]pyridine *Hiroko Adachi, Masakuni Degawa, Shin-ichi Miura, Yoshiyuki Hashimoto, Takashi Sugimura, and Hiroyasu Esumi* 797

A 17-bp Insertion and a Phe215→Cys Missense Mutation in the Dihydrolipoyl Transacylase (E2) mRNA from a Thiamine-Responsive Maple Syrup Urine Disease Patient WG-34 *Charles W. Fisher, Kim S. Lau, Carolyn R. Fisher, R. Max Wynn, Rody P. Cox, and David T. Chuang* 804

Characterization of $\alpha_2\beta_2$ and α_2 Forms of Kinesin *David D. Hackney, Joelle D. Levitt, and Douglas D. Wagner* 810

Cathepsin D Gene of Human MCF7 Cells Contains Estrogen-Responsive Sequences in Its 5′ Proximal Flanking Region *Vincent Cavailles, Patrick Augereau, and Henri Rochefort* 816

The Estrogen-Regulated Destabilization of *Xenopus* Albumin mRNA Is Independent of Translation *John E. Moskaitis, Susan W. Buzek, Ricardo L. Pastori, and Daniel R. Schoenberg* 825

Hepatocyte Growth Factor Is a Potent Mitogen for Cultured Rabbit Renal Tubular Epithelial Cells *Tsukasa Igawa, Shigeru Kanda, Hiroshi Kanetake, Yutaka Saitoh, Akira Ichihara, Yumiko Tomita, and Toshikazu Nakamura* 831

Specific Uptake of Asialofetuin-Tacked Liposomes Encapsulating Interferon-γ by Human Hepatoma Cells and Its Inhibitory Effect on Hepatitis B Virus Replication *Hiroshi Ishihara, Yasuyuki Hayashi, Toshifumi Hara, Yukihiko Aramaki, Seishi Tsuchiya, and Katsuro Koike* 839

High Level Expression and Purification of dThymidine Diphospho-D-glucose 4,6-Dehydratase (*rfbB*) from *Salmonella* Serovar Typhimurium LT2 *Lajwant K. Romana, Fernando S. Santiago, and Peter R. Reeves* 846

Mutagenesis of Human Fibrinogen γ Chain 259-411 Synthesized in *Escherichia coli*: Further Characterization of the Role of the Disulfide Bond CYS326-CYS339 in Calcium Binding *Mark G. Bolyard and Susan T. Lord* 853

Mitochondrial DNA Mutations in Mitochondrial Myopathy, Encephalopathy, Lactic Acidosis, and Stroke-like Episodes (MELAS) *Masashi Tanaka, Hidekazu Ino, Kinji Ohno, Toshihiro Ohbayashi, Shin-ichiro Ikebe, Tadashi Sano, Takashi Ichiki, Masanori Kobayashi, Yoshiro Wada, and Takayuki Ozawa* 861

α-1-Stimulated Phosphoinositide Breakdown in Cultured Cardiomyocytes: Diacylglycerol Production and Composition in Docosahexaenoic Acid-Supplemented Cells *Alessandra Bordoni, Pier Luigi Biagi, Carlo Alfonso Rossi, and Silvana Hrelia* 869

Structural Flexibility of Aib-Containing Peptides: The N-Terminal Tripeptide of Trichotoxin *Renate Gessmann, Hans Brueckner, and Michael Kokkinidis* 878

IGG-Stimulated and LPS-Stimulated Monocytes Elaborate Transforming Growth Factor Type β (TGF-β) in Active Form *L. Schalch, C. Rordorf-Adam, J. R. Dasch, and T. W. Jungi* 885

Suppressive Effects of Dehydroepiandrosterone and 3β-Methyl-androst-5-en-17-one on Attack toward Lactating Female Intruders by Castrated Male Mice. II. Brain Neurosteroids *J. Young, C. Corpéchot, M. Haug, S. Gobaille, E. E. Baulieu, and P. Robel* 892

A Model for Histone H5-DNA Interaction: Simultaneous Minor and Major Groove Binding *Alain Segers, Lode Wyns, and Ignace Lasters* 898

Isolation and Properties in Culture of Human Adrenal Capillary Endothelial Cells *Jonathan Fawcett, Adrian L. Harris, and Roy Bicknell* 903

Activation of Cromakalim of Pre- and Postsynaptic ATP-Sensitive K^+ Channels in Substantia Nigra *Michael A. Häusser, Jan R. de Weille, and Michel Lazdunski* 909

Blockade of α- and β-Adrenergic Receptors Can Prevent Stimulation of Liver Ornithine Decarboxylase Activity by Glucocorticoid or Laparatomy *Serenella Astancolle, Pierpaola Davalli, and Arnaldo Corti* 915

Ionophore A23187-Induced Protein-Tyrosine Phosphorylation of Human Platelets: Possible Synergism between Ca^{2+} Mobilization and Protein Kinase C Activation *Hiroshi Takayama, Toru Nakamura, Shigeru Yanagi, Takanobu Taniguchi, Shun-ichi Nakamura, and Hirohei Yamamura* 922

Effect of Cell Density on Induction of Growth Hormone Receptors by Dexamethasone in Primary Cultured Rat Hepatocytes *Shingo Niimi, Takao Hayakawa, and Akira Tanaka* 928

Transcription of *fra*-2 mRNA and Phosphorylation of Fra-2 Protein Are Stimulated by Serum *Tetsuo Yoshida, Hironori Sato, and Hideo Iba* 934

β-Subunits of Equine Chorionic Gonadotropin and Lutenizing Hormone with an Identical Amino Acid Sequence Have Different Asparagine-Linked Oligosaccharide Chains *Taei Matsui, Hiromu Sugino, Mari Miura, George R. Bousfield, Darrell N. Ward, Koiti Titani, and Tsuguo Mizuochi* 940

The Expression of Two Isoforms of the Human Fibroblast Growth Factor Receptor (*flg*) Is Directed by Alternative Splicing *Hiroko Fujita, Mitsuhiro Ohta, Toshisuke Kawasaki, and Nobuyuki Itoh* 946

Endothelin Stimulates Degradation of Phospholipids in Isolated Rat Hearts *M. Renuka Prasad* 952

Catenated Dimers and Knotted DNA Structures: Putative Intermediates in the Replication of *T. cruzi* Kinetoplast Minicircle DNA *Manuel S. Valenzuela, Smriti Bardhan, M. Raja S. Krishnamani, and Kazi A. I. Siddiqui* 958

The Effect of Micromolar Ca^{2+} on the Activities of the Different Na^+/K^+-ATPase Isozymes in the Rat Myometrium *Agnes Turi, Janos Somogyi, and Nandor Mullner* 969

The Isolated Cytoplasmic Domain of Band 3 Binds Calcium at Physiological Salt Concentration and Neutral pH *James M. Salhany and Karen A. Cordes* 975

Expression of Human Alzheimer Amyloid Precursor Protein in Insect Cells *Narayan Ramakrishna, Pothana Saikumar, Anna Potempska, Henryk M. Wisniewski, and David L. Miller* 983

Endogenous Biotinylated Proteins in *Dictyostelium discoideum* *Michael A. Lydan and Danton H. O'Day* 990

Purification and Partial Sequence Analysis of the Soluble Catechol-*O*-methyltransferase from Human Placenta: Comparison to the Rat Liver Enzyme *Carola Tilgmann and Nisse Kalkkinen* 995

Increased Gene Expression of Matrix Metalloproteinase-3 (Stromelysin) in Skin Fibroblasts from Patients with Severe Recessive Dystrophic Epidermolysis Bullosa *Daisuke Sawamura, Takamitsu Sugawara, Isao Hashimoto, Leena Bruckner-Tuderman, Daisaburo Fujimoto, Yasunori Okada, Nobuo Utsumi, and Hideo Shikata* 1003

A Quantifiable Phenotype of Viral Propagation *John Yin* 1009

Demonstration of an Active Component of Inter-α-Trypsin Inhibitor in the Brains of Alzheimer Type Dementia *Etsuo Yoshida, Masahiro Yoshimura, Yuji Ito, and Hisashi Mihara* 1015

Expression of mRNA for Activin-Binding Protein (Follistatin) during Early Embryonic Development of *Xenopus laevis* *Kosuke Tashiro, Ryutaro Yamada, Misaki Asano, Makoto Hashimoto, Masami Muramatsu, and Koichiro Shiokawa* 1022

Tetrahymena 14-NM Filament-Forming Protein Has Citrate Synthase Activity *Osamu Numata, Tohru Takemasa, Ibuki Takagi, Masafumi Hirono, Hisashi Hirano, Joe Chiba, and Yoshio Watanabe* 1028

The Structure of the Brain-Specific Rat Aldolase C Gene and Its Regional Expression *Tsunehiro Mukai, Hitomi Yatsuki, Sadahiko Masuko, Yuji Arai, Keiichiro Joh, and Katsuji Hori* 1035

Synaptic and Extra-Synaptic Distribution of Histamine H_1-Receptors in Rat and Guinea Pig Brains *Hiroyuki Mizuguchi, Hiroyuki Fukui, Masami Yabumoto, and Hiroshi Wada* 1043

Predominance of Type III over Type I Cell Surface Procollagens in Rat Lung Fibroblasts *Yoshiki Nagai* 1048

Characterization of Cholecystokinin Receptors on Guinea Pig Gastric Chief Cell Members *Takashi Matozaki, Choitsu Sakamoto, Munehiko Nagao, Hogara Nishisaki, Yoshitaka Konda, Osamu Nakano, Kohei Matsuda, Ken Wada, Toshiya Suzuki, and Masato Kasuga* 1055

Regulation of IgE Receptor-Mediated Secretion from RBL-2H3 Mast Cells by GTP Binding Proteins and Calcium *Bridget Smith Wilson, Grace G. Deanin, and Janet M. Oliver* 1064

Potent Anti-angiogenic Action of AGM-1470; Comparison to the Fumagillin Parent *Masami Kusaka, Katsuichi Sudo, Takeshi Fujita, Shogo Marui, Fumio Itoh, Donald Ingber, and Judah Folkman* 1070

Induction of Group II-like Phospholipase A_2 by Lipopolysaccharide in the Liver of BCG-Primed Rat *Masami Inada, Hiromasa Tojo, Sumio Kawata, Seiichiro Tarui, and Mitsuhiro Okamoto* 1077

Purification of Cytosolic 3,5,3′-Triiodo-L-thyronine(T_3)-Binding Protein(CTBP) Which Regulates Nuclear T_3 Translocation *Kiyoshi Hashizume, Satoru Suzuki, Kazuo Ichikawa, and Teiji Takeda* 1084

Animal Model of Systemic Carnitine Deficiency: Analysis in C3H-H-2° Strain of Mouse Associated with Juvenile Visceral Steatosis *Masamichi Kuwajima, Norio Kono, Masahisa Horiuchi, Yasushi Imamura, Akira Ono, Yoshiaki Inui, Sumio Kawata, Tsutomu Koizumi, Jun-ichiro Hayakawa, Takeyori Saheki, and Seiichiro Tarui* 1090

Stoichiometric Interaction of *smg* p21 with Its GDP/GTP Exchange Protein and Its Novel Action to Regulate the Translocation of *smg* p21 between Membrane and Cytoplasm *Shiro Kawamura, Kozo Kaibuchi, Motoki Hiroyoshi, Yutaka Hata, and Yoshimi Takai* 1095

Vitamin E Derivatives as New Potent Inhibitors of Microsomal Lipid Peroxidation *Jean-Paul Battioni, Marc Fontecave, Maryse Jaouen, and Daniel Mansuy* 1103

Mitochondrial DNA Mutation in a Chinese Family with Myoclonic Epilepsy and Ragged-Red Fiber Disease (MERRF) *Kwang-Dar Shih, Tzu-Chen Yen, Cheng-Yoong Pang, and Yau-Huei Wei* 1109

Gastric Cytoprotection by Intracisternal Interleukin-1β in the Rat *André Robert, Esteban Saperas, Weirong Zhang, Adalsteinn S. Olafsson, Cleo Lancaster, Daniel E. Tracey, John G. Chosay, and Yvette Taché* 1117

Isolation and Characterization of Lamprey Rhodopsin cDNA *Osamu Hisatomi, Tatsuo Iwasa, Fumio Tokunaga, and Akira Yasui* 1125

Human Erythrocyte Multicatalytic Proteinase: Activation and Binding to Sulfated Galacto- and Lactosylceramides *Iwao Ohkubo, Shinsei Gasa, Chisato Namikawa, Akira Makita, and Makoto Sasaki* 1133

Deutrium Oxide, Dimethyl Sulfoxide, and Heat Shock Confer Protection against Hydrostatic Pressure Damage in Yeast *Yasuhiko Komatsu, Kaoru Obuchi, Hitoshi Iwahashi, Sunil C. Kaul, Miyuki Ishimura, G. M. Fahy, and W. F. Rall* 1141

The mRNA Levels of Thyrotropin-Receptor, Thyroglobulin, and Thyroid Peroxidase in Neoplastic Human Thyroid Tissues *Kazuyasu Ohta, Toyoshi Endo, and Toshimasa Onaya* 1148

The Lectin Wheat Germ Agglutinin Induces Rapid Protein-Tyrosine Phosphorylation in Human Platelets *Tetsuya Inazu, Takanobu Taniguchi, Shinji Ohta, Susumu Miyabo, and Hirohei Yamamura* 1154

Amino Acids and Peptides. XIV. Laminin Related Peptides and Their Inhibitory Effect on Experimental Metastasis Formation *Koichi Kawasaki, Machiko Namikawa, Tomohiro Murakami, Toyohiko Mizuta, Yuji Iwai, Takao Hama, and Tadanori Mayumi* 1159

Purification of Megakaryocyte Differentiation Activity from a Human Fibrous Histiocytoma Cell Line: N-Terminal Sequence Homology with Activin A *Koji Fujimoto, Makoto Kawakita, Kazuharu Kato, Yuji Yonemura, Tetsuya Masuda, Hiromitsu Matsuzaki, Jiro Hirose, Mitsuko Isaji, Hideki Sasaki, Tohru Inoue, and Kiyoshi Takatsuki* 1163

Solution Conformation of Forssman Antigen Probed by NOE and Exchange Interactions *Leszek Poppe, Janusz Dabrowski, and Claus-Wilhelm von der Lieth* 1169

Structural and Expression Analyses of Normal and Mutant mRNA Encoding Glycine Decarboxylase: Three-Base Deletion in mRNA Causes Nonketotic Hyperglycinemia *Shigeo Kure, Kuniaki Narisawa, and Keiya Tada* 1176

Uptake Characteristics of the InsP$_3$-sensitive and -insensitive Ca^{2+} Pools in Porcine Aortic Smooth-Muscle Cells: Different Ca^{2+} Sensitivity of the Ca^{2+}-Uptake Mechanism *Ludwig Missiaen, Humbert De Smedt, Guy Droogmans, Ingrid Declerck, Lutgart Plessers, and Rik Casteels* 1183

Effects of Interleukins on Plasma Arginine Vasopressin and Oxytocin Levels in Conscious, Freely Moving Rats *Yoshiyuki Naito, Junichi Fukata, Kazuo Shindo, Osamu Ebisui, Norihiko Murakami, Tomoko Tominaga, Yoshikatsu Nakai, Kenjiro Mori, Norman W. Kasting, and Hiroo Imura* 1189

Activation of α-Myosin Heavy Chain Gene Expression by cAMP in Cultured Fetal Rat Heart Myocytes *Mahesh P. Gupta, Madhu Gupta, Alexandre Stewart, and Radovan Zak* 1196

Calmodulin-Dependent Collagenase and Proteoglycanase Activities in Chondrocytes from Human Osteoarthritic Cartilage *M. Richard, P. Broquet, E. Vignon, M. J. Peschard, J. P. Carret, and P. Louisot* 1204

Evidence against a Laminin Receptor Role for Calsequestrin *Esther S-H. Choi, Peter D. Sullivan, and Dennis O. Clegg* 1208

Parathyroid Hormone Binding to Cultured Avian Osteoclasts *Anna Teti, René Rizzoli, and Alberta Zambonin Zallone* 1217

Expression of Exogenous DNA in Rat Liver Cells after Liposome-Mediated Transfection *in Vivo* *Barbara Leibiger, Ingo Leibiger, Dieter Sarrach, and Hartmut Zühlke* 1223

The Precursor of Mitochondrial Asparate Aminotransferase Is Imported into Mitochondria Faster than the Homologous Cystosolic Isoenzyme with the Same Presequence Attached *Claudia M. Hartmann, Jean-Michel Lindenmann, Philipp Christen, and Rolf Jaussi* 1232

Hepatic Glucocorticoid Receptor Behaves Differently when Its Hormone Binding Site Is Occupied by Agonist (Triamcinolone Acetonide) or Antagonist (RU486) Steroid Ligands *V. K. Moudgil and Madhavi Gunda* 1239

Reduction in the Ca^{2+}-Induced Ca^{2+} Release from Canine Cardiac Sarcoplasmic Reticulum following Endotoxin Administration *Maw-Shung Liu and Li-Ling Wu* 1248

Phosphorylation of Heart Phosphofructokinase by Ca^{2+}/Calmodulin Protein Kinase *Alan M. Mahrenholz, Linda Lan, and Tag E. Mansour* 1255

The Stimulatory Effect of PDGF on Vascular Smooth Muscle Cell Migration Is Mediated by the Induction of Endogenous Basic FGF *Yasufumi Sato, Ryoji Hamanaka, Junko Ono, Michihiko Kuwano, Daniel B. Rifkin, and Ryosaburo Takaki* 1260

2,3,7,8-Tetrachlorodibenzo-*p*-dioxin Increases Reliance on Fats as a Fuel Source Independently of Diet: Evidence That Diminished Carbohydrate Supply Contributes to Dioxin Lethality *Marci Lentnek, Owen W. Griffith, and Arleen B. Rifkind* 1267

Incorporation of tRNA into Normal and Mutant HIV-1 *L. Kleiman, S. Caudry, F. Boulerice, M. A. Wainberg, and M. A. Parniak* 1272

Cultured Epithelial Cells from Patients with Cystic Fibrosis Have an Increased Expression of the 14-kDa CA^{2+}-Binding Protein CFA *J. Keulemans, V. Van Heyningen, B. J. Scholte, J. Bijman, A.W. M. van der Kamp, M. Kansen, H. De Jonge, H. Galjaard, and A. T. Hoogeveen* 1281

Interleukin-4 Is a Potent Mitogen for Capillary Endothelium *Masakazu Toi, Adrian L. Harris, and Roy Bicknell* 1287

Transforming Growth Factor β1 Differentially Regulates α-Fetoprotein and Albumin in HuH-7 Human Hepatoma Cells *Kazuhiko Nakao, Keisuke Nakata, Satoru Mitsuoka, Akira Ohtsuru, Akio Ido, Masahiko Hatano, Yoshiaki Sato, Toshihiro Nakayama, Masayoshi Shima, Yukio Kusumoto, Toshihiko Koji, Taiki Tamaoki, and Shigenobu Nagataki* 1294

Introduction of Single-Stranded ADH Genes into *Drosophila* Results in Tissue-Specific Expression *Nancy L. L. Shen and William H. Sofer* 1300

Identification of the Leucine-Rich Amelogenin Peptide as the Translation Product of an Alternatively Spliced Transcript *Carolyn W. Gibson, Ellis Golub, Wendi Ding, Hitoyata Shimokawa, Marian Young, John Termine, and Joel Rosenbloom* 1306

The Existence of Unique B Structures in Polynucleotides with Alternating Purine–Pyrimidine Sequences *D. M. Loprete and K. A. Hartman* 1313

Bilateral Hydrophobic Zipper as a Hypothetical Structure Which Binds Acidic Ribosomal Protein Family Together on Ribosomes in Yeast *Saccharomyces cerevisiae* *Kunio Tsurugi and Kazuhiro Mitsui* 1318

Alternative, Simultaneous Complex I Mitochondrial DNA Mutations in Leber's Hereditary Optic Neuropathy *Donald R. Johns and Joy Berman* 1324

Bioluminescent Immunoassay Using a Monomeric Fab′–Photoprotein Aequorin Conjugate *Teruya Erikaku, Shuhei Zenno, and Satoshi Inouye* 1331

Translocation of the Yeast Dolichol-phosphate-mannose Synthase into Microsomal Membranes *Nicole Déglon, Andréa Krapp, Claude Bron, and Nicolas Fasel* 1337

Identification of G Protein-Coupled Endothelin Receptors in Cultured Bovine Endothelial Cells *Satoru Eguchi, Masamichi Kozuka, Shigehisa Hirose, Teizo Ito, Yukio Hirata, Fumiaki Marumo, and Hiromi Hagiwara* 1343

Author Index for Volume 174 1347

Volume 175, Number 1, February 28, 1991

Inhibition of Infection with Human Immunodeficiency Virus Type 1 by Sulfated Gangliosides *Atsushi Handa, Hiroo Hoshino, Katsuyuki Nakajima, Masakazu Adachi, Kiyoshi Ikeda, Kazuo Achiwa, Takeshi Itoh, and Yasuo Suzuki* 1

Chemically Induced Viral Resistance in Single Preimplantation Bovine Embryos *M. S. Thomson, R. C. Bird, D. A. Stringfellow, C. R. Rossi, and L. H. Lauerman* 10

Protease Nexin-2/Amyloid β-Protein Precursor in Blood Is a Platelet-Specific Protein *William E. Van Nostrand, Alvin H. Schmaier, Jeffrey S. Farrow, Douglas B. Cines, and Dennis D. Cunningham* 15

Degradation of Brain Natriuretic Peptide by Neutral Endopeptidase: Species-Specific Sites of Proteolysis Determined by Mass Spectrometry *Jon A. Norman, Deborah Little, Mark Bolgar, and Gerald Di Donato* 22

Phosphorylation of Basic Fibroblast Growth Factor by Purified Protein Kinase C and the Identification of a Cryptic Site of Phosphorylation *Jean-Jacques Feige, Nicholas Ling, and Andrew Baird* 31

A Transforming Growth Factor Related to Epidermal Growth Factor Is Expressed by Fetal Mouse Salivary Mesenchyme Cells in Culture *Tracy G. Ram, Vasundara Venkateswaran, Sylvia A. Oliver, and Howard L. Hosick* 37

cDNA Cloning, Sequence Analysis, and Tissue Distribution of Rat Preproendothelin-1 mRNA *Takeshi Sakurai, Masashi Yanagisawa, Akihiro Inoue, Una S. Ryan, Sadao Kimura, Youji Mitsui, Katsutoshi Goto, and Tomoh Masaki* 44

Regulation of Mouse Ornithine Decarboxylase Gene Expression in a Macrophage-like Cell Line: Synergistic Induction by Bacterial Lipopolysaccharide and cAMP *Shuang Zheng, Christine M. McElwain, and Steven M. Taffet* 48

Role of Guanine Nucleotide Binding Protein, $G_{\alpha}2$, in Regulation of Adenylate Cyclase in *Dictyostelium discoideum* *Masakazu Oyama, Kou Kubota, and Koji Okamoto* 55

Ingestion of Eicosapentaenoic Acid-Ethyl Ester Renders Rabbit LDL Less Susceptible to Cu^{2+}-Catalyzed-Oxidative Modification *H. Saito, K.-J. Chang, Y. Tamura, and S. Yoshida* 61

Specific Binding of Vascular Permeability Factor to Endothelial Cells *Jitka V. Olander, Daniel T. Connolly, and Joseph E. DeLarco* 68

Jun-B Gene Expression Mediated by the Surface Immunoglobulin Receptor of Primary B Lymphocytes *John F. Tilzey, Thomas C. Chiles, and Thomas L. Rothstein* 77

The High Affinity Murine Laminin Receptor Is a Member of a Multicopy Gene Family *María-Teresa Fernández, Vincent Castronovo, C. N. Rao, and Mark E. Sobel* 84

Modulation of B2 Containing Small RNAs during Induced Differentiation of Murine Erythroleukemia Cells *Saadi Khochbin, Didier Grunwald, Evelyne Bergeret, and Jean-Jacques Lawrence* 91

The Nucleolar Localization Signal of the HTLV-I Protein *p27rex* Is Important for Stabilization of IL-2 Receptor α Subunit mRNA by *p27rex* *Kenneth N. White, Tetsuya Nosaka, Hiroshi Kanamori, Masakazu Hatanaka, and Tasuku Honjo* 98

Variation of Tyrosine Aminotransferase Expression during the Day in Rats of Different Ages *Giuseppe Servillo, Maria Agnese Della Fazia, and Mariapia Viola-Magni* 104

Cloning and Nucleotide Sequence of a Bovine Pancreatic Preprocarboxypeptidase A cDNA *Isabelle Le Huërou, Paul Guilloteau, René Toullec, Antoine Puigserver, and Catherine Wicker* 110

Comparison of the Estrogen Responsiveness of the Rat and Bovine Oxytocin Gene Promoters *Roger A. H. Adan, Norbert Walther, Joke J. Cox, Richard Ivell, and J. Peter H. Burbach* 117

Identification of a Thioredoxin-Related Protein Associated with Plasma Membranes *Harry Martin and Michael Dean* 123

UV Induces Oxy- and Chromanoxyl Free Radicals in Microsomes by a New Photosensitive Organic Hydroperoxide, *N,N′*-Bis(2-hydroperoxy-2-methoxyethyl)-1,4,5,8-naphthalene-tetra-carboxylic-diimide (NP-III) *T. Konishi, V. Kagan, S. Matsugo, and L. Packer* 129

Diminished Phosphorylation of a Heat Shock Protein (HSP 27) in Infant Acute Lymphoblastic Leukemia *J. R. Strahler, R. Kuick, and S. M. Hanash* 134

Inhibition of O_2^- Generating Oxidase of Neutrophils by Iodonium Biphenyl in a Cell Free System: Effect of the Redox State of the Oxidase Complex *Jacques Doussiere and Pierre V. Vignais* 143

Autocatalytic Processing of Procathepsin E to Cathepsin E and Their Structural Differences *Senarath B. P. Athauda, Takayuki Takahashi, Takashi Kageyama, and Kenji Takahashi* 152

Antigen-Induced Phospholipase D Activation in Rat Mast Cells Is Independent of Protein Kinase C *Kouji Yamada, Yasunori Kanaho, Kiyoshi Miura, and Yoshinori Nozawa* 159

Chemotactic Peptide from Ropalidian Wasp as well as the Authentic Chemotactic Tripeptide Stimulates Two Distinct Pathways in Neutrophils, but the [Lys^7] Analog Does Only One of Them *Masamichi Koike, Ken Nagashima, Kazuki Saito, Mamoru Nakanishi, Masahiko Fujino, and Terumi Nakajima* 165

Inner Arm Dynein ATPase Fraction of Sea Urchin Sperm Flagella Causes Active Sliding of Axonemal Outer Doublet Microtubule *Shigeo Wada, Makoto Okuno, and Hideo Mohri* 173

A Novel Detection of a Single *Plasmodium falciparum* in Infected Blood *Witoon Tirasophon, Mathurose Ponglikitmongkol, Prapon Wilairat, Vichai Boonsaeng, and Sakol Panyim* 179

Structure and Chromosome Assignment of Human S100 α and β Subunit Genes *Ken Morii, Ryuichi Tanaka, Yasuo Takahashi, Shinsei Minoshima, Ryuichi Fukuyama, Nobuyoshi Shimizu, and Ryozo Kuwano* 185

Inositol 1,4,5-Trisphosphate Receptor Is Phosphorylated by Cyclic AMP-Dependent Protein Kinase at Serines 1755 and 1589 *Christopher D. Ferris, Andrew M. Cameron, David S. Bredt, Richard L. Huganir, and Solomon H. Snyder* 192

Tissue and Subcellular Distributions of an Inhibitory GDP/GTP Exchange Protein (GDI) for the *rho* Proteins by Use of Its Specific Antibody *Kazuya Shimizu, Kozo Kaibuchi, Hidetaro Nonaka, Juro Yamamoto, and Yoshimi Takai* 199

Antisense Sequences of Antigenic Peptides Are Found in MHC Class II Molecules *William Campbell and Hidechika Okada* 207

Memory Impairment and Morphological Changes in Rats Induced by Active Fragment of Anti-nerve Growth Factor Antibody *Toshitaka Nabeshima, Shin-ichi Ogawa, Hirohisa Ishimaru, Tsutomu Kameyama, Taneo Fukuta, Rie Takeuchi, and Kyozo Hayashi* 215

Hypervariable Regions in the Putative Glycoprotein of Hepatitis C Virus *Makoto Hijikata, Nobuyuki Kato, Yuko Ootsuyama, Masanori Nakagawa, Shogo Ohkoshi, and Kunitada Shimotohno* 220

A Sensitive Enzyme Immunoassay for Human Basic Fibroblast Growth Factor *Hiroyuki Watanabe, Akira Hori, Masaharu Seno, Yoshio Kozai, Koichi Igarashi, Yuzo Ichimori, and Koichi Kondo* 229

Granulocyte Phospholipase D Is Activated by a Guanine Nucleotide-Dependent Protein Factor *John C. Anthes, Peng Wang, Marvin I. Siegel, Robert W. Egan, and M. Motasim Billah* 236

A Unique Cellular Myosin II Exhibiting Differential Expression in the Cerebral Cortex *Weidong Sun and Peter D. Chantler* 244

Zn^{2+} Induces Reversible Cross-linking of Human Placental Thyroid Hormone Nuclear Receptor with No Effect on Hormone Binding *Kwang-Huei Lin and Sheue-Yann Cheng* 250

Halothane Metabolism: Kupffer Cells Carry and Partially Process Trifluoroacetylated Protein Adducts *Urs Christen, Maria Bürgin, and Josef Gut* 256

CD36-Mediated Signal Transduction in Human Monocytes by Anti-CD36 Antibodies but Not by Anti-thrombospondin Antibodies Recognizing Cell Membrane-Bound Thrombospondin *B. J. Schüepp, H. Pfister, K. J. Clemetson, R. L. Silverstein, and T. W. Jungi* 263

Effects of Dihydropyridines on Calcium Release from the Isolated Membrane Complex Consisting of the Transverse Tubule and Sarcoplasmic Reticulum *Tomoko Ohkusa, Aida D. Carlos, Jaw-Jou Kang, Henry Smilowitz, and Noriaki Ikemoto* 271

Heterogeneity of Smooth Muscle Myosin Light Chain Kinase Is Revealed by Anion-Exchange High-Performance Liquid Chromatography *Michela Fasolo, Palmina Cavallini, and Luciano Dalla Libera* 277

Human Thyroid Hormone β1 Receptor Produced by Recombinant Baculovirus-Infected Insect Cells *J. zu Putlitz, S. Datta, L. D. Madison, E. Macchia, and J. L. Jameson* 285

Establishment of Monoclonal Antibodies against Human Acidic Fibroblast Growth Factor *Yuzo Ichimori, Yumiko Kinoshita, Tatsuya Watanabe, Masaharu Seno, and Koichi Kondo* 291

Structural Studies of the Anti-HIV Agent 2′,3′-Didehydro-2′,3′-dideoxythymidine (D4T) *William E. Harte, Jr., John E. Starrett, Jr., John C. Martin, and Muzammil M. Mansuri* 298

Patch Clamp Analysis of a Partially Purified Ion Channel from Rat Liver Mitochondria *German Costa, Kathleen W. Kinnally, and Joyce J. Diwan* 305

Inhibition of the Rat Renal Na^+/H^+ Exchanger by β-Adrenergic Antagonists *T. Friedrich and G. Burckhardt* 311

FMRFamide and L-Arg–L-Phe Increase Blood Pressure and Heart Rate in the Anesthetized Rat by Central Stimulation of the Sympathetic Nervous System *Christoph Thiemermann, Saad Al-Damluji, Markus Hecker, and John R. Vane* 318

Special Considerations in the Purification of the GM_3 Ganglioside-Forming Enzyme, CMP-Sialic Acid:Lactosylceramide α2-3 Sialyltransferase (SAT-1): Effects of Protease Inhibitors on Rat Hepatic SAT-1 Activity *L. J. Melkerson-Watson and C. C. Sweeley* 325

Amino Acid Substitutions in the SP1 Zinc Finger Domain Alter the DNA Binding Affinity to Cognate SP1 Target Site *Hans-Jürgen Thiesen and Björn Schröder* 333

A Lysophosphatidic Acid-Binding Cytosolic Protein Stimulates Mitochondrial Glycerophosphate Acyltransferase *Ales Vancura, Margaret A. Carroll, and Dipak Haldar* 339

Involvement of Retinoic Acid Nuclear Receptors in Retinoic Acid-Induced Tissue Transglutaminase Gene Expression in Rat Tracheal 2C5 Cells *Mitchell F. Denning and Ajit K. Verma* 344

Distinct C-Terminal Sequences of Isozymes I and II of the Human Erythrocyte L-Isoaspartyl/D-Aspartyl Protein Methyltransferase *Diego Ingrosso, Ron M. Kagan, and Steven Clarke* 351

A Proper Transmembrane Ca^{2+} Gradient Is Essential for the Higher Enzymatic Activity of Adenylate Cyclase *F. Y. Yang and Y. P. Tu* 366

Transforming Growth Factor β_2 Inhibits Interleukin 1β- and Tumor Necrosis Factor α-Induction of Nitric Oxide Synthase in Rat Renal Mesangial Cells *Josef Pfeilschifter and Klaus Vosbeck* 372

Receptors for Insulin Interact with G_i Proteins and for Epidermal Growth Factor with G_i and G_s Proteins in Rat Pancreatic Acinar Cells *André Pröfrock, Susanne Schnefel, and Irene Schulz* 380

Dihydrotetramethylrosamine: A Long Wavelength, Fluorogenic Peroxidase Substrate Evaluated *in Vitro* and in a Model Phagocyte *James E. Whitaker, Patrick L. Moore, Rosaria P. Haugland, and Richard P. Haugland* 387

Expression and Characterization of a Rabbit Liver Cytochrome P450 Belonging to the P450IIB Subfamily with the Aid of the Baculovirus Expression Vector System *Daisaku Ohta, Yoshiharu Matsu-ura, and Ryo Sato* 394

Elongation Factor-2 in Chick Embryo Is Phosphorylated on Tyrosine as Well as Serine and Threonine *Yeon Woong Kim, Choong Won Kim, Kee Ryeon Kang, Si Myung Byun, and Yoon-Se Kang* 400

Redox Reactive Reagents Inhibiting and Inactivating Choline Acetyltransferase *Phenil J. Patel, Eric R. Wohlfeil, Sara S. Stahl, Kendra A. McLaughlin, and Richard A. Hudson* 407

Molecular Cloning and Chromosomal Localization of a Novel Human Tracheobronchial Mucin cDNA Containing Tandemly Repeated Sequences of 48 Base Pairs *N. Porchet, Nguyen Van Cong, J. Dufosse, J. P. Audie, V. Guyonnet-Duperat, M. S. Gross, C. Denis, P. Degand, A. Bernheim, and J. P. Aubert* 414

Divergent Effects of Propranolol on Neutrophil Superoxide Release: Involvement of Phosphatidic Acid and Diacylglycerol as Second Messengers *Denis English and Gregory S. Taylor* 423

The cAMP-Dependent Protein Kinase Phosphorylates the *rap*1 Protein *in Vitro* as Well as in Intact Fibroblasts, but Not the Closely Related *rap*2 Protein *Isabelle Lerosey, Véronique Pizon, Armand Tavitian, and Jean de Gunzberg* 430

A Spectroscopic Study of the Conformations of Active and Latent Forms of Recombinant Plasminogen Activator Inhibitor-1 *Anil M. Dwivedi, Robert W. Woodeshick, Harry L. Walton, and Thomas M. Reilly* 437

Frog Brain Expresses a 60-kDa Ca^{2+} Binding Protein Similar to Mammalian Calreticulin *S. Treves, F. Zorzato, P. Chiozzi, P. Melandri, P. Volpe, and T. Pozzan* 444

A Hemopoietic-Specific Gene Encoding a Small GTP Binding Protein Is Overexpressed during T Cell Activation *L. Reibel, O. Dorseuil, R. Stancou, J. Bertoglio, and G. Gacon* 451

Transgenic Mice Mimic the Methylation Pattern of the Human HLA-DRα Gene *Giordana Feriotto, Laura Pozzi, Roberta Piva, Francesco Deledda, Rafaella Barbieri, Claudio Nastruzzi, Alessandra Ciucci, Pier Giorgio Natali, Patrizio Giacomini, and Roberto Gambari* 459

Characterization of the pp70 Protein Phosphorylation in the Extract of Rice Young Panicle *Ching-Ming Cheng, Chen-Kung Chow, Nien-Tai Hu, and Tsong-Teh Kuo* 467

Identification of the G-Protein α-Subunit Encoded by α_{o2} cDNA as a 39-kDa Pertussis Toxin Substrate *K. Spicher, F.-J. Klinz, U. Rudolph, J. Codina, L. Birnbaumer, G. Schultz, and W. Rosenthal* 473

Estrogen Induces c-*fos* Expression Specifically in the Luminal and Glandular Epithelia of Adult Rat Uterus *Michele Papa, Vincenzo Mezzogiorno, Francesco Bresciani, and Alessandro Weisz* 480

Calpastatin Level in Spontaneously Hypertensive Rats *Laura Soldati, Isabella Molinari, Sergio Salardi, Barry Roger Barber, Marco Ruggiero, Fulvio Serra, and Giuseppe Bianchi* 486

Spectroscopic Studies of the DNA Binding Site of the GAL4 "Zinc Finger" Protein *Andrew Hansen, Michael Van Hoy, and Thomas Kodadek* 492

Characterization of a cAMP-Independent Ca^{2+}-Inhibited Protamine Kinase from *Candida lipolytica* *M. Rahmatullah, D. L. Brenner, M. W. Wooten, and J. D. Weete* 500

Complete Nucleotide Sequence of the High Molecular Weight Human IGF-I mRNA *P. H. Steenbergh, A. M. C. B. Koonen-Reemst, C. B. J. M. Cleutjens, and J. S. Sussenbach* 507

^{1}H NMR Resonance Assignments in a Paramagnetic Heme Protein by Two-Dimensional Spectroscopy: Heme Resonances in Equine Met-azido Myoglobin *David H. Peyton* 515

Insulin Down-Regulates the Steady-State Level of Its Receptor's Messenger Ribonucleic Acid *Arif M. K. Rohilla, Celia Anderson, William M. Wood, and Paulos Berhanu* 520

Central Nervous System Action of Basic Fibroblast Growth Factor: Inhibition of Gastric Acid and Pepsin Secretion *Toshikatsu Okumura, Akira Uehara, Kazuyuki Tsuji, Yoshiaki Taniguchi, Shigeru Kitamori, Yoshimi Shibata, Kiyoshi Okamura, Yuichi Takasugi, and Masayoshi Namiki* 527

Synergistic Effect of Magnesium and Calcium Ions in the Activation of Phospholipase A_2 of Liver Macrophages *Hellmut Krause, Peter Dieter, Agnes Schulze-Specking, Annette Ballhorn, Ernst Ferber, and Karl Decker* 532

Interstrand Cross-Linking of the Hexadeoxynucleotide d(TACGTA) upon Reaction with *Trans*-diamminedichloroplatinum(II) *Hidehito Urata, Miwa Ueno, Futoshi Yamasaki, and Masao Akagi* 537

The Primary Source of *Tetrahymena* Profilin *Masaki Edamatsu, Masafumi Hirono, Tohru Takemasa, and Yoshio Watanabe* 543

The Primary Structure of Rat Ribosomal Protein L38 *Yuh Kuwano, Joe Olvera, and Ira G. Wool* 551

Sarafotoxin S6c: An Agonist Which Distinguishes between Endothelin Receptor Subtypes *David L. Williams, Jr., Kathryn L. Jones, Douglas J. Pettibone, Edward V. Lis, and Bradley V. Clineschmidt* 556

The Putative Role of Fibrin Fragments in the Biosynthesis of Fibrinogen by Hepatoma Cells *Yang Wang and Gerald M. Fuller* 562

Pathway for the Formation of D-3 Phosphate Containing Inositol Phospholipids in PDGF-Stimulated NIH 3T3 Fibroblasts *Thomas W. Cunningham and Philip W. Majerus* 568

Murine Recombinant Leukemia Inhibitory Factor Modulates Inhibitory Effect of 1,25 Dihydroxyvitamin D_3 on Alkaline Phosphatase Activity in MC3T3-E1 Cells *Yoshiyuki Hakeda, Tetsuo Sudo, Seiichi Ishizuka, Kayo Tanaka, Kiyoshi Higashino, Michinori Kusuda, Hiroaki Kodama, and Masayoshi Kumegawa* 577

A Role for Na^+/H^+ Exchange in Contraction of Guinea Pig Airways by Endothelin-1 *in Vitro* *Bruno Battistini, János G. Filep, Edward J. Cragoe, Jr., Alain Fournier, and Pierre Sirois* 583

Vascular Cell Responses to a Hybrid Transforming Growth Factor-β Molecule *J. R. Merwin, A. Tucker, L. Madisen, A. Purchio, and J. Madri* 589

Aldosterone Biosynthesis Induced by ACTH and Angiotensin II in Newborn Rat Adrenocortical Cells Transfected by c-EJ-Ha-ras Oncogene *G. Maume, A. Filali-Ansary, E. Giannini, Y. Hathout, M. Fischbach, and B. F. Maume* 596

Intrapulmonary Interleukin 1 Mediates Acute Immune Complex Alveolitis in the Rat *Jeffrey S. Warren* 604

Quantification of Intracellular Free Sodium Ions Using a New Fluorescent Indicator, Sodium-Binding Benzofuran Isophthalate in Guinea Pig Myocytes *Hiroshi Satoh, Hideharu Hayashi, Naohisa Noda, Hajime Terada, Akira Kobayashi, Yutaka Yamashita, Tohru Kawai, Masahiko Hirano, and Noboru Yamazaki* 611

Molecular Cloning of RI-HB, a Heparin-Binding Protein Regulated by Retinoic Acid *Paul Urios, Delphine Duprez, Jean-Pierre Le Caer, Yves Courtois, Marc Vigny, and Maryvonne Laurent* 617

Antitumor Activity of Naltrexone and Correlation with Steroid Hormone Receptors *Hussein Abou-Issa and Gopi A. Tejwani* 625

Mutation Detection in Leber's Hereditary Optic Neuropathy by PCR with Allele-Specific Priming *Søren Nørby, Patrick Lestienne, Isabelle Nelson, and Thomas Rosenberg* 631

Modulation of Nucleotide Pyrophosphatase in Plasmacytoma Cells *Neil F. Rebbe and Scot Hickman* 637

Gene and Precursor Structures of Human C-Type Natriuretic Peptide *Yasunori Tawaragi, Kayoko Fuchimura, Shoji Tanaka, Naoto Minamino, Kenji Kangawa, and Hisayuki Matsuo* 645

Differential Expression of the GLUT1 and GLUT4 Glucose Transporters during Differentiation of L6 Muscle Cells *Yasuhide Mitsumoto, Elena Burdett, Andrew Grant, and Amira Klip* 652

Identification of the N-Terminal Residue of the Heavy Chain of Both Native and Recombinant Human Hepatocyte Growth Factor *Yoshiko Yoshiyama, Naokatu Arakaki, Daiji Naka, Kazuhiro Takahashi, Shuichi Hirono, Jun Kondo, Hiroyuki Nakayama, Eiichi Gohda, Naomi Kitamura, Hirohito Tsubouchi, Takehisa Ishii, Tadashi Hishida, and Yasushi Daikuhara* 660

Synthesis of a New Inhibitor of the UDP-GalNAc:Polypeptide Galactosaminyl Transferase *Kenichi Hatanaka, James T. Slama, and Alan D. Elbein* 668

Occurrence of Ether-Containing Inositol Phospholipids in Bovine Erythrocytes *Ten-ching Lee, Bòyd Malone, Allison B. Buell, and Merle L. Blank* 673

Identification of the Genomic Region Determining Serotype Specificity of *Vibrio cholerae* 01 *Teruyo Ito, Yoshihiro Ohshita, Tetsuya Nakamoto, Keiichi Hiramatsu, and Takeshi Yokota* 679

Inhibitory Effect of Interferon-γ-Dependent Induction of Major Histocompatability Complex Class II Antigen by Expressing Exogenous Poly(ADP-Ribose) Synthetase Gene *Ichiro Nomura, Takanobu Kurashige, and Taketoshi Taniguchi* 685

Selective Processing of Proalbumin Determined by Site-Specific Mutagenesis *Kimimitsu Oda, Yoshio Misumi, Miwa Sohda, Noboru Takami, Yoshiyuki Sakaki, and Yukio Ikehara* 690

Expression of Human Preproendothelin-1 cDNA in COS Cells Results in the Production of Mature Vasoactive Endothelin-1 *Anthony G. DiLella, Eliot Ohlstein, Nabil Elshourbagy, Pradip K. Bhatnagar, Ponnal Nambi, Walter E. DeWolf, Jr., and Madelyn M. Caltabiano* 697

The Amino-Terminal Region of a Proteochondroitin Core Protein, Secreted by Aortic Smooth Muscle Cells, Shares Sequence Homology with the Prepropeptide Region of the Biglycan Core Protein from Human Bone *James A. Marcum and Maureen A. Thompson* 706

Purification, Characterization, and Immunolocalization of Fimbrial Protein from *Porphyromonas* (Bacteroides) *gingivalis* *Hakimuddin T. Sojar, Jin-Yong Lee, Gurrinder S. Bedi, Moon-Il Cho, and Robert J. Genco* 713

A Geranylgeranyltransferase for *rho*A p21 Distinct from the Farnesyltransferase for *ras* p21S *Yasuhisa Yoshida, Masahito Kawata, Masaya Katayama, Hisanori Horiuchi, Yasuhiro Kita, and Yoshimi Takai* 720

ERRATUM
Volume 173, Number 3, December 31, 1990: Douglas N. Foster, Sung U. Kim, John J. Enyeart, and Linda K. Foster, "Nucleotide Sequence of the Complementary DNA for Turkey Growth Hormone," pp. 967–975 729

Volume 175, Number 3, March 29, 1991

Conserved Positioning of Proline Residues in Membrane-Spanning Helices of Ion-Channel Proteins *Derek N. Woolfson, Russell J. Mortishire-Smith, and Dudley H. Williams* 733

Human Carbonyl and Aldose Reductases: New Catalytic Functions in Tetrahydrobiopterin Biosynthesis *Y. S. Park, C. W. Heizmann, B. Wermuth, R. A. Levine, P. Steinerstauch, J. Guzman, and N. Blau* 738

Platelet-Derived Growth Factor B Chain Homodimer Enhances Chemotaxis and DNA Synthesis in Normal Osteoblast-like Cells (MC3T3-E1) *Tatsuo Tsukamoto, Toshimitu Matsui, Masaaki Fukase, and Takuo Fujita* 745

Activated Macrophages Kill Pancreatic Syngeneic Islet Cells via Arginine-Dependent Nitric Oxide Generation *Klaus-Dietrich Kröncke, Victoria Kolb-Bachofen, Britta Berschick, Volker Burkart, and Hubert Kolb* 752

Distribution and Characterization of Immunoreactive Porcine C-Type Natriuretic Peptide *Shuzo Ueda, Naoto Minamino, Masahito Aburaya, Kenji Kangawa, Shigeru Matsukura, and Hisayuki Matsuo* 759

A Cationic Detergent, Cetlytrimethylammonium Bromide (CTAB), Selectively Dissociates the Intermediate Filament of the Fibroblast *Katsuyuki Maki, Junji Sagara, and Akihiko Kawai* 768

Bradykinin Synergistically Potentiates Interleukin-1 Induced Bone Resorption and Prostanoid Biosynthesis in Neonatal Mouse Calvarial Bones *Ulf H. Lerner* 775

Expression of an Autoprocessing CAT–HIV-1 Proteinase Fusion Protein: Purification to Homogeneity of the Released 99 Residue Proteinase *Douglas S. Montgomery, Onkar M. P. Singh, Norman M. Gray, Colin W. Dykes, Malcolm P. Weir, and Adrian N. Hobden* 784

Immunoreactivity and Proliferative Actions of β_2 Microglobulin on Human Bone-Derived Cells *in Vitro* *Dean B. Evans, Maniccam Thavarajah, and John A. Kanis* 795

12-Hydroxyeicosatetraenoic Acid (12-HETE) Induces Heat Shock Proteins in Human Leukocytes *Manfred Köller and Wolfgang König* 804

In Vivo Accumulation of Sulfated Glycoprotein 2 (SGP-2) mRNA in Rat Thymocytes upon Dexamethasone-Induced Cell Death *S. Bettuzzi, L. Troiano, P. Davalli, F. Tropea, M. C. Ingletti, E. Grassilli, D. Monti, A. Corti, and C. Franceschi* 810

Phosphorylation of Nuclear Protein Is an Early Event in TGFβ1 Action *Ijsbrand M. Kramer, Irma Koornneef, Carlie de Vries, Rolf P. de Groot, Siegfried W. de Laat, Adriana J. M. van den Eijnden-van Raaij, and Wiebe Kruijer* 816

A 16-Amino Acid Synthetic Peptide, Derived from Human C3d, Carries Regulatory Activity on *in Vitro* Phosphorylation of a Cellular Component of the Human B Lymphoma Cells, Raji *Fouad Lyamani, Aline Gauffre, Monique Barel, Anny Fiandino-Tirel, Jacques Hermann, and Raymond Frade* 823

The 56-kDa Androgen Binding Protein Is an Aldehyde Dehydrogenase *Fred Pereira, Eduardo Rosenmann, Edward Nylen, Morris Kaufman, Leonard Pinsky, and Klaus Wrogemann* 831

Interactions between Ultraviolet Light and Interleukin-1 on MSH Binding in Both Mouse Melanoma and Human Squamous Carcinoma Cells *Nicholas Birchall, Seth J. Orlow, Thomas Kupper, and John Pawelek* 839

Sodium-Dependent, Concentrative Nucleoside Transport in Walker 256 Rat Carcinosarcoma Cells *Charles R. Crawford and Judith A. Belt* 846

Activation of Protein Kinase C by Phosphatidylinositol 4,5-Bisphosphate. Possible Involvement in Na^+/H^+ Antiport Down-Regulation and Cell Proliferation *Abha Chauhan, Ved P. S. Chauhan, and Hans Brockerhoff* 852

Quantitation of Ryanodine Receptor of Rabbit Skeletal Muscle, Heart, and Brain *Ernesto Damiani, Gianantonio Tobaldin, Pompeo Volpe, and Alfredo Margreth* 858

Two *cis*-Acting Regulatory Sequences in the Peroxisome Proliferator-Responsive Enhancer Region of Rat ACYL-CoA Oxidase Gene *Takashi Osumi, Jin-Kun Wen, and Takashi Hashimoto* 866

Fusogenic Activity of SIV (Simian Immunodeficiency Virus) Peptides Located in the GP32 NH_2 Terminal Domain *I. Martin, F. Defrise-Quertain, V. Mandieau, N. M. Nielsen, T. Saermark, A. Burny, R. Brasseur, J-M. Ruysschaert, and M. Vandenbranden* 872

Correlation between Oral Drug Absorption in Humans and Apparent Drug Permeability Coefficients in Human Intestinal Epithelial (Caco-2) Cells *P. Artursson and J. Karlsson* 880

Isolation and Characterization of a New Atrial Peptide-Degrading Enzyme from Bovine Kidney *Lawrence Toll, Susan R. Brandt, Cris M. Olsen, Amrit K. Judd, and Ronald G. Almquist* 886

Comparative Studies of D-Myoinositol 1,4,5-Trisphosphate and Synthetic 6-Deoxy-D-Myoinositol 1,4,5-Trisphosphate: Binding and Calcium Release Activity in Rat Parotid Microsomes *D. Bonis, A. Sezan, P. Mauduit, D. Dubreuil, J. Cleophax, S. D. Gero, and B. Rossignol* 894

Catalysis of Nitrosyl Transfer by Denitrifying Bacteria Is Facilitated by Nitric Oxide *Joanne Goretski and Thomas C. Hollocher* 901

Molecular Cloning of Human Epidermal Transglutaminase cDNA from Keratinocytes in Culture *Kiyofumi Yamanishi, Foo Min Liew, Keisuke Konishi, Hirokazu Yasuno, Hiroshi Doi, Jiro Hirano, and Shoji Fukushima* 906

Potent HIV-1 Protease Inhibitors with Antiviral Activities *in Vitro* *Hing L. Sham, David A. Betebenner, Norman E. Wideburg, Ayda C. Saldivar, William E. Kohlbrenner, Sudthida Vasavanonda, Dale J. Kempf, Daniel W. Norbeck, Chen Zhao, Jacob J. Clement, John E. Erickson, and Jacob J. Plattner* 914

N,N,N′,N′-Tetramethyl-1,4-phenylenediamine: A Facile Electron Donor and Chromophoric Substrate for Dopamine β-Monooxygenase *Kandatege Wimalasena and D. Shyamali Wimalasena* 920

Estradiol-17β Induces Polyaromatic Hydrocarbon-Inducible Cytochrome P450 in Chicken Liver *J. Ramana Murti, P. R. Adiga, and G. Padmanaban* 928

N-Acetyl-β-endorphin$_{1-31}$ Antagonizes the Suppressive Effect of β-Endorphin$_{1-31}$ on Murine Splenocyte Proliferation via a Naloxone-Resistant Receptor *Nahid A. Shahabi, Michele Z. Burtness, and Burt M. Sharp* 936

Enantiospecific Change in Products for Aldose Reductase-Mediated Reaction of Glyceraldehyde with Bound NADP$^+$ *Charles E. Grimshaw* 943

DNA-Dependent RNA Polymerase from an Extremely Thermophilic Hydrogen-Oxidizing Bacterium *Calderobacterium hydrogenophilum* *Ladislav Anděra, Karel Mikulík, Pavel Branny, and Margarita A. Puscheva* 949

Evidence That Ser-82 Is a Unique Phosphorylation Site on Vimentin for Ca^{2+}-Calmodulin-Dependent Protein Kinase II *Shoji Ando, Toshiya Tokui, Takashi Yamauchi, Hiroko Sugiura, Kazushi Tanabe, and Masaki Inagaki* 955

Inhibition of Gastric Mucosal Laminin Receptor by *Helicobacter pylori* Lipopolysaccharide *B. L. Slomiany, J. Piotrowski, S. Sengupta, and A. Slomiany* 963

Molecular Cloning of a New Class of Cartilage-Specific Matrix, Chondromodulin-I, Which Stimulates Growth of Cultured Chondrocytes *Yuji Hiraki, Hideho Tanaka, Hiroyuki Inoue, Jun Kondo, Akihito Kamizono, and Fujio Suzuki* 971

Identification and Partial Characterization of a Serum Enzyme Which Hydrolyzes Epidermal Inhibitory Pentapeptide *P. A. Whitehead, P. A. Robinson, W. J. Hume, and J. N. Keen* 978

Identification in Human Genomic DNA of the Sequence Homologous but Not Identical to Either the Histo-Blood Group ABH Genes or α1→3 Galactosyltransferase Pseudogene *Fumi-ichiro Yamamoto, Patricia D. McNeill, and Sen-itiroh Hakomori* 986

Liver and Muscle-Fat Type Glucose Transporter Gene Expression in Obese and Diabetic Rats *Taizo Yamamoto, Hirofumi Fukumoto, Gyohan Koh, Hideki Yano, Koichiro Yasuda, Kazuhiro Masuda, Hitoshi Ikeda, Hiroo Imura, and Yutaka Seino* 995

Candida albicans Serotype A Strains Grow in Yeast Extract-Added Sabouraud Liquid Medium at pH 2.0, Elaborating Mannans without β-1,2 Linkage and Phosphate Group *Hidemitsu Kobayashi, Phillippe Giummelly, Shin-ichi Takahashi, Mami Ishida, Jun Sato, Masako Takaku, Yuko Nishidate, Nobuyuki Shibata, Yoshio Okawa, and Shigeo Suzuki* 1003

Effects of Amyl Ester of Unsubstituted Rhodamine on Respiration and Ca^{2+} Transport in Rat Liver Mitochondria *Boris F. Krasnikov, Avad S. Avad, Dmitry B. Zorov, and Lev S. Yaguzhinsky* 1010

Regulation of ANF Receptor Internalization: Involvement of Extracellular Calcium *Appu Rathinavelu and Gary E. Isom* 1017

Degradation of Connective Tissue Proteins by Serine Proteases from *Streptococcus pneumoniae* *Harry S. Courtney* 1023

A New Photocatalytic Material Based on Algal Cells *G. Duncan Hitchens, Tom D. Rogers, Oliver J. Murphy, and Comer O. Patterson* 1029

Xenopus Transcription Factor IIIC (TFIIIC) Specifically Interacts with the "B" Block Region of the TFIIIA Gene *Barkur S. Shastry and Zheng G. Zhang* 1036

Naturally Occurring Benzodiazepines in Human Milk *C. Peña, J. H. Medina, M. Piva, L. E. Diaz, C. Danilowicz, and A. C. Paladini* 1042

Age- and Gender-Related Gene Expression of Hydroxysteroid Sulfotransferase-a in Rat Liver *Melissa Runge-Morris and Joseph Wilusz* 1051

Transcriptional Start and MetR Binding Sites on the *Escherichia coli metH Gene* *Richard Marconi, John Wigboldus, Herbert Weissbach, and Nathan Brot* 1057

A New Retinoid-Binding Protein with a Low Molecular Weight *Brahma P. Sani, and Lakshmi G. Reddy, Raj K. Singh, and Elizabeth A. Arello* 1064

Cystatins of Family II Are Harboring Two Domains Which Retain Inhibitory Activities against the Proteinases *Eiichi Saitoh, Satoko Isemura, Kazuo Sanada, and Koji Ohnishi* 1070

Glycolipid Receptor Binding Specificity of Exoenzyme S from *Pseudomonas aeruginosa* *Clifford A. Lingwood, Michael Cheng, Howard C. Krivan, and Donald Woods* 1076

Chlamydia trachomatis and *Chlamydia pneumoniae* Bind Specifically to Phosphatidylethanolamine in HeLa Cells and to GalNACβ1-4Galβ1-4GlC Sequences Found in Asialo-GM_1 and Asialo-GM_2 *H. C. Krivan, B. Nilsson, C. A. Lingwood, and H. Ryu* 1082

Purification and Characterization of an ATPase from Human Liver Which Catalyzes ATP Hydrolysis in the Presence of the Conjugates of Bilirubin, Bile Acids, and Glutathione *Yogesh C. Awasthi, Sharad S. Singhal, Sanjiv Gupta, Hassan Ahmad, Piotr Zimniak, Anna Radominska, Roger Lester, and Rajendra Sharma* 1090

Biosynthesis of Human α-*N*-Acetylgalactosaminidase: Defective Phosphorylation and Maturation in Infantile α-NAGA Deficiency *P. Hu, A. J. J. Reuser, H. C. Janse, W. J. Kleijer, D. Schindler, H. Sakuraba, A. Tsuji, Y. Suzuki, and O. P. van Diggelen* 1097

Differential Interaction of Fatty Acids and Fatty Acyl CoA Esters with the Purified/Reconstituted Brown Adipose Tissue Mitochondrial Uncoupling Protein *Sarvagya S. Katiyar and Earl Shrago* 1104

Tolbutamide and Phenytoin Hydroxylations by cDNA-Expressed Human Liver Cytochrome P4502C9 *Maurice E. Veronese, Peter I. Mackenzie, Christopher J. Doecke, Michael E. McManus, John O. Miners, and Donald J. Birkett* 1112

Retinoids Induce Tissue Transglutaminase in NIH-3T3 Cells *D. Cai, T. Ben, and L. M. De Luca* 1119
Cloning and Sequencing of Human FSH Receptor cDNA *Takashi Minegish, Kazuto Nakamura, Yumi Takakura, Yoshito Ibuki, and Masao Igarashi* 1125
Active Recombinant C3a of Human Anaphylatoxin Produced in *Escherichia coli* *Yoshihiro Fukuoka, Akira Yasui, and Takehiko Tachibana* 1131
UV Damage-Specific DNA-Binding Protein in Xeroderma Pigmentosum Complementation Group E *Hiroko Kataoka and Yoshisada Fujiwara* 1139
A Monoclonal Antibody to the Phosphorylated Form of Glial Fibrillary Acidic Protein: Application to a Nonradioactive Method for Measuring Protein Kinase Activities *Takeo Yano, Chiai Taura, Masao Shibata, Yukari Hirono, Shoji Ando, Masashi Kusubata, Toshitada Takahashi, and Masaki Inagaki* 1144
Specific Cleavages of Arginyl Peptide Bonds at Basic Amino Acid Pairs by a Serine Proteinase from the Microsomal Membranes of Rat Liver *Kenji Takahashi, Yoshiaki Tamanoue, Mitsuaki Yanagida, Yasuko Sakurai, Takayuki Takahashi, and Kazuo Sutoh* 1152
Normal Transthyretin and Synthetic Transthyretin Fragments Form Amyloid-like Fibrils *in Vitro* *Åsa Gustavsson, Ulla Engström, and Per Westermark* 1159
ERRATA

Expression of Rat Liver Fructose-1,6-bisphosphatase in *Escherichia coli* *M. Raafat El-Maghrabi and Simon J. Pilkis* 137

Selective Modulation of the Two Antagonistic Activities of Protein Kinase FA (the Activator of ATP.Mg-Dependent Protein Phosphatase) *Shiaw-Der Yang, Jen-Shin Song, Yao-Tsung Hsieh, and Hui-Wen Liu* 145

The Polyphasic Reduction of Oxygen to Water by Purified Cytochrome *c* Oxidase *Baltazar D. Reynafarje* 150

Modulation of CTP: Phosphocholine Cytidylytransferase Translocation by Oleic Acid and the Antitumoral Alkylphospholipid in HL-60 Cells *Hélène Tronchere, François Terce, Michel Record, Gérard Ribbes, and Hugues Chap* 157

Molecular Cloning, cDNA Structure, and Tissue-Specific Expression of the Human Regulatory Subunit RI_β of cAMP-Dependent Protein Kinases *Rigmor Solberg, Kjetil Taskén, Anne Keiserud, and Tore Jahnsen* 166

Inhibition of Human Collagenases by Sulfur-Based Substrate Analogs *M. A. Schwartz, S. Venkataraman, M. A. Ghaffari, A. Libby, K. A. Mookhtiar, S. K. Mallya, H. Birkedal-Hansen, and H. E. Van Wart* 173

The Inhibitory Activity of a Peptide Derivative against the Growth of Simian Immunodeficiency Virus in C8166 Cells *Joseph A. Martin, Margaret A. Mobberley, Sally Redshaw, Andy Burke, A. Stanley Tyms, and Timothy A. Ryder* 180

Location of the C-Terminus of Titin at the Z-Line Region in the Sarcomere *Seu-Mei Wang, Mu-Chien Sun, and Chung-Jiuan Jeng* 189

Spontaneous and Mitomycin-C-Induced Micronuclei in Human Lymphocytes Exposed to Extremely Low-Frequency Pulsed Magnetic Fields *M. R. Scarfi, F. Bersani, A. Cossarizza, D. Monti, G. Castellani, R. Cadossi, G. Franceschetti and C. Franceschi* 194

Phenylarsine Oxide Inhibits Insulin-Dependent Glucose Transport Activity in Rat Soleus Muscles *Chung Wang, Chang-Huain Hsieh, and Wen-guey Wu* 201

Purification of Glycated Hemoglobin Free of Hemoglobin A_{1c} and Its Use to Produce Monoclonal Antibodies Specific for Deoxyfructosyllsine Residues in Glycohemoglobin *Van-Yu Wu, Leslie Ann Steward, and Margo P. Cohen* 207

A Novel Human Insulin-like Growth Factor Binding Protein Secreted by Osteoblast-like Cells *Dennis L. Andress and Roger S. Birnbaum* 213

Molecular Cloning of a New Human Insulin-like Growth Factor Binding Protein *Michael C. Kiefer, Richard S. Ioh, Diane M. Bauer, and Jürgen Zapf* 219

Down-Regulation of Prostaglandin E_2 Receptors in Regenerating Rat Liver and Its Physiological Significance *Naoaki Hashimoto, Tsuyoshi Watanabe, Yusei Ikeda, Gotaro Toda, Haruki Yamada, Yuji Yoshikawa, Hiroshi Mitsui, and Kiyoshi Kurokawa* 226

Glutathione Transferase π: Its Minimal Promoter and Downstream *cis*-Acting Element *C. L. Xia, I. G. Cowell, K. H. Dixon, S. E. Pemble, B. Ketterer, and J. B. Taylor* 233

Inhibition of HIV-1 Proteinase by Nonpeptide Carboxylates *Ross I. Brinkworth, Tai Chin Woon, and David P. Fairlie* 241

The WDNM1 Gene Product Is a Novel Member of the "Four-Disulfide Core" Family of Proteins *T. N. Dear and R. F. Kefford* 247

Purification and Partial Sequencing of Inhibitory Factor on Renal Membrane Adenylate Cyclase in Pancreatic Cancer Extract: Identity with Histones H1B or H1D *Yoshirou Yasutomo, Tatsuko Suga, Seiki Wada, Hiroshi Kosano, Kunio Takishima, Gunji Mamiya, Nobuo Kugai, and Naokazu Nagata* 255

Production of Polyclonal and Monoclonal Antibodies for Specific Detection of Nitrosation-Proficient Denitrifying Bacteria in Biological Fluids *N. Dalla Venezia, S. Calmels, and H. Bartsch* 262

In Vitro Depolymerization of Lignin by Manganese Peroxidase of *Phanerochaete chrysosporium* *Hiroyuki Wariishi, Khadar Valli, and Michael H. Gold* 269

Calcium Chelation Induced Glutathione Efflux from Tumor Cells and Prevention by Ruthenium Red or Neomycin *Ann E. Brodie and Donald J. Reed* 276

Induction of Cytochrome P-450IA1 in Fetal Rat Liver by a Single Dose of 3-Methylcholanthrene *Mark Steven Miller, Ann B. Jones, Dharam P. Chauhan, Sang S. Park, and Lucy M. Anderson* 280

Inhibition of Protein Kinase C by Calphostin C Is Light Dependent *Robert F. Bruns, F. Dean Miller, Ronald L. Merriman, J. Jeffry Howbert, William F. Heath, Eiji Kobayashi, Isami Takahashi, Tatsuya Tamaoki, and Hirofumi Nakano* 288

Diacylglycerol Stimulates the Ca^{2+}-Dependent Phospholipase A_2 or Ram Spermatozoa *E. R. S. Roldan and F. Mollinedo* 294

Guanidine Group-Specific ADP-Ribosyltransferase in Murine Cells *Gopalan Soman, Abebe Haregewoin, Richard C. Hom, and Robert W. Finberg* 301

Characterization of Monocyte Chemotactic Protein-1 Binding to Human Monocytes *Anthony J. Valente, Marius M. Rozek, Colin J. Schwartz, and Dana T. Graves* 309

Linkage between Blood Coagulation and Inflammation: Stimulation of Neutrophil Tissue Kallikrein by Thrombin *William M. Cohen, Hai-feng Wu, Gerald L. Featherstone, Joyce W. Jenzano, and Roger L. Lundblad* 315

Nucleotide Sequence of *pnl* Gene from *Erwinia carotovora* Er *Hiroki Ohnishi, Tamotsu Nishida, Aruto Yoshida, Yoshiyuki Kamio, and Kazuo Izaki* 321

Avian Thymic Hormone and Chicken (Muscle) Parvalbumin Are Distinct Proteins: Isolation of a Muscle Parvalbumin cDNA Fragment by PCR *William S. Palmisano and Michael T. Henzl* 328

T2 Open Reading Frame from the Shope Fibroma Virus Encodes a Soluble Form of the TNF Receptor *Craig A. Smith, Terri Davis, Janis M. Wignall, Wenie S. Din, Theresa Farrah, C. Upton, G. McFadden, and Raymond G. Goodwin* 335

Homologous Structures of Nuclear and GTPase-Linked Plasma Membrane Receptors Suggest Analogous Mechanisms of Action *Jouko Oikarinen* 343

Protective Effect of Coenzyme Q_{10} on Exercise-Induced Muscular Injury *Yoshiharu Shimomura, Masashige Suzuki, Satoru Sugiyama, Yoshihiro Hanaki, and Takayuki Ozawa* 349

Fluidity of Bacterial Membrane Lipids Monitored by Intramolecular Excimerization of 1,3-Di(2-pyrenyl)propane *Amália S. Jurado, Leonor M. Almeida, and Vítor M. C. Madeira* 356

Stimulation of Phagocytosis in Rat Polymorphonuclear Leukocytes by A23187 Is Accompanied by Activation of Myeloperoxidase *Eibai Lee, Mitsugu Fujita, and Kimio Kariya* 364

A Novel Method for the Purification of Porcine Phospholipase A_2 Expressed in *Escherichia coli* *K. M. Bhat, I. G. Sumner, B. N. Perry, M. E. Collins, R. W. Pickersgill, and P. W. Goodenough* 371

Hydrogen Peroxide: An Endogenous Smooth Muscle Cell Hyperpolarizing Factor *Jean-Louis Bény and Pierre-Yves von der Weid* 378

Identification of Glucocorticoid- and Cyclic AMP-Responsive Elements of the Rat Serine Dehydratase Gene: Difference in Responses of the Transfected and Chromosomal Genes *Koichi Matsuda, Chiseko Noda, Chisako Fukushima, and Akira Ichihara* 385

Detection of an Endothelin-1–Binding Protein Complex by Low-Temperature SDS–PAGE *Tsuyoshi Takasuka, Ikuo Horii, Yasuhiro Furuichi, and Takahide Watanabe* 392

Probing the Specificity of the S_1 Binding Site of Subtilisin Carlsberg with Boronic Acids *Thomas H. Keller, Peter Seufer-Wasserthal, and J. Bryan Jones* 401

Gonadotropin-Releasing Hormone Antagonists: Novel Structures Incorporating N^{ω}-Cyano Modified Guanidine Moieties *Jean Rivier, Paula Theobald, John Porter, Marilyn Perrin, Joseph Gunnet, Do Won Hahn, and Catherine Rivier* 406

Production of Activin-Binding Protein by Rat Granulosa Cells *in Vitro* *Sachiko Saito, Takanori Nakamura, Koiti Titani, and Hiromu Sugino* 413

Vascular A10 Cell Membranes Contain an Endothelin Metabolizing Neutral Endopeptidase *Kenneth E. J. Dickinson, Adrienne A. Tymiak, Robert B. Cohen, Eddie C-K. Liu, Maria L. Webb, and Anders Hedberg* 423

Oxidation of Cholesterol Moiety of Low-Density Lipoprotein in the Presence of Human Endothelial Cells or Cu^{+2} Ions: Identification of Major Products and Their Effects *S. Bhadra, M. A. Q. Arshad, Z. Rymaszewski, E. Norman, R. Wherley, and M. T. R. Subbiah* 431

Demonstration of Cross-Linked Cytokeratin Polypeptides in Transplantable Rat Hepatoma Cells *Kazunori Fukuda, Ronglin Xie, and Jen-Fu Chiu* 441

Gravidin, an Endogenous Inhibitor of Phospholipase A2 Activity, Is a Secretory Component of IgA *Theresa Wilson and David L. Christie* 447

Phospholipase D Activity and Phosphatidylethanol Formation in Stimulated HeLa Cells Expressing the Human M1 Muscarinic Acetylcholine Receptor Gene *Stefania Pepitoni, Robert G. Mallon, Jin-Keon Pai, Joseph A. Borkowski, Melissa A. Buck, and Robert D. McQuade* 453

Synthesis of 5-Nitro-2-[*N*-3-(4-azidophenyl)-propylamino]-benzoic Acid: Photoaffinity Labeling of Human Red Blood Cell Ghosts with a 5-Nitro-2-(3-phenylpropylamino)-benzoic Acid Analog *Bruce R. Branchini, Martha H. Murtiashaw, and Laura A. Egan* 459

Exocytosis in Colonic Goblet Cells Visualized by Video-Enhanced Light Microscopy *Susumu Terakawa and Yuichi Suzuki* 466

A 41-kDa Transferrin-Related Molecule Acts as an Autocrine Growth Factor for HL-60 Cells *Klaus H. Dittmann and Petro E. Petrides* 473

A Region Immediately Adjacent to the Origin of Replication of Bovine Papilloma Virus Type 1 Interacts *in Vitro* with the Nuclear Matrix *Jacques N. Adom and Hélène Richard-Foy* 479

Estrogen Receptor Alters the Topology of Plasmid DNA Containing Estrogen-Responsive Elements *Yuko Ishibe, Carolyn M. Klinge, Russell Hilf, and Robert A. Bambara* 486

Detection of Cannabinoid Receptors by Photoaffinity Labeling *Sumner H. Burstein, Charlene A. Audette, Avgui Charalambous, Sharon A. Doyle, Yan Guo, Sheila A. Hunter, and Alexandros Makriyannis* 492

Lactoferrin Activates Plasma Membrane Oxidase and Na^+/H^+ Antiport Activity *Iris L. Sun, Frederick L. Crane, D. James Morré, Hans Löw, and W. Page Faulk* 498

Effects of Fecapentaene on Protein Kinase C *Sadayori Hoshina, Marius Ueffing, Masami Morotomi, and I. Bernard Weinstein* 505

Slow Reversible Inhibition of Rabbit Muscle Aldolase by D-Erythrulose 1-Phosphate *Edward L. Ferroni, Edwin T. Harper, and Wilmer K. Fife* 511

Characterization of the Inhibition of *Escherichia coli* Pyruvate Dehydrogenase Complex by Pyruvate *Asit Datta* 517

Regulation of Cytochrome P-450-Dependent Steroid Hydroxylase Activity in *Manduca sexta:* Effects of the Ecdysone Agonist RH 5849 on Ecdysone 20-Monooxygenase Activity *Daniel P. Keogh and Stan L. Smith* 522

N^{ω}-Hydroxy-L-Arginine: A Novel Arginine Analog Capable of Causing Vasorelaxation in Bovine Intrapulmonary Artery *Guillermo C. Wallace, Priya Gulati, and Jon M. Fukuto* 528

Altered Glucose Transporter mRNA Abundance in a Rat Model of Endotoxic Shock *W. Patrick Zeller, Sian M. The, Michelle Sweet, Masakatsu Goto, Michael E. Gottschalk, R. Morrison Hurley, James P. Filkins, and Cecilia Hofmann* 535

Structure and Properties of Luciferase from *Photobacterium phosphoreum* *Stefano R. Ferri, Robert R. Soly, Rose B. Szittner, and Edward A. Meighen* 541

Tetramethylthiuram Disulfide or Dimethyldithiocarbamate Induces the Synthesis of Cadystins, Heavy Metal Chelating Peptides, in *Schizosaccharomyces pombe*
Norihiro Mutoh, Masao Kawabata, and Yukimasa Hayashi 1068

Alteration in L-Type Pyruvate Kinase Gene Expression Is Not Associated with the LF-B1 mRNA Level *Enyu Imai, Tamio Noguchi, Masaru Takenaka, Kazuya Yamada, Tamiko Matsuda, Paolo Monaci, Alfredo Nicosia, and Takehiko Tanaka* 1074

A Reliable and Rapid Procedure to Estimate Drug Partitioning in Biomembranes *José B. A. Custódio, Leonor M. Almeida, and Vitor M. C. Madeira* 1079

Increase of O^6-Methylguanine-DNA Methyltransferase and N^3-Methyladenine Glycosylase RNA Transcripts in Rat Hepatoma Cells Treated with DNA-Damaging Agents *Françoise Laval* 1086

Primary Hyperoxaluria Type I Due to a Point Mutation of T to C in the Coding Region of the Serine:Pyruvate Aminotransferase Gene *Kozo Nishiyama, Tsuneyoshi Funai, Ritsuko Katafuchi, Fumitada Hattori, Kaoru Onoyama, and Arata Ichiyama* 1093

Inhibition of the Oxidative Burst Response of *N*-Formyl Peptide-Stimulated Neutrophils by Serum Amyloid-A Protein *Reinhold P. Linke, Veronika Bock, Günter Valet, and Gregor Rothe* 1100

Dehalogenation of 4-Chlorobenzoate by 4-Chlorobenzoate Dehalogenase from *Pseudomonas* sp. CBS3: An ATP/Coenzyme A Dependent Reaction *Frank Löffler, Rudolf Müller, and Franz Lingens* 1106

Mitochondrial $tRNA^{thr}$ Mutation in Fatal Infantile Respiratory Enzyme Deficiency *Kyunglim L. Yoon, June R. Aprille, and Susan G. Ernst* 1112

Apolipoprotein B Upstream Suppressor Site: Identification of an Element Which Can Decrease Apolipoprotein B Transcription *Robert S. Ross, Andrew C. Li, Jeffrey M. Hoeg, Uwe K. Schumacher, Stephen J. Demosky, Jr., and H. Bryan Brewer, Jr.* 1116

Phosphorylation of Coagulation Factor II by Phospholipid/Ca^{2+}-Dependent Protein Kinase (Protein Kinase C) *Keisuke Abe, Keisuke Sakurada, Masanori Tanaka, Yoshio Uehara, Kazuhiko Matsuno, Tamotsu Miyazaki, and Norio Katoh* 1123

Evolutionary Grouping of the Ras-Protein Family *George T. Drivas, Stephen Palmieri, Peter D'Eustachio, and Mark G. Rush* 1130

Nitric Oxide Synthase: Irreversible Inhibition by L-N^G-Nitroarginine in Brain *in Vitro* and *in Vivo* *Mary A. Dwyer, David S. Bredt, and Solomon H. Snyder* 1136

A Single Trp^{121} to Ala^{121} Mutation in Human Cyclophilin Alters Cyclosporin A Affinity and Peptidyl-Prolyl Isomerase Activity *Mary J. Bossard, Paul L. Koser, Martin Brandt, Derk J. Bergsma, and Mark A. Levy* 1142

Tissue-Specific and Dexamethasone-Inducible Expression of Alkaline Phosphatase from Alternative Promoters of the Rat Bone/Liver/Kidney/Placenta Gene *Joseph Zernik, Barbara Kream, and Kristine Twarog* 1149

Secretion of Triglyceride and Ketogenesis by Livers from Spontaneous Diabetic BB Wistar Rats *Ira Weinstein, Tarun B. Patel, and Murray Heimberg* 1157

A Novel Spermidine-Dependent Endoribonuclease Activity Caused by RNA–Protein Complex in Mouse FM3A Cell Extracts *Masayuki Nashimoto, Ryo Kominami, Shinzo Nishi, and Yukio Mishima* 1163

Human cDNA Expressing a Functional DNA Glycosylase Excising 3-Methyladenine and 7-Methylguanine *Timothy R. O'Connor and Jacques Laval* 1170

Quantitation of the Class I Disulfides of the Insulin Receptor *Kenneth B. Chiacchia* 1178

Calcium Modulation of Mitochondrial Inner Membrane Channel Activity *Kathleen W. Kinnally, Dmitry Zorov, Yuri Antonenko, and Sean Perini* 1183

1,25$(OH)_2D_3$ Induces Differentiation of Osteoclast-like Cells from Human Bone Marrow Cultures *Maniccam Thavarajah, Dean B. Evans, and John A. Kanis* 1189

A Voltage, Calcium, and ATP Sensitive Nonselective Cation Channel in Human Colonic Tumor Cells *Guy Champigny, Bernard Verrier, and Michel Lazdunski* 1196

Kinetics of Postexercise Phosphate Transport in Human Skeletal Muscle: An *in Vivo* ^{31}P-MR Spectroscopy Study *S. Iotti, R. Funicello, P. Zaniol, and B. Barbiroli* 1204

Yeast Pyruvate Carboxylase: Identification of Two Genes Encoding Isoenzymes *Michelle E. Walker, Dale L. Val, Manfred Rohde, Rodney J. Devenish, and John C. Wallace* 1210

Differential Effects of Human Anaphylatoxin C3A on Glucose Output and Flow in Rat Liver during Orthograde and Retrograde Perfusion: The Periportal Scavenger Cell Hypothesis *Gerhard P. Püschel, Martin Oppermann, Frank Neuschäfer-Rube, Otto Götze, and Kurt Jungermann* 1218

Down-Regulation of Protein Kinase C in Swiss 3T3 Fibroblasts Is Independent of Its Phosphorylating Activity *Dieter Lindner, Michael Gschwendt, and Friedrich Marks* 1227

Post-translational Processing and Secretory Pathway of Human Atriopeptin in Rat Pheochromocytoma Cells *Shozo Shiono, Nobuhiko Suganuma, Masàki Bo, Irving Boime, Karen Seibert, Kazuwa Nakao, Masashi Mukoyama, Hiroo Imura, and Philip Needleman* 1232

Cloning and Partial Nucleotide Sequence of Human Glutamic Acid Decarboxylase cDNA from Brain and Pancreatic Islets *David S. Cram, Louise D. Barnett, Joan L. Joseph, and Leonard C. Harrison* 1239

Regulation of Guanylate Cyclase by a Guanine Nucleotide Binding Protein, Gα2, in *Dictyostelium discoideum* *Masakazu Oyama, Kou Kubota, and Koji Okamoto* 1245

Structure and Localization of the Human Insulin-like Growth Factor-Binding Protein 2 Gene *Ewa Ehrenborg, Susanne Vilhelmsdotter, Svetlana Bajalica, Catharina Larsson, Ingrid Stern, Jørn Koch, Karen Brøndum-Nielsen, and Holger Luthman* 1250

Sulfhydryl Groups Are Involved in the Interaction of FSH with Its Receptor *Tomás A. Santa-Coloma, Patricia Grasso, and Leo E. Reichert, Jr.* 1256

A ^{31}P-NMR Study on the Energy State of Rat Liver in an Experimental Model of Chronic Dietary Iron Overload *Daniela Ceccarelli, Guerrino Predieri, Umberto Muscatello, and Alberto Masini* 1262

Genomic Structure and Expression of Human β-1,4-Galactosyltransferase *L. Mengle-Gaw, M. F. McCoy-Haman, and D. C. Tiemeier* 1269

Amiloride Inhibits Insulin Sensitivity and Responsiveness in Rat Adipocytes through Different Mechanisms *Jan Eriksson, Peter Lönnroth, Christian Wesslau, and Ulf Smith* 1277

Effects of Valinomycin on Vanadate-Sensitive and Vanadate-Resistant H^+ Transport in Vesicles from Turtle Bladder Epithelium: Evidence for a K^+/H^+ Exchanger
Steven J. Youmans and Catherine R. Barry 1285

α_1-Adrenergic and Muscarinic-Cholinergic Stimulated Inositol Trisphosphate Production May Proceed through Different Postreceptor Signal Transduction Pathways in Parotid Acini *Mary Ann Kowatch and George S. Roth* 1291

Relationships between Heterogeneity of the PSII Core Complex from Grana Particles and Phosphorylation *Maria T. Giardi, Fernanda Rigoni, Roberto Barbato, and Giorgio M. Giacometti* 1298

Site-Specific Fragmentation and Modification of Albumin by Sulfite in the Presence of Metal Ions or Peroxidase/H_2O_2: Role of Sulfate Radical
Kimiko Ito and Shosuke Kawanishi 1306

Molecular Cloning of Phosphofructokinase 1 Gene from a Thermophilic Bacterium, *Thermus thermophilus*
Jing Xu, Makoto Seki, Kimitoshi Denda, and Masasuke Yoshida 1313

Southern Hybridization Analysis of the *mecA* Deletion from Methicillin-Resistant *Staphylococcus aureus*
Akihito Wada, Yuko Katayama, Keiichi Hiramatsu, and Takeshi Yokota 1319

Identification of Two Distinct Nuclear Factors with DNA Binding Activity within the Glucocorticoid Regulatory Region of the Rat α-1-Acid Glycoprotein Promoter
D. Di Lorenzo, P. Williams, and G. Ringold 1326

Transcription of Ribosomal DNA Intergenic Spacer Sequences in Normal and Regenerating Rat Liver
I. D. Kalcheva, L. K. Karagyozov, and A. A. Hadjiolov 1333

Association of Heat Shock Protein 90 with the 16- kDa Steroid Binding Core Fragment of Rat Glucocorticoid Receptors
Pradip K. Chakraborti and S. Stoney Simons, Jr. 1338

Myeloperoxidase Is a Primary Response Gene in HL60 Cells, Directly Regulated during Hematopoietic Differentiation
R. W. Meier, T. Chen, R. R. Friis, and A. Tobler 1345

Synchronous Scan Fluorescence Spectroscopy of Proteins and Human Eye Lenses
Ch. Mohan Rao 1351

A New Membrane-Associated Ca^{2+}-Binding Protein of Rat Spermatogenic Cells: Its Purification and Characterization
Masahisa Nakamura, Tomoyo Yamanobe, Takashi Suyemitsu, Masayuki Komukai, Shoichi Okinaga, and Kiyoshi Arai 1358

A Novel Myosin Heavy Chain Isoform in Vascular Smooth Muscle
Yoki Okai-Matsuo, Hiromi Takano-Ohmuro, Teruhiko Toyo-oka, and Tsuneaki Sugimoto 1365

Lysolecithin: A Potent Activator of Prophenoloxidase from the Hemolymph of the Lobster, *Homarus americanas*
Manickam Sugumaran and Kalliappan Nellaiappan 1371

A Relationship between Multidrug Resistance and Growth-State Dependent Cytotoxicity of the Lysosomotropic Detergent *N*-Dodecylimidazole
Patricia D. Wilson, David Hreniuk, and John Lenard 1377

Effects of Polyamine Analogs on the Extent and Fidelity of *in Vitro* Polypeptide Synthesis
Ronald D. Snyder and Michael L. Edwards 1383

Genes for the Insulin Receptor and the Insulin-like Growth Factor I Receptor Are Expressed in the Chicken Embryo Blastoderm and throughout Organogenesis
Louis M. Scavo, Jose Serrano, Jesse Roth, and Flora de Pablo 1393

Reverse-Phase Chromatography of Trypsin Digests of a Plasma Membrane and a Cytoplasmic Insulin Receptor Substrate
H. Joseph Goren and Donna Boland 1402

Growth Factor-like Effect of Urokinase Type Plasminogen Activator in Human Renal Cells *Ci-Jiang He, Jean-Michel Rebibou, Marie-Noëlle Peraldi, Quentin Meulders, and Eric Rondeau* 1408

Endothelial Cells Have a Particulate Enzyme System Responsible for EDRF Formation: Measurement by Vascular Relaxation
Jane A. Mitchell, Ulrich Förstermann, Timothy D. Warner, Jennifer S. Pollock, Harald H. H. W. Schmidt, Michael Heller, and Ferid Murad 1417

Tyrosine Phosphorylation Is Essential for Microfilament Assembly in B Lymphocytes
I. Melamed, G. P. Downey, and C. M. Roifman 1424

Control of Pteridine Biosynthesis in the Natural Killer-like Cell Line YT
Karin Schott, Junij Yodoi, Udo Schwuléra, and Irmgard Ziegler 1430

Inhibition of Transplasma Membrane Electron Transport by Monoclonal Antibodies to the Transferrin Receptor *W. Toole-Simms, I. L. Sun, W. P. Faulk, H. Löw, A. Lindgren, F. L. Crane, and D. J. Morré* 1437

Identity between the Novel Integrin β_7 Subunit and an Antigen Found Highly Expressed on Intraepithelial Lymphocytes in the Small Intestine
Qian Yuan, Wei-meng Jiang, Daniel Hollander, Euphemia Leung, James D. Watson, and Geoffrey W. Krissansen 1443

Intraperoxisomal Form of Alanine:Glyoxylate Aminotransferase in the Peroxisomes of Bird Kidney *Haruhiko Sakuraba, Satoko Fujiwara, and Tomoo Noguchi* 1450

Characterization of a New Substrate for Protein Kinase C: Assay by Continuous Fluorometric Monitoring and High-Performance Liquid Chromatography
Zhizhuang Zhao, Dean A. Malencik, and Sonia R. Anderson 1454

Protein Separation and Purification in Neat Dimethyl Sulfoxide
Nancy Chang, Steward J. Hen, and Alexander M. Klibanov 1462

Recombinant Cytochrome *c* Peroxidase Folds Properly without Conformational "Annealing" *Juan C. Ferrer, Mark Ring, and A. Grant Mauk* 1469

BALB/C Mouse 3T3 Fibroblasts Expressing Human Estrogen Receptor: Effect of Estradiol on Cell Growth *Anne-Marie Gaben and J. Mester* 1473

Rat Ribophorin II: Molecular Cloning and Chromosomal Localization of a Highly Conserved Transmembrane Glycoprotein of the Rough Endoplasmic Reticulum
Gregorio Pirozzi, Zhongmin Zhou, Peter D'Eustachio, David D. Sabatini, and Gert Kreibich 1482

The Mechanism for the Inhibition of Actin-Activated ATPase of Smooth Muscle Heavy Meromyosin by Calponin *Kurumi Y. Horiuchi and Samuel Chacko* 1487

GTP-Dependent Membrane Fusion during Hepatocarcinogenesis and Liver Regeneration
Jacques Paiement, J. Manuel Dominguez, Anne Guénette, and Line Roy 1494

Purification and Properties of Cytochrome P450 (SCC) from Pig Testis Mitochondria
Masahiro Kuwada, Rie Kitajima, Haruo Suzuki, and Shigeo Horie 1501

Identification of the Promoter Region and Gene Expression for Human Acid α Glucosidase *Stephanie Tzall and Frank Martiniuk* 1509

Molecular Cloning and Expression of Mouse Leukotriene A_4 Hydrolase cDNA
Juan F. Medina, Olof Rådmark, Colin D. Funk, and Jesper Z. Haeggström 1516

Mechanism(s) of Heat Killing: Accumulation of Nascent Polypeptides in the Nucleus?
Yong J. Lee, Michael J. Borrelli, and Peter M. Corry 1525

Cloning and Expression of a New Pregnancy-Specific β_1-Glycoprotein Member
Cathie A. Plouzek, Shuichiro Watanabe, and Janice Yang Chou 1532

Expression of Nuclear Retinoic Acid Receptors in Rat Adipose Tissue
Riaz-ul-Haq and Frank Chytil 1539

Mechanisms Involved in Stimulation of Insulin Secretion by the Hypoglycaemic α-Adrenergic Antagonist, DG-5128
Susan L. F. Chan, Michael R. Stillings, and Noel G. Morgan 1545

Enhanced Contractile Effect of Phorbol Dibutyrate in Portal Vein from Hypertensive Rats *Noriyuki Miyata, Katsuharu Tsuchida, and Susumu Otomo* 1552

Synthesis of 1-Acyl-2-[^{3}H]acetyl-*sn*-glycero-3-phosphocholine, a Structural Analog of Platelet Activating Factor, by Vascular Endothelial Cells
Howard W. Muller, Matthias U. Nollert, and Suzanne G. Eskin 1557

The Nuclear 42-kDa Phosphoprotein Preferentially Binds Promoter-Containing Single-Stranded DNA *J. Stigare and E. Egyhazi* 1565

Immunological Detection of Propolypeptide of von Willebrand Factor on Platelet Surface *Keiko Hashimoto, Tomoko Usui, Ken-ichi Sasaki, Tomoyuki Fujisawa, Fujio Sekiya, Junichi Takagi, Toshiyasu Tsukada, and Yuji Saito* 1571

A Monoclonal Antibody against Peripheral Benzodiazepine Receptor Activates the Human Neutrophil NADPH-Oxidase *Flora Zavala, Annie Masson, Lea Brys, Patrick de Baetselier, and Béatrice Descamps-Latscha* 1577

Shorter Variants of the D_3 Dopamine Receptor Produced through Various Patterns of Alternative Splicing *Bruno Giros, Marie-Pascale Martres, Catherine Pilon, Pierre Sokoloff, and Jean-Charles Schwartz* 1584

Sequence-Specific Single-Strand DNA-Binding Proteins That Interact with the Regulatory Regions of Wheat Histone H3 and H4 Genes
Hisabumi Takase, Maki Minami, and Masaki Iwabuchi 1593

Interaction of Atrial Natriuretic Polypeptide and Angiotensin II on Protooncogene Expression and Vascular Cell Growth
Hiroshi Itoh, Richard E. Pratt, and Victor J. Dzau 1601

Primary Structure of Mouse Tyrosine Hydroxylase Deduced from Its cDNA
Shinichi Ichikawa, Toshikuni Sasaoka, and Toshiharu Nagatsu 1610

Improved Methodology to Assay Carnitine and Levels of Free and Total Carnitine in Human Plasma *Li-Jun Xia and Karl Folkers* 1617

Author Index for Volume 176 1624

Volume 177, Number 1, May 31, 1991

Gene Expression of Fibroblast Growth Factor Receptors in the Tissues of Human Gliomas and Meningiomas *Jun A. Takahashi, Hiroshi Suzui, Yosiko Yasuda, Nobuyuki Ito, Mitsuhiro Ohta, Michael Jaye, Manabu Fukumoto, Yoshifumi Oda, Haruhiko Kikuchi, and Masakazu Hatanaka* 1

Isolation and Characterization of the Human Lung NK-2 Receptor Gene Using Rapid Amplification of cDNA Ends *Alexander Graham, Brian Hopkins, Steven J. Powell, Petra Danks, and Ian Briggs* 8

Pravastatin, a HMG-CoA Reductase Inhibitor, Blocks the Cell Cycle Progression but Not Ca^{2+} Influx Induced by IGF-I in FRTL-5 Cells *Hisato Tada, Kaoru Takada, Nobuyuki Amino, and Kiyoshi Miyai* 17

Modulation of Phospholipase A_2 Activity in Zymogen Granule Membranes by GTP[S]; Evidence for GTP-Binding Protein Regulation *Ronald P. Rubin, Matthew Withiam-Leitch, and Suzanne G. Laychock* 22

APGW-Amide as an Inhibitory Neurotransmitter of *Achatina fulica* Ferussac *Guo Jun Liu, Divina E. Santos, Hiroshi Takeuchi, Yoshimi Kamatani, Hiroyuki Minakata, Kyosuke Nomoto, Ichiro Kubota, Tetsuya Ikeda, and Yojiro Muneoka* 27

Cloning and Sequence Analysis of a cDNA Encoding Human Nonselective Type of Endothelin Receptor *Makoto Nakamuta, Ryoichi Takayanagi, Yoshiyuki Sakai, Shigeru Sakamoto, Hiromi Hagiwara, Takeshi Mizuno, Yasuyoshi Saito, Shigehisa Hirose, Mikio Yamamoto, and Hajime Nawata* 34

Concentration and Molecular Forms of Brain Natriuretic Peptide in Rat Plasma and Spinal Cord *Masahito Aburaya, Etsu Suzuki, Naoto Minamino, Kenji Kangawa, Kenjiro Tanaka, and Hisayuki Matsuo* 40

A Simple Convenient Biological Dosimeter for Monitoring Solar UV-B Radiation *Tzu-chien V. Wang* 48

Demonstration of Platelet-Activating Factor Receptor in Guinea Pig Kidney *Tomoko Takano, Zen-ichiro Honda, Tsuyoshi Watanabe, Shunya Uchida, Takao Shimizu, and Kiyoshi Kurokawa* 54

Phorbol Ester Induces Phosphorylation of the 80 kDa Murine Interleukin 1 Receptor at a Single Threonine Residue *Timothy A. Bird, Anne Woodward, Jana L. Jackson, Steven K. Dower, and John E. Sims* 61

A Gene Structure of Testosterone 6β-Hydroxylase (P450IIIA) *Masaaki Miyata, Kiyoshi Nagata, Yasushi Yamazoe, and Ryuichi Kato* 68

Effect of Cyclic RGD Peptide on Cell Adhesion and Tumor Metastasis *Hiromichi Kumagai, Mayumi Tajima, Yukio Ueno, Yuhko Giga-Hama, and Masataka Ohba* 74

Antibody against Neurofibromatosis Type I Gene Product Reacts with a Triton-Insoluble GTPase-Activating Protein toward *ras* p21 *Seisuke Hattori, Naoko Ohmi, Midori Maekawa, Masato Hoshino, Masao Kawakita, and Shun Nakamura* 83

Overexpression of Human TRK Proto-oncogene into Mouse Cells Using an Inducible Vector System *Rita Mulherkar and François Coulier* 90

Enhancer Dependent Expression of the Chicken β-Hatching Globin Gene during Erythroid Differentiation *M. A. Plumb, S. Lowe, G. Partington, and G. Goodwin* 97

Multiple Forms of NADPH-Cytochrome P450 Reductase in Higher Plants *Irène Benveniste, Agnès Lesot, Marie-Paule Hasenfratz, Georg Kochs, and Francis Durst* 105

Interrelationship between Insulin-like Growth Factor I-Induced Activation of the Na^+/H^+-Antiporter and Intracellular Ca^{2+}-Mobilization in Thyroid Cells *Nobuyuki Takasu, Ichiro Komiya, Yoshitaka Nagasawa, Takayuki Asawa, Yoshifusa Shimizu, and Takashi Yamada* 113

Evolution of *Alu* Repeats Surrounding the Human Ferredoxin Gene *Bon-chu Chung and Chi-Yao Chang* 120

Expression of Alkaline Phosphatase in Murine Lymphoma Cells *Jean Harb, Fabienne Vavasseur, Corinne Chadéneau, Marc Denis, and Khaled Meflah* 125

Metabolism of Lipoxins A_4 and B_4 and of Their All-*trans*-Isomers by Human Leukocytes and Rat Liver Microsomes *J. L. Boucher, M. Delaforge, and D. Mansuy* 134

Footprint of the Sigma Protein: A Reexamination *Arthur Wellman and Claude F. Meares* 140

Thyroid-Stimulating Activity of Rabbit Antibodies toward the Human Thyrotropin Receptor Peptide *Toyoshi Endo, Masayuki Ohmori, Masato Ikeda, and Toshimasa Onaya* 145

Nuclease P_1-Mediated Fluorescence Postlabeling Assay of AAF-Modified DNA Model d(TACGTA) and Calf-Thymus DNA *M. Sharma and R. Jain* 151

Mastoparan Induces Oscillations of Cytosolic Ca^{2+} in Rat Pancreatic Acinar Cells *David I. Yule and John A. Williams* 159

Basic Fibroblast Growth Factor Is a Calcium-Mobilizing Secretagogue in Rat Pancreatic Acini *Bysani Chandrasekar and Murray Korc* 166

Endothelin-1 Induces Prostacyclin Release from Bovine Aortic Endothelial Cells *János G. Filep, Bruno Battistini, Yvan P. Côté, Adrien R. Beaudoin, and Pierre Sirois* 171

Biosynthesis of the 67-kDa High-Affinity Laminin Receptor *Vincent Castronovo, Anne P. Claysmith, Karen T. Barker, Vittoria Cioce, Henry C. Krutzsch, and Mark E. Sobel* 177

The Effect of pH on Rate Constants, Ion Selectivity, and Thermodynamic Properties of Fluorescent Calcium and Magnesium Indicators *Frank A. Lattanzio, Jr., and D. K. Bartschat* 184

Tyrosine Phosphorylation Is an Early Signaling Event Common to Fc Receptor Cross-linking in Human Neutrophils and Rat Basophilic Leukemia Cells (RBL-2H3) *Patricia A. Connelly, Cathy A. Farrell, Joseph M. Merenda, Maryrose J. Conklyn, and Henry J. Showell* 192

Full-Length Mouse Glycophorin Gene Constructed Using Recombinant Polymerase Chain Reaction *Haoming Gu, José Planas, Rey Gómez, and Donella J. Wilson* 202

DuP 532: A Second Generation of Nonpeptide Angiotensin II Receptor Antagonists *Andrew T. Chiu, David J. Carini, John V. Duncia, Kam H. Leung, Dale E. McCall, William A. Price, Jr., Pancras C. Wong, Ronald D. Smith, Ruth R. Wexler, Pieter B. M. W. M. Timmermans, Raymond S. L. Chang, and Victor J. Lotti* 209

Different Segment Similarities in Long-Chain Dehydrogenases *Bengt Persson, Jonathan Jeffery, and Hans Jörnvall* 218

Induction of Metallothionein by Simultaneous Administration of Cadmium(II) and Zinc(II) *Catherine Harford and Bibudhendra Sarkar* 224

Tissue-Specific Methylation in the 5' Flanking Region of the γ-Glutamyl Transpeptidase Gene *Julio Coloma and Adelaida Garcia-Jimeno* 229

Esterase Activity of Synthetic Fragments of Human Adrenocorticotrophic Hormone *Kari K. Eklund, Petri Vainio, Jorma A. Virtanen, and Paavo K. J. Kinnunen* 235

Expression of Functional β-Galactosidase Containing the Coxsackievirus 3C Protease as an Internal Fusion *Michael G. Windheuser, Sheila Dwyer, and Bimalendu Dasmahapatra* 243

Synthesis and Initial Characterization of γ-L-Glutamyl-L-thiothreonylglycine and γ-L-Glutamyl-L-*allo*-thiothreonylglycine as Steric Probes of the Active Site of Glyoxalase I *Xiaofu Xie and Donald J. Creighton* 252

Thymidine Secretion by Cultured Chicken Embryo Fibroblasts and NII/3T3 Cells: Quantification and Time Course *Heinz Gehring and Annelies Schröder* 259

Nuclear Matrix Attachment Regions and Topoisomerase II Binding and Reaction Sites in the Vicinity of a Chicken DNA Replication Origin *S. V. Razin, Y. S. Vassetzky, and R. Hancock* 265

Conformational Analysis of the Tetrapeptide Pro–D-Phe–Pro–Gly in Aqueous Solution *D. Hübner, B. Hartrodt, E. Kleinpeter, D. Ströhl, W. Brandt, H. Schinke, M. Wahab, and G. Fischer* 271

Recognition of Human Immunodeficiency Virus Glycoproteins by Natural Anti-carbohydrate Antibodies in Human Serum *Takami Tomiyama, Douglas Lake, Yasuhiko Masuho, and Evan M. Hersh* 279

Isolation of Partial Complementary DNA Encoding Human Thromboxane Synthase *Lee-Ho Wang, Kazuteru Ohashi, and Kenneth K. Wu* 286

Bombesin Activates Large-Conductance Chloride Channels in Swiss 3T3 Fibroblasts *Katsumasa Kawahara and Noriko Takuwa* 292

Rat Angiotensin II Receptor: cDNA Sequence and Regulation of the Gene Expression *N. Iwai, Y. Yamano, S. Chaki, F. Konishi, S. Bardhan, C. Tibbetts, K. Sasaki, M. Hasegawa, Y. Matsuda, and T. Inagami* 299

Expression of Human Brain Hexokinase in *Escherichia coli*: Purification and Characterization of the Expressed Enzyme *Feng Liu, Qun Dong, Alan M. Myers, and Herbert J. Fromm* 305

Human Elongation Factor 1β: cDNA and Derived Amino Acid Sequence *H. von der Kammer, J. Klaudiny, M. Zimmer, and K. H. Scheit* 312

Oxidative Phosphorylation Coupled to Electron Transfer in the Filarial Parasite *Setaria digitata* *K. R. Santhamma and R. Kaleysa Raj* 318

Differential Regulation of Calmodulin-Dependent and -Independent Cyclic AMP Phosphodiesterases from Oviduct by Fatty Acids
Christian Laugier, Noureddine Zebda, Abdallah Fanidi, Michel Lagarde, and Jean-François Pageaux 324

Possible Endocrine Control by Hepatocyte Growth Factor of Liver Regeneration after Partial Hepatectomy *Taisei Kinoshita, Shigeaki Hirao, Kunio Matsumoto, and Toshikazu Nakamura* 330

Antigen-Induced Biphasic Diacylglycerol Formation in RBL-2H3 Cells: The Late Sustained Phase Due to Phosphatidylcholine Hydrolysis Is Dependent on Protein Kinase C *Shigeru Nakashima, Hiroshi Fujimiya, Hideo Miyata, and Yoshinori Nozawa* 336

Palmitate Stimulates Glucose Transport in Rat Adipocytes by a Mechanism Involving Translocation of the Insulin-Sensitive Glucose Transporter (GLUT4)
Robert W. Hardy, Jack H. Ladenson, Erik J. Henriksen, John O. Holloszy, and Jay M. McDonald 343

The Myosin Head Can Bind Two Actin Monomers *O. A. Andreev and J. Borejdo* 350

Synthesis of the 1-*O*-Hexadecyl Molecular Species of Platelet-Activating Factor by Airway Epithelial and Vascular Endothelial Cells
Michael J. Holtzman, Barbara Ferdman, Alan Bohrer, and John Turk 357

The Activation of cAMP-Dependent Protein Kinase Is Directly Linked to the Regulation of Osteoblast Proliferation (UMR-106) by Parathyroid Hormone
Junichi Kano, Toshitsugu Sugimoto, Masaaki Fukase, and Takuo Fujita 365

Interaction of RNA Polymerase II with Acetylated Nucleosomal Core Particles
Manuel Piñeiro, Pedro José González, Francisco Hernández, and Enrique Palacián 370

Alzheimer's Disease Amyloid β-Clipping Enzyme (APP Secretase): Identification, Purification, and Characterization of the Enzyme
Kazuhiko Tagawa, Tatsuhide Kunishita, Kei Maruyama, Kazuaki Yoshikawa, Eiki Kominami, Takahide Tsuchiya, Koichi Suzuki, Takeshi Tabira, Hideo Sugita, and Shoichi Ishiura 377

Effect of Active Vitamin D_3 on the Levels of NADPH-Dependent Cytosolic 3,5,3'-Triiodo-L-thyronine-Binding Protein
Kiyoshi Hashizume, Satoru Suzuki, Kazuo Ichikawa, Teiji Takeda, and Mutsuhiro Kobayashi 388

Nuclear Matrix Protein Mitotin Messenger RNA Is Expressed at Constant Levels during the Cell Cycle *Ivan T. Todorov, Jacques Lavigne, Françoise Sakr, Radka Kaneva, Sylvain Foisy, and Viviane Bibor-Hardy* 395

6α,7α-Cyclopropane Derivatives of Androst-4-ene: A Novel Class of Competitive Aromatase Inhibitors *Mitsuteru Numazawa and Ayako Mutsumi* 401

Possible Role of Sodium–Hydrogen Antiport in Acetylcholine-Induced Relaxation of Rat Aorta *Katsuyuki Ando, Katsutoshi Takahashi, Ayumu Ono, Tatsuo Shimosawa, Etsuro Ogata, and Toshiro Fujita* 407

Activation of Aspartase by Site-Directed Mutagenesis
Sachiko Murase, Jun S. Takagi, Yasuyuki Higashi, Hiromasa Imaishi, Noboru Yumoto, and Masanobu Tokushige 414

Superoxide Dismutase Activity Regulation by Spermine: A New Dimension in Spermine Biochemistry and Sperm Development
Aparna Singh, Pradeep Kumar G., Malini Laloraya, Saguna Verma, and Manish Nivsarkar 420

Changes in the Gene Expression of Collagens, Fibronectin, Integrin, and Proteoglycans during Matrix-Induced Bone Morphogenesis
Yu M. Yu, Radim Becvar, Yoshihiko Yamada, and A. H. Reddi 427

Oxidative Modification of Glycated Low Density Lipoprotein in the Presence of Iron
Tamiko Sakurai, Satsuki Kimura, Minoru Nakano, and Hirokazu Kimura 433

Evidence for the Formation of a Known Toxin, P-Cresol, from Menthofuran
K. M. Madyastha and C. Paul Raj 440

Properties of a Thermoactive β-1,3-1,4-Glucanase (Lichenase) from *Clostridium thermocellum* Expressed in *Escherichia coli*
Silke Schimming, Wolfgang H. Schwarz, and Walter L. Staudenbauer 447

Purification and Characterization of a Human Liver Arylacetamide Deacetylase
Markus R. Probst, Paul Jenö, and U. A. Meyer 453

Single Pulses of Cytoplasmic Calcium Associated with Phagocytosis of Individual Zymosan Particles by Macrophages
Laura C. Meagher, Baljit S. Moonga, Christopher Haslett, Christopher L.-H. Huang, and Mone Zaidi 460

Identification of *sn*-2-ω-Hydroxycarboxylate-Containing Phospholipids in a Lipid Extract from Bovine Brain *Akira Tokumura, Tamotsu Tanaka, Takashi Yotsumoto, and Hiroaki Tsukatani* 466

TB(III) as Fluorescent Probe for the Structure of Bovine Serum Albumin
Yongjie Jin, Wenlian Li, and Qingrong Wang 474

Temporal Changes in Intracellular Distribution of Protein Kinase C in Swiss 3T3 Cells during Mitogenic Stimulation with Insulin-like Growth Factor I and Bombesin: Translocation to the Nucleus follows Rapid Changes in Nuclear Polyphosphoinositides *A. M. Martelli, L. M. Neri, R. S. Gilmour, P. J. Barker, N. S. Huskisson, F. A. Manzoli, and L. Cocco* 480

Autoregulation of Androgen Receptor Expression in Rodent Prostate: Immunohistochemical and *in Situ* Hybridization Analysis
Hiroyuki Takeda, Takahisa Nakamoto, John Kokontis, Gerald W. Chodak, and Chawnshang Chang 488

Identification of Lanosterol 14 α-Methyl Demethylase in Human Tissues
Judy L. Raucy, Susan J. Carpenter, and James M. Trzaskos 497

Dialdehyde-GDP Blocks Activity of Cytosolic Components of Neutrophil NADPH Oxidase *Eti Klinger and Irit Aviram* 504

Mithramycin Cannot Bind to Left-Handed Poly(dG-m^5dC) in the Presence of Mg^{2+} Ion
C. Demicheli and A. Garnier-Suillerot 511

Patients with Idiopathic Cardiomyopathy Belong to the Same Mitochondrial DNA Gene Family of Parkinson's Disease and Mitochondrial Encephalomyopathy
Takayuki Ozawa, Masashi Tanaka, Satoru Sugiyama, Hidekazu Ino, Kinji Ohno, Kazuki Hattori, Toshihiro Ohbayashi, Takayuki Ito, Hirofumi Deguchi, Keishiro Kawamura, Yumiko Nakane, and Kunitake Hashiba 518

Macrophage Colony-Stimulating Factor (M-CSF) Is Essential for Osteoclast Formation *in Vitro* *G. Hattersley, J. Owens, and T. J. Chambers* 526

Cyclophellitol: A Naturally Occurring Mechanism-Based Inactivator of β-Glucosidases *S. G. Withers and K. Umezawa* 532

Conservation of Binding Sites for Regulatory Factors in the Coordinately Expressed α1(I) and α2(I) Collagen Promoters *Gerard Karsenty and Benoit de Crombrugghe* 538

The Effects of Histamine H2 Receptor Antagonists on Melanogenesis and Cellular Proliferation in Melanoma Cells in Culture *Kalust Uçar* 545

Evidence for Multiple Intracellular Calcium Pools in GH_4C_1 Cells: Investigations Using Thapsigargin *Hiroyuki Koshiyama and Armen H. Tashjian, Jr.* 551

Expression of Hepatocyte Growth Factor mRNA in Regenerating Rat Liver after Partial Hepatectomy *Reza Zarnegar, Marie C. DeFrances, Diane P. Kost, Pamela Lindroos, and George K. Michalopoulos* 559

Regulation of Sterol Biosynthesis in Sunflower by 24(R,S),25-Epiminolanosterol, a Novel C-24 Methyl Transferase Inhibitor *W. David Nes, Giselle G. Janssen, Robert A. Norton, Malgorzata Kalinowska, Farrist G. Crumley, Beni Tal, Annika Bergenstrahle, and Lisbeth Jonsson* 566

Cycloheximide Increases the Thermostability of Proteins in Chinese Hamster Ovary Cells *Michael J. Borrelli, Yong J. Lee, Harold E. Frey, John P. Ofenstein, and James R. Lepock* 575

Ganglioside GM3 Stimulates the Uptake and Processing of Low Density Lipoproteins by Macrophages *Nina V. Prokazova, Irina A. Mikhailenko, and Lev D. Bergelson* 582

Isolation of Four Novel Tachykinins from Frog (*Rana catesbeiana*) Brain and Intestine *Hitoo Kozawa, Jun Hino, Naoto Minamino, Kenji Kangawa, and Hisayuki Matsuo* 588

Volume 177, Number 2, June 14, 1991

cDNA Cloning of the Rat O^6-Methylguanine-DNA-Methyltransferase *Iwonna Rahden-Staron and Françoise Laval* 597

Presence of 2-Methyl-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline and 1,2-Dimethyl-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline, Novel Endogenous Amines, in Parkinsonian and Normal Human Brains *Toshimitsu Niwa, Naohito Takeda, Hideo Yoshizumi, Akira Tatematsu, Mitsuo Yoshida, Philippe Dostert, Makoto Naoi, and Toshiharu Nagatsu* 603

Signal Transduction Pathways in the Induction of HLA Class I Antigen Expression on Huh 6 Cells by Interferon-γ *Takahiro Towata, Norio Hayashi, Kazuhiro Katayama, Tetsuo Takehara, Yutaka Sasaki, Akinori Kasahara, Hideyuki Fusamoto, and Takenobu Kamada* 610

Identity Determinants of *Escherichia coli* $tRNA^{Val}$ *Koji Tamura, Hyouta Himeno, Haruichi Asahara, Tsunemi Hasegawa, and Mikio Shimizu* 619

Okadaic Acid Stimulates the Activity of the Nerve Growth Factor-Sensitive S6 Kinase of PC12 Cells *Makio Mogi and Gordon Guroff* 624

Specificity of Guanylic RNases to Polynucleotide Substrates *Valentin Both, Gennady P. Moiseyev, and Jozef Sevcik* 630

An Approach to Imaging of Living Cell Surface Topography by Scanning Tunneling Microscopy *Etsuro Ito, Tetsuo Takahashi, Kiyoshi Hama, Tohru Yoshioka, Wataru Mizutani, Hajime Shimizu, and Masatoshi Ono* 636

The Analysis of Underivatized Oligosaccharides by Matrix Assisted Laser Desorption Mass Spectrometry *K. K. Mock, M. Davey, and J. S. Cottrell* 644

Purification of Recombinant Midkine and Examination of Its Biological Activities: Functional Comparison of New Heparin Binding Factors *Hisako Muramatsu and Takashi Muramatsu* 652

Expression in Monkey Cells of the Missing Enzyme in L-Ascorbic Acid Biosynthesis, L-Gulono-γ-lactone Oxidase *Kunio Yagi, Takuya Koshizaka, Mariko Kito, Takayuki Ozawa, and Morimitsu Nishikimi* 659

Involvement of Adhesion Molecules (CD11a-ICAM-1) in Vascular Endothelial Cell Injury Elicited by PMA-Stimulated Neutrophils *Hiroshi Fujita, Ikuo Morita, and Sei-itsu Murota* 664

Nucleolin Promotes Secondary Structure in Ribosomal RNA *Katalin Sipos and Mark O. J. Olson* 673

Composite Structure of the Human Thyrotropin Receptor Gene *Babette Gross, Micheline Misrahi, Sokhavuth Sar, and Edwin Milgrom* 679

Complementary DNA Sequence of Human Neutrophil Azurocidin, an Antibiotic with Extensive Homology to Serine Proteases *Roque P. Almeida, Maxine Melchior, David Campanelli, Carl Nathan, and Joelle E. Gabay* 688

Cloning and Nucleotide Sequence of a Human Zn-α_2-glycoprotein cDNA and Chromosomal Assignment of Its Gene *Hisao Ueyama, Masaaki Niwa, Toyohiro Tada, Makoto Sasaki, and Iwao Ohkubo* 696

Evidence for a Platelet-Activating Factor Receptor on Human Alveolar Macrophages *Tom Schaberg, Hermann Haller, and Hartmut Lode* 704

Purification and Properties of a Novel DNA Methyltransferase from Cultured Rice Cells *M. Giordano, M. E. Mattachini, R. Cella, and G. Pedrali-Noy* 711

Primary Structure of a Trisialylated Oligosaccharide from Human Milk *Sophie Fievre, Jean-Michel Wieruszeski, Jean-Claude Michalski, Jérôme Lemoine, Jean Montreuil, and Gérard Strecker* 720

Antigen Specificity of Anticolipase Monoclonal Antibodies: Characterization of Colipase–Fab Complexes Using Gel Filtration High-Performance Liquid Chromatography *Nathalie Rugani, Christine Dezan, Bernard Bellon, and Louis Sarda* 726

Histamine-Induced Inositol Phosphate Accumulation in Type-2 Astrocytes *Hiroki Kondou, Naoyuki Inagaki, Hiroyuki Fukui, Yutaka Koyama, Akira Kanamura, and Hiroshi Wada* 734

Receptors for Gastrin on Gastric Carcinoid Tumor Membrane of *Mastomys natalensis* *Tsutomu Chiba, Yoshikazu Kinoshita, Tomoyuki Morishita, Hirohisa Nakata, Akira Nakamura, and Syun Hosoda* 739

Correlation between Spermine Stimulation of Rat Liver Ile–tRNA Formation and Structural Change of the Acceptor Stem by Spermine
Kuniko Kusama-Eguchi, Shin-ichi Watanabe, Mika Irisawa, Kazuko Watanabe, and Kazuei Igarashi 745

In Vitro Translation and Expression of Renal Intrinsic Factor–Cobalamin Receptor
S. Seetharam, N. Dahms, N. Li, K. S. Ramanujam, and B. Seetharam 751

Copurification of the Aminoacyl–tRNA Synthetase Complex with the Elongation Factor eEF1 *Valerie Sarisky and David C. H. Yang* 757

Biosynthesis of the Precursor of a Soluble Human Insulin Receptor Ectodomain in Insect Sf9 Cells Infected with a Recombinant Baculovirus
Janice F. Sissom and Leland Ellis 764

Amylin Increases Cyclic AMP Formation in L6 Myocytes through Calcitonin Gene-Related Peptide Receptors
Guochang Zhu, David T. Dudley, and Alan R. Saltiel 771

Intracellular ATP Mimics GTP-γ-S in Generating Ca^{2+} Oscillations in Pancreatic β-Cells *Per-Eric Lund, Eva Grapengiesser, Erik Gylfe, and Bo Hellman* 777

Muscarinic Receptor Antagonist Effects in Parotid Acini and M_1-CHO Cells: Evidence of G Protein Involvement
Valerie J. Horn, Bruce J. Baum, and Indu S. Ambudkar 784

A Pit-1 Binding Site 3′ to the Transcription Start Site Inhibits Transcription Elongation *in Vitro* *Kelly P. Smith and Z. Dave Sharp* 790

Insulin Stimulates Fatty Acid Acylation of Adipocyte Proteins
Albert Jochen, Judith Hays, Elias Lianos, and Steven Hager 797

Mastoparan Increases Membrane Permeability in Rat Parotid Cells Independently of Action on G-Proteins
Akihiko Tanimura, Yoshito Matsumoto, and Yosuke Tojyo 802

Central Basic Fibroblast Growth Factor Inhibits Gastric Ulcer Formation in Rats
Toshikatsu Okumura, Akira Uehara, Shigeru Kitamori, Yuichi Takasugi, and Masayoshi Namiki 809

ONO-5046, a Novel Inhibitor of Human Neutrophil Elastase
Kazuhito Kawabata, Mayumi Suzuki, Masafumi Sugitani, Katsuhiro Imaki, Masaaki Toda, and Tsumoru Miyamoto 814

The Macrophage Response to Bacteria: Flow of L-Arginine through the Nitric Oxide and Urea Pathways and Induction of Tumoricidal Activity
R. Keller, R. Keist, S. Klauser, and A. Schweiger 821

Inactivation of Macrophage Nitric Oxide Synthase Activity by N^G-Methyl-L-Arginine
Norman M. Olken, Kristin M. Rusche, Michael K. Richards, and Michael A. Marletta 828

A Transcortin-Binding Protein in the Plasma Membrane of Human Syncytiotrophoblast
Sergey A. Krupenko, George V. Avvakumov, and Oleg A. Strel'chyonok 834

Augmentation of Vasopressin-Induced cAMP Production by High Potassium in Rat Renal Papillary Collecting Tubule Cells in Culture
San-e Ishikawa, Koji Okada, and Toshikazu Saito 840

Purification of Achatin-I from the Atria of the African Giant Snail, *Achatina fulica*, and Its Possible Function *Katsuyuki Fujimoto, Ichiro Kubota, Yoshimi Yasuda-Kamatani, Hiroyuki Minakata, Kyosuke Nomoto, Masayuki Yoshida, Arata Harada, Yojiro Muneoka, and Makoto Kobayashi* 847

Endothelin-1 Inhibits Adipogenic Differentiation of 3T3-L1 Preadipocytes *Tatsuichiro Tanahashi, Ken Yamaguchi, Shiro Ishikawa, Masatoshi Kusuhara, Isamu Adachi, and Osahiko Abe* 854

Nonphagocytic Uptake of Intravenously Injected Microspheres in Rat Spleen: Influence of Particle Size and Hydrophilic Coating *S. M. Moghimi, C. J. H. Porter, I. S. Muir, L. Illum, and S. S. Davis* 861

Molecular Cloning and Characterization of 2B7, a Rat mRNA Which Distinguishes Smooth Muscle Cell Phenotypes *in Vitro* and Is Identical to Osteopontin (Secreted Phosphoprotein I, 2aR) *Cecilia Giachelli, Nancy Bae, Donna Lombardi, Mark Majesky, and Stephen Schwartz* 867

ESR Measurement of Radical Clearance in Lung of Whole Mouse *Keizo Takeshita, Hideo Utsumi, and Akira Hamada* 874

Identification of a Novel Parvalbumin in Avian Thymic Tissue *Michael T. Henzl, Rita E. Serda, and Jeanne M. Boschi* 881

Cytosolic Ionized Calcium in Human Platelets: The Influence of Collagen and a Novel Antiplatelet Agent *Ramachander Gollamudi, Elwood O. Dillingham, Stephen E. Bond, and Beverly A. Lyman* 888

Effect of Schisanhenol on the Antitumor Activity of Adriamycin *Tong-Jun Lin and Geng-Tao Liu* 207

Regulatory Mediators in the Venom of *Chelonus* sp.: Their Biosynthesis and Subsequent Processing in Homologous and Heterologous Systems *Davy Jones and Mietek Wozniak* 213

Molecular Cloning and Characterization of the Promoter Region of the Mouse Regulatory Subunit RIIβ of Type II cAMP-Dependent Protein Kinase *Ishwar S. Singh, Zhijun Luo, Alfred Eng, and Jack Erlichman* 221

Mapping the Human CAS2 Gene, the Homologue of the Mouse Brown (*b*) Locus, to Human Chromosome 9p22-pter *Chaya D. Chintamaneni, Michele Ramsay, Mary-Anne Colman, Margaret F. Fox, Richard T. Pickard, and Byoung S. Kwon* 227

Organogenesis-Stage Cytochrome P450 Isoforms: Utilization of PCR for Detection of CYP1A1 mRNA in Rat Conceptal Tissues *Hsueh-Ying L. Yang, Bruce D. Zelus, and Mont R. Juchau* 236

Occurrence of Cholesterol 7 α- and 7 β-Hydroperoxides in Rat Skin as Aging Markers *Naoki Ozawa, Shinji Yamazaki, Koji Chiba, Hiroyuki Aoyama, Hiroki Tomisawa, Mitsuru Tateishi, and Tadashi Watabe* 242

Molecular Cloning of a Non-isopeptide-Selective Human Endothelin Receptor *Yoshihiro Ogawa, Kazuwa Nakao, Hiroshi Arai, Osamu Nakagawa, Kiminori Hosoda, Shin-ichi Suga, Shigetada Nakanishi, and Hiroo Imura* 248

Proteasome and Its Novel Endogeneous Activator in Human Platelets *Masao Yukawa, Masato Sakon, Jun-ichi Kambayashi, Eiichi Shiba, Tomio Kawasaki, Hideo Ariyoshi, and Takesada Mori* 256

Barbiturates Enhance Retinoic Acid or 1,25-Dihydroxyvitamin D_3-Induced Differentiation of Leukemia HL-60 Cells *Kosei Takeuchi, Hiroshi Ishihara, Kazuko Tsuneoka, and Mikio Shikita* 263

Natural and Conditional Aging of Mouse Fibroblasts: Genetic vs. Epigenetic Control *Renu Wadhwa, Yoji Ikawa, and Yoshikazu Sugimoto* 269

Endothelin-1 and Endothelin-3 Play Different Roles in Acute and Chronic Alterations of Blood Pressure in Patients with Chronic Hemodialysis *Takashi Miyauchi, Nobuhiro Suzuki, Tohru Kurihara, Iwao Yamaguchi, Yasuro Sugishita, Hirokazu Matsumoto, Katsutoshi Goto, and Tomoh Masaki* 276

Structure of Mouse Myelin-Associated Glycoprotein Gene *Ryoichi Nakano, Nobuya Fujita, Shuzo Sato, Takashi Inuzuka, Kenji Sakimura, Hideaki Ishiguro, Masayoshi Mishina, and Tadashi Miyatake* 282

A Novel Brain-Specific mRNA Encoding Nuclear Protein (Necdin) Expressed in Neurally Differentiated Embryonal Carcinoma Cells *Kei Maruyama, Mihoko Usami, Takako Aizawa, and Kazuaki Yoshikawa* 291

Comparison of Spantide II and CP-96,345 for Blockade of Tachykinin-Evoked Contractions of Smooth Muscle *Rolf Håkanson, Zunyi Wang, and Karl Folkers* 297

Human B Lymphocytes Possess 5-Lipoxygenase Activity and Convert Arachidonic Acid to Leukotriene B_4 *Per-Johan Jakobsson, Björn Odlander, Dieter Steinhilber, Anders Rosén, and Hans-Erik Claesson* 302

Proton Resonance Assignments for *Pseudomonas aeruginosa* Ferrocytochrome c-551 *Mengli Cai and Russell Timkovich* 309

Evidence That the Protein Components of Bovine Erythrocyte Green Heme Binding Protein and Flavin Reductase Are Identical *Kim S. Quandt, Feng Xu, Ping Chen, and Donald E. Hultquist* 315

The Primary Structure of Rat Ribosomal Protein L17 *Katsuyuki Suzuki and Ira G. Wool* 322

Activity of Acyclic Nucleoside Phosphonate Analogues against Human Immunodeficiency Virus in Monocyte/Macrophages and Peripheral Blood Lymphocytes *Jan Balzarini, Carlo-Federico Perno, D. Schols, and Erik De Clercq* 329

Characterization of *Porphyromonas* (Bacteroides) *gingivalis* Hemagglutinin as a Protease *Makoto Nishikata and Fuminobu Yoshimura* 336

Haptoglobin Synergistically Potentiates Bradykinin and Thrombin Induced Prostaglandin Biosynthesis in Isolated Osteoblasts *Nils Fröhlander, Östen Ljunggren, and Ulf H. Lerner* 343

A Cyclopeptidic Suicide Substrate Preferentially Inactivates Urokinase-Type Plasminogen Activator *Michèle Reboud-Ravaux, Anne-Cécile Vilain, Nicole Boggetto, Jean Maillard, Catherine Favreau, Juan Xie, Jean-Paul Mazaleyrat, and Michel Wakselman* 352

Kringle Domains and Plasmin Denaturation *Guey-Yueh Shi, Dung-Ho Wu, and Hua-Lin Wu* 360

Bafilomycin A_1 Inhibits the Targeting of Lysosomal Acid Hydrolases in Cultured Hepatocytes *Kimimitsu Oda, Yukio Nishimura, Yukio Ikehara, and Keitaro Kato* 369

Reduction by Interferon-α of Levels of c-*myc* Protein and DNA Synthesis in Human Hepatoma Cell Line Mediated by Inhibition of Putrescine Synthesis *Tadashi Takeda, Shuhei Nishiguchi, Tetsuo Kuroki, Kenzo Kobayashi, Tadayoshi Hasuma, Isao Matsui-Yuasa, and Shuzo Otani* 378

NMR Spectra of Exchangeable Protons of Pyridoxal Phosphate-Dependent Enzymes *Carol M. Metzler, David E. Metzler, Agustin Kintanar, Robert D. Scott, and Michelle Marceau* 385

Basic Fibroblast Growth Factor in Rat Corpus Luteum Stimulates Prostaglandin F2-α Production *Kazuhiro Tamura, Rei Asakai, and Ryohei Okamoto* 393

Direct Activation of GTP-Binding Proteins by Venom Peptides That Contain Cationic Clusters within Their α-Helical Structures *Urara Tomita, Katsunobu Takahashi, Kazuhiro Ikenaka, Tetsuro Kondo, Ichiro Fujimoto, Saburo Aimoto, Katsuhiko Mikoshiba, Michio Ui, and Toshiaki Katada* 400

Purification and Characterization of β-Galactoside Binding Lectin from Frog (*Rana catesbeiana*) Eggs *Yasuhiro Ozeki, Taei Matsui, Kazuo Nitta, Hiroaki Kawauchi, Yoshio Takayanagi, and Koiti Titani* 407

Negative Regulation of Scl-70/Topoisomerase I by Zinc and an Endogenous Macromolecule *Angeline Douvas, Paul B. Lambie, Martin A. Turman, Kenneth S. Nitahara, and Linda Hammond* 414

Volume 178, Number 2, July 31, 1991

Staurosporine Inhibits the Soluble and Membrane-Bound Protein Tyrosine Kinases of Human Neutrophils *John A. Badwey, Richard W. Erickson, and John T. Curnutte* 423

A Synthetic Peptide Substrate for Initiation Factor-2 Kinases *Harry Mellor and Christopher G. Proud* 430

Dark Adapted Leaves of Paraquat-Resistant Tobacco Plants Emit Less Ultraweak Light than Susceptible Ones *Èva Hideg and Humio Inaba* 438

Isolation and Sequencing of a cDNA Clone Encoding 85 kDa Sialoglycoprotein in Rat Liver Lysosomal Membranes *Hideaki Fujita, Junji Ezaki, Youichiro Noguchi, Akira Kono, Masaru Himeno, and Keitaro Kato* 444

Temperature-Sensitive Synthesis of a Metalloproteinase in ts110-MSV-M-Transformed NRK Cells *J. C. Chan, M. Scanlon, H. Z. Zhang, and J. L. Murray III* 453

Lecithin-Cholesterol Acyltransferase (LCAT) Deficiency with a Missense Mutation in Exon 6 of the LCAT Gene *Eiichi Maeda, Yoshiko Naka, Takashi Matozaki, Maki Sakuma, Yasuo Akanuma, Gen Yoshino, and Masato Kasuga* 460

HLA-DR Is a Procoagulant *Mohan Chelladurai, Kenneth V. Honn, and Daniel A. Walz* 467

Identification of the γ-Subunit Interaction Sites in the Retinal Cyclic-GMP Phosphodiesterase β-Subunit *Brenda Oppert and Dolores J. Takemoto* 474

Cell-Density Dependent Expression of the c-*myc* Gene in Primary Cultured Rat Hepatocytes *Atsushi Kumatori, Toshikazu Nakamura, and Akira Ichihara* 480

Fulicin, a Novel Neuropeptide Containing a D-Amino Acid Residue Isolated from the Ganglia of *Achatina fulica* *Noriyuki Ohta, Ichiro Kubota, Toshifumi Takao, Yasutsugu Shimonishi, Yoshimi Yasuda-Kamatani, Hiroyuki Minakata, Kyosuke Nomoto, Yojiro Muneoka, and Makoto Kobayashi* 486

Decreased Expression of the Myristoylated Alanine-Rich C Kinase Substrate in Transformed BALB/C 3T3 Mouse Fibroblasts *Masatomo Otsuka and Henry C. Yang* 494

The Primary Structure and Elastinolytic Activity of Medullasin (a Serine Protease of Bone Marrow) *Yosuke Aoki and Tomomi Hase* 501

Molecular Cloning and Nucleotide Sequence of Complementary DNA Encoding Rabbit α_1-Acid Glycoprotein *Bimal K. Ray and Alpana Ray* 507

Role of the C-Terminus in the Biological Activity of Human Interleukin 5 *Shiho Kodama, Nobuo Tsuruoka, and Masafumi Tsujimoto* 514

Inhibitory Effect of Bombesin and SMS 201-995 on DNA Synthesis in the Rat Thyroid Lobes Incubated *in Vitro* *A. Lewiński, E. Sewerynek, E. Wajs, B. Baranowska, G. Zerek-Mełeń, and J. Kunert-Radek* 520

Primary Structures of the Bombesin-like Neuropeptides in Frog Brain Show That Bombesin Is Not the Amphibian Gastrin-Releasing Peptide *J. Michael Conlon, Finbarr O'Harte, and Hubert Vaudry* 526

N-Ethylmaleimide Differentiates Endothelin Converting Activity by Two Types of Metalloproteinases Derived from Vascular Endothelial Cells *Yasuo Matsumura, Ruriko Ikegawa, Yaeko Tsukahara, Masanori Takaoka, and Shiro Morimoto* 531

Phosphorylation and Dephosphorylation Modulation of an Inverse Temperature Transition *Asima Pattanaik, D. Channe Gowda, and Dan W. Urry* 539

Flavin-Containing Monooxygenase: A Major Detoxifying Enzyme for the Pyrrolizidine Alkaloid Senecionine in Guinea Pig Tissues *Cristobal L. Miranda, Woongye Chung, Ralph E. Reed, Xine Zhao, Marilyn C. Henderson, Jun-Lan Wang, David E. Williams, and Donald R. Buhler* 546

Illegitimate (or Ectopic) Transcription Proceeds through the Usual Promoters *Jamel Chelly, Jean-Philippe Hugnot, Jean-Paul Concordet, Jean-Claude Kaplan, and Axel Kahn* 553

Fluorescent and Photoaffinity Labeling Derivatives of Rhizoxin *Takayuki Sawada, Yuichi Hashimoto, Yin Li, Hisayoshi Kobayashi, and Shigeo Iwasaki* 558

1-β-D-Ribofuranosyl-1,2,4-triazole-3-carboxamide (Ribavirin) and 5-Ethynyl-1-β-D-ribofuranosylimidazole-4-carboxamide (EICAR) Markedly Potentiate the Inhibitory Effect of 2',3'-Dideoxyinosine on Human Immunodeficiency Virus in Peripheral Blood Lymphocytes *Jan Balzarini, Chong-Kyo Lee, Dominique Schols, and Erik De Clercq* 563

The Conformation of Endothelin-1 in Aqueous Solution: NMR-Derived Constraints Combined with Distance Geometry and Molecular Dynamics Calculations *Michael D. Reily and James B. Dunbar, Jr.* 570

Initial Characterization of Several Actin Genes in the Parasitic Nematode, *Ascaris suum* *Michael A. Winrow and Ann Sodja* 578

Demonstration of a Heterogeneous Transcription Pattern of Thyroglobulin mRNA in Human Thyroid Tissues *F. Bertaux, M. Noel, Y. Malthiéry, and P. Fragu* 586

Production of MUC1 and MUC2 Mucins by Human Tumor Cell Lines *Peter L. Devine, Guy T. Layton, Bronwyn A. Clark, Geoff W. Birrell, Bruce G. Ward, Pei-Xiang Xing, and Ian F. C. McKenzie* 593

Malonyl-CoA Inhibits Proteolysis of Carnitine Palmitoyltransferase *Khosrow Kashfi and George A. Cook* 600

Single Base Mutation in the Hormone Binding Domain of the Thyroid Hormone Receptor β Gene in Generalized Thyroid Hormone Resistance Demonstrated by Single Stranded Conformation Polymorphism Analysis *C. V. Boothroyd, B. T. Teh, N. K. Hayward, P. E. Hickman, G. J. Ward, and D. P. Cameron* 606

Binding Specificity of Human Nuclear Protein Interacting with the Alu-Family DNA Repeats *Igor Chesnokov, Valerii Bozhkov, Boris Popov, and Nikolai Tomilin* 613

Changes in Fibronectin mRNA Splicing with *in Vitro* Passage
Elizabeth M. Burke and David B. Danner 620

Purification and Characterization of Human Recombinant Insulin-like Growth Factor Binding Protein 3 Expressed in Chinese Hamster Ovary Cells
Timothy J. Tressel, Gwen P. Tatsuno, Kaye Spratt, and Andreas Sommer 625

Crystallization and Preliminary X-Ray Diffraction Studies of Recombinant Rabbit Interferon-γ *Cleopas T. Samudzi, Cynthia L. Gribskov, L. E. Burton, and J. Ronald Rubin* 634

Regulation of Arachidonic Acid Metabolism by Phenylarsine Oxide
Lawrence Levine 641

Glucose Utilization by Tumor Cells: A Post-translational Modification of Mitochondrial Hexokinase May Play a Regulatory Role *Marco G. Paggi, Maurizio Fanciulli, Carlo Del Carlo, Gennaro Citro, Tiziana Bruno, and Aristide Floridi* 648

Cloning and Functional Expression of Human cDNA for the ET_B Endothelin Receptor
Aiji Sakamoto, Masashi Yanagisawa, Takeshi Sakurai, Yoh Takuwa, Hiromi Yanagisawa, and Tomoh Masaki 656

Expression of Mouse Tyrosine Hydroxylase in *Escherichia coli*
Shinichi Ichikawa, Shamima Nasrin, and Toshiharu Nagatsu 664

Kinetic Studies of Human Polymorphonuclear Leukocyte Phosphofructokinase
Gilberto Campos, Elena Ryder, Luz Marina Morales, and Xiomara Raleigh 672

A Metabolite of Halothane Covalently Binds to an Endoplasmic Reticulum Protein That Is Highly Homologous to Phosphatidylinositol-Specific Phospholipase C-α but Has No Activity *Jackie L. Martin, Neil R. Pumford, Angela C. LaRosa, Brian M. Martin, Heloisa M. S. Gonzaga, Michael A. Beaven, and Lance R. Pohl* 679

Bufalin as a Potent Inducer of Differentiation of Human Myeloid Leukemia Cells
Lisha Zhang, Kazuyasu Nakaya, Takemi Yoshida, and Yukio Kuroiwa 686

Interleukin-4 Blocks Parathyroid Hormone-Related Protein-Induced Hypercalcemia *in Vivo* *Koichi Nagasaki, Ken Yamaguchi, Kenichi Watanabe, Sumiya Eto, and Kaoru Abe* 694

Epitope Mapping of the Receptor-Bound Agonistic Form of Human Chorionic Gonadotropin (hCG) in Comparison to the Antagonistic Form (Deglycosylated hCG) *Siegfried Schwarz, Heiko Krude, Wolfgang E. Merz, Clemens Lottersberger, Georg Wick, and Peter Berger* 699

Effect of a New V_1 Antagonist (OPC-21268) on Vascular Action of Vasopressin in Cultured Rat Vascular Smooth Muscle Cells
Koji Okada, San-e Ishikawa, and Toshikazu Saito 707

Ba^{2+} Current Oscillation Evoked by Bradykinin in *ras*-Transformed Fibroblasts
Haruhiro Higashida, Naoto Hoshi, Minako Hashii, Tao Fu, Mami Noda, and Yoshinori Nozawa 713

Kinetic Determination of Talin-Actin Binding
W. H. Goldmann and G. Isenberg 718

Transactivation of the TPA-Responsive Element by the Oncogenic C-*erbB*-2 Protein Is Partly Mediated by Protein Kinase C *Akiko Fujimoto, Sumio Kai, Tetsu Akiyama, Kumao Toyoshima, Kozo Kaibuchi, Yoshimi Takai, and Tadashi Yamamoto* 724

Role of N-Terminal Region of the Thyrotropin (TSH) Receptor in Signal Transduction for TSH or Thyroid Stimulating Antibody *M. Ohmori, T. Endo, M. Ikeda, and T. Onaya* 733

Expression of a Mouse Tyrosinase cDNA in 3T3 Swiss Mouse Fibroblasts *Alison J. Winder* 739

Isolation of a cDNA Clone, Encoding a Human β-Galactoside Binding Protein, Overexpressed during Glucocorticoid-Induced Cell Death *Sherilyn D. Goldstone and Martin F. Lavin* 746

Subtypes of Protein Kinase C in Isolated Nerve Growth Cones: Only Type II Is Associated with the Membrane Skeleton from Growth Cones *Michihiro Igarashi and Yoshiaki Komiya* 751

Inhibitory Effect of Okadaic Acid on Bone Resorption in Neonatal Mouse Calvaria *in Vitro*: Protein Dephosphorylation as an Important Regulatory Mechanism in the Bone Resorption Process *Jean H. M. Feyen and Geneviève M. M. Kuntzelmann* 758

Novel Serine Phosphorylation Occurs in the Fibroblast Form of pp60$^{c\text{-}src}$ from Y79 Retinoblastoma Cells *Goro Kato and Kazuhiko Wakabayashi* 764

Topological Regulation of Cell-Membrane Phosphoinositidase C *St. N. Constantinescu and L. M. Popescu* 773

Comparative Effects of Epidermal Growth Factor and Carbachol on Phosphoinositide Synthesis and Breakdown in Pancreatic Acinar Cells *Bruce R. Conway, Suzanne G. Laychock, and Ronald P. Rubin* 780

Pertussis Toxin Blocks Melatonin-Induced Inhibition of Forskolin-Stimulated Adenylate Cyclase Activity in the Chick Brain *L. P. Niles, M. Ye, D. S. Pickering, and S-W. Ying* 786

Molecular Cloning of cDNA for the Import Precursor of Human Coupling Factor 6 of H^+-ATP Synthase in Mitochondria *T. Higuti, C. Tsurumi, Y. Kawamura, H. Tsujita, F. Osaka, Y. Yoshihara, I. Tani, K. Tanaka, and A. Ichihara* 793

ERRATUM

Volume 177, Number 1, May 31, 1991: Sachiko Murase, Jun S. Takagi, Yasuyuki Higashi, Hiromasa Imaishi, Noboru Yumoto, and Masanobu Tokushige, "Activation of Aspartase by Site-Directed Mutagenesis," pp. 414–419 800

Masayuki Nashimoto, Masaharu Sakai, and Shinzo Nishi 1247

Carbohydrate Analysis of Human von Willebrand Factor with Horseradish Peroxidase-Conjugated Lectins *Taei Matsui, Chisato Kihara, Yoshihiro Fujimura, Tsuguo Mizuochi, and Koiti Titani* 1253

Identification of the Peroxidation Product Hydroxystearic Acid in Lewis Lung Carcinoma Cells *G. Cavalli, E. Casali, A. Spisni, and L. Masotti* 1260

Biphasic Rise Caused by Extracellular ATP in Intracellular Calcium Concentration in Bovine Adrenocortical Fasciculata Cells *Takashi Matsui* 1266

Photoisomerization of Retinal at 13-Ene Is Important for Phototaxis of *Chlamydomonas reinhardtii*: Simultaneous Measurements of Phototactic and Photophobic Responses *Tetsuo Takahashi, Kazuo Yoshihara, Masakatsu Watanabe, Mamoru Kubota, Randy Johnson, Fadila Derguini, and Koji Nakanishi* 1273

Scanning Tunnelling Microscopy of 16S Ribosomal RNA in Water *Eric Lesniewska, Pierre-Jacques Flamion, Claire Cachia, Jean-Pierre Schreiber, and Jean-Pierre Goudonnet* 1280

Sequence Analysis of the Ryanodine Receptor: Possible Association with a 12K, FK506-Binding Immunophilin/Protein Kinase C Inhibitor *John H. Collins* 1288

Identification of Skeletal Muscle Protein–Tyrosine Phosphatases by Amplification of Conserved cDNA Sequences *Wei-Ren Zhang and Barry J. Goldstein* 1291

Type II Phospholipase A_2 Recombinant Overexpression Enhances Stimulated Arachidonic Acid Release *Patrick Pernas, Joëlle Masliah, Jean-Luc Olivier, Colette Salvat, Tania Rybkine, and Gilbert Bereziat* 1298

Cyclic Phosphorylation–Dephosphorylation of Rhodopsin in Retina by Protein Kinase FA (the Activator of ATP•Mg-Dependent Protein Phosphatase) *Shiaw-Der Yang, Jeffrey L. Benovic, Yiu-Lian Fong, Marc G. Caron, and Robert J. Lefkowitz* 1306

Connexon Integrity Is Maintained by Noncovalent Bonds: Intramolecular Disulfide Bonds Link the Extracellular Domains in Rat Connexin-43 *Scott A. John and Jean-Paul Revel* 1312

Detection of Allele-Specific Transcripts by the Polymerase Chain Reaction (AST-PCR) *Bert Top, Nicolle van den Boorn, André van der Zee, Louis M. Havekes, and Rune R. Frants* 1319

Expression of the p80 Region of Bovine Viral Diarrhea Virus and Identification of Specific Antibodies to this Recombinant Protein in Bovine Sera *J. Kwang, S. Bolin, E. T. Littledike, E. J. Dubovi, and R. O. Donis* 1326

Halo Enol Lactone Inhibitors of Chymotrypsin: Burst and Enantioselectivity of Inhibition *Du-Jong Baek and John A. Katzenellenbogen* 1335

Tumorigenesis of a v-Ha-*ras*-Expressing Pre-B Cell Line Selects for c-*myc* Activation *Shu-Chih Chen, Diane Redenius, and Richard C. Schwartz* 1343

Selective *in Vitro* Inhibition of Human MOLT-4 T Lymphoblasts by the Novel Purine Nucleoside Phosphorylase Inhibitor, CI-972 *Richard B. Gilbertsen, Mi K. Dong, Lynn M. Kossarek, Jagadish C. Sircar, Catherine R. Kostlan, and Mary Carol Conroy* 1351

Protein Phosphorylation by Inorganic Pyrophosphate in Yeast Mitochondria *Lucia Pereira da Silva, Marika Lindahl, Maria Lundin, and Herrick Baltscheffsky* 1359

The Presence of *N*-Glycosylated Proteins in Cell Nuclei
A. Ferraro, P. Grandi, M. Eufemi, F. Altieri, L. Cervoni, and C. Turano 1365

Human Liver Class III Alcohol- and Glutathione-Dependent Formaldehyde Dehydrogenase Are the Same Enzyme *Barton Holmquist and Bert L. Vallee* 1371

Lysophosphatidylcholine as a Possible Second Messenger Synergistic to Diacylglycerol and Calcium Ion for T-Lymphocyte Activation *Yoshinori Asaoka, Masahiro Oka, Kimihisa Yoshida, and Yasutomi Nishizuka* 1378

Molecular Cloning of the Human Histamine H2 Receptor *Ira Gantz, Gerd Munzert, Takao Tashiro, Matthias Schäffer, Lidong Wang, John DelValle, and Tadataka Yamada* 1386

Identification of Tyrosine 67 in Bovine Brain Myelin Basic Protein as a Specific Phosphorylation Site for Thymus $p56^{lck}$ *Qingmei Wang, Jean B. Smith, Marietta L. Harrison, and Robert L. Geahlen* 1393

Initial Characterization of the Carbohydrate Structure of MCP-1
Yanling Jiang, Lawrence A. Tabak, Anthony J. Valente, and Dana T. Graves 1400

Bioelimination and Organ Retention Profile of Benzanthrone in Scorbutic and Nonscorbutic Guinea Pigs *Mukul Das, Kalpana Garg, Giriraj B. Singh, and Subhash K. Khanna* 1405

Deletion-Mutant Epidermal Growth Factor Receptor in Human Gliomas: Effect of Type II Mutation on Receptor Function *Peter A. Humphrey, Lisa M. Gangarosa, Albert J. Wong, Gerald E. Archer, Morten Lund-Johansen, Rolf Bjerkvig, Ole-Didrik Laerum, Henry S. Friedman, and Darell D. Bigner* 1413

Characterization of N- and C-Terminal Deletion Mutants of the Rat Serotonin HT2 Receptor in *Xenopus laevis* Oocytes *Friedrich Buck, Wolfgang Meyerhof, Helmut Werr, and Dietmar Richter* 1421

Characterization of Mucin-Type Oligosaccharides with the Sialyl-Le^a Structure from Human Colorectal Adenocarcinoma Cells *Hiroshi Kitagawa, Hiroshi Nakada, Shigeyuki Fukui, Toshisuke Kawasaki, and Ikuo Yamashina* 1429

Study of *O*-Glycan Sialylation in C6 Cultured Glioma Cells: Evidence for Posttranslational Regulation of β-Galactoside α2,3 Sialyltransferase Activity by *N*-Glycosylation *Pierre Broquet, Pascal George, Jocelyne Geoffroy, Pascal Reboul, and Pierre Louisot* 1437

17R(18S)Epoxyeicosatetraenoic Acid, a Cytochrome P450 Metabolite of 20:5n-3 in Monkey Seminal Vesicles, Is Metabolized to Novel Prostaglandins
Ernst H. Oliw 1444

Stimulation of Autocrine Platelet-Derived Growth Factor AA-Homodimer and Transforming Growth Factor β in Vascular Smooth Muscle Cells
Alfred W. A. Hahn, Therese J. Resink, Jens Bernhardt, Fabrizia Ferracin, and Fritz R. Bühler 1451

Structural and Immunological Evidence for the Identity of Prolyl Aminopeptidase with Leucyl Aminopeptidase *Masashi Matsushima, Takayuki Takahashi, Masao Ichinose, Kazumasa Miki, Kiyoshi Kurokawa, and Kenji Takahashi* 1459

Modulation of Gene Expression by High and Low Density Lipoproteins in Human Vascular Smooth Muscle Cells *Alfred W. A. Hahn, Fabrizia Ferracin, Fritz R. Bühler, and Alfred Pletscher* 1465

An Endonuclease Activity in Human Polymorphonuclear Neutrophils That Removes 8-Hydroxyguanine Residues from DNA *Myung-Hee Chung, Hun-Sik Kim, Eiko Ohtsuka, Hiroshi Kasai, Fuyumi Yamamoto, and Susumu Nishimura* 1472

Molecular Cloning of Human Platelet Thromboxane A Synthase *Chieko Yokoyama, Atsuro Miyata, Hayato Ihara, Volker Ullrich, and Tadashi Tanabe* 1479

Elevated Levels of c-*jun* and c-*fos* Transcripts in the Aged Rat Liver *Toshiko Fujita and Naoki Maruyama* 1485

Effects of Somatostatin-14 and Its Analogs on the (Ca,Mg)ATPase in the Rat Anterior Pituitary *A. Lachowicz and M. Pawlikowski* 1492

Expression and Functional Characterization of a Soluble Form of Vascular Cell Adhesion Molecule 1 *Roy Lobb, Gloria Chi-Rosso, Diane Leone, Margaret Rosa, Barbara Newman, Stefan Luhowskyj, Lauralee Osborn, Susan Schiffer, Christopher Benjamin, Irene Dougas, Catherine Hession, and Pingchang Chow* 1498

Detection of 14-kDa Group II Phospholipase A_2 in Human Seminal Plasma *Kiyoshi Takayama, Shuntaro Hara, Ichiro Kudo, and Keizo Inoue* 1505

Author Index for Volume 178 1512

Volume 179, Number 1, August 30, 1991

Cosecretion of Amylin and Insulin from Cultured Islet β-Cells: Modulation by Nutrient Secretagogues, Islet Hormones, and Hypoglycemic Agents *Candace X. Moore and Garth J. S. Cooper* 1

Distinct Mode of G Protein Activation Due to Single Residue Substitution of Active IGF-II Receptor Peptide Arg^{2410}–Lys^{2423}: Evidence for Stimulation Acceptor Region Other than C-Terminus of Giα *Takashi Okamoto, Yoshihiro Ohkuni, Etsuro Ogata, and Ikuo Nishimoto* 10

HIV-1 Proteinase Is Required for Synthesis of Pro-viral DNA *Christina Baboonian, Angus Dalgleish, Lynne Bountiff, Jackie Gross, Stephen Oroszlan, Graham Rickett, Caroline Smith-Burchnell, Peter Troke, and James Merson* 17

Quantitative Measurement of Extrarenal Renin mRNA by Polymerase Chain Reaction *Takafumi Okura, Yutaka Kitami, Takeru Iwata, and Kunio Hiwada* 25

Retinoic Acid Receptor Transcripts in Human Umbilical Vein Endothelial Cells *Laszlo Fesus, Laszlo Nagy, James P. Basilion, and Peter J. A. Davies* 32

Glutamate Triggers Internucleosomal DNA Cleavage in Neuronal Cells *Shigeo Kure, Teiji Tominaga, Takashi Yoshimoto, Keiya Tada, and Kuniaki Narisawa* 39

2,3,7,8-Tetrachlorodibenzo-*p*-dioxin as a Possible Activator of HIV Infection
Andrey G. Pokrovsky, Antonina I. Cherykh, Olga N. Yastrebova, and Ilya B. Tsyrlov 46

Hepoxilin A_3 Induces Heat Shock Protein (HSP^{72}) Expression in Human Neutrophils
Zheng Lin, Odette Laneuville, and Cecil R. Pace-Asciak 52

Antiproliferative Effect of 1,25-Dihydroxyvitamin D_3 and Its Analogs on Human Colon Adenocarcinoma Cells (CaCo-2): Influence of Extracellular Calcium
Heide S. Cross, Christine Huber, and Meinrad Peterlik 57

Cathepsin B and L Activities in Isolated Osteoclasts
Barry R. Rifkin, Anthony T. Vernillo, Audrey P. Kleckner, Jeanine M. Auszmann, Linda R. Rosenberg, and Morris Zimmerman 63

Immunoglobulins from Graves' Disease Patients Interact with Different Sites on TSH Receptor/LH-CG Receptor Chimeras than either TSH or Immunoglobulins from Idiopathic Myxedema Patients
Kazuo Tahara, Toshiaki Ban, Takashi Minegishi, and Leonard D. Kohn 70

Compound Heterozygosity for Mutant Hepatic Lipase in Familial Hepatic Lipase Deficiency *Robert A. Hegele, J. Alick Little, and Philip W. Connelly* 78

Inhibition of Bovine Brain Calmodulin-Dependent cGMP Phosphodiesterase by Peptide and Nonpeptide Angiotensin Receptor Ligands
R. K. Sharma, J. R. Smith, and G. J. Moore 85

Effects of Androgen on Intracellular Calcium of LNCaP Cells
Jaime Steinsapir, Robin Socci, and Peter Reinach 90

The Activation of cAMP-Dependent Protein Kinase Is Directly Linked to the Inhibition of Osteoblast Proliferation (UMR-106) by Parathyroid Hormone-Related Protein
Junichi Kano, Toshitsugu Sugimoto, Masaaki Fukase, and Takuo Fujita 97

Relationship between the Neural Dysgenesis and Increased Production of Class I MHC H-$2K^k$ mRNA and Protein in Neurons of Murine Trisomy 16 Fetuses
Steven Kornguth, Kenneth J. Mack, and Edward Bersu 102

Insulin-like Growth Factor II Overexpression Does Not Affect Sorting of Lysosomal Enzymes in NIH-3T3 Cells *Thomas Braulke, Roberto Bresciani, Daniel M. Buergisser, and Kurt von Figura* 108

Murine Osteogenic Protein (OP-1): High Levels of mRNA in Kidney
Engin Özkaynak, Patrick N. J. Schnegelsberg, and Hermann Oppermann 116

Evidence for a Structural Mutation (^{347}Ala to Thr) in a German Family with 3-Ketothiolase Deficiency *Toshiyuki Fukao, Seiji Yamaguchi, Shunji Tomatsu, Tadao Orii, George Frauendienst-Egger, Lothar Schrod, Takashi Osumi, and Takashi Hashimoto* 124

The Inhibitory Effect of [D-Arg^1,D-Phe,D-$Try^{7,9}$,Leu^{11}] Substance P on Endothelin-1 Binding Sites in Rat Cardiac Membranes
Xin Hua Gu, David J. Casley, and Winifred G. Nayler 130

Selective Antagonism of Calcitonin-Induced Osteoclastic Quiescence (Q Effect) by Human Calcitonin Gene-Related Peptide (Val^8Phe^{37})
A. S. M. Towhidul Alam, Baljit S. Moonga, Peter J. R. Bevis, Christopher L-H. Huang, and Mone Zaidi 134

Mast Cell Exocytosis: Evidence That Granule Proteoglycan Processing Is Not Coupled to Degranulation
Stephen J. Ruoss, Warren M. Gold, and George H. Caughey 140

The Peroxidase-Catalyzed Oxidation of Enkephalins
M. A. Rosei, C. Blarzino, C. Foppoli, R. Coccia, and C. De Marco 147

Differentiation of Murine Erythroleukemia Cells by Hexamethylenebisacetamide Involves Secretion and Binding to Membranes of a Differentiation Enhancing Factor *Bianca Sparatore, Mauro Patrone, Mario Passalacqua, Edon Melloni, and Sandro Pontremoli* 153

High Density Lipoprotein Cholesterol as a Mechanistic Probe for the Side Chain Cleavage Reaction *Mikako Takeshima and Takayuki Hara* 161

Complementary DNA Sequence of Rabbit CAP18—A Unique Lipopolysaccharide Binding Protein *James W. Larrick, John G. Morgan, Ilona Palings, Michimasa Hirata, and Michael H. Yen* 170

Vasoactive Intestinal Peptide Receptors on AR42J Rat Pancreatic Acinar Cells
Matthew J. Raymond and Steven A. Rosenzweig 176

Cloning and Sequencing of cDNA Encoding Human Sepiapterin Reductase: An Enzyme Involved in Tetrahydrobiopterin Biosynthesis
Hiroshi Ichinose, Setsuko Katoh, Terumi Sueoka, Koiti Titani, Keisuke Fujita, and Toshiharu Nagatsu 183

Isolation and Sequencing of a cDNA Clone Encoding Rat Liver Lysosomal Cathepsin D and the Structure of Three Forms of Mature Enzymes
Hideaki Fujita, Yoshitaka Tanaka, Youichiro Noguchi, Akira Kono, Masaru Himeno, and Keitaro Kato 190

o-Hydroxyphenylacetaldehyde: A Major Novel Metabolite of Coumarin Formed by Rat, Gerbil, and Human Liver Microsomes
J. H. Fentem, J. R. Fry, and D. A. Whiting 197

Effect of Antiserum to a 99-kDa Polypeptide on the Uptake of Taurocholic Acid by Rat Ileal Brush Border Membrane Vesicles *Yong-Zhong Gong, Peter P. Zwarych, Jr., Marie C. Lin, and Frederick A. Wilson* 204

Production and Analyses of Transgenic Mice with Ectopic Expression of Cellular Retinoic Acid-Binding Protein *Li-Na Wei and Gee-Jang Chen* 210

Nerve Growth Factor Binds to the 140-kDa *trk* Proto-oncogene Product and Stimulates Its Association with the *src* Homology Domain of Phospholipase C γ1
Masahide Ohmichi, Stuart J. Decker, Long Pang, and Alan R. Saltiel 217

Na^+-Coupled ATP Synthesis in a Mutant of *Vibrio parahaemolyticus* Lacking H^+-Translocating ATPase Activity
Yuki Sakai-Tomita, Masaaki Tsuda, and Tomofusa Tsuchiya 224

Temporal Regulation of Tobacco Mosaic Virus-Induced Phosphorylation of a Host Encoded Protein *Jie Hu and Don Roth* 229

Effect of Parathyroid Hormone on Release of Interleukin 1 and Interleukin 6 from Cultured Mouse Osteoblastic Cells *Ninghua Li, Yasuyoshi Ouchi, Yasushi Okamoto, Akihiro Masuyama, Masao Kaneki, Akira Futami, Takayuki Hosoi, Tetsuro Nakamura, and Hajime Orimo* 236

Inhibition of Human Immunodeficiency Virus Type-1-Induced Synctium Formation and Cytopathicity by Complestatin *Kenji Momota, Isao Kaneko, Satoshi Kimura, Keiji Mitamura, and Kaoru Shimada* 243

Illegitimate Recombination in a Bovine Papillomavirus Shuttle Vector: A High Level of Site Specificity *Y. Kitamura, A. Naito, and H. Yoshikura* 251

Fluorescent and Photoaffinity Labeling Probes for Retinoic Acid Receptors
Rumiko Shimazawa, Rie Sanda, Hidetoshi Mizoguchi, Yuichi Hashimoto, Shigeo Iwasaki, Hideo Tanaka, Hiroyuki Kagechika, and Koichi Shudo 259

Two Receptor Binding Regions of Human FSH Show Sense–Antisense Similarity to the Human FSH Receptor *Jerry W. Slootstra and Eric W. Roubos* 266

Overexpression of a β-Galactoside Binding Protein Causes Transformation of BALB3T3 Fibroblast Cells
Kazuko Yamaoka, Shigeo Ohno, Hiroshi Kawasaki, and Koichi Suzuki 272

A Novel Cationic Liposome Reagent for Efficient Transfection of Mammalian Cells
Xiang Gao and Leaf Huang 280

[Ala^{1,3,11,15}]Endothelin-1 Analogs with ET_B Agonistic Activity
Toshihiko Saeki, Masaki Ihara, Takahiro Fukuroda, Miho Yamagiwa, and Mitsuo Yano 286

SF-B That Binds to a Negative Element in Glutathione Transferase P Gene Is Similar or Identical to *Trans*-activator LAP/IL6-DBP *Masayoshi Imagawa, Shigehiro Osada, Yumi Koyama, Toshiya Suzuki, Paul C. Hirom, Mitchell B. Diccianni, Shigeru Morimura, and Masami Muramatsu* 293

Purification of Large Neuromedin N (NMN) from Canine Intestine and Its Identification as NMN-125 *Robert E. Carraway and Sankar P. Mitra* 301

Neuropeptide Y Stimulates Prostacyclin Production in Porcine Vascular Endothelial Cells *Koji Kawamura, Qi Zhou, Terrance L. Smith, and Fred A. Kummerow* 309

The Primary Structure of Rat Ribosomal Protein S28
Yuen-Ling Chan, Joe Olvera, and Ira G. Wool 314

Prokaryotic Expression of the Thyrotropin Receptor and Identification of an Immunogenic Region of the Protein Using Synthetic Peptides
Osamu Takai, Rajesh K. Desai, G. S. Seetharamaiah, Craig A. Jones, Graham P. Allaway, Takashi Akamizu, Leonard D. Kohn, and Bellur S. Prabhakar 319

β-Agonists Modulate ACh-Inhibition of a K Current in Intestinal Smooth Muscle Cells *Tadahito Shimada, Eiji Hamada, Akira Terano, Tsuneaki Sugimoto, and Yoshihisa Kurachi* 327

The Effect of Extracellular Matrix Interactions on Morphologic Transformation *in Vitro* *Kenneth J. Pienta, Brian C. Murphy, Robert H. Getzenberg, and Donald S. Coffey* 333

Modifications of the Intermediate Filament and Nuclear Matrix Networks by the Extracellular Matrix *Robert H. Getzenberg, Kenneth J. Pienta, Edwin Y. W. Huang, Brian C. Murphy, and Donald S. Coffey* 340

12-*S*-Hydroxyeicosatetraenoic Acid Plays a Central Role in the Regulation of Platelet Activation *Fujio Sekiya, Junichi Takagi, Tomoko Usui, Keiko Kawajiri, Yuichi Kobayashi, Fumie Sato, and Yuji Saito* 345

Site-Specific Mutagenesis of Human Follistatin
Satoshi Inouye, Yili Guo, Nicholas Ling, and Shunichi Shimasaki 352

The Contribution of the Macrophage Receptor for Oxidized LDL to Its Cellular Uptake
Michael Aviram 359

^{13}C NMR Study of Hepatic Pyruvate Carboxylase Activity in Tumor Rats
Katherine J. M. Liu, Robert Kleps, Thomas Henderson, and Lloyd Nyhus 366

A Human Fab Fragment Specific for Thyroid Peroxidase Generated by Cloning Thyroid Lymphocyte-Derived Immunoglobulin Genes in a Bacteriophage λ Library *Stefano Portolano, Pui Seto, Gregorio D. Chazenbalk, Yuji Nagayama, Sandra M. McLachlan, and Basil Rapoport* 372

Expression of a New Type of High Molecular Weight Receptor (Type V Receptor) of Transforming Growth Factor β in Normal and Transformed Cells *Pauline O'Grady, Shuan Shian Huang, and Jung San Huang* 378

^{1}H NMR Study of the Sugar Pucker of 2',3'-Dideoxynucleosides with Anti-human Immunodeficiency Virus (HIV) Activity *B. Jagannadh, D. V. Reddy, and A. C. Kunwar* 386

Insulin-Sensitive Myelin Basic Protein Phosphorylation on Tyrosine Residues *Sung-Jin Kim, Helen Kim, and Dennis J. Pillion* 392

Evidence That the Signal-Initiating Membrane Protein CD9 Is Associated with Small GTP-Binding Proteins *Jutta G. Seehafer and Andrew R. E. Shaw* 401

Characterization of a Full-Length cDNA Which Codes for the Human Spermidine/Spermine N^1-Acetyltransferase *Lei Xiao, Paul Celano, Amy R. Mank, Anthony E. Pegg, and Robert A. Casero, Jr.* 407

Glucuronosyl Transfer to Galactose Residues in the Biosynthesis of HNK-1 Antigens and Xylose-Containing Glycosaminoglycans: One or Two Transferases? *Tracy Curenton, Göran Ekborg, and Lennart Rodén* 416

Overexpression of the Actin Gene Is Associated with the Morphogenesis of *Candida albicans* *Vijay Paranjape and Asis Datta* 423

Cloning and Characterization of a Lignin Peroxidase Gene from the White-Rot Fungus *Trametes versicolor* *Andrew K. Black and C. A. Reddy* 428

1-Bromoalkanes as New Potent Nontoxic Glutathione Depletors in Isolated Rat Hepatocytes *Sumsullah Khan and Peter J. O'Brien* 436

Inactivation of Ribonucleotide Reductase by Nitric Oxide *Michel Lepoivre, Franck Fieschi, Jacques Coves, Lars Thelander, and Marc Fontecave* 442

Post-translational Reduction of Cytochrome P450IIE by CCl_4, Its Substrate *Dong Hwan Sohn, Yeo-Pyo Yun, Kwang Sik Park, Richard L. Veech, and Byoung J. Song* 449

Sequence of a Human Brain Adenylyl Cyclase Partial cDNA: Evidence for a Consensus Cyclase Specific Domain *Jasmine Parma, Dominique Stengel, Marie-Hélène Gannage, Madeleine Poyard, Robert Barouki, and Jacques Hanoune* 455

cAMP-Dependent Phosphorylation of RER Proteins from Rat Liver: Relationship with GTP-Dependent Membrane Fusion *Joël Lanoix and Jacques Paiement* 463

Transmembrane Signalling by the *N*-Formyl Peptide Receptor in Stably Transfected Fibroblasts *Eric R. Prossnitz, Oswald Quehenberger, Charles G. Cochrane, and Richard D. Ye* 471

Examination of an Area in β-Hexosaminidase B Homologous to That in Cathepsin D Linked to Lysosomal Targeting *Carmelina Sagherian and Don Mahuran* 477

Electrophoretic Separation of *S. Pombe* Chromosomes in Polyacrylamide Solutions Using a Constant Field *Tadeusz Guszczynski and Andreas Chrambach* 482

Involvement of Protein Kinase C in Ca^{2+}-Independent Contraction of Rat Uterine Smooth Muscle *Hideji Karibe, Kazuhiko Oishi, and Masaatsu K. Uchida* 487

Presence of IDF45 (mIGFBP-3) Binding Sites on Chick Embryo Fibroblasts *J. Delbé, C. Blat, G. Desauty, and L. Harel* 495

Excitation–Contraction Uncoupling during Ischemia in the Blood-Perfused Dog Heart *Marc J. Levine, Kazumasa Harada, Arthur J. Meuse, Jun Watanabe, Jeffrey Breall, Joseph P. Carrozza, Lisa Bentivegna, Alvin Franklin, Robert G. Johnson, William Grossman, and James P. Morgan* 502

Inhibitory Effects of Dicyclohexylcarbodiimide on Spinach Cytochrome b_6f Complex *Liang-Bi Li, Linda Yu, and Chang-An Yu* 507

The Presence of Sequence-Specific Protein Binding Sites Correlates with Replication Activity and Matrix Binding in a 1.7-kb-Long DNA Fragment of the Chicken α-Globin Gene Domain *C. V. de Moura Gallo, Y. S. Vassetzky, F. Recillas Targa,G. P. Georgiev, K. Scherrer, and S. V. Razin* 512

Monitoring of Enzymatic Activity *in Situ* by EPR *Valery V. Khramtsov, Tatyana E. Gorunova, and Lev M. Weiner* 520

Cooperative Effect of Antisense-Rb and Antisense-p53 Oligomers on the Extension of Life Span in Human Diploid Fibroblasts, TIG-1 *Eiji Hara, Hiromichi Tsurui, Ayako Shinozaki, Susumu Nakada, and Kinichiro Oda* 528

Characterization of Immunoreactive Human C-Type Natriuretic Peptide in Brain and Heart *Naoto Minamino, Yasuhiro Makino, Hitone Tateyama, Kenji Kangawa, and Hisayuki Matsuo* 535

Synthesis and Secretion of Cobalamin Binding Proteins by Opossum Kidney Cells *Kalathur S. Ramanujam, Shakuntla Seetharam, and Bellur Seetharam* 543

Tyrosine Kinase-Dependent Phosphatidylinositol Turnover and Functional Responses in the FcεR1 Signalling Pathway *Grace G. Deanin, A. Marina Martinez, Janet R. Pfeiffer, Mary E. Gardner, and Janet M. Oliver* 551

Energy Transfer Kinetics in C-Phycocyanin from Cyanobacterium *Westiellopsis prolifica* Studied by Pump-Probe Techniques *A. D. Xia, J. C. Zhu, L. J. Jiang, D. L. Li, and X. Y. Zhang* 558

Gene Structure of Heat Shock Proteins 61 and 12 kDa (Thermophilic Chaperonins) of Thermophilic Bacterium PS3 *Hiroshi Tamada, Toshiko Ohta, Toshiro Hamamoto, Yoko Otawara-Hamamoto, Miyoko Yanagi, Hiromi Hiraiwa, Hajime Hirata, and Yasuo Kagawa* 565

Amphiregulin-Associated Protein: Complete Amino Acid Sequence of a Protein Produced by the 12-*O*-Tetradecanoylphorbol-13-acetate-Treated Human Breast Adenocarcinoma Cell Line MCF-7 *Mohammed Shoyab, Vicki L. McDonald, Kenneth Dick, Brett Modrell, Najma Malik, and Gregory D. Plowman* 572

Intact but Not Truncated Insulin-like Growth Factor Binding Protein-3 (IGFBP-3) Blocks IGF I-Induced Stimulation of Osteoblasts: Control of IGF Signalling to Bone Cells by IGFBP-3-Specific Proteolysis? *Ch. Schmid, J. Rutishauser, I. Schläpfer, E. R. Froesch, and J. Zapf* 579

GM-CSF and IL-3 Stimulate Diacylglycerol Generation in Murine Bone Marrow-Derived Macrophages *Nurin Veis and John A. Hamilton* 586

Casein Kinase I in Bovine Sperm: Purification and Characterization
Prem S. Chaudhry, Peggy A. Newcomer, and Edmund R. Casillas 592

Apoprotein A-1 Is a Cofactor Independent Substrate of Protein Kinase C
Oksana Holian, Raj Kumar, and Bashar Attar 599

Kinetic Studies of the Electron Exchange Reaction between the Octaheme Cytochrome c_3 (M_r 26,000) and the Hydrogenase from *Desulfovibrio desulfuricans* Norway
J. Haladjian, P. Bianco, F. Guerlesquin, and M. Bruschi 605

Evidence for Sulfite as an Essential Metabolite for Human Peripheral Lymphocytes
Flora H. Pettit, Donna Lyon, James R. Brown, and William Shive 611

A Deficiency of Vitamin B_6 Is a Plausible Molecular Basis of the Retinopathy of Patients with Diabetes Mellitus *John M. Ellis, Karl Folkers, Michael Minadeo, Ronald VanBuskirk, Li-Jun Xia, and Hiroo Tamagawa* 615

An Efficient Method for Constructing a Chimeric Bacteriophage T4 to Estimate the Regulatory Signals *Toshitada Noguchi and Hideo Takahashi* 620

Interleukin 8-Inhibitor and Inducer of Histamine and Leukotriene Release in Human Basophils *Stephan C. Bischoff, Marco Baggiolini, Alain L. de Weck, and Clemens A. Dahinden* 628

Osteoblast–Osteoclast Relationships in Bone Resorption: Osteoblasts Enhance Osteoclast Activity in a Serum-Free Coculture System
Anna Teti, Maria Grano, Silvia Colucci, Francesco P. Cantatore, Maria C. Loperfido, and Alberta Zambonin Zallone 634

Inositol Tetrakisphosphates as Second Messengers Induce Ca^{2+}-Dependent Chloride Currents in *Xenopus laevis* Oocytes *Andreas H. Guse, Günther Gercken, Holger Boysen, Jürgen R. Schwarz, and Wolfgang Meyerhof* 641

Molecular Dissection of Cholinergic Binding Sites: How Do Snakes Escape the Effect of Their Own Toxins?
Bella Ohana, Yigal Fraenkel, Gil Navon, and Jonathan M. Gershoni 648

Cyclic AMP-Dependent Protein Kinase Phosphorylates Serine^{378} in Vitronectin
Julie H. Mehringer, Carolyne J. Weigel, and Douglas M. Tollefsen 655

Genistein Inhibition of the Growth of Human Breast Cancer Cells: Independence from Estrogen Receptors and the Multi-drug Resistance Gene
Greg Peterson and Stephen Barnes 661

The Monomer of Pyruvate Kinase, Subtype M_1, Is Both a Kinase and a Cytosolic Thyroid Hormone Binding Protein *Clifford Parkison, Kiyoto Ashizawa, Peter McPhie, Kwang-huei Lin, and Sheue-yann Cheng* 668

Initial Description of a Tumor Enhancing Activity (TEA) Produced by Murine Splenocytes *Wen H. Sun, Barbra Stebler, and William B. Ershler* 675

Purification of Recombinant Human Tumor Necrosis Factor Precursor from *Escherichia coli* *Yoshiyuki Tanabe, Katsuo Noguchi, Akinobu Morikawa, Den-Ichi Mizuno, and Gen-Ichiro Soma* 683

Acetaldehyde as a Substrate for Ethanol-Inducible Cytochrome P450 (CYP2E1)
Ylva Terelius, Carina Norsten-Höög, Tomas Cronholm, and Magnus Ingelman-Sundberg 689

Atrial Natriuretic Peptide Hormonal System in Plants
David L. Vesely and Amy T. Giordano 695

GLP-$1_{(7\text{-}36)}$Amide-Stimulated Insulin Secretion in Rat Islets Is Sodium Dependent *Tord Fridolf and Bo Ahrén* 701

Phosphorylase Kinase Activity in I/Strain Neonatal Skeletal Muscle with a Deficiency in α/α' Subunit mRNAs *Patrick K. Bender* 707

Volume 179, Number 2, September 16, 1991

Adhesion of Human Cancer Cells to Vascular Endothelium Mediated by a Carbohydrate Antigen, Sialyl Lewis A *Akiko Takada, Katsuyuki Ohmori, Naofumi Takahashi, Kiyotaka Tsuyuoka, Akihiro Yago, Koichi Zenita, Akira Hasegawa, and Reiji Kannagi* 713

The Protein Kinase C Inhibitor 1-(5-Isoquinolinesulfonyl)-2-methylpiperazine Dihydrochloride (H-7) Inhibits PMA-Induced Promiscuous Cytolytic Activity but Not Specific Cytolytic Activity by a Cloned Cytolytic T Lymphocyte *T. Kevin Howcroft and Richard R. Lindquist* 720

Okadaic Acid Interferes with Lipoprotein-Supported Corticosterone Production in Adrenal Cells *Salman Azhar, Hui Wang, Louisa Tsai, and Eve Reaven* 726

Displacement of Apolipophorin III from the Surface of Low Density Lipophorin by Human Apolipoprotein A-I *Hu Liu, Veronica Malhotra, and Robert O. Ryan* 734

Stabilization of the FK506 Binding Protein by Ligand Binding *Dorothy Marquis-Omer, Gautam Sanyal, David B. Volkin, Alice I. Marcy, H. Karen Chan, James A. Ryan, and C. Russell Middaugh* 741

The Effect of Vitamin D on Rat Intestinal Plasma Membrane Ca-Pump mRNA *Jay M. Zelinski, Donald E. Sykes, and Milton M. Weiser* 749

Enhancement by IL-1β and IFN-γ of Platelet Activation: Adhesion to Leukocytes via GMP-140/PADGEM Protein (CD62) *Naoko Todoroki, Yoshifumi Watanabe, Toshihiro Akaike, Yasuhiro Katagiri, Kenjiro Tanoue, Hiroh Yamazaki, Tsutomu Tsuji, Satoshi Toyoshima, and Toshiaki Osawa* 756

Expression of the Tn Antigen on T-Lymphoid Cell Line Jurkat *Hiroshi Nakada, Mizue Inoue, Nobuhiro Tanaka, Yoshito Numata, Hiroshi Kitagawa, Shigeyuki Fukui, and Ikuo Yamashina* 762

Binding of Radioiodinated SPECT Ligands to Transfected Cell Membranes Expressing Single Muscarinic Receptor Subtypes *Barry R. Zeeberg, Miriam S. Gitler, Jesse Baumgold, Rosanna A. de la Cruz, and Richard C. Reba* 768

The 5′-Triphosphates of 3′-Azido-3′-deoxythymidine and 2′,3′-Dideoxynucleosides Inhibit DNA Polymerase γ by Different Mechanisms *Shunji Izuta, Mineo Saneyoshi, Takeshi Sakurai, Motoshi Suzuki, Kiyohide Kojima, and Shonen Yoshida* 776

Molecular Characterization of the Interleukin-8 Receptor *M. Patricia Beckmann, William E. Munger, Carl Kozlosky, Tim VandenBos, Virginia Price, Stewart Lyman, Norma P. Gerard, Craig Gerard, and Douglas Pat Cerretti* 784

Role of Cysteine Residues in the Activity of Rat Glutathione Transferase P (7-7): Elucidation by Oligonucleotide Site-Directed Mutagenesis *Katsuto Tamai, Hongxie Shen, Shigeki Tsuchida, Ichiro Hatayama, Kimihiko Satoh, Akira Yasui, Atsushi Oikawa, and Kiyomi Sato* 790

Protection by Acidotic pH against Anoxia/Reoxygenation Injury to Rat Neonatal Cardiac Myocytes *John M. Bond, Brian Herman, and John J. Lemasters* 798

Preparation and Crystallization of Human Transthyretin (Prealbumin) Variants *L. K. Steinrauf, Youjia Cao, Jean Hamilton, Jill Murrell, Juris J. Liepnieks, and Merrill D. Benson* 804

Neutron Scattering Studies of Chromatosomes *Stan Lambert, Serge Muyldermans, John Baldwin, Josephine Kilner, Konrad Ibel, and Lode Wijns* 810

Different Effects of DNA Adducts Induced by Carcinogenic and Noncarcinogenic Azo Dyes on *in Vitro* DNA Synthesis *Misaki Kojima, Masakuni Degawa, Yoshiyuki Hashimoto, and Mariko Tada* 817

Antipeptide Antibodies Differentiate between Long and Short Isoforms of the D_2 Dopamine Receptor *Carol David, Markus Ewert, Peter H. Seeburg, and Sara Fuchs* 824

Local Formation and Degradation of Endothelin-1 in Guinea Pig Airway Tissues *Kazuhito Noguchi, Takahiro Fukuroda, Yukiko Ikeno, Hiroyasu Hirose, Yasuko Tsukada, Masaru Nishikibe, Fumihiko Ikemoto, Kenji Matsuyama, and Mitsuo Yano* 830

Effects of Successive Carbon Monoxide Exposures on Delayed Neuronal Death in Mice under the Maintenance of Normal Body Temperature *Hirohisa Ishimaru, Toshitaka Nabeshima, Akira Katoh, Hirotaka Suzuki, Taneo Fukuta, and Tsutomu Kameyama* 836

Purification of a Protease Inhibitor Which Controls Prophenoloxidase Activation in Hemolymph of *Locusta migratoria* (Insecta) *M. Brehélin, R. A. Boigegrain, L. Drif, and M. A. Coletti-Previero* 841

HIV-1 Reproduction Is Inhibited by Peptides Derived from the N- and C-Termini of HIV-1 Protease *Hans J. Schramm, Hideki Nakashima, Wolfgang Schramm, Hideko Wakayama, and Naoki Yamamoto* 847

Effect of Okadaic Acid on Hormone- and Mastoparan-Stimulated Phosphoinositide Turnover in Isolated Rat Hepatocytes *J. Adolfo García-Sáinz, Marina Macías-Silva, and M. Teresa Romero-Avila* 852

Decreased Carbon Centered and Hydrogen Radicals in Skeletal Muscle of Vitamin E Supplemented Rats *Midori Hiramatsu, Raymond D. Velasco, and Lester Packer* 859

Inhibitors of Poly(ADP-ribose) Polymerase Suppress Lipopolysaccharide-Induced Nitrite Formation in Macrophages *S. Hauschildt, P. Scheipers, and W. G. Bessler* 865

Bacterial Toxins Induce Heat Shock Proteins in Human Neutrophils *T. Hensler, M. Köller, J. E. Alouf, and W. König* 872

Quantitation of Mitochondrial DNA Carrying $tRNA^{Lys}$ Mutation in MERRF Patients *Yoshinori Tanno, Makoto Yoneda, Ikuya Nonaka, Keiko Tanaka, Tadashi Miyatake, and Shoji Tsuji* 880

Effect of Hyperbaric Oxygenation on Macrophage Function in Mice
Yoshihito Inamoto, Fumio Okuno, Kazuyoshi Saito, Yoshiya Tanaka, Kenichi Watanabe, Isao Morimoto, Uki Yamashita, and Sumiya Eto 886

Hydrogenosomal Succinate Thiokinase in *Tritrichomonas foetus* and *Trichomonas vaginalis* *Timothy M. Jenkins, Thomas E. Gorrell, Miklós Müller, and P. D. J. Weitzman* 892

Heterologous Expression of Active Manganese Peroxidase from *Phanerochaete chrysosporium* Using the Baculovirus Expression System
Elizabeth A. Pease, Steven D. Aust, and Ming Tien 897

^{1}H NMR Studies of Lipid Extracts of Rat Liver Mitochondria
Piero Pollesello, Ove Eriksson, Bjarne J. Kvam, Sergio Paoletti, and Nils-Erik Leo Saris 904

Transmembrane Signalling by Insulin via an Insulin Receptor Mutated at Tyrosines 1158, 1162, and 1163 *Ronit Rafaeloff, Betty A. Maddux, Antonio Brunetti, Paolo Sbraccia, Chin K. Sung, Rohit Patel, Dennis M. Hawley, and Ira D. Goldfine* 912

Identification of a Point Mutation in the Human Lysosomal α-Glucosidase Gene Causing Infantile Glycogenosis Type II *M. M. P. Hermans, E. de Graaff, M. A. Kroos, H. A. Wisselaar, B. A. Oostra, and A. J. J. Reuser* 919

Role of Carbohydrate in Rat Plasma Thiostatin: Deglycosylation Destroys Cysteine Proteinase Inhibition Activity
Michael E. Rusiniak, Gurrinder S. Bedi, and Nathan Back 927

The Toxic Moiety of the *Bacillus thuringiensis* Protoxin Undergoes a Conformational Change upon Activation
Christin T. Choma, Witold K. Surewicz, and Harvey Kaplan 933

The Effect of β-Aminopropionitrile on Elastin Gene Expression in Smooth Muscle Cell Cultures *Loretta E. Jackson, Barbara Faris, Bernice M. Martin, H. Vernon Jones, Celeste B. Rich, Judith A. Foster, and Carl Franzblau* 939

NADPH-Dependent Reduction of Amaranch in Liver Microsomes Characterized the Quantity of Low Spin Forms of Cytochrome P-450
Vladimir M. Shcherbakov, Yurii N. Dubrov, Elena N. Korneva, Lida D. Molchanova, Sergei Yu. Semenov, and Vjacheslav M. Devichensky 945

In Vivo Oxygen-17 Nuclear Magnetic Resonance for the Estimation of Cerebral Blood Flow and Oxygen Consumption *Toshiyuki Arai, Kenjiro Mori, Shin-ichi Nakao, Koji Watanabe, Koichi Kito, Motoo Aoki, Hiroko Mori, Shigehiro Morikawa, and Toshiro Inubushi* 954

Insulin-Stimulated Serine/Threonine Phosphorylation of the Insulin Receptor: Paucity of Threonine 1348 Phosphorylation *in Vitro* Indicates the Involvement of More than One Serine/Threonine Kinase *in Vivo* *T. S. Pillay and K. Siddle* 962

Comparison between α-Adrenergic- and K-Opioidergic-Mediated Inositol(1,4,5)P_3/Inositol(1,3,4,5)P_4 Formation in Adult Cultured Rat Ventricular Cardiomyocytes
Carlo Ventura, Carlo Guarnieri, Claudio Stefanelli, Corrado Cirielli, Edward G. Lakatta, and Maurizio C. Capogrossi 972

Serotonin Stimulates Calcium Influx in Isolated Rat Adrenal Zona Glomerulosa Cells
Eleanor Davies, Christopher R. W. Edwards, and Brent C. Williams 979

Thrombospondin Binds Normally to Glycoprotein IIIb Deficient Platelets
Beate Kehrel, Antje Kronenberg, Barbara Schwippert, Doris Niesing-Bresch, Ulrike Niehues, Diethelm Tschöpe, Jürgen van de Loo, and Kenneth J. Clemetson 985

Mitochondrial Uptake of Bridged Bismethylpyridinium Aldoximes and Induction of the "Petite" Phenotype in Yeast *Guy Dodin, Dietrich Averbeck, Pierre Demerseman, Sylvano Nocentini, and Jacques Dupont* 992

The Effect of Magnesium on Glycolysis of Permeabilized Ehrlich Ascites Tumor Cells
Federica I. Wolf, Donatella Bossi, and Achille Cittadini 1000

Characterization of a New Bioactive Protein from Bovine Seminal Fluid
R. Einspanier, A. Einspanier, F. Wempe, and K. H. Scheit 1006

Competitive Inhibition of T3 Binding to α_1 and β_1 Thyroid Hormone Receptors by Fatty Acids *Fiona R. M. van der Klis, E. D. L. Schmidt, H. C. van Beeren, and W. M. Wiersinga* 1011

The Influence of L-N^G-Nitroarginine on Field Stimulation Induced Contractions and Acetylcholine Release in Guinea Pig Isolated Tracheal Smooth Muscle
Sandra R. Brave, Adrian J. Hobbs, Alan Gibson, and John F. Tucker 1017

Age-Associated Accumulation of 8-Hydroxydeoxyguanosine in Mitochondrial DNA of Human Diaphragm *Mika Hayakawa, Keizo Torii, Satoru Sugiyama, Masashi Tanaka, and Takayuki Ozawa* 1023

Increment of α B-Crystallin mRNA in the Brain of Patient with Infantile-Type Alexander's Disease *Nobuhiko Ochi, Kazuto Kobayashi, Mitsuo Maehara, Atsuo Nakayama, Tamiko Negoro, Haruo Shinohara, Kazuyoshi Watanabe, Toshiharu Nagatsu, and Kanefusa Kato* 1030

Identification of a Diuretic Hormone of *Locusta migratoria*
Elisabeth Lehmberg, Ronald B. Ota, Kenji Furuya, David S. King, Shalom W. Applebaum, Hans-Jörg Ferenz, and David A. Schooley 1036

Hepatocyte Growth Factor Modulates Migration and Proliferation of Human Microvascular Endothelial Cells in Culture
Akio Morimoto, Kazuki Okamura, Ryoji Hamanaka, Yasufumi Sato, Nobuyuki Shima, Kanji Higashio, and Michihiko Kuwano 1042

Modification of the N-Terminus of Membrane Fusion-Active Peptides Blocks the Fusion Activity *M. Murata, S. Kagiwada, R. Hishida, R. Ishiguro, S. Ohnishi, and S. Takahashi* 1050

Protein and DNA Sequence Homologies between the V3-Loop of Human Immunodeficiency Virus Type I Envelope Protein gp120 and Immunoglobulin Variable Regions
Radmilla Metlas, Veljko Veljkovic, Rudy D. Paladini, and Sàndor Pongor 1056

The Interaction of Thioridazine with Cardiac Cytochrome Oxidase: Enzyme Activity and Drug Binding Studies *A. S. Moubarak and B. B. Muhoberac* 1063

Phospholipase D in Cultured Rat Vascular Smooth Muscle Cells and Its Activation by Phorbol Ester *Fumiko Konishi, Takao Kondo, and Tadashi Inagami* 1070

Inhibitory Effect of Phosphatidylserine on Iron-Dependent Lipid Peroxidation
Katsunori Yoshida, Junji Terao, Tetsuya Suzuki, and Kozo Takama 1077

Developmental Changes in the Organization of the Nuclear Lamina in Mouse Liver
Siyaram Pandey and Veena K. Parnaik 1082

Possible Involvement of a L-Δ^1-Pyrroline-5-carboxylate (P5C) Reductase in the Synthesis of Proline in *Desulfovibrio desulfuricans* Norway
Michel Fons, Brigitte Cami, and Marc Chippaux 1088
The *in Vivo* Disposition of Aflatoxin B_1 in Rat Liver
Joseph I. Ewaskiewicz, Thomas M. Devlin, and John J. Ch'ih 1095
Attenuation of Daunorubicin-Augmented Microsomal Lipid Peroxidation and Oxygen Consumption by Calcium Channel Antagonists
Ferzaan N. Engineer and Rajagopalan Sridhar 1101
Separation of *Escherichia coli* RNA Polymerase σ^{70} Holoenzyme from Core Enzyme on Heparin–Sepharose Columns
Stephen R. Wellington and George B. Spiegelman 1107
Pachytene Spermatocytes Can Achieve Meiotic Process *in Vitro*
B. Le Magueresse-Battistoni, N. Gérard, and B. Jégou 1115
Comparison of the Hemodynamic Effects of Endothelin-1 and Big Endothelin-1 in the Rat *David M. Pollock and Terry J. Opgenorth* 1122
N, *N*-Diethylhydroxylamine: A New Electron Donor to Photosystem II
S. C. Sabat, T. Sudhakar Babu, and Prasanna Mohanty 1127
Occurrence of Autoimmune Antibodies to Liver Microsomal Proteins in Association with Fulminant Hepatitis in the Lec Strain of Rats
Sekio Nagayama, Ryuji Kitamura, Tsuyoshi Yokoi, Yasuro Kawaguchi, Noriyuki Kasai, Noritoshi Takeichi, Hiroshi Kobayashi, and Tetsuya Kamataki 1134

Volume 179, Number 3, September 30, 1991

Dictyostelium Transiently Expresses Eight Distinct G-Protein α-Subunits during Its Developmental Program *Lijun Wu and Peter N. Devreotes* 1141
The Processing of Alzheimer A4/β-Amyloid Protein Precursor: Identification of a Human Brain Metallopeptidase Which Cleaves –Lys–Leu– in a Model Peptide
J. R. McDermott and A. M. Gibson 1148
A Forskolin and Verapamil Sensitive K^+ Current in Human Tracheal Cells
Luis J. V. Galietta, Andrea Rasola, Virginia Barone, Dieter C. Gruenert, and Giovanni Romeo 1155
Dermenkephalin and Deltorphin I Reveal Similarities within Ligand-Binding Domains of μ- and δ-Opioid Receptors and an Additional Address Subsite on the δ-Receptor
Stéphane Charpentier, Sandrine Sagan, Antoine Delfour, and Pierre Nicolas 1161
Cultured Hepatocytes Bind and Internalize Bovine Serum Amine Oxidase-Gold Complexes *L. Dini, E. Agostinelli, and B. Mondoví* 1169
Defect of a Fiber-Cell Specific 94-kDa Protein in the Lens of Inherited Microphthalmic Mutant Mouse Elo *Shigeo Masaki, Katsuyuki Tamai, Ryujiro Shoji, and Tomomasa Watanabe* 1175
Sequence Requirements for Proteolytic Cleavage of Precursors with Paired Basic Amino Acids *Kimimitsu Oda, Masaharu Ikeda, Emiko Tsuji, Miwa Sohda, Noboru Takami, Yoshio Misumi, and Yukio Ikehara* 1181

Molecular Basis of Acid Sphingomyelinase Deficiency in a Patient with Niemann–Pick Disease Type A *Klaus Ferlinz, Robert Hurwitz, and Konrad Sandhoff* 1187

Effect of Extracellular ATP Level on Flow-Induced Ca^{2+} Response in Cultured Vascular Endothelial Cells *Joji Ando, Akira Ohtsuka, Risa Korenaga, and Akira Kamiya* 1192

T7 Infection-Dependent Selective Expression of Cloned Genes in P1-Lysogenic *Escherichia coli* *Claudia Olenik, Ellen Krüger, Frieder Söling, Wolfgang Hahn, Monika Messerschmid, and Rudolf Hausmann* 1200

Isolation of L-3-Phenyllactyl–Phe–Lys–Ala-NH_2 (Antho-KAamide), a Novel Neuropeptide from Sea Anemones *Hans-Peter Nothacker, Kenneth L. Rinehart, and Cornelis J. P. Grimmelikhuijzen* 1205

Structure–Function Studies of Designed DDT-Binding Polypeptides *Stephan Klauser, Doris Gantner, Prathima Salgam, and Bernd Gutte* 1212

Cloning of Fish Zinc-Finger Genes Related to *Krox*-20 and *Krox*-24 *Jeremy Lanfear, Trevor Jowett, and Petr W. H. Holland* 1220

Signal Transduction in *Coprinus congregatus*: Evidence for the Involvement of G Proteins in Blue Light Photomorphogenesis *Katherine R. Kozak and Ian K. Ross* 1225

Molecular Cloning, Structural Characterization, and Functional Expression of the Human Substance P Receptor *Y. Takeda, K. B. Chou, J. Takeda, B. S. Sachais, and J. E. Krause* 1232

Expression of c-*myc* Proto-oncogene during Podophyllotoxin Induced IW32 Erythroleukemia Cell Differentiation *Yu-Ting Yen, Rong-Tsun Wu, Shye-Jye Tang, and Fung-Fang Wang* 1241

Peptides Homologous to the Amyloid Protein of Alzheimer's Disease Containing a Glutamine for Glutamic Acid Substitution Have Accelerated Amyloid Fibril Formation *Thomas Wisniewski, Jorge Ghiso, and Blas Frangione* 1247

Determination of the 5′ Exon Structure of the Human Cardiac α-Myosin Heavy Chain Gene *Nigel J. Brand, Nina Dabhade, Magdi Yacoub, and Paul J. R. Barton* 1255

Functional Reconstitution of a $GABA_A$ Receptor Purified from Bovine Brain *Rick P. Thuynsma and Susan M. J. Dunn* 1259

Reversible Inhibition of the Urea Cycle and Gluconeogenesis by *N*, *N*-Diethyl-*m*-toluamide *Carla M. Brini and George C. Tremblay* 1264

Thyroid Hormone Regulation of α-Myosin Heavy Chain Promoter Activity Assessed by *in Vivo* DNA Transfer in Rat Heart *Kaie Ojamaa and Irwin Klein* 1269

Triamcinolone Acetonide Inhibits Lymphocyte Differentiation in B Cells Decorated with Artificial Antigen Receptors *Deborah A. Roess, Mary E. Zschokke, James S. Peacock, and B. George Barisas* 1276

Proteoglycan and Glycosaminoglycan Free Chain Expression in Keratinocytes, Endothelium, and Mesenchymal Cells *Michael Piepkorn, Peter Hovingh, and Alfred Linker* 1281

Signal and Propeptide Processing of Human Tissue Plasminogen Activator: Activity of a Pro-tPA Derivative *David T. Berg and Brian W. Grinnell* 1289

Stimulation of *in Vivo* Tumor Growth and Phorbol Ester-Induced Inflammation by *N*, *N*-Diethyl-2-[4-(phenylmethyl)phenoxy]Ethanamine HCl, a Potent Ligand for Intracellular Histamine Receptors *Lorne J. Brandes, Wayne A. Beecroft, and Georgina R. Hogg* 1297

Light-Dependent Spin Trapping of Hydroxyl Radical from Human Erythrocytes *Leon A. Bynoe, Sovitj Pou, John D. Gottsch, and Gerald M. Rosen* 1305

Coordinate Regulation of mRNA Levels of Pro-opiomelanocortin and the Candidate Processing Enzymes PC2 and PC3, but Not Furin, in Rat Pituitary Intermediate Lobe *Nigel P. Birch, Howard L. Tracer, David J. Hakes, and Y. Peng Loh* 1311

High-Valent Intermediates in the Reaction of N_α-Acetyl Microperoxidase-8 with Hydrogen Peroxide: Models for Compounds 0, I, and II of Horseradish Peroxidase *Jinn-Shyan Wang, Haesun K. Baek, and Harold E. Van Wart* 1320

cDNA Cloning of a Novel Testis-Specific Calcineurin B-like Protein *Hideyuki Mukai, Chang-Duk Chang, Hozumi Tanaka, Akira Ito, Takayoshi Kuno, and Chikako Tanaka* 1325

A High Phosphorylation State and Increased Activity of the TRE Motif in the NIH3T3 Cell Transformant Induced by ret^{TPC} *Yukihito Ishizaka, Masahide Takahashi, Toshikazu Ushijima, Takashi Sugimura, and Minako Nagao* 1331

NMR Studies of Fluorinated Visual Pigment Analogs *Leticia U. Colmenares, Alfred E. Asato, Marlene Denny, Dennis Mead, J. P. Zingoni, and Robert S. H. Liu* 1337

Microfluorometric Size Measurements of Human and Phage DNA Correlate with the Degree of *in Vitro* Cisplatin Treatment *Nicholas J. Rampino and Patrick G. Johnston* 1344

Characterization of a Second Promoter for the Mouse Liver/Bone/Kidney-Type Alkaline Phosphatase Gene: Cell and Tissue Specific Expression *Michela Studer, Mineko Terao, Maurizio Gianni, and Enrico Garattini* 1352

Changes in Expression of Angiotensin Receptor Subtypes in the Rat Aorta during Development *Mohan Viswanathan, Keisuke Tsutsumi, Fernando M. A. Correa, and Juan M. Saavedra* 1361

Generation and Fate of Enamines in the Microsomal Metabolism of Cyclic Tertiary Amines *L. M. Sayre, D. A. Engelhart, B. Venkataraman, M. K. M. Babu, and G. D. McCoy* 1368

Isolation and Characterization of an Infectious Molecular Clone of the MN Strain of HIV-1 *Kesh Prakash, Richard L. Hodinka, Diana M. Hullihen, and Stanley A. Plotkin* 1377

Current Inactivation Involves a Histidine Residue in the Pore of the Rat Lymphocyte Potassium Channel RGK5 *A. E. Busch, R. S. Hurst, R. A. North, J. P. Adelman, and M. P. Kavanaugh* 1384

Specific, High-Affinity Binding Sites for Angiotensin II on *Mycoplasma hyorhinis* *Clemens Bergwitz, Sarabelle Madoff, Abdul-Badi Abou-Samra, and Harald Jüppner* 1391

ATP- and ATP+ Ubiquitin-Stimulated Proteolysis in Rat Liver and Yoshida Ascites Hepatoma *Roberto C. Costa, Cristina Bianchi, and Ugo Del Monte* 1400

The Irreversibility of Endothelin Action Is a Property of a Late Intracellular Signalling Event *Robert Marsault, Paul Vigne, and Christian Frelin* 1408

Identification of Initiating Agents in Myoglobin-Induced Lipid Peroxidation *Emma S. R. Newman, Catherine A. Rice-Evans, and Michael J. Davies* 1414

Quantitation of GLUT1 and GLUT4 mRNA Using a Solution Hybridization Assay *Daniel A. Meier, Debra Pastorek, Roland G. James, and Steven R. Hager* 1420

Chromosomal Assignment of the Human Immunophilin FKBP-12 Gene *Anthony G. DiLella* 1427

Expression of Na,K-ATPase Isoforms in Human Heart *Olga I. Shamraj, David Melvin, and Jerry B. Lingrel* 1434

Inhibition of Erythropoietin Production by Phorbol Ester Is Associated with Down-Regulation of Protein Kinase C-α Isoenzyme in Hepatoma Cells *Wolfgang Jelkmann, Andrea Huwiler, Joachim Fandrey, and Josef Pfeilschifter* 1441

Enhanced *MYCN* Oncogene Expression in Human Neuroblastoma Cells Is Associated with Altered FGF Receptor Expression and Cellular Growth Response to Basic FGF *Lothar Schweigerer, Dominique Ledoux, Gudrun Fleischmann, and Denis Barritault* 1449

Isolation and Expression of a Guanylate Cyclase-Coupled Heat Stable Enterotoxin Receptor cDNA from a Human Colonic Cell Line *Sujay Singh, Gita Singh, Jörg-Martin Heim, and Rupert Gerzer* 1455

Synthesis and Characterization of a Pertussis Toxin-Biotin Conjugate *Louis D. Heerze, Clifford G. Clark, Ying Chen, Richard H. Smith, and Glen D. Armstrong* 1464

Cloning and Tissue Expression of a Rat Histamine H_2-Receptor Gene *Martial Ruat, Elisabeth Traiffort, Jean-Michel Arrang, Rob Leurs, and Jean-Charles Schwartz* 1470

Production of 22 nm HBsAg Particles by Human Lymphocytes Infected with a Recombinant Vaccinia Virus Containing the Coding Sequence for Hepatitis B Virus Surface Antigen *Lorenz Theilmann and Albrecht von Brunn* 1479

Molecular Cloning and Sequencing of a cDNA Encoding a Human α_{1A} Adrenergic Receptor *John F. Bruno, Jonathan Whittaker, Jinfen Song, and Michael Berlowitz* 1485

Mammalian Spermatid Specific Protein, TP2, Is a Zinc Metalloprotein with Two Finger Motifs *Rajasekharan Baskaran and M. R. S. Rao* 1491

Inhibition of the Thrombin-Platelet Reactions by DuP 714 *Andrew T. Chiu, Shaker A. Mousa, Lori J. Pease, William A. Roscoe, Jeffrey M. Bozarth, Thomas M. Reilly, Ronald D. Smith, and P. B. M. W. M. Timmermans* 1500

Specific Endonucleolytic Cleavage of IGF-II mRNAs *Durk Meinsma, P. Elly Holthuizen, J. Leo Van den Brande, and John S. Sussenbach* 1509

Inhibitory Effect of Cadmium and Mercury Ions on Transcription of the *ada* Gene *Makoto Suzuki, Kazuhiko Takahashi, Yutaka Kawazoe, Kunihiko Sakumi, and Mutsuo Sekiguchi* 1517

Arachidonic Acid and Diacylglycerol Act Synergistically to Activate Protein Kinase C *in Vitro* and *in Vivo* *David S. Lester, Carlos Collin, Rene Etcheberrigaray, and Daniel L. Alkon* 1522

Creatine Kinase BB Produced by Murine Hybridomas but Not by Parental Cells *S. Legastelois, J. P. Steghens, and J. Grange* 1529

Isolation and Characterization of a neu Protein-Specific Activating Factor from Human ATL-2 Cell Conditioned Medium *James G. Davis, Junji Hamuro, Caroline Y. Shim, Arabinda Samanta, Mark I. Greene, and Kunio Dobashi* 1536

Thyrotropin Receptor Non-mediated Thyroid Stimulating Immunoglobulin in Graves' Disease *Toyoshi Endo, Kazutaka Haraguchi, Masayuki Ohmori, Masato Ikeda, Kazuyasu Ohta, and Toshimasa Onaya* 1543

Rabbit Antibodies against Two Different Extracellular Domains of Human Thyrotropin Receptor Possess Thyroid Stimulating Activities *Toyoshi Endo, Masayuki Ohmori, Masato Ikeda, Shuji Kotani, and Toshimasa Onaya* 1548

6′-Substituted Naphthalene-2-carboxylic Acid Analogs, a New Class of Retinoic Acid Receptor Subtype-Specific Ligands *Gerhart Graupner, Gérard Malle, Jean Maignan, Gérard Lang, Michel Pruniéras, and Magnus Pfahl* 1554

Membranolytic and Nucleolytic Activities of Cytolytic T Lymphocyte Clones *J. M. Cosgrove, T. K. Howcroft, S. M. Tatum, and R. R. Lindquist* 1562

Glycosylation Is Essential for Efficient Secretion but Not for Permeability-Enhancing Activity of Vascular Permeability Factor (Vascular Endothelial Growth Factor) *Tet-Kin Yeo, Donald R. Senger, Harold F. Dvorak, Lisa Freter, and Kiang-Teck Yeo* 1568

Lipoprotein-Incorporated Pregnenolone Fatty Acid Esters Act as Substrate for Ovarian Progestin Synthesis *Richard Roy and Alain Bélanger* 1576

Nonreducible Crosslink Formation in Tibial Dyschondroplastic Growth Plate Cartilage from Broiler Chicks Fed Homocysteine *M. W. Orth, D. A. Martinez, M. E. Cook, and A. C. Vailas* 1582

Separation of the Two Domains of Human Mucus Proteinase Inhibitor: Inhibitory Activity Is Only Located in the Carboxy-Terminal Domain *Isabelle Van-Seuningen and Monique Davril* 1587

Inhibition of Pre-mRNA Splicing by Antisense RNA *in Vitro*: Effect of RNA Containing Sequences Complementary to Exons *Vladimir Volloch, Bruce Schweitzer, and Sophia Rits* 1593

Inhibition of Pre-mRNA Splicing by Antisense RNA *in Vitro*: Effect of RNA Containing Sequences Complementary to Introns *Vladimir Volloch, Bruce Schweitzer, and Sophia Rits* 1600

Clearance Receptor-Binding Atrial Natriuretic Peptides Inhibit Mitogenesis and Proliferation of Rat Aortic Smooth Muscle Cells *Paul A. Cahill and Aviv Hassid* 1606

Phosphorothioate Analogues of Oligodeoxyribonucleotide: Synthesis and Activity as Inhibitors of Replication of Human Immunodeficiency Virus
Sang-Gug Kim, Yoshikazu Suzuki, Hideki Nakashima, Naoki Yamamoto, and Hiroshi Takaku 1614

Microtubule Destabilization by *cdc*2/H1 Histone Kinase: Phosphorylation of a "Pro-rich Region" in the Microtubule-Binding Domain of MAP-4
Hiroyuki Aizawa, Masayuki Kamijo, Yoshiki Ohba, Akiko Mori, Koji Okuhara, Hiroshi Kawasaki, Hiromu Murofushi, Koichi Suzuki, and Hideyo Yasuda 1620

Substitution of Asparagine for Serine-406 of the Immunoglobulin μ Heavy Chain Alters Glycosylation at Asparagine-402
Wenyong Sun, Jing Xiong, and Marc J. Shulman 1627

Identification of the cDNA for XLCAAX-1, a Membrane Associated *Xenopus* Maternal Protein *Bramham A. Reddy, Malgorzata Kloc, and Laurence D. Etkin* 1635

Class II Antigen-Associated Invariant Chain mRNA in Mouse Small Intestine
Andre J. Ouellette, Dana Frederick, Susan J. Hagen, and Julia D. Katz 1642

Involvement of OP18 in Cell Proliferation
R. F. Melhem, J. R. Strahler, N. Hailat, X. X. Zhu, and S. M. Hanash 1649

A 14 Amino Acid Peptide Derived from the Amino Terminus of the Cleaved Thrombin Receptor Elevates Intracellular Calcium and Stimulates Prostacyclin Production in Human Endothelial Cells *Justinian R. Ngaiza and Eric A. Jaffe* 1656

Δ^{12}-Prostaglandin J_2 Mimics Heat Shock in Inducing Cell Cycle Arrest at G_1 Phase
Nobuyuki Marui, Hoyoku Nishino, Toshiyuki Sakai, Akira Aoike, Keiichi Kawai, and Masanori Fukushima 1662

"Secretase," Alzheimer Amyloid Protein Precursor Secreting Enzyme Is Not Sequence-Specific *Kei Maruyama, Fuyuki Kametani, Mihoko Usami, Wakako Yamao-Harigaya, and Kikuko Tanaka* 1670

N_W-Nitro L-Arginine Benzyl Ester, a Potent Irreversible Inhibitor of Endothelium Dependent Relaxation *George Thomas and Peter W. Ramwell* 1677

ERRATUM
Volume 175, Number 1, February 28, 1991: Toshitaka Nabeshima, Shin-ichi Ogawa, Hirohisa Ishimaru, Tsutomu Kameyama, Taneo Fukuta, Rie Takeuchi, and Kyozo Hayashi, "Memory Impairment and Morphological Changes in Rats Induced by Active Fragment of Anti-nerve Growth Factor Antibody," pp. 215–219 1683

Author Index for Volume 179 1684

Volume 180, Number 1, October 15, 1991

Effect of Dietary Manipulation on *c-myc* RNA Expression in Adipose Tissue, Muscle, and Liver of Broiler Chickens *Jong-Won Kim, Daniel L. Fletcher, Dennis R. Campion, H. Rex Gaskins, and Roger Dean* 1

Thromboxane A_2 Synthesis in Human Erythroleukemia Cells
David A. Jones, F. A. Fitzpatrick, and Kenneth C. Malcolm 8

The Human H_b (MU) Class Glutathione *S*-Transferases Are Encoded by a Dispersed Gene Family *Jeff L. DeJong, T. Mohandas, and Chen-Pei D. Tu* 15

Formaldehyde-Treated Albumin Contains Monomeric and Polymeric Forms That Are Differently Cleared by Endothelial and Kupffer Cells of the Liver: Evidence for Scavenger Receptor Heterogeneity *Robert W. Jansen, Grietje Molema, Geert Harms, Johan K. Kruijt, Theo J. C. van Berkel, Machiel J. Hardonk, and Dirk K. F. Meijer* 23

The Nonspecific Inner Membrane Pore of Liver Mitochondria: Modulation of Cyclosporin Sensitivity by ADP at Carboxyatractyloside-Sensitive and -Insensitive Sites *Sergei A. Novgorodov, Tatyana I. Gudz, Dennis W. Jung, and Gerald P. Brierley* 33

cDNA Cloning of the β-Subunit of the Human Gastric H,K-ATPase *Jing-yie Ma, Yao-hua Song, Sven Erik Sjöstrand, Lars Rask, and Sven Mårdh* 39

Cytokine- and Forskolin-Induced Synthesis of Group II Phospholipase A_2 and Prostaglandin E_2 in Rat Mesangial Cells Is Prevented by Dexamethasone *Casper Schalkwijk, Margriet Vervoordeldonk, Josef Pfeilschifter, Fritz Märki, and Henk van den Bosch* 46

Pentoxifylline Does Not Act via Adenosine Receptors in the Inhibition of the Superoxide Anion Production of Human Polymorphonuclear Leukocytes *M. Thiel, H. Bardenheuer, G. Pöch, C. Madel, and K. Peter* 53

Studies on the Relationship between Cell Proliferation and Cell Death: Opposite Patterns of SGP-2 and Ornithine Decarboxylase mRNA Accumulation in PHA-Stimulated Human Lymphocytes *E. Grassilli, S. Bettuzzi, D. Monti, M. C. Ingletti, C. Franceschi, and A. Corti* 59

Localization of an Endogenous ADP-Ribose Acceptor, p33, in Polymorphonuclear Cell Granules in Chicken Liver Interlobular Connective Tissue *Harumi Osago, Koichi Mishima, Mikako Tsuchiya, Yoshinori Tanigawa, Tetsuhiro Umeno, and Makoto Shimoyama* 64

Mouse Oncogene Protein 24p3 Is a Member of the Lipocalin Protein Family *D. R. Flower, A. C. T. North, and T. K. Attwood* 69

Bovine Lactoferrin mRNA: Sequence, Analysis, and Expression in the Mammary Gland *Richard E. Goodman and Floyd L. Schanbacher* 75

Restriction Enzyme Analysis of Mitochondrial DNA in Colorectal Tumours *Wei Cui, Ian C. Talbot, and John M. A. Northover* 85

Statherin: A Major Boundary Lubricant of Human Saliva *William H. Douglas, Ernest S. Reeh, Narayanan Ramasubbu, Periathamby A. Raj, Krishna K. Bhandary, and Michael J. Levine* 91

In Vivo Activation of an ω-6 Oxygenase in Human Skin *Alan N. Baer, Patrick B. Costello, and Floyd A. Green* 98

Characterization of a Human cDNA That Encodes a Functional Receptor for Platelet Activating Factor *Richard D. Ye, Eric R. Prossnitz, Aihua Zou, and Charles G. Cochrane* 105

Evidence That Potassium Channels Regulate Prolactin Secretion in GH_4C_1 Cells by Causing Extracellular Calcium Influx *Xiangbing Wang, Noriyuki Sato, Monte A. Greer, Susan E. Greer, and Staci McAdams* 112

Inhibition of Microtubule Assembly Is a Possible Mechanism of Action of Mitoxantrone *Chi-Kuan Ho, Sai-Lung Law, Hung Chiang, Mei-Ling Hsu, Chien-Chia Wang, and Sheng-Yuan Wang* 118

A New Catalytic Function of Halohydrin Hydrogen-Halide-Lyase, Synthesis of β-Hydroxynitriles from Epoxides and Cyanide *Tetsuji Nakamura, Toru Nagasawa, Fujio Yu, Ichiro Watanabe, and Hideaki Yamada* 124

A Novel Vasopressin Receptor in Rat Early Proximal Tubule *Kyu Yong Jung and Hitoshi Endou* 131

Alteration of Human Myoglobin Proximal Histidine to Cysteine or Tyrosine by Site-Directed Mutagenesis: Characterization and Their Catalytic Activities *Shin-ichi Adachi, Shingo Nagano, Yoshihito Watanabe, Koichiro Ishimori, and Isao Morishima* 138

Mitogenic Properties of a New Endothelial Cell Growth Factor Related to Pleiotrophin *José Courty, Marie Claude Dauchel, Danièle Caruelle, Myléne Perderiset, and Denis Barritault* 145

α-Adrenergic Inhibition of Rat Pancreatic β-Cell Replication and Insulin Secretion Is Mediated through a Pertussis Toxin-Sensitive G-Protein Regulating Islet cAMP Content *Åke Sjöholm* 152

Effect of Substance P/Bombesin Antagonists on the Release of Growth Hormone by GHRP and GHRH *Kamal G. Bitar, Cyril Y. Bowers, and David H. Coy* 156

Hepatic Expression of Apolipoprotein A-I Gene in Rats Is Upregulated by Monounsaturated Fatty Acid Diet *Jesus Osada, Antonio Fernandez-Sanchez, Jose Luis Diaz-Morillo, Hortensia Aylagas, Maria Jesus Miro-Obradors, Jose Maria Ordovas, and Evangelina Palacios-Alaiz* 162

Endothelins Inhibit Adenylate Cyclase in Brain Capillary Endothelial Cells *Annie Ladoux and Christian Frelin* 169

Cortisone and Thyroxine Modulate Intestinal Lactase and Sucrase mRNA Levels and Activities in the Suckling Rat *Kwo-yih Yeh, Mary Yeh, Robert K. Montgomery, Richard J. Grand, and Peter R. Holt* 174

Substrate Analog Inhibitors of HIV-1 Protease Containing Phenylnorstatine as a Transition State Element *B. Raju and Milind S. Deshpande* 181

Investigating the Stereochemistry of Binding to HIV-1 Protease with Inhibitors Containing Isomers of 4-Amino-3-hydroxy-5-phenylpentanoic Acid *B. Raju and Milind S. Deshpande* 187

Phosphorylation and Functional Modification of Calmodulin-Dependent Protein Kinase IV by cAMP-Dependent Protein Kinase *Isamu Kameshita and Hitoshi Fujisawa* 191

Isolation and Sequence of a cDNA Encoding Human Platelet Phosphofructokinase *Craig J. Simpson and Linda A. Fothergill-Gilmore* 197

Cellular Retinoic Acid-Binding Protein Type 2 mRNA Is Overexpressed in Human Psoriatic Skin as Shown by *in Situ* Hybridization *Liliane Didierjean, Béatrice Durand, and Jean-Hilaire Saurat* 204

Calcium Binding to Fluorescent Calcium Indicators: Calcium Green, Calcium Orange, and Calcium Crimson *Marc Eberhard and Paul Erne* 209

Energy State of Chondrocytes Assessed by ^{31}P-NMR Studies of Preosseous Cartilage *Piero Pollesello, Benedetto de Bernard, Micaela Grandolfo, Sergio Paoletti, Franco Vittur, and Bjarne J. Kvam* 216

Rat Follistatin: Ontogeny of Steady-State mRNA Levels in Different Tissues Predicts Organ-Specific Functions *Uwe Michel, Alex Rao, and Jock K. Findlay* 223

Definition of the Affinity of Binding between Human von Willebrand Factor and Coagulation Factor VIII *Peter R. Ganz, Judith S. Atkins, Douglas S. Palmer, Anil K. Dudani, Sophia Hashemi, and Fabio Luison* 231

Calcium Is Required for the Reduction of Sulfite from Hydrogen in a Reconstituted Electron Transfer Chain from the Sulfate Reducing Bacterium, *Desulfovibrio gigas* *Liang Chen, Ming-Y. Liu, and Jean Le Gall* 238

Cisplatin Induces the Small Heat Shock Protein hsp25 and Thermotolerance in Ehrlich Ascites Tumor Cells *Steffi Oesterreich, Hildegunde Schunck, Rainer Benndorf, and Heinz Bielka* 243

Fluorescent Probes for Retinoic Acid Receptors: Molecular Measures for the Ligand Binding Pocket *Rumiko Shimazawa, Sayaka Hibino, Hidetoshi Mizoguchi, Yuichi Hashimoto, Shigeo Iwasaki, Hiroyuki Kagechika, and Koichi Shudo* 249

Formation and Proliferative Effects of Lipoxins in Human Bone Marrow *Leif Stenke, Mahmoud Mansour, Charlotte Edenius, Peter Reizenstein, and Jan Åke Lindgren* 255

Position-Independent, Aberrant Expression of the Human Ornithine Decarboxylase Gene in Transgenic Mice *Maria Halmekytö, Leena Alhonen, Jarmo Wahlfors, Riitta Sinervirta, Olli A. Jänne, and Juhani Jänne* 262

Macrophage Hydrogen Peroxide Production and Phagocytic Function Are Decreased following Phagocytosis Mediated by Fc Receptors but Not Complement Receptors *Daniel J. Loegering and Martin G. Schwacha* 268

Correlation between NMR Spectral Parameters of Nucleosides and Its Implication to the Conformation about the Glycosyl Bond *Bongsup P. Cho and Frederick E. Evans* 273

An ATP-Independent Catenating Enzyme from the Kinetoplast Hemoflagellate *Leishmania donovani* *A. K. Chakraborty and H. K. Majumder* 279

Biotransformation of Organic Nitrates to Nitric Oxide by Vascular Smooth Muscle and Endothelial Cells *Martin Feelisch and Malte Kelm* 286

Equilibrium Unfolding of Class π Glutathione *S*-Transferase *Heini W. Dirr and Peter Reinemer* 294

Neutrophil Activating Peptide-2 (NAP-2) Binds with Two Affinities to Receptor(s) on Human Neutrophils *Wolfgang Schnitzel, Brigitte Garbeis, Ulrike Monschein, and Jürgen Besemer* 301

Flavonoids, but Not Protein Kinase C Inhibitors, Prevent Stress Protein Synthesis during Erythrophagocytosis *Salomé Kantengwa and Barbara S. Polla* 308

Magnetic Field Elicits Hypotension Mediated by Platelet Activating Factor in Rats Injected with Iron Beads *Károly Mészáros* 315

The Single Cysteine Residue on an Alpha Family Chick Liver Glutathione *S*-Transferase CL 3-3 Is Not Functionally Important *Li-Hsueh Chang, Lian-Yung Wang, and Ming F. Tam* 323

Phosphorylation and Chromatin Mechanics: The Central Importance of Substrate Conformation in Determining the Patterns of HL-60 Nuclear Phosphorylation *Alessandro Testori, Jennifer D. Skinner, Andrew W. Murray, and Leigh A. Burgoyne* 329

Antigenic Properties Associated with Vinca Alkaloid Resistance in Ovarian Cancer Cells: Identification of a 92,000 Da Protein *Thibault Voeltzel, Jean Bénard, Laurent Lavaissiere, Pascale Solère, Jacqueline Da Silva, Claude Bohuon, and Jean-Michel Bidart* 334

High Intracellular pH in CFPAC: A Pancreas Cell Line from a Patient with Cystic Fibrosis Is Lowered by Retrovirus-Mediated CFTR Gene Transfer *Ada Elgavish* 342

Glycosylation of High-Affinity Thrombin Receptors Appears Necessary for Thrombin Binding *Gloria H. Frost, John S. Bergmann, and Darrell H. Carney* 349

Structural Identity of Immunoglobulin Binding Factor and Prostatic Secretory Protein of Human Seminal Plasma *Zhi Guo Liang, Masaharu Kamada, and S. S. Koide* 356

The Dual Oxygenase and Peroxidase Activities of Porphobilinogen Oxygenase and Horseradish Peroxidase: A Study Using the Reaction with Phenylhydrazine *Marcelo Fernández and Rosalia B. Frydman* 360

GLUT 1-Glucose Transporter Protein in Adult and Fetal Mouse Lung *Gregory Mantych, Uday Devaskar, Daphne deMello, and Sherin Devaskar* 367

Superiority of an Antagonist of the Luteinizing Hormone Releasing Hormone with Emphasis on Arginine in Position 8, Named Argtide *Anna Janecka, Anders Ljungqvist, Cyril Bowers, and Karl Folkers* 374

New Mutant Gene (Transthyretin Arg 58) in Cases with Hereditary Polyneuropathy Detected by Non-isotope Method of Single-Strand Conformation Polymorphism Analysis *Yoshinaga Saeki, Satoshi Ueno, Shiro Yorifuji, Yu Sugiyama, Yoshihiko Ide, and Yuji Matsuzawa* 380

Increased Serum Levels of Basic Fibroblast Growth Factor in Patients with Renal Cell Carcinoma *Kiyohide Fujimoto, Yuzo Ichimori, Tadao Kakizoe, Eigoro Okajima, Hiromi Sakamoto, Takashi Sugimura, and Masaaki Terada* 386

Retinoylation of Cytokeratins in Normal Human Epidermal Keratinocytes *Noriko Takahashi, Anton M. Jetten, and Theodore R. Breitman* 393

Chemical Modification Locates Guanidinyl and Carboxylate Groups within the Active Site of Prolidase *William L. Mock and Hui Zhuang* 401

In Situ Binding of Fatty Acids to the Liver Fatty Acid Binding Protein: Analysis Using 3-[^{125}I]Iodo-4-azido-*N*-hexadecylsalicylamide *David W. Waggoner, Joan A. Manning, Nathan M. Bass, and David A. Bernlohr* 407

Utilization of Methoxylated Aromatic Compounds by the Acetogen *Clostridium thermoaceticum*: Expression and Specificity of the Co-dependent O-Demethylating Activity *Steven L. Daniel, Elizabeth S. Keith, Hsiuchin Yang, Yu-Su Lin, and Harold L. Drake* 416

Simian Sarcoma Virus Transformation of Normal Rat Kidney Fibroblasts Is Associated with Markedly Increased Basic Fibroblast Growth Factor Expression *Peter G. Milner* 423

Augmented Secretion of Brain Natriuretic Peptide in Acute Myocardial Infarction *Masashi Mukoyama, Kazuwa Nakao, Kenji Obata, Michihisa Jougasaki, Michihiro Yoshimura, Etsuo Morita, Kiminori Hosoda, Shin-ichi Suga, Yoshihiro Ogawa, Hirofumi Yasue, and Hiroo Imura* 431

Atrial Natriuretic Factor in Mammalian Testis: Immunological Detection in Spermatozoa *Kailash N. Pandey and Marie-Claire Orgebin-Crist* 437

Detection of 20-Hydroxyeicosatetrenoic Acid in Rat Urine *Michal Laniado Schwartzman, Ken Omata, Faming Lin, Rama K. Bhatt, J. R. Falck, and Nader G. Abraham* 445

Purification of 52-kDa Protein: A Putative Component of the Import Machinery for the Mitochondrial Protein-Precursor in Rat Liver *Hideyu Ono and Syozo Tuboi* 450

Gastrin Releasing Peptide-like Immunoreactive Substance in Rat Mammary Glands during Pregnancy *Masaharu Takeyama, Kazuhiro Kondo, Akira Otaka, Shunji Asakura, Norifumi Morikawa, Satoshi Itami, Susumu Takayasu, and Nobutaka Fujii* 455

ERRATA

Volume 178, Number 3, August 15, 1991: Myung-Hee Chung, Hun-Sik Kim, Eiko Ohtsuka, Hiroshi Kasai, Fuyumi Yamamoto, and Susumu Nishimura, "An Endonuclease Activity in Human Polymorphonuclear Neutrophils That Removes 8-Hydroxyguanine Residues from DNA$^+$," pp. 1472–1478 462

Volume 179, Number 1, August 30, 1991: Toshitada Noguchi and Hideo Takahashi, "An Efficient Method for Constructing a Chimeric Bacteriophage T4 to Estimate the Regulatory Signals," pp. 620–627 462

Volume 180, Number 2, October 31, 1991

The 180,000 Molecular Weight Plasma Membrane Insulin Receptor Substrate Is a Protein Tyrosine Phosphatase and Is Elevated in Diabetic Plasma Membranes *H. Joseph Goren and Donna Boland* 463

Characterization of Two Isozymic Forms of Heart Fructose-6-phosphate 2-Kinase:Fructose-2,6-bisphosphatase *Junichiro Sakata and Kosaku Uyeda* 470

Identification of High Affinity Endothelin-1 Receptor Subtypes in Human Tissues *David L. Williams, Jr., Kathryn L. Jones, Christiane D. Colton, and Ruth F. Nutt* 475

Response to and Expression of Amphiregulin by Ovarian Carcinoma and Normal Ovarian Surface Epithelial Cells: Nuclear Localization of Endogenous Amphiregulin *Gibbes R. Johnson, Toshiaki Saeki, Nelly Auersperg, Alfred W. Gordon, Mohammed Shoyab, David S. Salomon, and Kurt Stromberg* 481

Identification of a Novel Growth Hormone Binding Protein mRNA in Rat Liver *Tak S. Tiong and Adrian C. Herington* 489

Inhibitory Binding of Adenosine Diphosphoribosyl Transferase to the DNA Primer Site of Reverse Transcriptase Templates *Kalman G. Buki, Pal I. Bauer, and Ernest Kun* 496

Inhibition of HIV-1 IIIb Replication in AA-2 and MT-2 Cells in Culture by Two Ligands of Poly(ADP-ribose) Polymerase: 6-Amino-1,2-benzopyrone and 5-Iodo-6-amino-1,2-benzopyrone *Gerald A. Cole, Gerhard Bauer, Eva Kirsten, Jerome Mendeleyev, Pal I. Bauer, Kalman G. Buki, Alaeddin Hakam, and Ernest Kun* 504

Isolation and Sequence Determination of cDNA Encoding the Major Structural Protein of Human Peripheral Myelin *Kiyoshi Hayasaka, Kenji Nanao, Marie Tahara, Wataru Sato, Goro Takada, Masayuki Miura, and Keiichi Uyemura* 515

Regulated Expression of PDGF A-Chain mRNA in Human Saphenous Vein Smooth Muscle Cells *Jeffrey A. Winkles and Cyril G. Gay* 519

In Situ Measurement of HMG-CoA Reductase Activity in Digitonin-Permeabilized Hepatocytes *Math J. H. Geelen, Joseph S. Papiez, Kamal Girgis, and David M. Gibson* 525

Location of Receptor-Binding Region of Protective Antigen from *Bacillus anthracis* *Stephen F. Little and John R. Lowe* 531

Overexpression of Dimeric Guanylyl Cyclase Cores of an Atrial Natriuretic Peptide Receptor *David S. Thorpe, Shi Niu, and Eugene Morkin* 538

A Proper Amino Terminus of Diphtheria Toxin Is Important for Cytotoxicity *Vijay K. Chaudhary, David J. FitzGerald, and Ira Pastan* 545

The Effect of Hydrostatic Pressure on the Interaction of Actomyosin Subfragment 1 with Nucleotides *Daniel F. A. McKillop, Michael A. Geeves, and Claude Balny* 552

Isolation and Characterization of Corticostatic Peptides from Guinea Pig Bone Marrow *Jing Hu, Hugh P. J. Bennett, Claude Lazure, and Samuel Solomon* 558

Hypothermic Protection—A Fundamental Property of "Antifreeze" Proteins *B. Rubinsky, A. Arav, and G. L. Fletcher* 566

Effects of a Variety of Cytokines and Inducing Agents on Vascular Permeability Factor mRNA Levels in U937 Cells *Gregory J. Dolecki and Daniel T. Connolly* 572

Stimulation of Starfish Coelomocytes by Interleukin-1 *Robert D. Burke and Russell F. Watkins* 579

3-Aminotriazole Is a Substrate for Lactoperoxidase but Not for Catalase *Diana Metodiewa and H. Brian Dunford* 585

Induction of Human Leukemia Cell Differentiation by Regiospecifically Acetylated Spermidines *Stuart W. Snyder, Merrill J. Egorin, and Patrick S. Callery* 591

Enhanced Axial Symmetry at the Fe^{3+}-Heme Center of Peroxidase by Ascorbate: A Basis for the Ascorbate-Dependent Peroxidase Action
Pradeep Kumar G., Sumita Sinha, Malini Laloraya, and Manish Nivsarkar 597

Detection of mRNA for the Transforming Growth Factor β Family in Human Articular Chondrocytes by the Polymerase Chain Reaction *A. Frazer, J. M. Seid, K. A. Hart, H. Bentley, R. A. D. Bunning, and R. G. G. Russell* 602

Stimulation by Endozepine of the Side-Chain Cleavage of Cholesterol in a Reconstituted Enzyme System *A. Shane Brown and Peter F. Hall* 609

ADP-Ribosylation of a Small Size GTP-Binding Protein in Bovine Neutrophils by the C3 Exoenzyme of *Clostridium botulinum* and Effect on the Cell Motility
Marie-José Stasia, Alain Jouan, Nicolas Bourmeyster, Patrice Boquet, and Pierre V. Vignais 615

Casein Kinase II and Polyamines May Interact in the Response of Adrenocortical Cells to Their Trophic Hormone *Odile Filhol, Petra Loue-Mackenbach, Claude Cochet, and Edmond M. Chambaz* 623

Synthesis and Phosphorylation of an Extracellular Polypeptide Reacting with Anti-MYC Antisera in Primary Rat Hepatocyte Cultures
George G. Skouteris and George K. Michalopoulos 631

Effects of Lymphocyte Activation on Transfer RNAs
Kathleen Rasmussen, Sandra Whelly, and Kenneth Barker 638

cDNA Cloning and Regulation of a Novel Rat Cytochrome P450 of the 2C Gene Subfamily (P450IIC24) *Peter G. Zaphiropoulos* 645

Oncostatin M Stimulates Urokinase-Type Plasminogen Activator Activity in Human Synovial Fibroblasts *John A. Hamilton, Tali Leizer, Diana S. Piccoli, Keith M. Royston, Debra M. Butler, and Maryann Croatto* 652

On α-Helices Terminated by Glycine. 1. Identification of Common Structural Features
Robert Preissner and Peer Bork 660

On α-Helices Terminated by Glycine. 2. Recognition by Sequence Patterns
Peer Bork and Robert Preissner 666

Transforming Growth Factor-β Up-Regulates Type VII Collagen Gene Expression in Normal and Transformed Epidermal Keratinocytes in Culture
Jaana Ryynänen, Stephan Sollberg, David R. Olsen, and Jouni Uitto 673

UDP-GalNAc:NeuAcα2,3Galβ-R (GalNAc to Gal) β1,4-*N*-Acetylgalactosaminyltransferase Responsible for the Sd^a Specificity in Human Colon Carcinoma CaCo-2 Cell Line *Nadia Malagolini, Fabio Dall'Olio, and Franca Serafini-Cessi* 681

Viable Transmembrane Region Mutants of Bacteriophage M13 Coat Protein Prepared by Site-Directed Mutagenesis *Zuomei Li and Charles M. Deber* 687

A Phosphatase Resistant Substrate for the Assay of Protein Kinase C in Crude Tissue Extracts *Young Jo K. Farrar, Thomas C. Vanaman, and John T. Slevin* 694

The NH_2-Terminal Extension of Rat Liver Arginyl-tRNA Synthetase Is Responsible for Its Hydrophobic Properties *Shouting Huang and Murray P. Deutscher* 702

α- and β-Anomeric Preference of Glucose-Induced Insulin Secretion at Physiological and Higher Glucose Concentrations, Respectively
Ichitomo Miwa, Tomiyasu Murata, and Jun Okuda 709

Phosphorylation and Proteolytic Degradation of Nucleolin from 3T3-F442A Cells *Paul Warrener and Raymond Petryshyn* 716

Electrochemical Identification of Dopachrome Isomerase in *Drosophila melanogaster* *J. Li and A. J. Nappi* 724

Effect of Inserted Oxysterols on Phospholipid Packing in Normal and Sickle Red Blood Cell Membranes *R. Szostek, O. Kucuk, L. J. Lis, D. Tracy, R. Mata, T. Dey, J. W. Kauffman, S. Yachnin, and M. P. Westerman* 730

Interactions of Platinum Complexes with Thioltransferase (Glutaredoxin), *in Vitro* *William W. Wells, Pamela A. Rocque, Dian-Peng Xu, Yanfeng Yang, and Thomas L. Deits* 735

Identification of a Site for Carboxyl Methylation in Human α-Globin *Cynthia A. Ladino and Clare M. O'Connor* 742

Hemolymph Phenol Oxidases in *Drosophila melanogaster*, *Locusta migratoria*, and *Austropotamobius pallipes* *A. J. Nappi and J. Seymour* 748

H^+ Uptake Increases GTP-Induced Connection of Inositol 1,4,5-Trisphosphate- and Caffeine-Sensitive Calcium Pools in Pancreatic Microsomal Vesicles *Terutaka Ozawa and Irene Schulz* 755

Scatter Factor from Human Embryonic Lung Fibroblasts Is Probably Identical to Hepatocyte Growth Factor *Tetsumi Konishi, Toyohiro Takehara, Takashi Tsuji, Keiichi Ohsato, Kunio Matsumoto, and Toshikazu Nakamura* 765

Effect of *rec* Mutations on Viability and Processing of DNA Damaged by Methylmethane Sulfonate in *xth nth nfo* Cells of *Escherichia coli* *Tzu-Chien V. Wang and Hai-Yin Chang* 774

Amylin Secretion from the Perfused Pancreas: Dissociation from Insulin and Abnormal Elevation in Insulin-Resistant Diabetic Rats *Bronislava Gedulin, Garth J. S. Cooper, and Andrew A. Young* 782

Ceruloplasmin Stimulates Thymidine Incorporation by CCL-39 Cells in the Absence of Serum or Growth Factors *F. Alcain, H. Löw, and F. L. Crane* 790

Control of *Leishmania mexicana* Proliferation by Modulation of Polyamine Intracellular Levels *N. S. González, C. P. Sánchez, L. Sferco, and I. D. Algranati* 797

Purification of a Group of HeLa Nuclear Proteins That Bind to a Regulatory Element (-1430/-1327) of the Human Proliferating Cell Nucleolar Protein P120 Gene *Amitava Chatterjee, Rose K. Busch, David Jung, Wei-Wei Zhang, and Harris Busch* 805

A Single Amino Acid Residue Determines the Ca^{2+} Permeability of AMPA-Selective Glutamate Receptor Channels *Masayoshi Mishina, Kenji Sakimura, Hisashi Mori, Etsuko Kushiya, Masayuki Harabayashi, Shigeo Uchino, and Kenji Nagahari* 813

[D-Ala^2]Deltorphin II Analogs with High Affinity and Selectivity for δ-Opioid Receptor *Yusuke Sasaki, Akihiro Ambo, and Kenji Suzuki* 822

Structure and Function of a Pentapeptide Isolated from the Gut of the Eel *Toshihiro Uesaka, Tetsuya Ikeda, Ichiro Kubota, Yojiro Muneoka, and Masaaki Ando* 828

Single Cell Analysis of Changes in Cytosolic Calcium Induced by Vitamin D_3 Metabolites in Cultured Rat Mesangial Cells
R. L. Boland, A. R. de Boland, R. Nobiling, T. Weinreich, and E. Ritz 833

The Determination of Absolute Electron Affinities of the Purines and Pyrimidines in DNA and RNA from Reversible Reduction Potentials
J. R. Wiley, J. M. Robinson, S. Ehdaie, E. C. M. Chen, E. S. D. Chen, and W. E. Wentworth 841

FKBP, the Binding Protein for the Immunosuppressive Drug, FK-506, Is Not an Inhibitor of Protein Kinase C Activity
John Cryan, Shirley H. Y. Hung, Gregory Wiederrecht, Nolan H. Sigal, and John J. Siekierka 846

Amplification and Sequencing of mRNA Encoding Acidic Fibroblast Growth Factor from Porcine Heart *Michaela Schmidt, Hari S. Sharma, Robert J. Schott, and Wolfgang Schaper* 853

Evidence for TRH-Induced Influx of Extracellular Ca^{2+} in Pituitary GH_4C_1 Cells
Kid Törnquist 860

Evidence for Two Classes of 1,25-Dihydroxyvitamin D_3 Binding Sites in Classical vs. Nonclassical Target Tissues *Robert C. Gensure, Paul C. Riggle, Steve D. Antrobus, and Marian R. Walters* 867

Laser-Induced Reconnection of Severed Axons
David Yogev, Angelo T. Todorov, Peimin Qi, Janos H. Fendler, and Gerard S. Rodziewicz 874

The Crucial Role of Cyclic GMP in the Eclosion Hormone Mediated Signal Transduction in the Silkworm Metamorphoses *Yasuhiko Shibanaka, Hideaki Hayashi, Noriko Okada, and Norihisa Fujita* 881

Cloning and Sequence Analysis of the Human Liver Rhodanese: Comparison with the Bovine and Chicken Enzymes
R. Pallini, G. C. Guazzi, C. Cannella, and M. G. Cacace 887

Quantitative Analysis of Age-Associated Accumulation of Mitochondrial DNA with Deletion in Human Hearts *Satoru Sugiyama, Kazuki Hattori, Mika Hayakawa, and Takayuki Ozawa* 894

Epidermal Growth Factor Inhibits Both Cholecystokinin Octapeptide-Induced Inositol 1,4,5-Trisphosphate Production and $[Ca^{2+}]_i$ Increase in Rat Pancreatic Acinar Cells *André Pröfrock, Albrecht Piiper, Luise Eckhardt, and Irene Schulz* 900

Release of Nitric Oxide from Human Vascular Smooth Muscle Cells
Jens Bernhardt, Marcel R. Tschudi, Yasuaki Dohi, Ivo Gut, Bernhard Urwyler, Fritz R. Bühler, and Thomas F. Lüscher 907

Induction Kinetics of RNA and Proteins in Exponentially Growing Organisms
S. Harayama 913

Synthesis of Nitric Oxide in the Bovine Retina
C. M. Venturini, R. G. Knowles, R. M. J. Palmer, and S. Moncada 920

Bradykinin and ATP Stimulate L-Arginine Uptake and Nitric Oxide Release in Vascular Endothelial Cells *R. G. Bogle, S. B. Coade, S. Moncada, J. D. Pearson, and G. E. Mann* 926

Cytotoxicity of Tiazofurin and Its Arabinose and Xylose Analogues in K562 Cells
Weining Zhen, Hiremagalur N. Jayaram, Victor E. Marquez, Barry M. Goldstein, David A. Cooney, and George Weber 933

Characterization of Phospholipid Compositions and Physical Properties of DMPC/Bacteriorhodopsin Vesicles Produced by a Detergent-Free Method
Paul Gale and Anthony Watts 939

Polyamine Binding Activity of Casein Kinase II *Odile Filhol, Claude Cochet, Thierry Delagoutte, and Edmond M. Chambaz* 945

Superinduction of 2,3,7.8-Tetrachlorodibenzo-*p*-dioxin-Inducible Expression of Aldehyde Dehydrogenase by the Inhibition of Protein Synthesis
Koichi Takimoto, Ronald Lindahl, and Henry C. Pitot 953

Glucose and Carbachol Synergistically Stimulate Phosphatidic Acid Accumulation in Pancreatic Islets *Robert J. Konrad, Y. Camille Jolly, and Bryan A. Wolf* 960

Expression of the pp63 Gene Encoding the Insulin Receptor Tyrosine Kinase Inhibitor in Proliferating Liver and in Liver Tumors
Bruno M. Colombo, Laurence Falquerho, Giacomo Manenti, Tommaso A. Dragani, and Alphonse Le Cam 967

Formation of Benzodiazepine-like Molecules in Rat Brain
Marta A. Piva, Jorge H. Medina, Angel L. de Blas, and C. Peña 972

Stretch Increases Inositol Trisphosphate and Inositol Tetrakisphosphate in Cultured Pulmonary Vascular Smooth Muscle Cells *Thomas J. Kulik, Russell A. Bialecki, Wilson S. Colucci, Abraham Rothman, Eileen T. Glennon, and Richard H. Underwood* 982

Two Commonly Occurring Nucleotide Base Substitutions in Chinese G6PD Variants
Daniel Tsun-Yee Chiu, Lin Zuo, Ellson Chen, Lotung Chao, Elaine Louie, Bertram Lubin, Tsan Z. Liu, and Chuan-Su Du 988

Expression of a Full-Length Nonstructural Protein NS1 of Bluetongue Virus Serotype 17 in *Escherichia coli* *Xiao-Song He, Lin-Fa Wang, Roy H. Doi, Maurecio Maia, Bennie I. Osburn, and Ronald Y. Chuang* 994

Oxodiene Formation during the *Vicia sativa* Lipoxygenase-Catalyzed Reaction: Occurrence of Dioxygenase and Fatty Acid Lyase Activities Associated in a Single Protein *Rivo-Hery Andrianarison, Hélène Rabinovitch-Chable, and Jean Louis Beneytout* 1002

First Large-Scale Chemical Synthesis of the 72 Amino Acid HIV-1 Nucleocapsid Protein NCp7 in an Active Form *H. de Rocquigny, D. Ficheux, C. Gabus, M.-C. Fournié-Zaluski, J.-L. Darlix, and B.P. Roques* 1010

Importance of the C-Terminal Region of Big Endothelin-1 for Specific Conversion by Phosphoramidon-Sensitive Endothelin Converting Enzyme
Kenji Okada, Junji Takada, Yukiko Arai, Kenji Matsuyama, and Mitsuo Yano 1019

The Influence of Flanking Sequence on O-Glycosylation
Brian O'Connell, Lawrence A. Tabak, and Narayanan Ramasubbu 1024

Lenore A. Snyder, James L. Roberts, and Stuart C. Sealfon 1031

Receptor-Mediated Activation of Arachidonic Acid Release in Mouse Peritoneal Macrophages Is Linked to Extracellular Calcium Influx
Belén Fernández, and Jesús Balsinde 1036

An Inositol Phosphoglycan Stimulates Glycolysis in Human Platelets
Paola Bruni, Valeria Vasta, Lucia Berti, Matias A. Avila, Marta Farnararo, and Isabel Varela-Nieto 1041

Analysis of Styryl-Based Inhibitors of the Lymphocyte Tyrosine Protein Kinase $p56^{lck}$
Zhen-hong Li, Terrence R. Burke, Jr., and Joseph B. Bolen 1048

Hydrogen Bonding in Steroidogenesis: Studies on New Heterocyclic Analogs of Estrone that Inhibit Human Estradiol 117β-Dehydrogenase
Frederick Sweet, James Boyd, Olga Medina, Lech Konderski, and Gary L. Murdock 1057

Expression of Enhancer Binding Factors Associated with Various Cell Types of Lung Cancer
Yuk-Chor Wong and Samuel D. Bernal 1064

Size Separation of Polystyrene Sulfate Particles (189 to 1085 nm radius) in Solutions of Methyl-hydroxypropyl-cellulose of Different Chain Lengths
John A. Burroughs and Andreas Chrambach 1070

Identification of Proteins Resembling G-Protein α-Subunits in Locust Muscle
A. Söling, Chr. Walther, and W. Rosenthal 1075

Analysis of Genetic Mutations in Human Lactate Dehydrogenase-A(M) Deficiency Using DNA Conformation Polymorphism in Combination with Polyacrylamide Gradient Gel and Silver Staining
Masato Maekawa, Kayoko Sudo, Steven S.-L. Li, and Takashi Kanno 1083

Identification of Four Different CD46 (MCP) Molecules with Anti-peptide Antibodies
Damian F. J. Purcell, Ricky W. Johnstone, and Ian F. C. McKenzie 1091

Autocrinological Role of Basic Fibroblast Growth Factor on Tube Formation of Vascular Endothelial Cells *in Vitro*
Yasufumi Sato, Tatsuo Shimada, and Ryosaburo Takaki 1098

Expression of the Human Angiotensinogen Gene in Transgenic Mice and Transfected Cells
Shigeru Takahashi, Akiyoshi Fukamizu, Takanori Hasegawa, Minesuke Yokoyama, Tatsuji Nomura, Motoya Katsuki, and Kazuo Murakami 1103

Isolation and Characterisation of the Human Lung NK-1 Receptor cDNA
Brian Hopkins, Steven J. Powell, Petra Danks, Ian Briggs, and Alexander Graham 1110

Further Characterization of a High Affinity Thyrotropin Binding Site on the Rat Thyrotropin Receptor Which Is an Epitope for Blocking Antibodies from Idiopathic Myxedema Patients but Not Thyroid-Stimulating Antibodies from Graves' Patients
Shinji Kosugi, Toshiaki Ban, Takashi Akamizu, and Leonard D. Kohn 1118

On the Spontaneous Adherence of Myelin Basic Protein to T Lymphocytes
A. Bobba, I. Munno, B. Greco, N. M. Pellegrino, P. Riccio, E. Jirillo, and E. Quagliariello 1125

Transforming Growth Factor-β-Induced Gene Expression of Monocyte Chemoattractant JE in Mouse Osteoblastic Cells, MC3T3-E1 *Shigemasa Hanazawa, Akira Takeshita, Yoshio Tsukamoto, Yasuhiro Kawata, Kazuzo Ohta Iwao Takara, and Shigeo Kitano* 1130

Differential Effects of All-*trans*- and 13-*cis*-Retinoic Acid on mRNA Levels of Nuclear Retinoic Acid Receptors in Rat Lung and Liver *Riaz-ul-Haq, Magnus Pfahl, and Frank Chytil* 1137

Timing and Role of p53 Gene Mutation in the Recurrence of Glioma *Yutaka Hayashi, Junkoh Yamashita, and Kazuo Yamaguchi* 1145

Tumor Cytotoxic Factor/Hepatocyte Growth Factor from Human Fibroblasts: Cloning of Its cDNA, Purification, and Characterization of Recombinant Protein *Nobuyuki Shima, Masaya Nagao, Fumiko Ogaki, Eisuke Tsuda, Akihiko Murakami, and Kanji Higashio* 1151

cDNA Cloning of a Calcineurin B Homolog in *Saccharomyces cerevisiae* *Takayoshi Kuno, Hozumi Tanaka, Hideyuki Mukai, Chang-Duk Chang, Kazumi Hiraga, Tokichi Miyakawa, and Chikako Tanaka* 1159

RETRACTION

Volume 162, Number 1, July 14, 1989: Tian-Shing Lee, Ting Chao, Kang-Quan Hu, and George L. King, "Endothelin Stimulates a Sustained 1,2-Diacylglycerol Increase and Protein Kinase C Activation in Bovine Aortic Smooth Muscle Cells," pp. 381-386 1164

Volume 180, Number 3, November 14, 1991

Identification of Free Glycan Chain Liberated by De-*N*-Glycosylation of the Cortical Alveolar Glycopolyprotein (Hyosophorin) during Early Embryogenesis of the Medaka Fish, *Oryzias latipes* *Akira Seko, Ken Kitajima, Sadako Inoue, and Yasuo Inoue* 1165

YM175, a New Bisphosphonate, Increases Serum 1,25-Dihydroxyvitamin D in Rats via Stimulating Renal 1-Hydroxylase Activity *Yoshitaka Nagao, Yoko Ishitobi, Haruko Kinoshita, Shinji Fukushima, and Hiroyuki Kawashima* 1172

Dystrophin-Related Protein in the Fetal and Denervated Skeletal Muscles of Normal and *mdx* Mice *Masakazu Takemitsu, Shoichi Ishiura, Ritsuko Koga, Keiko Kamakura, Kiichi Arahata, Ikuya Nonaka, and Hideo Sugita* 1179

Structural Differences in 5′-Flanking Regions of Rat Cytochrome P450aldo and P45011β Genes *Kuniaki Mukai, Michiyo Imai, Hideo Shimada, Yukiko Okada, Tadashi Ogishima, and Yuzuru Ishimura* 1187

Expression of Id, a Negative Regulator of Helix–Loop–Helix DNA Binding Proteins, Is Down-Regulated at Confluence and Enhanced by Dexamethasone in a Mouse Osteoblastic Cell Line, MC3T3E$_1$ *Toshiko Ogata and Masaki Noda* 1194

ATP Diphosphohydrolase Is Responsible for Ecto-ATPase and Ecto-ADPase Activities in Bovine Aorta Endothelial and Smooth Muscle Cells *Kiyohito Yagi, Masashi Shinbo, Minori Hashizume, Leonard S. Shimba, Sachiko Kurimura, and Yoshiharu Miura* 1200

Growth Inhibitory Factor of Human Alveolar Macrophage
Koh Nakata, Yasunori Yamaguchi, Mitsutaka Kadokura, Noboru Tanio, and Kiyoko S. Akagawa 1207

The Solution Conformation of the Le^x Group
Mark R. Wormald, Christopher J. Edge, and Raymond A. Dwek 1214

ClpB Proteins Copurify with the Anaerobic *Escherichia coli* Reductase
Elisabet Pontis, Xueyin Sun, Hans Jörnvall, Maria Krook, and Peter Reichard 1222

Requirement of ADP-Ribosylation for the Pertussis Toxin-Induced Alteration in Electrophoretic Mobility of G-Proteins
Sandra C. Roerig, Horace H. Loh, and P. Y. Law 1227

Direct Labeling of DNA Adducts Formed from Carcinogenic Diol-Epoxides with a Fluorescent Reporter Compound Specific for the *cis* Vic-Diol Group
M. Uziel and K. Houck 1233

The Human ASM (Adult Skeletal Muscle) Gene: Expression and Chromosomal Assignment to 11p15 *M. P. Leibovitch, V. C. Nguyen, M. S. Gross, B. Solhonne, S. A. Leibovitch, and A. Bernheim* 1241

Influence of Internucleotide Phosphate Linkage on Relative Base Stacking in 3′-5′ and 2′-5′ RNA: A Circular Dichroic Spectroscopic Study of RNA Hexamer *AACCUU*
Vidhya Gopalakrishnan, R. S. Ghadage, and K. N. Ganesh 1251

Rabbit Serum Amyloid A Gene: Cloning, Characterization, and Sequence Analysis
Bimal K. Ray and Alpana Ray 1258

Cloning and Characterization of cDNA Encoding Human A-Type Endothelin Receptor
Miki Adachi, Yan-Yan Yang, Yasuhiro Furuichi, and Chikara Miyamoto 1265

Inhibition and Enhancement of Eukaryotic Gene Expression by Potential Non-B DNA Sequences *Jozo Delic, Rosine Onclercq, and Mäité Moisan-Coppey* 1273

Inhibition of Growth Factor Signaling Pathways by Lovastatin
Timothy S. Vincent, Ernst Wülfert, and Ezio Merler 1284

Topographical Requirements for Delta Opioid Ligands: Presence of a Carboxyl Group in Position 4 Is Not Critical for Deltorphin High Delta Receptor Affinity and Analgesic Activity *Aleksandra Misicka, Andrzej W. Lipkowski, Lei Fang, Richard J. Knapp, Peg Davis, Thomas Kramer, Thomas F. Burks, Henry I. Yamamura, Daniel B. Carr, and Victor J. Hruby* 1290

Long-Lasting Vasoconstriction and Efficient Regional Extraction of Endothelin-1 in Human Splanchnic and Renal Tissues
E. Weitzberg, G. Ahlborg, and J. M. Lundberg 1298

Coated Pits and Asialoglycoprotein Receptors Redistribute to the Substratum during Hepatocyte Adhesion to Galactoside Surfaces
Paul H. Weigel and Janet A. Oka 1304

Interactions of Antisense Peptides with Ovine Prolactin
Anil Bajpai, Kyle P. Hooper, and Kurt E. Ebner 1312

High-Level Expression of Functional Platelet-Activating Factor Receptors on a Human B Lymphoblastoid Cell Line
Abraham Kuruvilla, Girish Putcha, and William T. Shearer 1318

The Lectin Wheat Germ Agglutinin Stimulates a Protein–Tyrosine Kinase Activity of $p72^{syk}$ in Porcine Splenocytes *Takechiyo Yamada, Takanobu Taniguchi, Katsuya Nagai, Hitoshi Saitoh, and Hirohei Yamamura* 1325

A Microvoltammetric Study of Permeation of Ferrocene Derivatives through a Planer Bilayer Lipid Membrane *Hiroshi Yamada, Tomokazu Matsue, and Isamu Uchida* 1330

Immunobiological Activities of Synthetic Peptide Segments of Fimbrial Protein from *Porphyromonas gingivalis* *Tomohiko Ogawa, Yutaka Kusumoto, Hiroshi Uchida, Shigeru Nagashima, Hideji Ogo, and Shigeyuki Hamada* 1335

Dactinomycin Is a Competitive Neurokinin-2 Receptor Antagonist *Philippe Delay-Goyet and Jan M. Lundberg* 1342

The C-Terminal Domain of RNA Polymerase II of the Malaria Parasite *Plasmodium berghei* *Heike Giesecke, Jean-Cristophe Barale, Gordon Langsley, and Albert W. C. A. Cornelissen* 1350

Gastric H,K-ATPase Topography: Amino Acids 888–907 Are Cytoplasmic *Adam Smolka, Leigh Alverson, Rolf Fritz, Kay Swiger, and Rick Swiger* 1356

Purification and Kinetic Characterization of Equine Infectious Anemia Virus Reverse Transcriptase *Deborah A. Thomas and Phillip A. Furman* 1365

Increased Activity of the eEF-2 Specific, Ca^{2+}- and Calmodulin-Dependent Protein Kinase III during the S-Phase in Ehrlich Ascites Cells *Ulf Carlberg, Anders Nilsson, Sven Skog, Kim Palmquist, and Odd Nygård* 1372

Regulation of Endogenous Chloride Conductance in Xenopus Oocytes *Anthony C. Chao and Yoko Katayama* 1377

Regulation of Interleukin-1β Production by Glucocorticoids in Human Monocytes: The Mechanism of Action Depends on the Activation Signal *Mikko Hurme, Pia Siljander, and Heli Anttila* 1383

An Exon 5-Deleted mRNA Encodes a Functional Interleukin-2 Receptor α-Subunit *L. Mercken, V. Moras, L. Hemon, B. Lionne, A. Bousseau, A. Dautry-Varsat, M. Collins, and J.-F. Mayaux* 1390

Phosphorylation by Calcium Calmodulin-Dependent Protein Kinase II and Protein Kinase C Modulates the Activity of Nitric Oxide Synthase *Masaki Nakane, Jane Mitchell, Ulrich Förstermann, and Ferid Murad* 1396

The *ble* Gene of *Streptoalloteichus hindustanus* as a New Selectable Marker for *Dictyostelium discoideum* Confers Resistance to Phleomycin *Barbara Leiting and Angelika A. Noegel* 1403

Engineering by PCR-Based Exon Amplification in the Genomic Porcine Interferon-γ DNA for Expression in *Escherichia coli* *Koen Vandenbroeck, Roger Dijkmans, Arthur Van Aerschot, and Alfons Billiau* 1408

Inhibition of Leukotriene B_4-Induced Neutrophil Migration by Lipoxin A_4: Structure–Function Relationships *Tak H. Lee, Penny Lympany, Attilio E. G. Crea, and Bernd W. Spur* 1416

Differential Recovery of Protein Kinase c-α and -ε Isozymes after Long-Term Phorbol Ester Treatment in Rat Renal Mesangial Cells *Andrea Huwiler, Doriano Fabbro, and Joseef Pfeilschifter* 1422

Potent Anti-inflammatory Action of Calcitonin Gene-Related Peptide *J. Raud, T. Lundeberg, G. Brodda-Jansen, E. Theodorsson, and P. Hedqvist* 1429

Endogenous Activity of Cyclic Nucleotide-Dependent Protein Kinase in Plasma Membranes Isolated from *Strongylocentrotus purpuratus* Sea Urchin Sperm *Jesus Garcia-Soto, Luz M. Araiza, Miriam Barrios, Alberto Darszon, and Juan P. Luna-Arias* 1436

The Peptides APLHK, EHIPA, and GAPL Are Hydropathically Equivalent Peptide Mimics of a Fibrinogen Binding Domain of Glycoprotein IIb/IIIa *T. Kent Gartner, Robert Loudon, and Donald B. Taylor* 1446

Identification of a GTP-Binding Protein in the Contact Sites between Inner and Outer Mitochondrial Membranes *Trevor Lithgow, Mark Timms, Peter B. Høj, and Nicholas J. Hoogenraad* 1453

The Orphan Receptor cDNA RDC4 Encodes a 5-HT$_{1D}$ Serotonin Receptor *C. Maenhaut, J. Van Sande, C. Massart, C. Dinsart, F. Libert, E. Monferini, E. Giraldo, H. Ladinsky, G. Vassart, and J. E. Dumont* 1460

Functional Analysis of the Human Lecithin Cholesterol Acyl Transferase (LCAT) Gene Promoter *Germana Meroni, Nicoletta Malgaretti, Marco Pontoglio, Sergio Ottolenghi, and Roberto Taramelli* 1469

Isolation and Sequence of Rat Testis cDNA for a Calcium Binding Polypeptide Similar to the Regulatory Subunit of Calcineurin *Mikio Sugimoto, Hideki Matsui, Seiji Etoh, Tohru Shimizu, Hajime Nishio, Lizomar J. M. P. Moia, Masaaki Tokuda, Toshifumi Itano, Ikumasa Takenaka, and Osamu Hatase* 1476

Mechanisms of a Conversion from Membrane-Associated Lysosomal Acid Phosphatase to Content Forms *Masaru Himeno, Katsuji Nakamura, Yoshitaka Tanaka, Hidenori Yamada, Taiji Imoto, and Keitaro Kato* 1483

Highly Conserved Eight Amino Acid Sequence in SH2 Is Important for Recognition of Phosphotyrosine Site *Michihiro Hidaka, Yoshimi Homma, and Tadaomi Takenawa* 1490

The Carboxyl Terminal Amino Acid Residues of *Pseudomonas aeruginosa* Exotoxin A Involved in Cell Toxicity and Pathogenesis, Characterized by a Neutralizing Human Monoclonal Antibody *Hiroshi Ohtsuka, Atsuko Higuchi, Noriko Nomura, Kazuhiko Horigome, Tsuneo Kohzuki, Yoshitaka Nakamori, and Hiroshi Noguchi* 1498

Physiological Role for Vanadate-Inhibitable Active H$^+$ Transport: A New Model for Distal Urinary Acidification *Steven J. Youmans and Catherine R. Barry* 1505

Additive Effect of Islet Amyloid Polypeptide (IAPP/Amylin) and Insulin on 2-Deoxyglucose Uptake in Mouse Pancreatic Acini *Yasuhiko Iwamoto, Gen Inooka, Nobuko Sakuma, Ikuo Shiraishi, Shinobu Kumakura, Takuya Awata, and Takeshi Kuzuya* 1513

The Thapsigargin-Sensitive Intracellular Ca^{2+} Pool Is More Important in Plasma Membrane Ca^{2+} Entry than the IP$_3$-Sensitive Intracellular Ca^{2+} Pool in Neuronal Cell Lines *Haruo Takemura, Hideyo Ohshika, Noriko Yokosawa, Keiji Oguma, and Ole Thastrup* 1518

Expression of Liver Type Pyruvate Kinase in Insulinoma Cells: Involvement of LF-B1 (HNF1) *Tamio Noguchi, Kazuya Yamada, Kazuya Yamagata, Masaru Takenaka, Hiromu Nakajima, Enyu Imai, Ziyuan Wang, and Takehiko Tanaka* 259

Trophic Effect of β-Amyloid Precursor Protein on Cerebral Cortical Neurons in Culture *Wataru Araki, Nobuya Kitaguchi, Yasuo Tokushima, Kazuhiro Ishii, Hisashi Aratake, Shun Shimohama, Shigenobu Nakamura, and Jun Kimura* 265

Expression of Bovine Lung Prostaglandin F Synthase in *Escherichia coli* *Kikuko Watanabe, Yutaka Fujii, Hiroaki Ohkubo, Seiki Kuramitsu, Hiroyuki Kagamiyama, Sigetada Nakanishi, and Osamu Hayaishi* 272

Distribution of Plural HCV Types in Japan *Nobuyuki Kato, Yuko Ootsuyama, Showgo Ohkoshi, Takahide Nakazawa, Shigehisa Mori, Makoto Hijikata, and Kunitada Shimotohno* 279

Isolation and Characterization of Prosaposin from Human Milk *Keiji Kondoh, Takashi Hineno, Akira Sano, and Yasuo Kakimoto* 286

Identification and Characterization of Islet Amyloid Polypeptide in Mammalian Gastrointestinal Tract *Mikiya Miyazato, Masamitsu Nakazato, Kazutaka Shiomi, Junko Aburaya, Hirotaka Toshimori, Kenji Kangawa, Hisayuki Matsuo, and Shigeru Matsukura* 293

Demonstration of an Antigenic Protein Specific for *Salmonella typhi* *Asma Ismail, Ong Kok Hai, and Zainoodin A. Kader* 301

Retinal Cyclic-GMP Phosphodiesterase γ-Subunit: Use of Mutant Synthetic Peptides to Define Function *Brenda Oppert, Karen Gonzalez, Dan Hurt, Jess Cunnick, and Dolores Takemoto* 306

Expression of Hanganutziu-Deicher Antigen in Activated Human T Lymphocytes *Nobutaka Wakamiya, Yoshio Osada, Daqing Wang, Kazuhiro Nakajima, Shiro Kato, Takashi Kurimura, and Masaharu Naiki* 310

Molecular Cloning of the Cytochrome aa_3 Gene from the Archaeon (Archaebacterium) *Halobacterium halobium* *Kimitoshi Denda, Taketomo Fujiwara, Makoto Seki, Masasuke Yoshida, Yoshihiro Fukumori, and Tateo Yamanaka* 316

Promyelocytic Leukemia Cell Line, HL-60, Produces Human Hepatocyte Growth Factor *Tomoyoshi Nishino, Nobuko Kaise, Yutaka Sindo, Naoki Nishino, Tsutomu Nishida, Setsuko Yasuda, and Yosihiro Masui* 323

Cell Surface Localization of a Novel Nongenomic Progesterone Receptor on the Head of Human Sperm *F. Blackmore and Frank A. Lattanzio* 331

Intrapeptide Sequence Homology in Rubrerythrin from *Desulfovibrio vulgaris*: Identification of Potential Ligands to the Diiron Site *Donald M. Kurtz, Jr., and Benet C. Prickril* 337

Spectroscopic Studies on APS Reductase Isolated from the Hyperthermophilic Sulfate-Reducing Archaebacterium *Archaeglobus fulgidus* *Jorge Lampreia, Guy Fauque, Norbert Speich, Christiane Dahl, Isabel Moura, Hans G. Trüper, and José J. G. Moura* 342

The Activity of a β Subtype of Protein Kinase C Purified from Nuclei of Human Neutrophils Is Enhanced by Treatment with Phorbol 12-Myristate 13-Acetate *Gianpaolo Perletti, Alberto Ghessi, Ettore Raffaldoni, and Francesco Piccinini* 348

Universality of c-*fos* Transcriptional Regulation: The Dyad Symmetry Element Mediates Activation by PMA in T Lymphocytes *Philippe Robin, Didier Trouche, Paolo Sassone-Corsi, and Annick Harel-Bellan* 353

Sphingosylphosphorylcholine Is a Remarkably Potent Mitogen for a Variety of Cell Lines *Naishadh N. Desai and Sarah Spiegel* 361

Interactions of Nuclear Protein from Cultured Rat Hepatocytes with the Cyclic AMP Responsive Elements and the NF1-CTF Site in the Promotor of the Rat Phosphoenolpyruvate Carboxykinase Gene *Bruno Christ, Annegret Nath, and Kurt Jungermann* 367

Cytochrome Oxidase Induction after Oxidative Stress Induced by Adriamycin in Liver of Rats Fed with Dietary Olive Oil *J. R. Huertas, M. Battino, F. J. Mataix, and G. Lenaz* 375

Rapid Homologous Up-Regulation of Binding Capacity of Androgen Receptors in Intact Cells *Gian Paolo Rossini* 383

Increased 12-HETE Production in Bovine Lymphocytes during Selenium Deficiency *Jane F. Maddox, Yu-Zhang Cao, Andrea M. Mastro, Richard W. Scholz, George Hildenbrandt, and C. Channa Reddy* 389

RO 31-8220 and RO 31-7549 Show Improved Selectivity for Protein Kinase C over Staurosporine in Macrophages *Peter Dieter and Edith Fitzke* 396

The Rapid Identification of HIV Protease Inhibitors through the Synthesis and Screening of Defined Peptide Mixtures *R. A. Owens, P. D. Gesellchen, B. J. Houchins, and R. D. DiMarchi* 402

A Newly Identified Iron-Binding Protein in Rat Liver: Purification and Characterization *Takako Furukawa, Shigeru Taketani, Hirao Kohno, and Rikio Tokunaga* 409

The *ret* Oncogene Products Are Membrane-Bound Glycoproteins Phosphorylated on Tyrosine Residues *in Vivo* *Masahiko Taniguchi, Takashi Iwamoto, Michinari Hamaguchi, Mutsushi Matsuyama, and Masahide Takahashi* 416

Potent and Preferential Inhibition of Ca^{2+}/Calmodulin-Dependent Protein Kinase II by K252a and Its Derivative, KT5926 *Yoshiaki Hashimoto, Toshihumi Nakayama, Tamio Teramoto, Hirokazu Kato, Tsuyoshi Watanabe, Makoto Kinoshita, Kazuhisa Tsukamoto, Kazuyuki Tokunaga, Kiyoshi Kurokawa, Satoshi Nakanishi, Yuzuru Matsuda, and Yoshiaki Nonomura* 423

Cloning and Sequencing of the Gene Encoding the Large Subunit of Glutathione Synthetase of *Schizosaccharomyces pombe* *Norihiro Mutoh, Chiaki W. Nakagawa, Shoji Ando, Kazushi Tanabe, and Yukimasa Hayashi* 430

The Cytochrome *c* Oxidase Genes in Blue-Green Algae and Characteristics of the Deduced Protein Sequence for Subunit II of the Thermophilic Cyanobacterium *Synechococcus vulcanus* *Hiroyuki Tano, Morio Ishizuka, and Nobuhito Sone* 437

Expression of a Biologically Active Ovine Trophoblastic Interferon Using a Baculovirus Expression System *Martine Cerutti, Dominique Hue, Madia Charlier, René L'Haridon, Jean-Claude Pernollet, Gérard Devauchelle, and Pierre Gaye* 443

The Activation Peptide of Pancreatic Procarboxypeptidase A Is the Keystone of the Bovine Procarboxypeptidase A-S6 Ternary Complex *Thierry Michon, Simone Granon, Paul Sauve, and Catherine Chapus* 449

Absence of Implication of L-Arginine/Nitric Oxide Pathway on Neuronal Cell Injury Induced by L-Glutamate or Hypoxia *Caroline Demerlé-Pallardy, Marie-Odile Lonchampt, Pierre-Etienne Chabrier, and Pierre Braquet* 456

Identification of $\Delta^{5,7}$-Sterol-Δ^{7}-Reductase in Higher Plant Microsomes *Maryse Taton and Alain Rahier* 465

Thermostabilization of Recombinant Human and Bovine CuZn Superoxide Dismutases by Replacement of Free Cysteines *Robert A. Hallewell, Karin C. Imlay, Pandora Lee, Noel M. Fong, Carol Gallegos, Elizabeth D. Getzoff, John A. Tainer, Diane E. Cabelli, Patricia Tekamp-Olson, Guy T. Mullenbach, and Lawrence S. Cousens* 474

Internal Ribosome-Binding Site Directs Expression of Parathyroid Hormone Analogue (8–84) in *Escherichia coli* *Wing L. Sung, Cathy K. Luk, Diana M. Zahab, Jean R. Barbier, Marc Lafontaine, and Gordon E. Willick* 481

Association of a RFLP for the Insulin Receptor Gene, but not Insulin, with Essential Hypertension *Li-Hua Ying, Robert Y. L. Zee, Lyn R. Griffiths, and Brian J. Morris* 486

Tissue Distribution of High Molecular Weight Calmodulin-Binding Protein *Rajendra K. Sharma* 493

Nucleotide and Amino Acid Homology between the Human Thyrotropin Receptor and the HIV-1 Nef Protein: Identification and Functional Analysis *Henry B. Burch, Endre V. Nagy, Yvonne G. Lukes, Wen Yi Cai, Leonard Wartofsky, and Kenneth D. Burman* 498

Volume 181, Number 2, December 16, 1991

Nucleotide Sequence of the *Clostridium thermocellum* Laminarinase Gene *Vladimir V. Zverlov, Dmitriy A. Laptev, Vladimir I. Tishkov, and Galina A. Velikodvorskaja* 507

The β-Amyloid Precursor Protein Is Not Processed by the Regulated Secretory Pathway *Caroline C. Overly, Lawrence C. Fritz, Ivan Lieberburg, and Lisa McConlogue* 513

Detection of Interleukin and Interleukin-Receptor mRNA in Human Heart by Polymerase Chain Reaction *Richard O. Han, Phillip E. Ray, Kenneth L. Baughman, and Arthur M. Feldman* 520

The Phosphotransferase Activity of Casein Kinase II Is Required for Its Physiological Function *in Vivo* *Mark J. Birnbaum and Claiborne V. C. Glover* 524

Endothelin-1 Is Expressed and Released by a Human Endothelial Hybrid Cell Line (EA.hy 926) *O. Saijonmaa, T. Nyman, U. Hohenthal, and F. Fyhrquist* 529

Normal Cholesterol Synthesis in Human Cells Requires Functional Peroxisomes *Vance J. Hodge, Steven J. Gould, Suresh Subramani, Hugo W. Moser, and Skaidrite K. Krisans* 537

Stabilization of Actin by Phalloidin: A Differential Scanning Calorimetric Study *Thierry Le Bihan and Claude Gicquaud* 542

The Role of Phosphorylation in Development of Tight Junctions in Cultured Renal Epithelial (MDCK) Cells *Sanjay K. Nigam, Natalia Denisenko, Enrique Rodriguez-Boulan, and Sandra Citi* 548

Lactosylceramide Stimulates Aortic Smooth Muscle Cell Proliferation *Subroto Chatterjee* 554

Inhibitory Effect of Thyrotropin-Releasing Hormone on Spontaneous Proliferation of Mouse Spleen Lymphocytes *in Vitro* *Jolanta Kunert-Radek, Marek Pawlikowski, Henryk Stepien, and Anna Janecka* 562

Stimulation of Phospholipase C Activity by Insulin Is Mediated by Both Isotypes of the Human Insulin Receptor *Monika Kellerer, Fausto Machicao, Eva Seffer, Joanne Mushack, Axel Ullrich, and Hans Ulrich Häring* 566

Identification of Potentially Neurotoxic Pyridinium Metabolite in the Urine of Schizophrenic Patients Treated with Haloperidol *Babu Subramanyam, Susan M. Pond, Darryl W. Eyles, Harvey A. Whiteford, Hassan G. Fouda, and Neal Castagnoli, Jr.* 573

Structural Properties of Human Carbonic Anhydrase II at pH 9.5
Satish K. Nair and David W. Christianson 579

A Common Precursor for a Putative Hemorrhagic Protein and Rhodostomin, a Platelet Aggregation Inhibitor of the Venom *Calloselasma rhodostoma*: Molecular Cloning and Sequence Analysis *Lo-Chun Au, Yue-Bin Huang, Tur-Fu Huang, Go-Wai Teh, Hsi-Hsien Lin, and Kong-Bung Choo* 585

Human Erythropoietic Protoporphyria: Two Point Mutations in the Ferrochelatase Gene *Jerôme Lamoril, Samia Boulechfar, Hubert de Verneuil, Bernard Grandchamp, Yves Nordmann, and Jean-Charles Deybach* 594

Scanning Tunneling Microscopy of Human Erythrocyte Membranes
M. Gaczynska, M. Chwialkowski, W. Olejniczak, S. Wojczuk, and G. Bartosz 600

A *DBL*-Homologous Region of the Yeast *CLS4/CDC24* Gene Product Is Important for Ca^{2+}-Modulated Bud Assembly *Shigemi Miyamoto, Yoshikazu Ohya, Yoshifumi Sano, Shuichi Sakaguchi, Hidetoshi Iida, and Yasuhiro Anraku* 604

Tissue Distribution of the 1,25-Dihydroxyvitamin D_3 Receptor in the Male Rat
Maria E. Sandgren, M. Brönnegärd, and Hector F. DeLuca 611

Dissociation between Activation of Growth-Related Genes and Mitogenic Responses of Neonatal Vascular Smooth Muscle Cells
Robert H. Weiss and Harlan E. Ives 617

Induction of DNA Polymerase β during Proliferation of Mitogen-Stimulated Human Lymphocytes *Hisanori Suzuki, Marta Menegazzi, Alessandra Carcereri De Prati, Tsutomu Ogura, Hiroyasu Esumi, Akio Matsukage, and Massimo Libonati* 623

Phosphorylation of cAMP Response Element-Binding Protein, CRE-BP1, by cAMP-Dependent Protein Kinase and Protein Kinase C *Atsusi Sakurai, Toshio Maekawa, Tatsuhiko Sudo, Shunsuke Ishii, and Akira Kishimoto* 629

Multiple Pathways of Thrombin-Induced Platelet Activation Differentiated by Desensitization and a Thrombin Exosite Inhibitor
Steven M. Seiler, Harold J. Goldenberg, Inge M. Michel, John T. Hunt, and George B. Zavoico 636

Molecular Cloning and Sequencing of a cDNA Clone Encoding a New Calcium Binding Protein, Named Calgizzarin, from Rabbit Lung
Masato Watanabe, Yuhko Ando, Hitoshi Todoroki, Hiroyuki Minami, and Hiroyoshi Hidaka 644

Intermolecular Degradation of Signal Peptidase I *in Vitro*
Todd L. Talarico, Inderjit K. Dev, Philip J. Bassford, Jr., and Paul H. Ray 650

Enzyme Chemistry of *Dithio*hemiacetals: Synthesis and Characterization of *S*-D-*Dithio*mandeloylglutathione as an Alternate Substrate for Glyoxalase I
Jie Li, Mrinal K. Guha, and Donald J. Creighton 657

Topochemical Analysis of Morphiceptin and Dermorphin Bioactivities
Toshimasa Yamazaki, Seonggu Ro, and Murray Goodman 664

Transepithelial Vinblastine Secretion Mediated by P-Glycoprotein Is Inhibited by Forskolin Derivatives *Janice Hunter, Barry H. Hirst, and Nicholas L. Simmons* 671

Morquio Disease: Isolation, Characterization, and Expression of Full-Length cDNA for Human *N*-Acetylgalactosamine-6-sulfate Sulfatase *Shunji Tomatsu, Seiji Fukuda, Michiya Masue, Kazuko Sukegawa, Toshiyuki Fukao, Atsushi Yamagishi, Toshinori Hori, Hideki Iwata, Tatsuya Ogawa, Yoshihiro Nakashima, Yuko Hanyu, Kunio Yagi, Yutaka Hayashi, Takashi Hashimoto, Koiti Titani, Rieko Oyama, Masami Suzuki, and Tadao Orii* 677

Activin Receptor mRNA Is Expressed Early in *Xenopus* Embryogenesis and the Level of the Expression Affects the Body Axis Formation *Mariko Kondo, Kosuke Tashiro, Gen Fujii, Misaki Asano, Ryutaro Miyoshi, Ryutaro Yamada, Masami Muramatsu, and Koichiro Shiokawa* 684

Deletion of Kringle Domains or the N-Terminal Hairpin Structure in Hepatocyte Growth Factor Results in Marked Decreases in Related Biological Activities *Kunio Matsumoto, Toyohiro Takehara, Hayao Inoue, Michio Hagiya, Shin Shimizu, and Toshikazu Nakamura* 691

Angiotensin II Blocks ATP-Sensitive K^+ Channels in Porcine Coronary Artery Smooth Muscle Cells *Yukiko Miyoshi and Yutaka Nakaya* 700

Molecular Cloning and Nucleotide Sequence of *Streptomyces griseus* Trypsin Gene *Jee Cheon Kim, Seung Hee Cha, Seong Tae Jeong, San Kon Oh, and Si Myung Byun* 707

Group II Phospholipase A2 Inhibitors Suppressed Lysophosphatidylserine-Dependent Degranulation of Rat Peritoneal Mast Cells *Makoto Murakami, Ichiro Kudo, Yumi Fujimori, Hinako Suga, and Keizo Inoue* 714

Inhibition of the Interaction between Lipoproteins and Amphotericin B by Some Delivery Systems *Joanna Barwicz, Raynald Gareau, André Audet, Anne Morisset, Johanne Villiard, and Ilona Gruda* 722

Inhibition of Farnesyl Transferases from Malignant and Nonmalignant Cultured Human Lymphocytes by Prenyl Substrate Analogues *Nagaratnam P. Das and Charles M. Allen* 729

Photoaffinity Labeling of Allatostatin Receptor Proteins in the Corpora Allata of the Cockroach, *Diploptera punctata* *Michel Cusson, Glenn D. Prestwich, Barbara Stay, and Stephen S. Tobe* 736

Enzymatic Properties of the Protein Encoded by Newly Cloned Human Alcohol Dehydrogenase *ADH*6 Gene *Cheng-Sheng Chen and Akira Yoshida* 743

Nonessentiality of Cysteine and Histidine Residues for the Activity of Human Class Pi Glutathione *S*-Transferase *Kwang-Hoon Kong, Hideshi Inoue, and Kenji Takahashi* 748

Functional Expression of the α1 Subunit of the AMPA-Selective Glutamate Receptor Channel, Using a Baculovirus System *Susumu Kawamoto, Hideki Onishi, Satoshi Hattori, Yohei Miyagi, Yoshihiro Amaya, Masayoshi Mishina, and Kenji Okuda* 756

The Inactivation of Mitochondrial F_1 ATPase by H_2O_2 Is Mediated by Iron Ions Not Tightly Bound in the Protein *G. Lippe, M. Comelli, D. Mazzilis, F. Dabbeni Sala, and I. Mavelli* 764

Alzheimer Disease Paired Helical Filament Core Structures Contain Glycolipid *Dennis R. Sparkman, Warren J. Goux, Christine M. Jones, Charles L. White III, and Sandra J. Hill* 771

In Vitro Reactivation of *in Vivo* Ammonium-Inactivated Glutamine Synthetase from *Synechocystis* sp. PCC 6803 *A. Mérida, P. Candau, and F. J. Florencio* 780

Identification of Macrophage Cell-Surface Binding Sites for Cationized Bovine Serum Albumin *Jan G. Dohlman, Dennis J. Pillion, Luis A. Rokeach, and M. P. Ramprasad* 787

Simultaneous Measurement of Ca^{2+} Transients and of Membrane Depolarizations in Synaptosomes *Martin Ochsner, Thomas Fleck, and Peter Waldmeier* 797

Changes in Binding Activity of Luteinizing Hormone Receptors by Site Directed Mutagenesis of Potential Glycosylation Sites *Ran Zhang, Chon Hwa Tsai-Morris, Masaya Kitamura, Ellen Buczko, and Maria L. Dufau* 804

The Modulation of Growth by HMBA in PKC Overproducing HT29 Colon Cancer Cells *Paul M. Choi and I. Bernard Weinstein* 809

Inhibition and Enhancement of Eukaryotic Gene Expression by Potential Non-B DNA Sequences *Joso Delic, Rosine Onclercq, and Maïté Moisan-Coppey* 818

Effects of Epidermal Growth Factor and Calcium Omission on Cholecystokinin-Stimulated Cl^- Conductance in Rat Pancreatic Zymogen Granules *Albrecht Piiper, André Pröfrock, and Irene Schulz* 827

F-Actin Capping by Cap32/34 Requires Heterodimeric Conformation and Can Be Inhibited with PIP_2 *Ulrike Haus, Herbert Hartmann, Paul Trommler, Angelika A. Noegel, and Michael Schleicher* 833

Partial Characterization and Subcellular Distribution Patterns of Endothelin-1, -2, and -3 Binding Sites in Human Liver *Bernd-Michael Löffler, Barbara Kalina, and Hans Kunze* 840

Concept of VNTR Alleles: Comparison of Apolipoprotein B 3′ Hypervariable Region Genotyping Results Obtained by Three Methods *Tiina Heliö* 846

Endogenous Nitric Oxide Is Present in the Exhaled Air of Rabbits, Guinea Pigs, and Humans *L. E. Gustafsson, A. M. Leone, M. G. Persson, N. P. Wiklund, and S. Moncada* 852

Identification of the Trypsin-like Activity in Commercial Preparations of Eel Acetylcholinesterase *Richard T. Carroll and Mark R. Emmerling* 858

Evidence for a Reverse Transcription Intermediate for a Marked Line Transposon in Tumoral Rat Cells *Evelyne Segal-Bendirdjian and Thierry Heidmann* 863

Glibenclamid-Sensitive K^+ Channels Are Responsible for Angiotensin II Hypersensitive Contraction and Atrial Natriuretic Factor Refractoriness of Glomeruli in Low-Sodium Rats *M. Szczepańska-Konkel, M. Redlak, and S. Angielski* 871

Fidelity of a YAC Clone in the Region of Human MCF-2 Gene *M. Cristina Patrosso, Annalisa Frattini, Lucia Susani, Paolo Vezzoni, and Anna Villa* 877

Library-Independent Cloning of Genomic Fragments Adjacent to Vector Integration Sites: Isolation of the EB4-PSV Gene from a *Dictyostelium* Gene Disruption Transformant *Martin Hildebrandt and Wolfgang Nellen* 884

Endogenous Nitric Oxide Modulates Morphine-Induced Constipation *A. Calignano, S. Moncada, and M. Di Rosa* 889

Characterization of the Lipid and Protein Contents of Myelin Bodies Isolated from the Renal Cortex of Gentamicin-Treated Rats *Eewa-Liisa Appelkvist, Mats Söderström, Lennart Nässberger, Charlotta Damberg, Gustav Dallner, and Joseph W. DePierre* 894

Vascular Endothelial Growth Factor Induces Plasminogen Activators and Plasminogen Activator Inhibitor-1 in Microvascular Endothelial Cells *M. S. Pepper, N. Ferrara, L. Orci, and R. Montesano* 902

Mutants of Human Insulin-like Growth Factor II: Expression and Characterization of Analogs with a Substitution of Tyr^{27} and/or a Deletion of Residues 62–67 *B. V. Roth, D. M. Bürgisser, C. Lüthi, and R. E. Humbel* 907

Ca^{2+}/Mg^{2+}-Dependent Nuclease: Tissue Distribution, Relationship to Internucleosomal DNA Fragmentation, and Inhibition by Zn^{2+} *Christos Giannakis, Ian J. Forbes, and Peter D. Zalewski* 915

Phosphorylation of Nitric Oxide Synthase by Protein Kinase A *Bernhard Brüne and Eduardo G. Lapetina* 921

Volume 181, Number 3, December 31, 1991

Isolation and Identification of a New Diuretic Peptide from the Tobacco Hornworm, *Manduca sexta* *Michael B. Blackburn, Timothy G. Kingan, Wanda Bodnar, Jeffrey Shabanowitz, Donald F. Hunt, Tomas Kempe, Renee M. Wagner, Ashok K. Raina, Michael E. Schnee, and Michael C. Ma* 927

Molecular Defect in Familial Lecithin:Cholesterol Acyltransferase (LCAT) Deficiency: A Single Nucleotide Insertion in LCAT Gene Causes a Complete Deficient Type of the Disease *Hideaki Bujo, Jun Kusunoki, Masahito Ogasawara, Tokuo Yamamoto, Yoshiaki Ohta, Toshitsune Shimada, Yasushi Saito, and Sho Yoshida* 933

Blood Pressure Cosegregates with a Microsatellite of Angiotensin I Converting Enzyme in F_2 Generation from a Cross between Original Normotensive Wistar–Kyoto Rat and Stroke-Prone Spontaneously Hypertensive Rat *Yasuo Nara, Toru Nabika, Katsumi Ikeda, Makoto Sawamura, Jiro Endo, and Yukio Yamori* 941

Amino-Terminal Presequence of the Precursor of Peroxisomal 3-Ketoacyl-CoA Thiolase Is a Cleavable Signal Peptide for Peroxisomal Targeting *Takashi Osumi, Toshiro Tsukamoto, Shingo Hata, Sadaki Yokota, Satoshi Miura, Yukio Fujiki, Makoto Hijikata, Shoko Miyazawa, and Takashi Hashimoto* 947

Brain Tumors Predominantly Express the Neurofibromatosis Type I Gene Transcripts Containing the 63-Base Insert in the Region Coding for GTPase-Activating-Protein-Related Domain *Youichi Suzuki, Hiroyuki Suzuki, Takamasa Kayama, Takashi Yoshimoto, and Shigeki Shibahara* 955

Immunological Cross-Reactivity between Proton-Pumping Inorganic Pyrophosphatases of Widely Phylogenic Separated Species *Beston F. Nore, Yoko Sakai-Nore, Masayoshi Maeshima, Margareta Baltscheffsky, and Pål Nyrén* 962

The Newly Synthesized Selective Ca^{2+}/Calmodulin-Dependent Protein Kinase II Inhibitor KN-93 Reduces Dopamine Contents in PC12h Cells *Mariko Sumi, Kazutoshi Kiuchi, Tomohiko Ishikawa, Akira Ishii, Masatoshi Hagiwara, Toshiharu Nagatsu, and Hiroyoshi Hidaka* 968

Constitutive Expression of *c-jun* and *jun-B* in Cell Lines Infected with Human T-Lymphotropic Virus Types I and II *W. Craig Hooper, Donna L. Rudolph, Michael D. Lairmore, and Renu B. Lal* 976

Active *c-erbB*-2 Induces Short-Term Growth of FDC-P2 Cells after IL-3 Depletion *Budsaba Wongsasant, Satoru Matsuda, and Tadashi Yamamoto* 981

Cholecystokinin Activation: Evidence for an Ordered Reaction Mechanism for the Tyrosyl Protein Sulfotransferase Responsible for the Peptide Sulfation *Olivier Frerot and Froylan Vargas* 989

Mass Measurements of Inositol 1,4,5-Trisphosphate and Inositol 1,3,4,5-Tetrakisphosphate in a Neuronal Cell Line Stimulated with Bradykinin: Inositolphosphate Response Shows Desensitization *Frédéric Doníé and Georg Reiser* 997

Implanting Mouse Embryo Stain with a LNF-I-Bearing Fluorescent Probe at Their Mural Trophectodermal Side *Tatsuya Yamagata and Kimie Yamazaki* 1004

Adenosine (A_2) Antagonist Inhibits Induction of Long-Term Potentiation of Evoked Synaptic Potentials but Not of the Population Spike in Hippocampal CA1 Neurons *Yuko Sekino, Ken-ichi Ito, Hiroyoshi Miyakawa, Hiroshi Kato, and Yoichiro Kuroda* 1010

The Regulatory Role of EF-Hand Motifs of Pig 80K Diacylglycerol Kinase as Assessed Using Truncation and Deletion Mutants *Fumio Sakane, Shin-ichi Imai, Keiko Yamada, and Hideo Kanoh* 1015

Replacement of Three Troponin Components with Cardiac Troponin Components within Single Glycerinated Skeletal Muscle Fibers *Masamitsu Hatakenaka and Iwao Ohtsuki* 1022

Fecal Excretion, Uptake, and Metabolism by Colon Mucosa of Diacylglycerol in Rats *Masami Morotomi, Paul LoGerfo, and I. Bernard Weinstein* 1028

Rabbit Antibodies toward Extracellular Loops of the Membrane-Spanning Region of Human Thyrotropin Receptor Possess Thyroid-Stimulating Activities *Toyoshi Endo, Masayuki Ohmori, Masato Ikeda, and Toshimasa Onaya* 1035

Effect of Erythroid Differentiation Factor on Megakaryocytic Differentiation of L8057, a Murine Megakaryoblastic Leukemia Cell Line *Manabu Nishimura, Kohei Kaku, Yoichi Azuno, Koichiro Okafuji, Yuzuru Etoh, Makoto Shiozaki, Hideki Sasaki, Tohru Inoue, and Toshio Kaneko* 1042

Production of Benzodiazepine-Like Compounds in Bovine Rumen *Jorge H. Medina, José L. Danelon, Cristina Wasowski, Miguelina Levi de Stein, and Alejandro C. Paladini* 1048

Gene Expression from Multicopy T7 Promoter Vectors Proceeds at Single Copy Rates in the Absence of T7 RNA Polymerase *Ronald L. Somerville, Tiee-Leou Ni Shieh, Byron Hagewood, and Jisong Cui* 1056

Lactogenic Hormones Increase Epidermal Growth Factor Messenger RNA Content of Mouse Mammary Glands *Suzanne E. Fenton and Lewis G. Sheffield* 1063

Eponemycin, a Novel Antibiotic, Is a Highly Powerful Angiogenesis Inhibitor *Tsutomu Oikawa, Masami Hasegawa, Mariko Shimamura, Hiromi Ashino, Sei-itsu Murota, and Ikuo Morita* 1070

Differential Regulation by Trophic Conditions of Phosphorylating and Nonphosphorylating $NADP^+$-Dependent Glyceraldehyde-3-Phosphate Dehydrogenases in *Chlorella fusca* *A. Serrano, M. I. Mateos, and M. Losada* 1077

Differences in Substrate Specificities of Monoamine Oxidase A from Human Liver and Placenta *Anthony K. Tan, Walter Weyler, James I. Salach, and Thomas P. Singer* 1084

Differential Inhibition by *Bacillus thuringiensis* δ Endotoxin of Leucine and Aspartic Acid Uptake into BBMV from Midgut of *Manduca sexta* *Moshe Reuveni and Peter E. Dunn* 1089

Retinal Cyclic-GMP Phosphodiesterase γ-Subunit: Identification of Functional Residues in the Inhibitory Region *Karen Gonzalez, Jess Cunnick, and Dolores Takemoto* 1094

Characterization of an Isoelectric Focusing Variant of SAA1 (ASP-72) in a Family of Turkish Origin *Barbara Kluve Beckerman, Ernst Malle, Herbert Vitt, Cathleen Pfeiffer, Merrill Benson, and Armin Steinmetz* 1097

Growth Signal Erythropoietin Activates the Same Tyrosine Kinases as Interleukin 3, but Activates Only One Tyrosine Kinase as Differentiation Signal *Satomi Kuramochi, Tomoki Chiba, Hiroshi Amanuma, Arinobu Tojo, and Kazuo Todokoro* 1103

Diabetes and Glucose Transporter Gene Expression in Rat Small Intestine *Ken-ichi Miyamoto, Kyoko Hase, Yutaka Taketani, Hisanori Minami, Tatsuzo Oka, Yukihiro Nakabou, and Hiroshi Hagihira* 1110

Cadmium (Cd^{2+}) Disrupts Ca^{2+}-Dependent Cell–Cell Junctions and Alters the Pattern of E-Cadherin Immunofluorescence in $LLC\text{-}PK_1$ Cells *Walter C. Prozialeck and Robert J. Niewenhuis* 1118

The Conformation of **a**-Factor Is Not Influenced by the S-Prenylation of Cys^{12} *John S. Gounarides, Michelle S. Broido, Chu-Biao Xue, Jeffrey M. Becker, and Fred R. Naider* 1125

Identification and NH_2-Terminal Amino Acid Sequence of Three Insulin-like Growth Factor-Binding Proteins in Porcine Serum *M. E. Coleman, Y.-C. E. Pan, and T. D. Etherton* 1131

Identification of Rat cDNA Encoding *hck* Tyrosine Kinase from Megakaryocytes *Yukio Okano, Yoshikazu Sugimoto, Masami Fukuoka, Akira Matsui, Koh-ichi Nagata, and Yoshinori Nozawa* 1137

cDNA and Amino Acid Sequences of Bovine Tissue Factor
Yoko Takayenoki, Tatsushi Muta, Toshiyuki Miyata, and Sadaaki Iwanaga 1145

Functional Expression of Transcoabalamin II cDNA in *Xenopus laevis* Oocytes
S. Seetharam, N. Dahms, N. Li, and B. Seetharam 1151

Increase in Intracellular Calcium Induced by Stimulating Histamine H1 Receptors in Macrophage-like P388D1 Cells *Shigeru Ohno, Akira Shirai, Atsuhisa Ueda, Toshihisa Igarashi, Yoshiaki Ishigatsubo, Kenji Tani, Takao Okubo, Naoshi Hikawa, Tadashi Kawakami, and Toshifumi Takenaka* 1156

Dystrophin: A Sensitive and Reliable Immunochemical Assay in Tissue and Cell Culture Homogenates *My-Anh Ho-Kim, Anny Bédard, Michel Vincent, and Peter A. Rogers* 1164

Comparison of Effects of HGF and EGF on Cellular Calcium in Rat Hepatocytes
Tetsuya Mine, Itaru Kojima, Etsuro Ogata, and Toshikazu Nakamura 1173

Purification of S-Adenosylmethionine Decarboxylase from Soybean
Young Geun Yang and Young Dong Cho 1181

Effects of Melatonin on [^{3}H]Thymidine Incorporation into DNA of Rat Thyroid Lobes *in Vitro* *E. Wajs and A. Lewiński* 1187

HSP27 Is a Mediator of Sustained Smooth Muscle Contraction in Response to Bombesin *Khalil N. Bitar, Mark S. Kaminski, Nabil Hailat, Kemp B. Cease, and John R. Strahler* 1192

Different Proliferative Responses of Periportal and Perivenous Hepatocytes to EGF
Rolf Gebhardt and Dirk Jonitza 1201

Distribution of the SGLT1 Na$^+$/Glucose Cotransporter and mRNA along the Crypt–Villus Axis of Rabbit Small Intestine *Eun-Sil Hwang, Bruce A. Hirayama, and Ernest M. Wright* 1208

Expression of a Carbohydrate Signal, Sialyl Dimeric Le^x Antigen, Is Associated with Metastatic Potential of Transitional Cell Carcinoma of the Human Urinary Bladder *Tetsushi Matsusako, Hisako Muramatsu, Tsutomu Shirahama, Takashi Muramatsu, and Yoshitada Ohi* 1218

Selectin GMP-140 (CD62; PADGEM) Binds to Sialosyl-Le^a and Sialosyl-Le^x, and Sulfated Glycans Modulate This Binding
Kazuko Handa, Edward D. Nudelman, Mark R. Stroud, Tanri Shiozawa, and Sen-itiroh Hakomori 1223

Molecular Cloning of Human XPAC Gene Homologs from Chicken, *Xenopus laevis*, and *Drosophila melanogaster* *Takuya Shimamoto, Kenji Kohno, Kiyoji Tanaka, and Yoshio Okada* 1231

Proline Enhances Primary Photochemical Activities in Isolated Thylakoid Membranes of *Brassica juncea* by Arresting Photoinhibitory Damage
Alia, P. Pardha Saradhi, and Prasanna Mohanty 1238

Evaluation of Endothelin Receptor Populations Using Endothelin-1 Biotinylated at Lysine-9 Sidechain *Harold I. Magazine, Thomas T. Andersen, Michael S. Goligorsky, and Asrar B. Malik* 1245

^{1}H-NMR Spectroscopy of Manno-Oligosaccharides of the β-1,2-Linked Series Released from the Phosphopeptidomannan of *Candida albicans* VW-32 (Serotype A)
Christine Faille, Jean-Michel Wieruszeski, Gilbert Lepage, Jean-Claude Michalski, Daniel Poulain, and Gérard Strecker 1251

Inactivation of NADPH Oxidase from Human Neutrophils by Affinity Labeling with Pyridoxal 5′-Diphospho-5′-adenosine *Pascale Ravel and Florence Lederer* 1259

Photocleavage of DNA by the *p*-Nitrobenzoyl Group Covalently Linked to Proflavine *Reiko Kuroda and Miho Shinomiya* 1266

Altered Response to Growth Factors or Retinoic Acid in Phenotypic Transformation of Normal Rat Kidney Cells Expressing Human c-fos Gene *Shin-ichi Sato, Kimitoshi Kohno, Mayumi Ono, Yasufumi Sato, and Michihiko Kuwano* 1273

Expression of Human T-Cell Leukemia Virus Type I Protease in *Escherichia coli* *Takaki Hayakawa, Yuko Misumi, Makoto Kobayashi, Yukio Fujisawa, Atsushi Kakinuma, and Masakazu Hatanaka* 1281

Amylin Is More Potent and More Effective than Glucagon in Raising Plasma Glucose Concentration in Fasted, Anesthetized Rats *Ming-Wei Wang, Pamela Carlo, Timothy J. Rink, and Andrew A. Young* 1288

Molecular Cloning and Amino Acid Sequencing of Rat Liver Class θ Glutathione *S*-Transferase Yrs-Yrs Inactivating Reactive Sulfate Esters of Carcinogenic Arylmethanols *Kenichiro Ogura, Takahito Nishiyama, Takahito Okada, Jiro Kajita, Hiroyuki Narihata, Tetsuro Watabe, Akira Hiratsuka, and Tadashi Watabe* 1294

Bacteriorhodopsin "Detergent-Monomers," Blue Shift and Velocity of Light–Dark Adaptation *Dominique Massotte and Jacques Aghion* 1301

High Affinity Aldosterone Binding to Plasma Membrane-Rich Fractions from Mononuclear Leukocytes: Is There a Membrane Receptor for Mineralocorticoids? *Martin Wehling, Michael Christ, and Karl Theisen* 1306

Effect of NCDC, a Protease Inhibitor, on Histamine Release from Rat Peritoneal Mast Cells Induced by Anti-IgE *Masao Takei, Makoto Ueno, Koichi Endo, and Hideyuki Nakagawa* 1313

Early Changes of αB-Crystallin mRNA in Rat Skeletal Muscle to Mechanical Tension and Denervation *Yoriko Atomi, Shigeru Yamada, and Tsutomu Nishida* 1323

Inhibition of Platelet Function by High-Density Lipoprotein from a Patient with Apolipoprotein E Deficiency *Masaaki Higashihara, Makoto Kinoshita, Shoji Kume, Tamio Teramoto, and Kiyoshi Kurokawa* 1331

Skeletal Muscle Relaxation with Diazo-2: The Effect of Altered pH *R. E. Palmer, S. J. Simnett, I. P. Mulligan, and C. C. Ashley* 1337

Binding of Oligonucleotides to Cell Membranes at Acidic pH *Goodarz Goodarzi, Misako Watabe, and Kounosuke Watabe* 1343

Endothelin Induces the Ca^{2+}-Transient in Endothelial Cells *in Situ* *Hiroki Aoki, Sei Kobayashi, Junji Nishimura, Hiromichi Yamamoto, and Hideo Kanaide* 1352

Cytochrome *b* Mutations in Leber Hereditary Optic Neuropathy *Donald R. Johns and Michael J. Neufeld* 1358

Radioiodinated CGP 42112A: A Novel High Affinity and Highly Selective Ligand for the Characterization of Angiotensin AT_2 Receptors *Steven E. Whitebread, Verdon Taylor, Serge P. Bottari, Bruno Kamber, and Marc de Gasparo* 1365

Purification and Characterization of a Human NO Synthase *Harald H. H. W. Schmidt and Ferid Murad* 1372

A Peptide from the GAP-Binding Domain of the *ras*-p21 Protein as Well as Azatyrosine Block *ras*-Induced Maturation of *Xenopus oocytes* *Denise L. Chung, Paul Brandt-Rauf, Randall B. Murphy, Susumu Nishimura, Z. Yamaizumi, I. Bernard Weinstein, and Matthew R. Pincus* 1378

Enhanced Lipolysis in 3T3-L1 Adipocytes following Prolonged Exposure to Tolbutamide *Jim C. Fong, Shr-Jeng Leu, and Pei-Kai Hong* 1385

Cytoprotective Function of Nitric Oxide: Inactivation of Superoxide Radicals Produced by Human Leukocytes *Gabor M. Rubanyi, Elena H. Ho, Elinor H. Cantor, William C. Lumma, and Lynne H. Parker Botelho* 1392

Identification of the Metal Associated with the Insulin-Degrading Enzyme *Alireza Ebrahim, Frederick G. Hamel, Robert G. Bennett, and William C. Duckworth* 1398

In Vivo Regulation of Apolipoprotein A-I Gene Expression by Estradiol and Testosterone Occurs at the Translational Level in Inbred Strains of Mice *Jingjing Tang, Elaine S. Krul, and Gustav Schonfeld* 1407

Mono(ADP-Ribosyl)ation of Poly(ADP-Ribose)polymerase by Cholera Toxin *Marcos Martinez, S. Russ Price, Joel Moss, and Rafael Alvarez-Gonzalez* 1412

Altered Expression of the Two Naturally Occurring Human Insulin Receptor Variants in Isolated Adipocytes of Noninsulin-Dependent Diabetes Mellitus Patients *Giorgio Sesti, Maria Adelaide Marini, Antonella Nadia Tullio, Antonio Montemurro, Patrizia Borboni, Angelo Fusco, Domenico Accili, and Renato Lauro* 1419

Effect of Elevated Extracellular Calcium on the Proliferation of Osteoblastic MC3T3-E1 Cells: Its Direct and Indirect Effect via Monocytes *Masanori Kanatani, Toshitsugu Sugimoto, Masaaki Fukase, and Takuo Fujita* 1425

Active Transcription of the Selenium-Dependent Glutathione Peroxidase Gene in Selenium-Deficient Rats *Mei Chang and C. Channa Reddy* 1431

The Effects of Insulin and the Pituitary Peptide β-Cell Tropin on the Incorporation of D-[3-^{3}H]-Glucose into Lipid in Brown Adipocytes from Lactating and Non-lactating Rats *Michelle Davenport, John L. Morton, Anne Beloff-Chain, Simon J. Dunmore, and Michael A. Cawthorne* 1437

Apoptosis and DNA Degradation Induced by 1-Methyl-4-phenylpyridinium in Neurons *Bruno Dipasquale, Ann M. Marini, and Richard J. Youle* 1442

Modification of the Radiochemical Assay of Rat Liver Mevalonate-5-diphosphate Decarboxylase and Induction and Stabilization of the Activity *Frank H. Hulcher* 1449

HIV-1 Protease Inhibitory Activity of L-694,746, a Novel Metabolite of L-689,502 *Russell B. Lingham, Byron H. Arison, Lawerence F. Colwell, Amy Hsu, Georgette Dezeny, Wayne J. Thompson, George M. Garrity, Magda M. Gagliardi, Frederick W. Hartner, Paul L. Darke, Suresh K. Balani, Steven M. Pitzenberger, Joan S. Murphy, Harri G. Ramjit, Edward S. Inamine, and Laszlo R. Treiber* 1456

Expression of the Human Neutrophil Elastase Gene: Positive and Negative Transcriptional Elements in the 5′ Flanking Region *Jian Han, Tino Unlap, and Thomas A. Rado* 1462

Cloning of the Human Serotonin 5-HT2 and 5-HT1C Receptor Subtypes
Alan G. Saltzman, Buzzy Morse, Mary Maureen Whitman, Yuri Ivanshchenko, Michael Jaye, and Stephen Felder 1469

Pertussis Toxin Inhibits Autophosphorylation and Activation of the Insulin Receptor Kinase *Dirk Müller-Wieland, Morris F. White, Bert Behnke, Angelika Gebhardt, Sandra Neumann, Wilhelm Krone, and C. Ronald Kahn* 1479

Regulation of Intracellular Acetyl-CoA Carboxylase by ATP Depletors Mimics the Action of the 5′-AMP-Activated Protein Kinase
Lee A. Witters, Ann-Charlotte Nordlund, and Lisa Marshall 1486

Nanosecond Fluorescence of Tryptophans in Cytochrome P-450_{scc} (CYP11A1): Effect of Substrate Binding *Pavel Anzenbacher, Jiří Hudeček, Štefan Vajda, Vlastimil Fidler, Christian Larroque, and Reinhard Lange* 1493

The Conversion of eIF-2 · GDP to eIF-2 · GTP by eIF-2B Requires Met-$tRNA_f^{Met}$
Martin Gross, Mark S. Rubino, and Suzanne M. Hessefort 1500

Studies on the Metabolic Inversion of the 6′ Chiral Center of Simvastatin
Stanley Vickers and Carol A. Duncan 1508

Oxidative Conversion of 6-Fluorobenzo(c)phenanthrene to Its K-Region Oxide by Liver Microsomes from 3-Methylcholanthrene-Treated Rats: Reversal of Stereoselectivity of Cytochrome P450c due to the Influence of Fluoro Group
Ganesh K. B. Prasad and Dhiren R. Thakker 1516

Dexamethasone Prevents the Growth Inhibitory Effects of Recombinant Tumor Necrosis Factor in a Rat Hepatoma Cell Line Reuber-RC-3: An Association with the Changes in the Messenger RNA Levels for Multidrug Resistance Gene
Mrunal S. Chapekar, Anthony C. Huggett, and C. Cheng 1524

Identification and Characterization of Receptors for Tumor Necrosis Factor-α in the Brain *Keiko Kinouchi, George Brown, Gavril Pasternak, and David B. Donner* 1532

Invasive Human Fibrosarcoma DNA Mediated Induction of a 92-kDa Gelatinase/Type IV Collagenase Leads to an Invasive Phenotype
Shunichiro Kubota, Tetsuya Mitsudomi, and Yoshihiko Yamada 1539

Association of Calmodulin with Isolated Nuclei from Rat Hepatocytes
E. C. C. Wong, J. E. Saffitz, and Jay M. McDonald 1548

The TRH-like Peptide, pGlu–Glu–$ProNH_2$, Is Present in the Porcine Pituitary but Not in Reproductive Tissues *R. J. Ashworth, T. J. Visser, and S. M. Cockle* 1557

Purification and Characterization of a *Coffea canephora* α-D-Galactosidase Isozyme
F. Haibach, J. Hata, M. Mitra, M. Dhar, M. Harmata, P. Sun, and D. Smith 1564

Tandem Translation of *Escherichia coli* Initiation Factor IF2β: Purification and Characterization *in Vitro* of Two Active Forms
Niels Randel Nyengaard, Kim Kusk Mortensen, Søren Flensted Lassen, John W. B. Hershey, and Hans Uffe Sperling-Petersen 1572

Human PAF Receptor Gene Expression: Induction during HL-60 Cell Differentiation
Eliane Müller, Gilles Dupuis, Sylvie Turcotte, and Marek Rola-Pleszczynski 1580

CUMULATIVE SUBJECT INDEX*
FOR VOLUMES 174–181

A

A23187, *see* Calcimycin
Acetaldehyde
  role as substrate for ethanol-inducible cytochrome P450 (rat), **179**, 689
Acetoacetyl-CoA thiolase, *see* Acetyl-CoA acetyltransferase
Acetohydroxy acid synthase
  expression in *gyrB* mutant of *Salmonella typhimurium*, effect of isoleucine, **178**, 934
N-Acetoxy-2-acetylaminofluorene
  reaction with d(TACGTA) and bovine thymic DNA: nuclease P$_1$-mediated fluorescence postlabeling assay of AAF-modified DNA, **177**, 151
Acetylaminofluorene deacetylase
  purification and characterization (human liver), **177**, 453
Acetylcholine
  field stimulation-induced release in tracheal smooth muscle, effects of L-N^G-nitro-arginine (guinea pig), **179**, 1017
  induced aortic relaxation, role of sodium–hydrogen antiport (rat), **177**, 407
  inhibition of K$^+$ current in intestinal smooth muscle cells, modulation by β-agonists (rabbit), **179**, 327
Acetylcholine receptors
  muscarinic m1, HeLa cells expressing gene for human receptor, phospholipase D activation and phosphatidylethanol formation upon stimulation, **176**, 453
  nicotinic
    neuronal, binding of κ-bungarotoxin, role of individual amino acid residues in receptor α3(50–71) region, **176**, 11
    recombinant cholinergic binding sites of, analysis: snake resistance to own toxins, **179**, 648
Acetylcholinesterase
  commercial preparations, identification of trypsin-like activity (electric eel), **181**, 858
  EPR monitoring *in situ* (bollworm larva), **179**, 520
Acetyl-CoA acetyltransferase
  structural mutation ^{347}Ala to Thr, detection in German family with 3-ketothiolase deficiency, **179**, 124
Acetyl-CoA acyltransferase
  peroxisomal, precursor, amino-terminal presequence, role as cleavable signal peptide for peroxisomal targeting (rat), **181**, 947
Acetyl-CoA carboxylase
  intracellular, regulation by ATP-depleting agents: mimicry of action of 5′-AMP-activated protein kinase (Fao hepatoma cells), **181**, 1486
N-Acetyl-β-endorphin$_{1-31}$
  antagonism of β-endorphin$_{1-31}$ suppression of splenocyte proliferation (mouse), **175**, 936
N-Acetylgalactosamine-6-sulfatase
  Morquio disease-associated, full-length cDNA, isolation, characterization, and expression (human), **181**, 677
N-Acetylgalactosamine-6-sulfate sulfatase, *see* *N*-Acetylgalactosamine-6-sulfatase
α-*N*-Acetylgalactosaminidase
  infantile deficiency: defective enzyme phosphorylation and maturation (human), **175**, 1097
N-Acetylgalactosaminyltransferase
  inhibition by UMP-(1-hexadecanesulfonic) anhydride (porcine submaxillary gland), **175**, 668
  responsible for Sd^a specificity, expression in colon carcinoma CaCo-2 cell line (human), **180**, 681
β-*N*-Acetylhexosaminidase
  isozyme B
    adult form of deficiency with motor neuron disease, molecular basis (human), **181**, 108
    region homologous to cathepsin D residues linked to lysosomal targeting, analysis, **179**, 477
N$_\alpha$-Acetyl microperoxidase-8
  reaction with hydrogen peroxide, high-valent intermediates: models for compounds 0, I, and II of horseradish peroxidase (horse), **179**, 1320
N-Acetylserotonin
  effects on [^{3}H]thymidine uptake by DNA of thyroid lobes *in vitro* (rat), **181**, 1187
Acetyl-Trp methyl ester
  effect on α-chymotrypsin activity in reverse micelles, **178**, 1105
Achatin I
  purification from cardiac atria and biological activities (African giant snail), **177**, 847
Acid β-galactosidase
  gene organization (mouse), **178**, 158
Acid α-glucosidase, *see* Glucan 1,4-α-glucosidase
α$_1$-Acid glycoprotein
  cDNA cloning and sequencing (rabbit), **178**, 507
  promoter, glucocorticoid regulatory region, binding of nuclear factors (rat), **176**, 1326
Acidification
  distal urine: physiological role for vanadate-sensitive ATP-dependent H$^+$ transport (turtle bladder), **180**, 1505
Acidosis
  lactic, and mitochondrial myopathy, encephalopathy, and stroke-like episodes, characterization of associated mitochondrial DNA mutations (human), **174**, 861

---

[*] Boldface numbers indicate appropriate volume; lightface numbers indicate pagination.

Acid phosphatase
  lysosomal, conversion from membrane to content forms, mechanisms, **180**, 1483
Acid sphingomyelinase, *see* Sphingomyelin phosphodiesterase
Acinar cells
  pancreatic
    AR42J, vasoactive intestinal peptide receptors, glycoprotein nature (rat), **179**, 176
    Ca^{2+}-dependent amylase secretion, role of phospholipase C-linked G proteins (rat), **174**, 536
    cholecystokinin octapeptide-induced inositol 1,4,5-trisphosphate production and $[Ca^{2+}]_i$ increase, inhibition by epidermal growth factor (rat), **180**, 900
    cytosolic Ca^{2+}
      basic fibroblast growth factor-induced mobilization (rat), **177**, 166
      mastoparan-induced oscillations (rat), **177**, 159
    insulin receptor interaction with G_i and epidermal growth factor receptor interaction with G_i and G_s proteins (rat), **175**, 380
    phosphoinositide synthesis and breakdown, comparative effects of epidermal growth factor and carbachol (rat), **178**, 780
  parotid
    α_1-adrenergic and muscarinic-cholinergic stimulated inositol 1,4,5-trisphosphate production (rat), **176**, 1291
    effects of atropine: role of G proteins (rat), **177**, 784
    membrane permeability enhancement by mastoparan, role of G protein activation (rat), **177**, 802
Acini
  pancreatic, 2-deoxyglucose uptake, effect of islet amyloid polypeptide in absence and presence of insulin (mouse), **180**, 1513
ACTH, *see* Adrenocorticotropin
Actin
  activated ATPase of heavy meromyosin, inhibition by calponin (chicken gizzard), **176**, 1487
  encoding genes
    isolation and partial characterization (*Ascaris suum*), **178**, 578
    overexpression, association with *Candida albicans* morphogenesis, **179**, 423
  fibrous, capping by cap32/34, requirement of heterodimeric conformation and inhibition by phosphatidyl bisphosphate, **181**, 833
  –myosin interaction, ATP-dependent, stimulation by okadaic acid, mechanism (bovine smooth muscle), **177**, 1155
  polymerization in B cells, essential role of tyrosine phosphorylation (human), **176**, 1424
  skeletal muscle, binding to smooth muscle talin, kinetics (chicken), **178**, 718
  stabilization by phalloidin, differential scanning calorimetric study, **181**, 542
  two monomers, binding to myosin subfragment 1 (rabbit muscle), **177**, 350
Activin
  binding protein, production by granulosa cells *in vitro* (rat), **176**, 413
  binding by recombinant human follistatin mutants, **179**, 352
Activin A
  homology with N-terminal sequence of megakaryocyte differentiation activity from human fibrous histiocytoma cell line, **174**, 1163
Activin receptors
  mRNA, expression during early embryogenesis and effect of expression level on body axis formation (*Xenopus laevis*), **181**, 684
Actomyosin
  subfragment 1, interaction with nucleotides, effect of hydrostatic pressure, **180**, 552
1-Acyl-2-acetyl-*sn*-glycero-3-phosphocholine
  ^{3}H-labeled, synthesis by vascular endothelial cells (human), **176**, 1557
Acylation
  adipocyte proteins by long-chain fatty acids, stimulation by insulin (rat), **177**, 797
Acyl-CoA oxidase
  gene, identification of two *cis*-acting regulatory sequences in peroxisome proliferator-responsive enhancer region (rat liver), **175**, 866
Adducin
  63-kDa, cDNA cloning and sequencing (rat), **177**, 939
[Adenine-2,8-3*H*,ethyl-2-3*H*]phenylisopropyladenosine
  binding to A_1 adenosine receptors, differential effects of *N*-ethylmaleimide in presence and absence of ligand (porcine brain), **181**, 213
Adenosine diphosphoribosyl transferase, *see* NAD^+ ADP-ribosyltransferase
Adenosine receptors
  A_1, agonist binding to, differential effects of *N*-ethylmaleimide in presence and absence of ligand (porcine brain), **181**, 213
  A_2, antagonist CP-66713, effects on long-term potentiation of evoked synaptic potentials and population spike in hippocampal CA1 neurons (guinea pig), **181**, 1010
S-Adenosyl-L-methionine C-24 methyltransferase
  inhibitor, 24(*R*,*S*),25-epiminolanosterol, regulation of sterol biosynthesis (sunflower), **177**, 566
S-Adenosylmethionine decarboxylase
  purification and inhibition by agmatine and other compounds (soybean), **181**, 1181
Adenylate cyclase
  cerebral
    forskolin-stimulated, melatonin-induced inhibition, blockage by pertussis toxin (chicken), **178**, 786
    inhibition by endothelins in capillary endothelial cells (rat), **180**, 169
    partial cDNA sequence: evidence for consensus cyclase-specific domain (human), **179**, 455
  inhibitor, purification from pancreatic cancer and partial sequencing: identity with histones H1b and H1d, **176**, 255
  reconstituted into liposomes, catalytic activity, role of transmembrane Ca^{2+} gradient (bovine brain), **175**, 366
  regulation in *Dictyostelium discoideum*, role of G_α 2 protein, **175**, 55

Adenylate cyclase system
  stimulation by Gs protein mono-ADP-ribosylation (human platelets), **176**, 1014
Adenylylcyclase, *see* Adenylate cyclase
Adenylylsulfate reductase
  spectroscopic studies (*Archaeglobus fulgidus*), **181**, 342
Adipocytes
  brown, from lactating and non-lactating rats, lipogenesis, comparative effects of insulin and beta-cell tropin, **181**, 1437
  glucose transport, stimulation by palmitate, mechanism (rat), **177**, 343
  insulin action in, inhibition by amiloride, mechanisms (rat), **176**, 1277
  from non-insulin-dependent diabetes patients, altered expression of naturally occurring insulin receptor variants, **181**, 1419
  3T3-L1, lipolysis, enhancement after prolonged exposure to tolbutamide, **181**, 1385
Adipose tissue
  expression of
    c-myc mRNA, effect of dietary manipulation (chicken), **180**, 1
    nuclear retinoic acid receptors (rat), **176**, 1539
ADP (adenosine 5′-diphosphate)
  modulation of cyclosporin sensitivity of nonspecific mitochondrial inner membrane pores at carboxyatractyloside-sensitive and -insensitive sites (rat liver), **180**, 33
  –ribose moiety, acceptor protein p33, localization in polymorphonuclear cell granules in hepatic interlobular connective tissue (chicken), **180**, 64
ADPase
  ecto-, and ecto-ATPase, activities in aortic endothelial and smooth muscle cells, role of ATP diphosphohydrolase (bovine), **180**, 1200
ADP-ribosylation
  role in pertussis toxin-induced alteration in electrophoretic mobility of G proteins, **180**, 1227
  small G proteins in neutrophils by C3 exoenzyme of *Clostridium botulinum*, effect on cell motility (bovine), **180**, 615
ADP-ribosyltransferase
  arginine-specific, mono-ADP-ribosylation of Gs protein, stimulation of adenylate cyclase system (human platelets), **176**, 1014
  endogenous, stimulation by L-arginine (HL-60 cells, rat brain), **178**, 848
  guanidine group-specific, detection in murine cells, **176**, 301
Adrenal gland
  increased production of angiotensin II in stroke-prone spontaneously hypertensive rats with malignant hypertension, **178**, 151
  medullary cells in culture, carbachol-induced catecholamine secretion, inhibition by okadaic acid (bovine), **174**, 77
  medullary histamine H_1 receptors, biochemical characterization (bovine), **177**, 1233
Adrenalin, *see* Epinephrine
β-Adrenergic agonists
  modulation of acetylcholine inhibition of K^+ current in intestinal smooth muscle cells (rabbit), **179**, 327
α-Adrenergic receptors
  blockade, prevention of hepatic ornithine decarboxylase stimulation by dexamethasone or laparotomy (rat), **174**, 915
  and K-opioidergic receptors, effects on phosphoinositide turnover in cardiomyocytes, comparison (rat), **179**, 972
α_1-Adrenergic receptors
  stimulated phosphoinositide breakdown in cultured cardiomyocytes: diacylglycerol production and composition in docosahexaenoic acid supplemented cells (rat), **174**, 869
α_{1A}-Adrenergic receptors
  cDNA, molecular cloning and sequencing (human), **179**, 1485
β-Adrenergic receptors
  blockade, prevention of hepatic ornithine decarboxylase stimulation by dexamethasone or laparotomy (rat), **174**, 915
Adrenocortical cells
  c-EJ-Ha-*ras*-transfected, aldosterone synthesis, stimulation by ACTH and angiotensin II (rat), **175**, 596
  intracellular calcium levels, biphasic rise caused by extracellular ATP (bovine), **178**, 1266
  lipoprotein-supported corticosterone production, inhibition by okadaic acid (rat), **179**, 726
  response to ACTH, associated interaction of casein kinase II and polyamines (bovine), **180**, 623
Adrenocorticotropin
  fragment 4–10, and synthetic analog semax, degradation by blood enzymes (rat), **176**, 741
  response of adrenocortical cells, associated interaction of casein kinase II and polyamines (bovine), **180**, 623
  stimulation of aldosterone synthesis in c-EJ-Ha-*ras*-transfected adrenocortical cells (rat), **175**, 596
  synthetic fragments, esterase activity (human), **177**, 235
Adrenodoxin
  and adrenodoxin reductase and P450scc, reconstituted system, side-chain cleavage of cholesterol, stimulation by endozepine, **180**, 609
Adrenodoxin reductase, *see* Ferredoxin–$NADP^+$ reductase
Adriamycin, *see* Doxorubicin
Aequorin
  –monomeric Fab′ conjugate, in bioluminescent immunoassay, **174**, 1331
  recombinant, galactose-dependent expression in yeast cells, **174**, 115
Affinity labeling
  NADPH oxidase with pyridoxal 5′-diphospho-5′-adenosine: inactivation of enzyme (human neutrophils), **181**, 1259
Aflatoxin B_1
  disposition in blood and liver *in vivo* (rat), **179**, 1095
Aflatoxins
  metabolites, excretion by isolated hepatocytes (rat), **178**, 1002

- Aging
  - association with
    - accumulation of mitochondrial DNA with deletion, quantitation in heart (human), **180**, 894
    - 5 kb deletion in mitochondrial DNA, detection by PCR and restriction mapping (human liver), **178**, 124
    - 8-hydroxydeoxyguanosine accumulation in mitochondrial DNA (human diaphragm), **179**, 1023
    - increase in c-*fos* and c-*jun* transcript levels in liver (rat), **178**, 1485
  - cholesterol 7α- and 7β-hydroperoxides as markers in skin (rat), **178**, 242
  - effects on
    - diurnal variation of tyrosine aminotransferase expression (rat), **175**, 104
    - hydroxysteroid sulfotransferase-a gene expression in liver (rat), **175**, 1051
    - RNA synthesis in cerebral mitochondria (rat), **176**, 645
  - natural and conditional, fibroblasts: genetic vs epigenetic control (mouse), **178**, 269
- AGM-1470
  - anti-angiogenic action, comparison with fumagillin parent, **174**, 1070
- Agmatine
  - inhibitory effect on *S*-adenosylmethionine decarboxylase from soybean, **181**, 1181
- Agmatine deiminase
  - monomeric, purification from soybean, **174**, 32
- Agmatine iminohydrolase, *see* Agmatine deiminase
- AIDS-related complex
  - affected patients, relevance of coenzyme Q_{10}-induced increase of T4/T8 lymphocyte ratios in normal subjects, **176**, 786
- Air
  - exhaled, presence of endogenous nitric oxide (guinea pig, human, rabbit), **181**, 852
- Alanine
  - myristoylated, protein kinase C substrate rich in, decreased expression in transformed BALB/c 3T3 cells, **178**, 494
- Alanine–glyoxylate aminotransferase
  - renal intraperoxisomal forms, description (chicken, pigeon), **176**, 1450
- Albumin
  - and α-fetoprotein, gene expression in HuH-7 hepatoma cells, differential regulation by transforming growth factor β1 (human), **174**, 1294; *erratum*, **175**, 1165
  - formaldehyde-treated, monomeric and polymeric fractions, clearance by hepatic endothelial and Kupffer cells: evidence for scavenger receptor heterogeneity (rat), **180**, 23
  - mRNA, estrogen-regulated destabilization, role of translation (*Xenopus laevis*), **174**, 825
  - pea, *see* Pea albumin
  - serum, *see* Serum albumin
  - site-specific fragmentation by sulfite in presence of cobalt or peroxidase/H_2O_2, role of sulfate radicals, **176**, 1306
- Alcohol dehydrogenase
  - *ADH6* gene, cloned, enzymatic properties (human), **181**, 743
  - class III, identity with glutathione-dependent formaldehyde dehydrogenase (human liver), **178**, 1371
  - hepatic isozymes, oxidation of intermediary alcohols of mevalonate metabolism shunt pathway (human), **174**, 701
  - single-stranded gene, injection into embryos, subsequent tissue-specific expression (*Drosophila melanogaster*), **174**, 1300
- Alcohols
  - intermediary, of mevalonate metabolism shunt pathway, oxidation by hepatic alcohol dehydrogenases (human), **174**, 701
- Aldehyde dehydrogenase
  - identity with 56-kDa androgen-binding protein (human genital skin fibroblasts), **175**, 831
  - 2,3,7,8-tetrachlorodibenzo-*p*-dioxin-inducible expression, superinduction by inhibition of protein synthesis (rat hepatoma cells), **180**, 953
- Aldolase, *see* Fructose-bisphosphate aldolase
- Aldose reductase
  - mediated glyceraldehyde reaction with $NADP^+$, enantiospecific change in products, **175**, 943
  - role in tetrahydrobiopterin biosynthesis (human), **175**, 738
- Aldosterone
  - high-affinity binding to plasma membrane-rich fractions of mononuclear leukocytes (human), **181**, 1306
  - synthesis in c-EJ-Ha-*ras*-transfected adrenocortical cells, stimulation by ACTH and angiotensin II (rat), **175**, 596
- Alexander's disease
  - infantile, increment of αB-crystallin mRNA in brain of affected patient, **179**, 1030
- Alkaline phosphatase
  - bone/liver/kidney/placenta gene, alternative promoters, role in tissue-specific and dexamethasone-inducible enzyme expression (rat), **176**, 1149
  - expression in lymphoma cells: effect of butyrate (mouse), **177**, 125
  - inhibition by 1,25-dihydroxyvitamin D_3 in MC3T3-E1 cells, modulation by murine recombinant leukemia inhibitory factor, **175**, 577
  - liver/bone/kidney-type, relative promoter for encoding gene exon 1B, characterization: cell- and tissue-specific expression (mouse), **179**, 1352
  - in MC3T3-E1 osteoblastic cells, effects of bone morphogenetic proteins, **174**, 96
- Alkaloids
  - Vinca, resistance in ovarian cancer cells, associated antigenic properties: identification of 92-kDa protein (human), **180**, 334
- Alkanal monooxygenase (FMN-linked)
  - individual α and β subunits, exhibition of bioluminescence (*Escherichia coli*), **178**, 1188
  - structure and properties (*Photobacterium phosphoreum*), **176**, 541
- Alkane 1-monooxygenase
  - renal, stimulation by bisphosphonate YM175, role in en-

hancement of serum 1,25-dihydroxyvitamin D (rat), **180**, 1172

1-Alkyl-2-acyl-*sn*-glycero-3-phosphoinositol
  detection in bovine erythrocytes, **175**, 673

1-*O*-Alkyl-2-*O*-methyl-*rac*-glycero-3-phosphocholine
  effect on CTP:phosphocholine cytidylyltransferase translocation in HL-60 cells, **176**, 157

Allatostatin receptors
  in corpora allata, photoaffinity labeling (*Diploptera punctata*), **181**, 736

Alprenolol
  inhibition of renal Na^+/H^+ exchanger (rat), **175**, 311

Alveolitis
  immune complex, acute, mediation by intrapulmonary interleukin-1 (rat), **175**, 604

Alveolysin
  induction of heat shock protein expression in neutrophils (human), **179**, 872

Alzheimer's disease
  β-amyloid from affected brain, inhibition of sprouting and survival of sympathetic neurons, **174**, 572
  APP secretase in brain, identification, purification, and characterization, **177**, 377
  associated amyloid protein precursor
    expression in insect cells, **174**, 983
    processing: identification of cerebral metallopeptidase cleaving -Lys–Leu- in model peptide (human), **179**, 1148
  associated dementia, detection of inter-α-trypsin inhibitor active component in brain tissues of affected individuals, **174**, 1015
  associated paired helical filaments, presence of glycolipid in core structure (human), **181**, 771
  calcium-activated protease from affected brain, cleavage of amyloid β-protein at N-terminus, **174**, 790
  familial
    abnormal and deficient processing of β-amyloid precursor protein in lymphoblastoid cells, **175**, 361
    association with ^{717}Val→Ile substitution in amyloid precursor protein regardless of ethnic background, **178**, 1141

Amaranch
  NADPH-dependent reduction in hepatic microsomes, in quantitation of cytochrome P450 low-spin forms (rat), **179**, 945

Amelogenin
  leucine-rich peptide, product of alternative splicing of amelogenin gene primary transcript (bovine), **174**, 1306

Amiloride
  inhibition of insulin action in adipocytes, mechanisms (rat), **176**, 1277

Amine oxidase (copper-containing)
  –gold complexes, binding and internalization by rat hepatocytes *in vitro* (bovine serum), **179**, 1169

Amine oxidase (flavin-containing)
  type A, isolated from placenta and liver, differences in substrate specificities (human), **181**, 1084

Amino acid composition
  calcium-binding protein associated with spermatogenic cell membranes (rat), **176**, 1358
  corticostatic peptides isolated from bone marrow (guinea pig), **180**, 558
  cystine-rich basic heparin-binding protein (bovine platelets), **174**, 70
  diuretic hormone (*Locusta migratoria*), **179**, 1036
  fimbrial protein (*Porphyromonas gingivalis*), **175**, 713
  α-D-galactosidase isozyme (coffee bean), **181**, 1564
  β-galactoside-binding lectin (frog eggs), **178**, 407
  green heme binding protein and flavin reductase, comparison (bovine erythrocytes), **178**, 315
  hepatocyte growth factor N-terminal peptides from native and recombinant forms (human), **175**, 660
  large neuromedin N: NMN-125 (canine intestine), **179**, 301
  leukocidin S-component (methicillin-resistant *Staphylococcus aureus*), **181**, 138
  NADH-quinone oxidoreductase NADH-binding subunit (*Thermus thermophilus* HB-8), **174**, 667
  prosaposin (human milk), **181**, 286
  ribosomal proteins
    L17 (rat), **178**, 322
    L23 (rat), **178**, 1153
    S18 (rat), **178**, 1212
    S28 (rat), **179**, 314
  60-kDa phosphorylated protein (fetal human bone), **174**, 439

Amino acid receptors
  for excitatory amino acids, mediated L-arginine–nitric oxide pathway, role in neuronal injury by L-glutamate or hypoxia (rat), **181**, 456

Amino acids
  active transport through Caco-2 cell monolayers by γ-glutamyl transpeptidase, **178**, 1028
  basic, paired, proteolysis of precursors with, sequence requirements (COS cells), **179**, 1181
  C-terminal residues of exotoxin A, role in cell toxicity and pathogenesis, characterization (*Pseudomonas aeruginosa*), **180**, 1498
  glycosylated, detection by Edman degradation of glycopeptides: identification of N- and O-linkages, **178**, 1194
  individual residues in neuronal nicotonic acetylcholine receptor α3(50–71) region, role in κ-bungarotoxin binding, **176**, 11
  positively charged residue in M2 segment of AMPA-selective glutamate receptor channels, role in Ca^{2+} permeability of channel (*Xenopus laevis*), **180**, 813
  substitutions in surfactin, identification with two-dimensional NMR (*Bacillus subtilis*), **177**, 998

Amino acid sequence
  N-acetylgalactosamine-6-sulfatase (human), **181**, 677
  α_1-acid glycoprotein (rabbit), **178**, 507
  acidic fibroblast growth factor (porcine heart), **180**, 853
  adducin 63 (rat), **177**, 939
  adenylate cyclase inhibitor from pancreatic cancer: identity with histones H1b and H1d, **176**, 255
  adenylylcyclase (human brain), **179**, 455

α_{1A} adrenergic receptor (human), **179**, 1485
amino-terminal
  acetylaminofluorene deacetylase (human liver), **177**, 453
  cathepsin E and procathepsin E, comparison (human stomach), **175**, 152
  cytochrome P450$_{scc}$ (porcine testis), **176**, 1501
  14-kDa group II phospholipase A$_2$ (human), **178**, 1505
  glutathione *S*-transferase class π (porcine lens), **176**, 966
  gravidin, identity with IgA secretory component (human), **176**, 447
  green heme binding protein and flavin reductase, comparison (bovine erythrocytes), **178**, 315
  initiation factors IF2β and IF2β′ (*Escherichia coli*), **181**, 1572
  insulin-like growth factor-binding proteins
    in serum (pig), **181**, 1131
    in U-2 osteosarcoma cells, **176**, 213; *erratum*, **177**, 895
  integrin β_7 subunit, identity with lymphocyte-expressed M290 antigen (mouse), **176**, 1443
  leucyl and prolyl aminopeptidases, comparison (bovine, human, pig), **178**, 1459
  megakaryocyte differentiation activity, homology with activin A (human), **174**, 1163
  prosaposin (human milk), **181**, 286
  proteochondroitin core protein, homology with biglycan core protein pre-propeptide region, **175**, 706
amphiregulin-associated protein produced by TPA-treated MCF-7 cells, **179**, 572
angiotensin II receptor (rat), **177**, 299
A2 protein encoded by bacteriophage T5, **177**, 1240
arylphorin (*Calliphora vicina*), **177**, 963
avian thymic hormone, comparison with chicken muscle parvalbumin, **176**, 328
azurocidin (human neutrophils), **177**, 688
biliary glycoprotein variants (human leukocytes), **176**, 578
bombesin-like neuropeptides in brain (frog), **178**, 526
branching enzyme-I (maize), **181**, 87
calcium-binding polypeptide similar to calcineurin β-subunit (rat testis), **180**, 1476
calgizzarin (rabbit lung), **181**, 644
cAMP-dependent protein kinase regulatory subunit RIβ (human), **176**, 166
CAP18 lipopolysaccharide-binding protein (rabbit), **179**, 170
carboxy-terminal
  big endothelin-1, role in specific conversion by phosphoramidon-sensitive endothelin-converting enzyme (human), **180**, 1019
  L-isoaspartyl/D-aspartyl protein methyltransferases I and II, comparison (human erythrocytes), **175**, 351; *erratum*, **176**, 549
CAS2 protein and tyrosinase, homology (human), **178**, 227
catechol-*O*-methyltransferase from human placenta: comparison with rat hepatic enzyme, **174**, 995
cathepsin D (rat liver), **179**, 190
cell adhesion molecule CD44 (human reticulocytes), **178**, 1127
cerebellar zinc finger protein identified in patient with paraneoplastic cerebellar degeneration, **178**, 198
chondromodulin I (fetal bovine cartilage), **175**, 971
class theta glutathione *S*-transferase Yrs subunit (rat liver), **181**, 1294
ClpB proteins, α and β_3 (*Escherichia coli*), **180**, 1222
CLS4 gene-encoded protein (yeast), **181**, 604
corticostatic peptides isolated from bone marrow (guinea pig), **180**, 558
C-type natriuretic peptide
  in chicken brain, **174**, 142
  and precursor (human), **175**, 645
cytochrome aa_3 subunit I (*Halobacterium halobium*), **181**, 316
cytochrome-*c* oxidase subunit II (*Synechococcus vulcanus*), **181**, 437
cytochrome P450 IIC24 (rat), **180**, 645
diuretic hormone (*Locusta migratoria*), **179**, 1036
diuretic peptide (tobacco hornworm), **181**, 927
DNA glycosylase excising 3-methyladenine and 7-methylguanine (human), **176**, 1170
dopamine D_3 receptors (human, rat), **180**, 1031
EB4-PSV, deduced from gene isolated from *Dictyostelium* gene disruption transformant without library construction, **181**, 884
eel intestinal pentapeptide, **180**, 828
eight-amino-acid, highly conserved in SH2-containing proteins, role in recognition of phosphotyrosine site, **180**, 1490
elongation factor 1β (human), **177**, 312
endothelin receptors
  ET_A (human placenta), **180**, 1265; **181**, 184
  ET_B (human liver), **177**, 34
enoyl-CoA hydratase:3-hydroxyacyl-CoA dehydrogenase bifunctional enzyme (human), **178**, 1084
episialin (mouse), **181**, 121
fibroblast growth factor receptor ectoplasmic domains (mouse), **178**, 8
flanking, effect on O-glycosylation of serine and threonine residues, **180**, 1024
follicle-stimulating hormone receptor (human), **175**, 1125
follicle-stimulating hormone receptor-binding regions and FSH receptor: sense–antisense similarity (human), **179**, 266
fructose 6-phosphatase,2-kinase:fructose 2,6-bisphosphatase isozymes (bovine heart), **180**, 470
β-galactoside-binding 14-kDa lectin, comparison to other 14-kDa lectins (frog eggs), **178**, 407
glutamic acid decarboxylase (human brain, pancreatic islets), **176**, 1239
glutathione synthetase large subunit (*Schizosaccharomyces pombe*), **181**, 430
GM$_2$ activator protein (human), **177**, 1217
hck tyrosine kinase (rat), **181**, 1137
heat shock proteins 60 and 10 of thermophilic bacterium PS3, **179**, 565
hepatitis C virus cDNA products: distribution of multiple virus types in Japan, **181**, 279

hepatocyte growth factor, identification of heavy chain N-terminal residue (human), **175**, 660
histamine H2 receptor (human), **178**, 1386
H^+-ATP synthase import signal peptide and mature coupling factor 6 (human), **178**, 793
H^+-ATP synthase subunit b, interspecies comparison (bovine, human, rat), **178**, 1014
HIV-1 envelope protein and Ig variable regions: homology between gp120 V3-loop and Ig heavy-chain variable regions, **179**, 1056
HIV-1 nef protein, homology with human thyrotropin receptor, **181**, 498
H^+,K^+-ATPase β subunit (human gastric mucosa), **180**, 39
H-protein of glycine cleavage system (human liver), **176**, 711
hst-1 protein with transforming growth factor activity, **174**, 404
human thyrotropin receptor, homology with HIV-1 nef protein, **181**, 498
immunoglobulin binding factor and prostatic secretory protein, identity (human seminal plasma), **180**, 356
inositol 1,4,5-trisphosphate 3-kinase (human brain), **174**, 529
insulin-like growth factor-binding protein (human osteosarcoma), **176**, 219
insulin-like growth factor-binding protein-3 (bovine), **177**, 1025
interleukin-8 receptor (rabbit), **179**, 784
lactoferrin (bovine), **180**, 75
laminarinase (*Clostridium thermocellum*), **181**, 507
large neuromedin N: NMN-125 (canine intestine), **179**, 301
lecithin:cholesterol acyltransferase, normal and proband (human), **181**, 933
leucine-rich amelogenin peptide (bovine), **174**, 1306
leukocidin S-component (methicillin-resistant *Staphylococcus aureus*), **181**, 138
leukotriene A_4 hydrolase (mouse), **176**, 1516
lignin peroxidase from white-rot fungus *Trametes versicolor*, **179**, 428
long-chain dehydrogenases, comparison, **177**, 218
luciferase (*Photobacterium phosphoreum*), **176**, 541
lysosomal membrane 85-kDa sialoglycoprotein (rat liver), **178**, 444
α-1,3-mannosyl-glycoprotein β-1,2-*N*-acetylglucosaminyltransferase (human), **176**, 608
medullasin (human bone marrow), **178**, 501
membrane fusion active peptides E5 and E5L: fusion activity block after N-terminal modification, **179**, 1050
O^6-methylguanine-DNA-methyltransferase (rat hepatoma cells), **177**, 597
midkine, strong conservation between human and mouse, **176**, 792
necdin nucleoprotein expressed in neurally differentiated P19 cells (mouse), **178**, 291
NK-1 receptor (human lung), **180**, 1110
NK-2 receptor (human lung), **177**, 8
non-isopeptide-selective endothelin receptor (human placenta), **178**, 248
osteogenic protein OP-1, pre-pro form (mouse), **179**, 116
parvalbumin
  from chicken muscle, comparison with avian thymic hormone, **176**, 328
  tissue-specific, from chicken muscle and thymus: phylogenetic comparisons, **181**, 226
patterns in α-helices terminated by glycine, recognition, **180**, 666
pea albumin 2, comparison with vitronectin, **176**, 1000
peripheral myelin structural protein P0 (human fetus), **180**, 515
peroxisomal 3-ketoacyl-CoA thiolase amino-terminal presequence (rat), **181**, 947
phosphofructokinase (human), **180**, 197
phosphofructokinase 1 (*Thermus thermophilus*), **176**, 1313
phytase, comparison with acid phosphatases from diverse sources (*Aspergillus ficuum*), **178**, 45
placental protein 11, comparison with vitronectin, **176**, 1000
platelet activating factor (human), **180**, 105
P2 protein (human), **181**, 204
pregnancy-specific β_1-glycoprotein type II (human), **176**, 1532
preprocarboxypeptidase A (bovine pancreas), **175**, 110
preproendothelin-1 (rat), **175**, 44
profilin (*Tetrahymena*), **175**, 543
propeptides, common motif: role as sorting signal at trans-Golgi face, **174**, 586
proteasome subunit XC3 (*Xenopus laevis*), **178**, 1233
putative hemorrhagic protein (snake venom), **181**, 585
ras p21-like G protein (rat liver), **177**, 1224
requirements for proteolysis of precursors with paired basic amino acids (COS cells), **179**, 1181
retinoic acid-induced heparin-binding protein (chicken), **175**, 617
rhodanese, interspecies comparison (bovine, chicken, human), **180**, 887
rhodopsin (lamprey), **174**, 1125
rhodostomin (snake venom), **181**, 585
ribophorin II (rat), **176**, 1482
ribosomal proteins
  L17 (rat), **178**, 322
  L23 (rat), **178**, 1153
  L38 (rat), **175**, 551
  S18 (rat), **178**, 1212
  S28 (rat), **179**, 314
RNA polymerase II subunit, C-terminal domain (*Plasmodium berghei*), **180**, 1350
rubrerythrin 21.5-kDa subunit homologous regions (*Desulfovibrio vulgaris*), **181**, 337
ryanodine receptor, comparison with FK506-binding protein (rabbit muscle), **178**, 1288
sepiapterin reductase (human), **179**, 183
serotonin 5-HT2 and 5-HT1C receptors (human), **181**, 1469
serum amyloid A protein (rabbit liver), **178**, 68
spermidine/spermine N^1-acetyltransferase (human), **179**, 407
squamous cell carcinoma antigen: member of serine protease inhibitors (human), **181**, 51

  Ssc protein (*Salmonella typhimurium*), **173**, 53; *erratum*, **174**, 1054
  substance P receptor (human, rat), **179**, 1232
  tachykinins (frog brain, intestine), **177**, 588
  thromboxane A synthase (human platelets), **178**, 1479
  thromboxane synthase (human), **177**, 286
  tissue factor, comparisons (bovine), **181**, 1145
  transglutaminase (human keratinocytes), **175**, 906
  trypsin (*Streptomyces griseus*), **181**, 707
  tyrosine hydroxylase (murine brain), **176**, 1610
  vacuolar H^+-ATPase 16-kDa subunit (murine cerebellum), **176**, 1062
  xeroderma pigmentosum group A protein, comparison (chicken, frog, fruit fly, human), **181**, 1231
  Zn-α_2-glycoprotein (human prostate), **177**, 696
Aminoacyl-tRNA synthetase
  multienzyme complex, copurification with elongation factor eEF1 (rabbit reticulocytes), **177**, 757
3-Aminobenzamide
  suppression of lipopolysaccharide-induced nitrite formation in macrophages (mouse), **179**, 865
γ-Aminobutyric acid receptors
  $GABA_A$, purified from brain, functional reconstitution (bovine), **179**, 1259
α-Amino-3-hydroxy-5-methyl-4-isoxazole propionic acid
  selective glutamate receptor channels
    Ca^{2+} permeability, determination by single amino acid residue (*Xenopus laevis*), **180**, 813
    α1 subunit, functional expression in baculovirus expression system (mouse), **181**, 756
3-Amino-2-hydroxy-4-phenylbutanoic acid, *see* Phenylnorstatine
4-Amino-3-hydroxy-5-phenylpentanoic acid, *see* Phenylstatine
2-Amino-1-methyl-6-phenylimidazo[4,5-*b*]pyridine
  induction of putative cytochrome P450 isozyme in liver (rat), **174**, 797
β-Aminopropionitrile
  effect on elastin gene expression in smooth muscle cells *in vitro* (rat), **179**, 939
3-Aminotriazole, *see* Amitrole
Amitrole
  identification as substrate for lactoperoxidase but not catalase, **180**, 585
Ammonium
  inactivated glutamine synthetase, reactivation *in vitro* (*Synechocystis* sp.), **181**, 780
Ammonium chloride
  effect on aortic vasoconstriction (rat), **178**, 808
Amnesia
  induction by nerve growth factor antibody Fab′ fragment (rat), **175**, 215; *erratum*, **179**, 1683
AMPA, *see* α-Amino-3-hydroxy-5-methyl-4-isoxazole propionic acid
Amphiregulin
  associated protein, produced by TPA-treated MCF-7 cells, amino acid sequence, **179**, 572
  response to and expression by ovarian carcinoma and ovarian surface epithelial cells (human), **180**, 481
Amphotericin B
  interaction with lipoproteins, inhibition by delivery systems (human), **181**, 722
Amplification
  conserved cDNA sequences, in identification of skeletal muscle protein-tyrosine phosphatases (rat), **178**, 1291
m-AMSA, *see* Amsacrine
Amsacrine
  inhibition of mitochondrial DNA topoisomerase II (bovine thymus), **176**, 690
Amylase
  Ca^{2+}-dependent secretion by pancreatic acini, role of phospholipase C-linked G proteins (rat), **174**, 536
Amylin
  effect on glycogen metabolism in muscle (rat), **174**, 716
  and glucagon, comparative potency and efficacy in raising plasma glucose levels in fasted anesthetized rats, **181**, 1288
  human and rat, effects on insulin secretion by isolated rat pancreatic islets, **177**, 932
  induced inhibition of ^{14}C-glycogen accumulation in muscle, reversal by amylin or CGRP fragments (rat), **181**, 116
  and insulin, cosecretion from cultured islet beta cells, modulation by nutrient secretagogues, islet hormones, and hypoglycemic agents, **179**, 1
  secretion from perfused pancreas: dissociation from insulin and abnormal elevation in insulin-resistant diabetic rat, **180**, 782
  stimulation of cAMP production in L6 myocytes via calcitonin gene-related peptide receptors (rat), **177**, 771
Amyloid, *see also* Serum amyloid
  β protein
    from Alzheimer disease brain, inhibition of sprouting and survival of sympathetic neurons, **174**, 572
    cleavage at N-terminus by calcium-activated protease from Alzheimer disease brain, **174**, 790
    homologous peptides containing Gln for Glu substitution, acceleration of amyloid fibril formation, **179**, 1247; *erratum*, **180**, 1528
  β protein precursor
    abnormal and deficient processing in familial Alzheimer disease lymphoblastoid cells, **175**, 361
    expression in insect cells, **174**, 983
    processing
      identification of cerebral metallopeptidase cleaving -Lys–Leu- in model peptide (human), **179**, 1148
      role of regulated secretory pathway, **181**, 513
    secreted form containing Kunitz protease inhibitor domain, identification as platelet-specific protein in blood (human), **175**, 15
    secreting enzyme, sequence specificity (COS-1 cells), **179**, 1670
    trophic effect on rat cerebral cortical neurons in culture (human), **181**, 265
    ^{717}Val→Ile substitution, association with familial Alzheimer's disease regardless of ethnic background, **178**, 1141
  fibril formation
    acceleration by Gln for Glu substitution in peptides

    homologous to amyloid, **179**, 1247; *erratum*, **180**, 1528
  by transthyretin and synthetic fragments *in vitro*, **175**, 1159
Amyloidosis
  related 85-kDa protein, purification from patients on chronic hemodialysis and partial characterization, **176**, 1037
Amylrhodamine
  effects on respiration and Ca^{2+} transport in hepatic mitochondria (rat), **175**, 1010
Anacardic acids
  inhibition of lipoxygenase and prostaglandin endoperoxide synthase, **176**, 775
Analgesia
  intrathecal, deltorphin analogs, role of carboxyl group in position 4 (rat), **180**, 1290
Androgen receptors
  binding capacity in intact MCF-7 cells, rapid homologous up-regulation (human), **181**, 383
  expression in prostate, autoregulation: immunohistochemical and in situ hybridization analysis (mouse, rat), **177**, 488
Androgens
  binding protein, 56-kDa, identity with aldehyde dehydrogenase (human genital skin fibroblasts), **175**, 831
  effects on intracellular calcium in human prostate cancer cells, **179**, 90
Androst-4-ene
  6α,7α-cyclopropane derivatives, preparation and evaluation as competitive aromatase inhibitors, **177**, 401
Angiogenesis
  in chorioallantoic membranes *in vivo*, inhibition by eponemycin (chicken embryo), **181**, 1070
  inhibition by synthetic fumagillin analog AGM-1470, comparison with parent compound (chicken embryo, rat), **174**, 1070
  vascular endothelial cells *in vitro*, autocrinological role of basic fibroblast growth factor (bovine), **180**, 1098
Angiogenin receptors
  on capillary endothelial cells, characterization (bovine brain), **176**, 833
Angiotensin II
  adrenal gland, increased production in stroke-prone spontaneously hypertensive rats with malignant hypertension, **178**, 151
  and atrial natriuretic polypeptide, interaction on proto-oncogene expression and vascular cell growth (rat), **176**, 1601
  blockade of ATP-sensitive K$^+$ channels in coronary artery smooth muscle cells (pig), **181**, 700
  hypersensitive contraction of glomerular capillaries in low-sodium rats, role of glibenclamide-sensitive K$^+$ channels, **181**, 871
  induced hypertrophy of cultured proximal tubular cells, effect of glucose concentration (mouse), **176**, 902
  specific high-affinity binding sites expressed on *Mycoplasma hyorhinis*, characterization (human), **179**, 1391
  stimulated phosphoinositide turnover in hepatocytes, effect of okadaic acid (rat), **179**, 852
  stimulation of aldosterone synthesis in c-EJ-Ha-*ras*-transfected adrenocortical cells (rat), **175**, 596
Angiotensin I-converting enzyme, *see* Dipeptidyl carboxypeptidase I
Angiotensinogen
  encoding gene, expression in transgenic mice and transfected cells (human), **180**, 1103
Angiotensin receptors
  peptide and non-peptide ligands, inhibition of bovine brain calmodulin-dependent cGMP phosphodiesterase, **179**, 85
  subtypes AT$_1$ and AT$_2$, expression in aorta, changes during development (rat), **179**, 1361
Angiotensin II receptors
  cDNA cloning and sequencing and gene expression regulation (rat), **177**, 299
  characterization with radioiodinated CGP 42112A as selective high-affinity ligand (human, rat), **181**, 1365
  nonpeptide antagonist DuP 532, characterization, **177**, 209
Annexin II
  and p11, increases in PC12 cells correlated with differentiation, **177**, 1188
Anoxia
  –reoxygenation injury to cardiac myocytes, protection by acidotic pH (neonatal rat), **179**, 798
Antibodies
  anti-CD36, induction of CD36-mediated signal transduction in monocytes: comparison with effects of anti-thrombospondin antibodies (human), **175**, 263
  antipeptide
    differentiation of long and short isoforms of D$_2$ dopamine receptor, **179**, 824
    in identification of four human CD46 isoforms (rabbit), **180**, 1091
  auto-, *see* Autoantibodies
  blocking, from idiopathic myxedema patients, epitope on high-affinity thyrotropin binding site of rat thyrotropin receptor, characterization, **180**, 1118
  to carbohydrates, in normal human serum, recognition of HIV glycoproteins, **177**, 279
  to cystic fibrosis transmembrane conductance regulator, high-affinity, development and use in CFTR localization in sweat gland (human), **181**, 36
  Fab′ fragments, conjugated with aequorin, in bioluminescent immunoassay, **174**, 1331
  to group II phospholipase A$_2$, suppression of lysophosphatidylserine-dependent degranulation of peritoneal mast cells (rat), **181**, 714
  to human thyrotropin receptor
    extracellular domains, thyroid-stimulating activities, **179**, 1548
    membrane-spanning region extracellular loops, thyroid-stimulating activities, **181**, 1035
    N-terminal region, characterization, **177**, 145
    peptides, generation in chickens and characterization, 174, **399**

to IgE, induced histamine release from peritoneal mast cells, effect of 2-nitro-4-carboxyphenyl-*N,N*-diphenylcarbamate (rat), **181**, 1313
to mammalian apolipoproteins, reactivity with yeast proteins, **174**, 631
monoclonal, *see* Monoclonal antibodies
to nerve growth factor, Fab′ fragment, induction of amnesia and brain morphological changes (rat), **175**, 215; *erratum*, **179**, 1683
to p80 region of bovine viral diarrhea virus, identification in bovine sera, **178**, 1326
polyclonal, to nitrosating enzyme, in detection of nitrosation-proficient denitrifying bacteria in biological fluids, **176**, 262
to saposin, cross-reacting 60-kDa protein associated with human placental sialidase, characterization, **177**, 1211
to *smg* p25A GDP dissociation inhibitor, in analysis of *smg* p25A GDI tissue and subcellular distribution (rat), **174**, 556
to thrombospondin, and anti-CD36 antibodies, role in monocyte signal transduction (human), **175**, 263
thyroid stimulating
inhibition by thyrotropin receptor sequence-derived synthetic oligopeptide P-195 (human), **178**, 165
signal transduction for, role of N-terminal region of thyrotropin receptor, **178**, 733
to zinc finger protein, in patient with paraneoplastic cerebellar degeneration, **178**, 198

Antide
and luteinizing hormone-releasing hormone, comparative susceptibility to enzymatic hydrolysis, **176**, 25

Antigens
carbohydrate, sialyl Lewis a, mediation of cancer cell adhesion to vascular endothelium (human), **179**, 713
CD36, mediated signal transduction in monocytes, induction by anti-CD36 antibodies: comparison with effects of anti-thrombospondin antibodies (human), **175**, 263
cystic fibrosis, increased expression in epithelial cells from CF patients, **174**, 1281
Forssman, solution conformation probed by NOE and exchange interactions, **174**, 1169
Hanganutziu–Deicher, expression in activated human T cells, **181**, 310
hepatitis B virus surface, recombinant vaccinia virus with coding sequence for, infected lymphocytes, production of 22 nm HBsAg particles (human), **179**, 1479
HLA class I, interferon-γ-induced expression on Huh 6 cells: analysis of signal transduction pathways, **177**, 610
HLA-DR, identification as procoagulant (human ovarian carcinoma), **178**, 467
HLA-DRα, gene methylation pattern, analysis in transgenic mice, **175**, 459
HNK-1, biosynthesis, glucuronosyl transfer to galactose residues in, enzymes involved, **179**, 416
M290, expressed on intestinal intraepithelial lymphocytes, N-terminal sequence identity with integrin β^7 subunit (mouse), **176**, 1443
MHC class I H-$2K^k$, and mRNA, increased production in neurons in trisomy 16 fetuses, relationship to neural dysgenesis (mouse), **179**, 102
MHC class II
associated invariant chain, mRNA detection in small intestine (mouse), **179**, 1642
detection of antisense sequences of antigenic peptides, **175**, 207
induction by interferon-γ, inhibitory effect of exogenous poly(ADP-ribose) synthetase gene expression (murine macrophages), **175**, 685
protective, from *Bacillus anthracis*, location of receptor-binding region, **180**, 531
Salmonella typhi outer membrane protein immunogenic in humans, demonstration, **181**, 301
Sd^a, β1,4-*N*-acetylgalactosaminyltransferase responsible for, expression in colon carcinoma CaCo-2 cell line (human), **180**, 681
sialosyl-Le^a and -Le^x, binding of selectin GMP-140, effect of sulfated glycans (human platelets), **181**, 1223
sialyl dimeric Le^x, expression, association with metastatic potential of transitional cell carcinoma of urinary bladder (human), **181**, 1218
squamous cell carcinoma, cDNA cloning and sequencing: member of serine protease inhibitors (human), **181**, 51
Tn, expression by glycoprotein CD 43 (Jurkat cells), **179**, 762

Antigen specificity
monoclonal antibodies to porcine colipase, **177**, 726

Anti-inflammatory action
calcitonin gene-related peptide (hamster, human, rat), **180**, 1429

Antimycin A
block in mitochondrial bc^1 complex, dye bypasses, in analysis of thyroid hormone effects on electron flow (rat liver), **178**, 73
regulation of intracellular acetyl-CoA carboxylase: mimicry of action of 5′-AMP-activated protein kinase, **181**, 1486

Antisera
anti-MYC, 67-kDa extracellular polypeptide reacting with, synthesis and phosphorylation in primary hepatocyte cultures (rat), **180**, 631
to 99-kDa polypeptide, effect on taurocholic acid uptake by ileal brush border membrane vesicles (rat), **179**, 204

Antistasin
specific binding to sulfatide [Gal(3-SO_4)β1-1Cer], inhibition by fragment [$A^{103,106,108}$] antistasin 93–119, **181**, 246

Antitumor activity
adriamycin, effect of schisanhenol (mouse), **178**, 207

Aorta
acetylcholine-induced relaxation, role of sodium–hydrogen antiport (rat), **177**, 407
expression of angiotensin receptor subtypes, changes during development (rat), **179**, 1361
vasoconstriction, effect of ammonium chloride (rat), **178**, 808

Apamin
  containing cationic clusters within α-helical structure, activation of GTP-binding proteins (honeybee venom), **178**, 400
APGW-amide
  purification and identification as inhibitory neurotransmitter (*Achatina fulica*), **177**, 27
Apolipophorin III
  displacement from low-density lipophorin surface by human apolipoprotein A-I, **179**, 734
Apolipoprotein A-I
  displacement of apolipophorin III from low-density lipophorin surface (human), **179**, 734
  gene expression
    in liver, upregulation by monosaturated fatty acid diet (rat), **180**, 162
    regulation *in vivo* by estradiol and testosterone at translational level (mouse), **181**, 1407
Apolipoprotein B
  encoding gene, identification of upstream suppressor site (human), **176**, 1116
  3′ hypervariable region, genotyping by polymerase chain reaction and gel electrophoresis, comparison, **181**, 846
Apolipoprotein E
  deficiency, high-density lipoprotein from affected patient, inhibition of platelet function, **181**, 1331
Apolipoproteins
  mammalian, antibodies to, reactivity with yeast proteins, **174**, 631
Apomorphine
  inhibition of type 2A protein phosphatase in brain (rat), **176**, 737
Apoprotein A-1
  phosphorylation by protein kinase C in absence of cofactors, **179**, 599
Apoptosis
  neuronal, induction by 1-methyl-4-phenylpyridinium (rat), **181**, 1442
  thymocytes, dexamethasone-induced, associated cellular accumulation of sulfated glycoprotein-2 mRNA (rat), **175**, 810
APP secretase
  in Alzheimer disease brain, identification, purification, and characterization, **177**, 377
APS reductase, *see* Adenylylsulfate reductase
Apyrase
  role in ecto-ATPase and ecto-ADPase activities in aortic endothelial and smooth muscle cells (bovine), **180**, 1200
2-β-D-Arabinofuranosylthiazole-4-carboxamide
  cytotoxicity to K562 cells (human), **180**, 933
Arachidonic acid
  conversion to leukotriene B_4 in B lymphocytes (human), **178**, 302
  and diacylglycerol, synergistic activation of rat protein kinase C *in vitro* and *in vivo* (*Hermissenda* neurons), **179**, 1522
  inhibition of mitochondrial NADH-CoQ oxidoreductase (rat brain), **178**, 1120
  metabolism, regulation by phenylarsine oxide (murine lymphoma, rat hepatic C-9 cells), **178**, 641
  phorbol ester- and fluoroaluminate-stimulated release from C127 fibroblasts, enhancement by overexpression of recombinant human type II phospholipase A_2, **178**, 1298
  release from peritoneal macrophages, receptor-mediated activation, role of extracellular calcium influx (mouse), **180**, 1036
  suppression of fatty acid synthase gene expression in hepatocytes (rat), **177**, 1056
Arginine
  effect on amylin and insulin cosecretion in cultured islet beta cells, **179**, 1
L-Arginine
  derived relaxing factor, production in aortic smooth muscle cells, induction by interleukin-1β (rat), **176**, 114
  detection in active site of prolidase (porcine liver), **180**, 401
  direct conversion to citrulline in jejunal enterocytes, stimulation by D-glucose (pig), **177**, 1171
  inhibition of endothelin-mediated cytosolic free calcium increase in neutrophils (human), **178**, 884
  metabolism in bone marrow-derived macrophages, effects of macrophage interactions with bacteria (rat), **177**, 821
  modification by 1,2-cyclohexanedione at active site of *Aspergillus ficuum* phytase, role in enzyme inactivation, **178**, 45
  –nitric oxide pathway, role in neuronal injury induced by L-glutamate or hypoxia (rat), **181**, 456
  N^G-substituted analogs, inhibition of nitric oxide synthase expressed in cytokine-activated endothelial cells (mouse), **178**, 823
  relationship to endothelium derived relaxing factor, analysis with N_W-nitro L-arginine benzyl ester probe (rat aorta), **179**, 1677
  stimulation of endogenous ADP-ribosyltransferase (HL-60 cells, rat brain), **178**, 848
  uptake in vascular endothelial cells, stimulation by bradykinin and ATP (porcine aorta), **180**, 926
Arginine-tRNA ligase
  hepatic, hydrophobic properties, role of NH_2-terminal extension (rat), **180**, 702
Arginine vasopressin
  induced cAMP production in renal papillary collecting tubule cells, enhancement by high potassium (rat), **177**, 840
  induced increase in Na^+ levels in vascular smooth muscle cells, effect of Na^+/K^+-ATPase inhibition (rat), **177**, 1247
  plasma levels, effects of interleukins (rat), **174**, 1189
Arginine vasopressin receptors
  subtype V_p, detection in early proximal tubule (rat), **180**, 131
L-Arginyl-L-phenylalanine
  augmentation of blood pressure and heart rate in anesthetized rats, mechanism, **175**, 318

Arginyl-tRNA synthetase, *see* Arginine-tRNA ligase
Argtide
  luteinizing hormone-releasing hormone antagonist, evaluation, **180**, 374
Aromatase
  6α,7α-cyclopropane derivatives of androst-4-ene as competitive inhibitors, preparation and evaluation (human placenta), **177**, 401
Aromatic-L-amino-acid decarboxylase
  and histidine decarboxylase, immuno-cross-reactivity (guinea pig, rat), **173**, 1299; *erratum*, **176**, 947
Aromatics
  methoxylated, utilization by acetogen *Clostridium thermoaceticum*: expression and specificity of CO-dependent O-demethylating activity, **180**, 416
Arrestin
  homologs phosrestin I and II, differential light-induced phosphorylation in *Drosophila* photoreceptor *in vivo*, **177**, 1306
Arteries, *see also* Aorta
  carotid, smooth muscle, detection of endothelin converting enzyme (bovine), **174**, 446
  cerebral, effects of intracisternal administration of big endothelin-1 in absence or presence of phosphoramidon pretreatment (dog), **178**, 24
  intrapulmonary, vasorelaxation, induction by N$^{\omega}$-hydroxy-L-arginine (bovine), **176**, 528
  mesenteric
    isolated perfused, phosphoramidon-sensitive conversion of big endothelin-1 to endothelin-1 (rat), **177**, 1127
    resistance, loss of contractility in culture, attenuation by 1,25-dihydroxyvitamin D$_3$ (rat), **174**, 11
Arylamine *N*-acetyltransferase
  genes, partial nucleotide sequences and restriction maps (human liver), **177**, 1252
Arylphorin
  complete cDNA, gene, and amino acid sequences (*Calliphora vicina*), **177**, 963
Arylsulfatase A, *see* Cerebroside-sulfatase
Ascorbate
  enhancement of axial symmetry of Fe^{3+}-heme center of horseradish peroxidase, **180**, 597
Ascorbic acid
  protective role in benzanthrone bio-elimination and organ retention (guinea pig), **178**, 1405
Asialofetuin
  tacked liposomes encapsulating interferon-γ, uptake by human hepatoma cells: inhibition of hepatitis B virus replication, **174**, 839
Asialoglycoprotein receptors
  role in hepatocyte adhesion to galactoside surfaces and simultaneous redistribution to substratum (rat), **180**, 1304
Asialo-GM$_1$
  binding of *Chlamydia* spp. to, **175**, 1082
Asialo-GM$_2$
  binding of *Chlamydia* spp. to, **175**, 1082
D-Asparagine
  containing neuropeptide fulicin, isolation from ganglia (*Achatina fulica*), **178**, 486
L-Asparagine
  substitution for Ser-406 in immunoglobulin μ heavy chain, effect on glycosylation at Asn-402 (murine cell lines), **179**, 1627
Aspartase, *see* Aspartate ammonia-lyase
Aspartate aminotransferase
  exchangeable protons, ^{1}H NMR spectra (human), **178**, 385
  mitochondrial, precursor import into yeast mitochondria, comparison with import of cytosolic isozyme containing same presequence (chicken), **174**, 1232
Aspartate ammonia-lyase
  catalytic and structural properties, effect of cysteine-to-tryptophan mutagenesis at position 430 (*Escherichia coli*), **177**, 414; *erratum*, **178**, 800
Aspartic acid
  or glutamic acid, detection in active site of prolidase (porcine liver), **180**, 401
  and leucine, uptake into brush border membrane vesicles from insect midgut, differential inhibition by *Bacillus thuringiensis* δ-endotoxin, **181**, 1089
Aspartic proteinases
  homology cloning from endocrine cell line: application of polymerase chain reaction, **177**, 920
Aspergillus flavus
  viability as plant pathogen, effect of animal myeloperoxidase, **178**, 1202
Aspergillus nidulans
  absence of methylmalonyl-CoA mutase in, **177**, 1076
Asterriquinone
  and analogs, inhibition of HIV reverse transcriptase, **174**, 56
Astrocytes
  detection of prostaglandin F$_{2\alpha}$ receptors coupled to phospholipase C (rat), **178**, 946
  type 2, histamine-induced accumulation of inositol phosphates (rat), **177**, 734
Ataxia
  cerebellar, paraneoplastic, identification of antibody to zinc finger protein in affected patient, **178**, 198
ATP (adenosine 5′-triphosphate)
  analog Mg(α,β-methylene)ATP bound to isoleucyl-tRNA synthetase, NOE conformational studies, **176**, 682
  and CoA, requirement for dehalogenation reaction of *Pseudomonas* 4-chlorobenzoate dehalogenase, **176**, 1106
  dependent actin–myosin interaction, stimulation by okadaic acid, mechanism (bovine smooth muscle), **177**, 1155
  extracellular
    induction of biphasic rise in intracellular calcium levels in adrenocortical fasciculata cells (bovine), **178**, 1266
    levels, effect on flow-induced Ca^{2+} response in cultured vascular endothelial cells (fetal bovine aorta), **179**, 1192
    induction of [Ca^{2+}]$_i$ oscillations in pancreatic beta cells (mouse), **177**, 777
    Na$^+$-coupled synthesis in *Vibrio parahaemolyticus* mutant lacking H$^+$-translocating ATPase activity, **179**, 224

- role in glucuronide transport across hepatic canalicular membranes (rat), **176**, 622
- sensitive nonselective cation channel, detection in colonic tumor cells (human), **176**, 1196
- stimulation of L-arginine uptake and nitric oxide release in vascular endothelial cells (porcine aorta), **180**, 926
- and thrombin, induction of $[Ca^{2+}]_i$ increases, differential regulation by prostacyclin receptor (murine mastocytoma cells), **176**, 102
- and ubiquitin, stimulated proteolysis in liver and Yoshida ascites hepatoma, analysis (rat), **179**, 1400

ATPase
- actin-activated, of heavy meromyosin, inhibition by calponin (chicken gizzard), **176**, 1487
- Ca^{2+}-
  - effect of cholera toxin (human erythrocytes), **181**, 208
  - mRNA, intestinal plasma membrane, effect of vitamin D (rat), **179**, 749
  - sarcoplasmic reticulum, encoding mRNA, diabetes-induced decrease in cardiomyocytes (rat), **178**, 906
- Ca^{2+},Mg^{2+}-, in anterior pituitary, effects of somatostatin and analogs RC-160 and SMS 201-995 (rat), **178**, 1492
- catalyzing ATP hydrolysis in presence of bilirubin, bile acid, and glutathione conjugates, purification and characterization (human liver), **175**, 1090
- ecto-, and ecto-ADPase, activities in aortic endothelial and smooth muscle cells, role of ATP diphosphohydrolase (bovine), **180**, 1200
- F_1, mitochondrial, inactivation by H_2O_2, mediation by not-tightly-bound iron ions (bovine heart), **181**, 764
- H^+-
  - deficient *Vibrio parahaemolyticus* mutant, Na^+-coupled ATP synthesis in, **179**, 224
  - vacuolar, 16-kDa subunit, cDNA cloning and sequencing (murine cerebellum), **176**, 1062
- H^+,K^+-
  - gastric, topography: assignment of amino acids 888–907 as cytoplasmic (pig), **180**, 1356
  - β subunit cDNA, cloning (human gastric mucosa), **180**, 39
- Na^+,K^+-
  - conformational transitions upon detergent solubilization, fluorescent monitoring (dogfish rectal gland, porcine kidney), **174**, 63
  - identification of hemin as endogenous inhibitor from erythrocytes (pig), **178**, 95
  - inhibition by ouabain, effect on vasopressin-induced Na^+ increase in vascular smooth muscle cells (rat), **177**, 1247
  - isoforms
    - expression in heart (human), **179**, 1434
    - myometrial, effects of micromolar Ca^{2+} (rat), **174**, 969
- sperm flagellar inner arm fraction inducing axonemal outer doublet microtubule sliding, purification and properties (sea urchin), **175**, 173

ATP diphosphohydrolase, *see* Apyrase

ATP synthase
- H^+-
  - human coupling factor 6 of, import precursor cDNA, molecular cloning, **178**, 793
  - subunit b import precursor, cDNA cloning and sequencing (human), **178**, 1014

Atrial natriuretic factor
- and angiotensin II, interaction on proto-oncogene expression and vascular cell growth (rat), **176**, 1601
- associated hormonal system, analysis in plant *Dracena godseffiana*, **179**, 695
- binding to guanylyl cyclase-containing ANF receptor, inhibition by microbial polysaccharide HS-142-1, **176**, 949
- and brain natriuretic peptide, secretion in nephrotic rats, analysis, **174**, 128
- clearance receptor-binding, inhibition of mitogenesis and aortic smooth muscle cell proliferation (rat), **179**, 1606
- glomerular refractoriness, in low-sodium rats, role of glibenclamide-sensitive K^+ channels, **181**, 871
- human, post-translational processing and secretory pathway in rat pheochromocytoma cells, **176**, 1232
- immunological localization in testis and detection in spermatozoa (mouse, rat), **180**, 437
- protective effect on cells damaged by oxygen radicals: roles of cGMP, calcium, and G proteins, **174**, 549
- synthesis and secretion by cardiocytes, stimulation by ouabain and digoxin (rat), **176**, 875

Atrial natriuretic factor receptors
- C-type, binding atrial natriuretic peptides, inhibition of mitogenesis and aortic smooth muscle cell proliferation (rat), **179**, 1606
- guanylyl cyclase-containing, ANF binding, inhibition by microbial polysaccharide HS-142-1, **176**, 949
- guanylyl cyclase cores, overexpression as homodimers, **180**, 538
- internalization, role of extracellular calcium (PC12 cells), **175**, 1017

Atriopeptin, *see* Atrial natriuretic factor

Atrophy
- thymic, induction by dexamethasone and TCDD by different mechanisms (mouse), **178**, 16

Atropine
- effects on rat parotid acini and M_1-CHO cells: role of G proteins, **177**, 784

Autoantibodies
- to hepatic microsomal proteins, occurrence with fulminant hepatitis (LEC rat), **179**, 1134

Autophosphorylation
- hyaluronate-binding protein *in vitro*, **177**, 1291
- insulin receptor, inhibition by pertussis toxin, **181**, 1479
- $p72^{syk}$, stimulation by wheat germ agglutinin (porcine splenocytes), **180**, 1325

Autoxidation
- NAD(P)H, initiated by hydroperoxyl radical, steady-state kinetics, **176**, 846

Avian thymic hormone
- distinction from chicken muscle parvalbumin, **176**, 328

- Axons
  - severed, laser-induced reconnection (*Lumbricus terrestris*), **180**, 874
- Azatyrosine
  - inhibition of *ras*-p21-induced maturation of *Xenopus* oocytes, **181**, 1378
- 3′-Azido-3′-deoxythymidine, *see* Zidovudine
- Azo dyes
  - carcinogenic and noncarcinogenic, induced DNA adducts, differential effects on DNA synthesis *in vitro* (*Escherichia coli*), **179**, 817
  - degradation by *Phanerochaete chrysosporium* ligninase, role of veratryl alcohol, **178**, 1056
- AZT, *see* Zidovudine
- Azurocidin
  - cDNA cloning and sequencing (human neutrophils), **177**, 688

B

- *Bacillus anthracis*
  - protective antigen, location of receptor-binding region, **180**, 531
- Bacillus Calmette-Guerin
  - primed rats, hepatic group II-like phospholipase A_2 induction by lipopolysaccharide, **174**, 1077
- *Bacillus subtilis*
  - dry spores, use as biological dosimeter for monitoring solar UV-B radiation, **177**, 48
- *Bacillus thuringiensis*
  - protoxin, activation of toxic moiety, associated conformational change, **179**, 933
- Bacteria, *see also specific bacteria*
  - denitrifying
    - nitrosation-proficient, detection in biological fluids with mono- and polyclonal antibodies to nitrosating enzyme, **176**, 262
    - nitrosyl transfer from nitrite to azide, nitric oxide-dependent catalysis, **175**, 901
  - interaction with rat bone marrow-derived macrophages, effects on L-arginine metabolism and tumoricidal activity, **177**, 821
  - thermophilic, PS3, heat shock proteins 60 and 10, gene structure, **179**, 565
- Bacteriophages
  - λ, gene library, cloning of thyroid lymphocyte-derived Ig genes in, in generation of human Fab fragment specific for thyroid peroxidase, **179**, 372
  - M13, coat protein, viable transmembrane mutants, preparation by site-directed mutagenesis, **180**, 687
  - T4, chimeric, for estimation of regulatory signals, construction method, **179**, 620; *erratum*, **180**, 462
  - T5, encoded A2 protein, amino acid sequence, **177**, 1240
  - T7, infection in *Escherichia coli*
    - dependent system for selective expression of cloned genes in P1-lysogenic bacteria, evaluation, **179**, 1200
    - quantifiable phenotype of viral propagation, **174**, 1009
- Bacteriorhodopsin
  - –DMPC vesicles produced by detergent-free method, phospholipid composition and physical properties, **180**, 939
  - incubated in various detergent solutions, spectroscopic analysis of monomers, **181**, 1301
- Baculovirus
  - in expression of
    - active manganese peroxidase from *Phanerochaete chrysosporium* in Sf9 cells, **179**, 897
    - α1 subunit of AMPA-selective murine glutamate receptor channel, **181**, 756
    - biologically active ovine trophoblastic interferon in insect cells, **181**, 443
    - human thyroid hormone β1 receptor in insect cells, **175**, 285
    - rabbit hepatic cytochrome P450F1 in insect cells, **175**, 394
  - recombinant, infected insect cells, precursor synthesis of soluble human insulin receptor ectodomain, **177**, 764
- Bafilomycin A_1
  - inhibitory effects on synthesis and processing of cathepsins D and H in cultured hepatocytes (rat), **178**, 369
- Barbiturates
  - enhancement of retinoic acid- or 1,25-dihydroxyvitamin D_3-induced differentiation of leukemia HL-60 cells (human), **178**, 263
- Barium currents
  - bradykinin-evoked oscillation in *ras*-transformed fibroblasts (mouse), **178**, 713
- Base stacking
  - in 3′–5′ and 2′–5′ RNA, role of internucleotide phosphate linkage: CD spectroscopic study of RNA hexamer AACCUU, **180**, 1251
- Basophils
  - histamine and leukotriene release, interleukin-8 as inhibitor and inducer (human), **179**, 628
- B cells
  - decorated with artificial antigen receptors, differentiation, inhibition by triamcinolone acetonide (human), **179**, 1276
  - 5-lipoxygenase activity and biosynthesis of leukotriene B_4 from arachidonic acid (human), **178**, 302
  - microfilament assembly, essential role of tyrosine phosphorylation (human), **176**, 1424
  - primary, *jun-B* gene expression mediated by surface immunoglobulin receptor (mouse), **175**, 77
- Benzanthracene
  - *trans*-10,11-dihydrodiol-8,9-epoxide–DNA adducts, direct labeling with *cis* vic-diol group-specific fluorescent reporter compound, **180**, 1233
- Benzanthrone
  - bio-elimination and organ retention in scorbutic and nonscorbutic guinea pigs, **178**, 1405
- Benzo[*a*]anthracene-*trans*-3,4-dihydrodiol-1,2-epoxide
  - –DNA adducts, direct labeling with *cis* vic-diol group-specific fluorescent reporter compound, **180**, 1233
- Benzodiazepine
  - related compounds
    - detection in human milk and plasma, **175**, 1042
    - formation in brain (rat), **180**, 972
    - production in rumen (bovine), **181**, 1048

Benzodiazepine receptors
  peripheral, monoclonal antibodies to, activation of NADPH oxidase (human neutrophils), **176**, 1577
Benzofuran isophthalate
  sodium-binding, in assay of intracellular free Na^+ in myocytes (guinea pig), **175**, 611
1,2-Benzopyrone, *see* Coumarin
1-Benzylpiperidine
  microsomal metabolism: generation and fate of enamines (rabbit liver), **179**, 1368
Beta cells
  balance between insulin synthesis and release, measurement (rat), **178**, 1182
  $[Ca^{2+}]_i$ oscillations, induction by ATP (mouse), **177**, 777
  cosecretion of amylin and insulin *in vitro*, modulation by nutrient secretagogues, islet hormones, and hypoglycemic agents, **179**, 1
  replication and insulin secretion, α-adrenergic inhibition, mediation by pertussis toxin-sensitive G protein regulating islet cAMP content (rat), **180**, 152
Beta-cell tropin
  and insulin, comparative effects on lipogenesis in brown adipocytes from lactating and non-lactating rats, **181**, 1437
  plasma levels, measurement in lean and genetically obese mice and Zucker rats, **174**, 767
Biglycan
  core protein from human bone, pre-propeptide sequence, homology with N-terminus of proteochondroitin core protein secreted by rat and bovine aortic smooth muscle cells, **175**, 706
Bile acids
  conjugates, ATPase catalyzing ATP hydrolysis in presence of, purification and characterization (human liver), **175**, 1090
  14-kDa transport protein from ileal cytosol, identification as gastrotropin (rat), **177**, 1147
Biliary glycoprotein
  cDNA clones encoding three variants, identification in human leukocyte library, **176**, 578
Bilirubin
  conjugates, ATPase catalyzing ATP hydrolysis in presence of, purification and characterization (human liver), **175**, 1090
Bilirubin UDP-glucuronosyltransferase
  genetic defect in hyperbilirubinemic Gunn rat, characterization, **177**, 1161
Binding assay
  competitive, for determination of cAMP content of human leukocytes, **178**, 980
Bioluminescence
  exhibition by individual α and β subunits of bacterial luciferase (*Escherichia coli*), **178**, 1188
Biotin
  –pertussis toxin, synthesis and characterization, **179**, 1464
Biotinylation
  endothelin-1 at lysine-9 sidechain, in evaluation of endothelin receptor populations, **181**, 1245
Bis(3,5-dibromosalicyl) fumarate
  crosslinking of hemoglobin in T-state, subsequent thermal stability, **174**, 518
α,α′-Bis[3-(*N,N*-diethylcarbamoyl)piperidino]-*p*-xylene dihydrobromide
  inhibition of collagen-induced calcium mobilization in platelets (human), **177**, 888
N,N′-Bis(2-hydroperoxy-2-methoxyethyl)-1,4,5,8-naphthalene-tetra-carboxylic-diimide
  ultraviolet-induced reactions in hepatic microsomes: generation of oxy- and chromanoxyl free radicals (rat), **175**, 129
Bis-methylpyridinium aldoximes
  bridged, mitochondrial uptake and induction of petite phenotype in yeast, **179**, 992
Blood, *see also* Plasma, Serum
  aflatoxin B_1 disposition *in vivo* (rat), **179**, 1095
  infected with *Plasmodium falciparum*, detection of single parasites, **175**, 179
  protease nexin-2/amyloid β-protein precursor content, predominance in platelets (human), **175**, 15
  whole, lipopolysaccharide-stimulated, cytokine gene expression kinetics (human), **174**, 18
Blood coagulation
  relationship to inflammation: stimulation of neutrophil tissue kallikrein by thrombin (human), **176**, 315
Blood flow
  cerebral, estimation by ^{17}O NMR *in vivo* (rabbit), **179**, 954
Blood groups
  histo-, ABH genes, sequence homologous to, identification in human genomic DNA, **175**, 986
Blood pressure
  acute and chronic alterations in patients with chronic hemodialysis, differential role of endothelin-1 and endothelin-3, **178**, 276
  arterial, after endotoxic shock, effect of N^G-monomethyl-L-arginine (dog), **178**, 1135
  augmentation by FMRF-amide and L-Arg–L-Phe in anesthetized rats, mechanism, **175**, 318
  cosegregation with angiotensin I-converting enzyme microsatellite in F_2 generation from WKY/SHRSP cross (rat), **181**, 941
Bluetongue virus
  serotype 17, full-length nonstructural protein NS1, expression in *Escherichia coli*, **180**, 994
BMS 180742
  inhibiting thrombin exosite, in differentiation of multiple pathways of thrombin-induced platelet activation (human), **181**, 636
Body axis
  formation, effect of activin receptor mRNA expression level (*Xenopus laevis*), **181**, 684
Bombesin
  activation of large-conductance chloride channels in Swiss 3T3 fibroblasts, **177**, 292
  induced sustained smooth muscle contraction, role of heat shock protein hsp27 (rabbit), **181**, 1192
  and insulin-like growth factor I, mitogenic stimulation of Swiss 3T3 cells, associated temporal changes in intracellular protein kinase C distribution, **177**, 480

related neuropeptides, cerebral, primary structure (frog), **178**, 526
and SMS 201-995, inhibition of DNA synthesis in thyroid lobes *in vitro* (rat), **178**, 520
and substance P antagonists, effects on release of growth hormone by GHRP and GHRH (rat), **180**, 156

Bombesin receptors
subtypes, analysis with *Xenopus* oocytes, **176**, 79

Bone
fixing of insulin-like growth factor II, role of bone-derived IGF-binding protein (human), **176**, 756
formation, matrix-induced, associated changes in collagen, fibronectin, integrin, and proteoglycan gene expression (rat), **177**, 427
trabecular, derived cells, β_2-microglobulin immunoreactivity and mitogenic effects (human), **175**, 795

Bone marrow
cultivation in presence of 1,25-dihydroxyvitamin D_3: differentiation of osteoclast-like cells (human), **176**, 1189
formation and proliferative effects of lipoxins (human), **180**, 255

Bone morphogenetic proteins
effects on alkaline phosphatase activity and collagen synthesis in MC3T3-E1 osteoblastic cells, **174**, 96

Bone resorption
interleukin-1-induced, potentiation by bradykinin (neonatal murine calvaria), **175**, 775
by isolated rat osteoclasts, effects of cathepsin L inhibitor (bovine), **179**, 63
in neonatal calvaria *in vitro*, inhibition by okadaic acid (mouse), **178**, 758
osteoblast–osteoclast relationships in, analysis (chicken), **179**, 634

Borate
and boric acid, complex formation with dityrosine, fluorometric characterization, **178**, 60

Boric acid
and borate ion, complex formation with dityrosine, fluorometric characterization, **178**, 60

Boronic acids
probing of subtilisin Carlsberg S_1 binding site specificity, **176**, 401

Bovine viral diarrhea virus
p80 region, expression as recombinant protein and identification of specific antibodies in bovine sera, **178**, 1326

Bowman–Birk inhibitor
inhibition of soluble 70-kDa serine proteinase from C3H/10T1/2 cells, **178**, 856

Bradykinin
evoked Ba^{2+} current oscillation in *ras*-transformed fibroblasts (mouse), **178**, 713
induced $[Ca^{2+}]_i$ oscillation in polyoma middle T-transformed NIH3T3 cells, role of protein kinase C, **176**, 813
potentiation of interleukin-1-induced bone resorption and prostanoid synthesis in calvarial bone (neonatal mouse), **175**, 775
stimulated neuronal cell lines, inositol 1,4,5-trisphosphate and inositol 1,3,4,5-tetrakisphosphate mass measurements (mouse), **181**, 997
stimulation of L-arginine uptake and nitric oxide release in vascular endothelial cells (porcine aorta), **180**, 926
and thrombin, induced prostaglandin E_2 biosynthesis in isolated osteoblasts, effect of haptoglobin (mouse), **178**, 343

Brain, *see also specific regions*
Alzheimer disease, identification, purification, and characterization of APP secretase, **177**, 377
amphibian, expression of 60-kDa calcium-binding protein similar to mammalian calreticulin (*Rana esculenta*), **175**, 444
blood flow and oxygen consumption, estimation by ^{17}O NMR *in vivo* (rabbit), **179**, 954
cortex, differential expression of myosin II (rat), **175**, 244
αB-crystallin mRNA, increment in patient with infantile-type Alexander's disease, **179**, 1030
cytokine mRNA levels, effects of kainic acid (rat), **176**, 593
detection of
  C-type natriuretic peptide (chicken), **174**, 142
  inter-α-trypsin inhibitor active component in individuals with Alzheimer-type dementia, **174**, 1015
differential distribution of mRNAs encoding two isoforms of calcineurin catalytic subunit (rat), **174**, 393
distribution of immunoreactive C-type natriuretic peptide (pig), **175**, 759
embryonic, isolated cells, effects of midkine (rat), **177**, 652
formation of benzodiazepine-like molecules (rat), **180**, 972
forskolin-stimulated adenylate cyclase, melatonin-induced inhibition, blockage by pertussis toxin (chicken), **178**, 786
identification and characterization of tumor necrosis factor α receptors (mouse), **181**, 1532
immunoreactive C-type natriuretic peptide, characterization (human), **179**, 535
intracisternally administered big endothelin-1, conversion to endothelin-1, inhibition by phosphoramidon (dog), **178**, 24
lipid extract, identification of *sn*-2-ω-hydroxycarboxylate-containing phospholipids (bovine), **177**, 466
lipoxygenase activity, reevaluation of past findings (rat), **174**, 729
melatonin-binding sites, affinity labeling (hamster), **178**, 1147
morphological changes induced by nerve growth factor antibody Fab′ fragment (rat), **175**, 215; *erratum*, **179**, 1683
neurosteroid levels, effects of dehydroepiandrosterone and 3β-methyl-androst-5-en-17-one (mouse), **174**, 892
nitric oxide synthase irreversible inhibition by L-N^G-nitroarginine (rat), **176**, 1136
parkinsonian and normal, identification of 2-methyl- and 1,2-dimethyl-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline (human), **177**, 603
presynaptic localization of histamine H_3 receptors (rat), **177**, 907

  - quantitation of ryanodine receptors (rabbit), **175**, 858
  - regional expression of nerve growth factor gene family during development (rat), **174**, 379
  - specific mRNA encoding nucleoprotein expressed in neurally differentiated P19 cells, cDNA sequence (mouse), **178**, 291
  - subcellular distribution of *rho* GDP dissociation inhibitor (rat), **175**, 199
  - substantia nigra, pre- and post-synaptic ATP-sensitive K$^+$ channels, activation by cromakalim (rat), **174**, 909
  - synaptic and extra-synaptic distribution of histamine H$_1$-receptors (guinea pig, rat), **174**, 1043
  - transcription of dopamine D5 pseudogene (human), **181**, 16
  - 28- and 36-kDa proteins, recognition by monoclonal antibodies immunoprecipitating ω-conotoxin receptor (bovine, chicken), **181**, 59
  - type 2A protein phosphatase inhibition by dopamine agonists (rat), **176**, 737
- Brain natriuretic peptide
  - and atrial natriuretic peptide, secretion in nephrotic rats, analysis, **174**, 128
  - augmented secretion in acute myocardial infarction (human), **180**, 431
  - concentration and molecular forms in plasma and spinal cord (rat), **177**, 40
  - degradation by neutral endopeptidase: species-specific proteolytic sites (human, pig, rat), **175**, 22
- Branching enzyme
  - in amylopectin biosynthesis, *see* 1,4α-Glucan branching enzyme
- 1-Bromoalkanes
  - effects on intracellular glutathiones in isolated hepatocytes (rat), **179**, 436
- Broxaterol
  - transdermal transport, lecithin organogels as matrices for, **177**, 897
- Budding
  - Ca^{2+}-modulated, yeast cells, role of *CLS4/CDC24* gene product *DBL*-homologous region, **181**, 604
- Bufalin
  - potent induction of K562 cell differentiation (human), **178**, 686
- κ-Bungarotoxin
  - binding to neuronal nicotinic acetylcholine receptor, role of individual amino acid residues in receptor α3(50–71) region, **176**, 11
- Butyl peroxide
  - –hemoprotein complex, coordination structure and chemical reactivity, **176**, 675
- Butyrate
  - effect on alkaline phosphatase expression in lymphoma cells (mouse), **177**, 125

C

- Cadmium
  - effect on Ca^{2+}-dependent cell–cell junctions and E-cadherin immunofluorescence pattern in epithelial LLC-PK$_1$ cells (porcine kidney), **181**, 1118
  - inhibitory effect on transcription of *ada* gene, **179**, 1517
  - and zinc, additive induction of metallothionein (LLC-PK1 cells), **177**, 224
- Cadystins
  - synthesis in *Schizosaccharomyces pombe*, induction by tetramethylthiuram disulfide or dimethyldithiocarbamate, **176**, 1068
- Caffeine
  - and inositol 1,4,5-trisphosphate, sensitive calcium pools in pancreatic microsomal vesicles, GTP-induced connection, increase by H$^+$ uptake, **180**, 755
- Calbindin-D$_{28K}$
  - pancreatic, intestinal, and renal levels, effects of 1,25-dihydroxyvitamin D$_3$ (chicken), **176**, 1057
- Calcimycin
  - effect on fibroblast membrane permeability (mouse), **178**, 830
  - induction of protein-tyrosine phosphorylation in platelets, analysis (human), **174**, 922
  - stimulation of neutrophil phagocytosis, concomitant activation of myeloperoxidase (rat), **176**, 364
- Calcineurin
  - catalytic subunit, mRNAs encoding two isoforms, differential distribution in brain (rat), **174**, 393
  - β-subunit, similar to calcium-binding polypeptide, cDNA cloning and sequencing (rat testis), **180**, 1476
- Calcineurin B
  - mammalian, cDNA for homolog, cloning in *Saccharomyces cerevisiae*, **180**, 1159
  - related protein, testis-specific, cDNA cloning (rat), **179**, 1325
- Calcitonin
  - –calcitonin gene-related peptide I pre-mRNA, alternative processing, deregulation by point mutation, **178**, 985
  - induced quiescence in rat osteoclasts, selective antagonism by human calcitonin gene-related peptide-(Val^{8}Phe^{37}), **179**, 134
- Calcitonin gene-related peptide
  - fragment analog hCGRP-(Val^{8}Phe^{37}), selective antagonism of calcitonin-induced quiescence in rat osteoclasts, **179**, 134
  - inhibition of edema-promoting actions of inflammatory mediators (hamster, human, rat), **180**, 1429
  - peptide fragments, reversal of amylin-induced inhibition of ^{14}C-glycogen accumulation (rat muscle), **181**, 116
  - type I, –calcitonin pre-mRNA, alternative processing, deregulation by point mutation, **178**, 985
- Calcitonin gene-related peptide receptors
  - role in amylin stimulation of cAMP production in L6 myocytes (rat), **177**, 771
- Calcium
  - binding to
    - band 3 isolated cytoplasmic domain at physiological salt concentration and neutral pH (human), **174**, 975
    - calcium green, calcium orange, and calcium crimson, analysis, **180**, 209
    - fibrinogen γ chain 259–411, role of disulfide bond Cys326–Cys339 (human), **174**, 853

- binding protein
  - inhibiting myosin light chain kinase, purification (*Physarum polycephalum*), **176**, 564
  - membrane-associated, purification from spermatogenic cells and characterization (rat), **176**, 1358
  - 60-kDa, similar to mammalian calreticulin, expression in frog brain, **175**, 444
- binding sites on bovine serum albumin, analysis with terbium(III) as fluorescent probe, **177**, 474
- and cAMP, role in regulation of endogenous chloride conductance in oocytes (*Xenopus laevis*), **180**, 1377
- chelation, induction of glutathione efflux from tumor cells, prevention by ruthenium red and neomycin, **176**, 276
- cytoplasmic levels in platelets, thrombin-induced elevation, inhibition by DUP 714 (human), **179**, 1500
- cytosolic levels
  - in cultured mesangial cells, effects of vitamin D_3 metabolites, single cell analysis (rat), **180**, 833
  - increased, in downregulation of thyrotropin receptor gene expression in FRTL-5 cells, mechanism, **176**, 94
- dependent amylase secretion in pancreatic acini, role of phospholipase C-linked G proteins (rat), **174**, 536
- dependent cell–cell junctions in epithelial LLC-PK_1 cell line, effect of cadmium (porcine kidney), **181**, 1118
- extracellular
  - elevated levels, monocyte-mediated effects on proliferation of MC3T3-E1 osteoblasts, **181**, 1425
  - influx
    - role in receptor-mediated activation of arachidonic acid release from peritoneal macrophages (mouse), **180**, 1036
    - TRH-induced, influx in pituitary GH_4C_1 cells (rat), **180**, 860
  - potassium channel-induced influx to GH_4C_1 cells, regulation of prolactin secretion (rat), **180**, 112
  - proliferation of colon adenocarcinoma cells in different concentrations of, effects of 1,25-dihydroxyvitamin D_3 and analogs, **179**, 57
  - role in atrial natriuretic factor receptor internalization (PC12 cells), **175**, 1017
- flow-induced response in cultured vascular endothelial cells, effect of extracellular ATP level (fetal bovine aorta), **179**, 1192
- fluorescent indicators, rate constants, ion selectivity, and thermodynamic properties: effects of pH, **177**, 184
- and GTP-binding proteins, regulation of IgE receptor-mediated RBL-2H3 mast cell secretion (rat), **174**, 1064
- homeostasis in GH_4C_1 cells, effects of thapsigargin (rat), **177**, 551
- induced Ca^{2+} release from cardiac sarcoplasmic reticulum, reduction after endotoxin administration (dog), **174**, 1248
- influx into
  - adrenal zona glomerulosa cells, stimulation by serotonin *in vitro* (rat), **179**, 979
  - FRTL-5 cells, IGF-I-induced, effects of pravastatin, **177**, 17
- inhibition of cAMP-independent protamine kinase from *Candida lipolytica*, **175**, 500
- inositol 1,4,5-trisphosphate-sensitive
  - and caffeine-sensitive pools in pancreatic microsomal vesicles, GTP-induced connection, increase by H^+ uptake, **180**, 755
  - and -insensitive pools in aortic smooth muscle cells, Ca^{2+} uptake characteristics (pig), **174**, 1183
- intracellular
  - in adrenocortical fasciculata cells, biphasic rise caused by extracellular ATP (bovine), **178**, 1266
  - ATP- and thrombin-induced increases, differential regulation by prostacyclin receptor (murine mastocytoma cells), **176**, 102
  - bradykinin-induced oscillation in polyoma middle T-transformed NIH3T3 cells, role of protein kinase C, **176**, 813
  - cholecystokinin octapeptide-induced increase in pancreatic acinar cells, inhibition by epidermal growth factor (rat), **180**, 900
  - effects of
    - collagen and antiplatelet agent (human platelets), **177**, 888
    - dibutyryl cCMP (human neutrophils), **174**, 258
    - platelet-activating factor (rat GH_4C_1 cells), **174**, 424
  - elevation in endothelial cells by 14 amino acid peptide derived from amino terminus of cleaved thrombin receptor (human umbilical vein), **179**, 1656
  - endothelin-mediated increase, inhibition by L-arginine (human neutrophils), **178**, 884
  - in hepatocytes, comparative effects of epidermal growth factor and hepatocyte growth factor (rat), **181**, 1173
  - IGF-I-induced mobilization, relationship to Na^+/H^+ antiporter activation (porcine thyroid cells), **177**, 113
  - increase
    - in macrophage-like P388D1 cells, induction by stimulation of histamine H1 receptors, **181**, 1156
    - role in parathyroid hormone-induced homologous desensitization (UMR-106 cells), **176**, 1033
  - and membrane depolarization, in synaptosomes, simultaneous measurement (rat), **181**, 797
  - mobilization in pancreatic acinar cells induced by basic fibroblast growth factor (rat), **177**, 166
  - oscillations in
    - pancreatic acinar cells induced by mastoparan (rat), **177**, 159
    - pancreatic beta cells, induction by ATP (mouse), **177**, 777
  - pools, thapsigargin- and inositol trisphosphate-sensitive, comparative roles in plasma membrane Ca^{2+} entry in neuronal cell lines, **180**, 1518
  - in prostate cancer cells, effects of androgen (human), **179**, 90
  - resting levels and thrombin-induced changes in platelets from spontaneously hypertensive rats, effects of erythropoietin, **177**, 991
  - single pulses associated with phagocytosis of individual zymosan particles by macrophages (mouse), **177**, 460
  - in vascular endothelial cells, endothelin effects *in situ* (pig), **181**, 1352
- and magnesium, synergistic effect in phospholipase A_2 activation in hepatic macrophages (rat), **175**, 532

  - micromolar, effects on Na^+/K^+-ATPase isozymes in myometrium (rat), **174**, 969
  - microsomal sequestration, inhibition: impairment of protein synthesis initiation in perfused liver (rat), **177**, 1082
  - mobilization, and protein kinase C activation, role in A23187-induced protein-tyrosine phosphorylation in platelets (human), **174**, 922
  - modulation of mitochondrial inner membrane channel activity (murine liver, rat heart), **176**, 1183
  - omission from medium, effect on cholecystokinin-stimulated Cl^- conductance in pancreatic zymogen granules (rat), **181**, 827
  - permeability of AMPA-selective glutamate receptor channels, determination by single amino acid residue (*Xenopus laevis*), **180**, 813
  - release from
    - isolated T-tubule–sarcoplasmic reticulum complex, effects of dihydropyridines (rabbit muscle), **175**, 271; *erratum*, **176**, 549
    - parotid microsomes, comparative effects of D-myoinositol 1,4,5-trisphosphate and 6-deoxy derivative (rat), **175**, 894
    - rod outer segments: evidence for cGMP-sensitive Ca^{2+}-binding protein (bovine retina), **176**, 70
  - requirement for sulfite reduction by hydrogen in reconstituted electron transfer chain from *Desulfovibrio gigas*, **180**, 238
  - responses to endothelin-1 in NG108-15 cells, inhibition by SK&F 96365, **177**, 1141
  - role in atrial natriuretic factor protective effect on cells damaged by oxygen radicals, **174**, 549
  - sensitive nonselective cation channel, detection in colonic tumor cells (human), **176**, 1196
  - transmembrane gradient, role in catalytic activity of adenylate cyclase reconstituted into liposomes (bovine brain), **175**, 366
  - transport in hepatic mitochondria, effect of amylrhodamine (rat), **175**, 1010
- Calcium carbonate
  - biomineralized, crystal growth, phase transition observation (*Cristaria plicata*), **176**, 654
- Calcium channels
  - antagonists, attenuation of daunorubicin-augmented microsomal lipid peroxidation and oxygen consumption (rat), **179**, 1101
  - ω-conotoxin-sensitive molecules, monoclonal antibodies immunoprecipitating, recognition of 28- and 36-kDa proteins in brain (bovine, chicken), **181**, 59
- Calcium crimson
  - binding to calcium, analysis, **180**, 209
- Calcium currents
  - bradykinin-evoked oscillation in *ras*-transformed fibroblasts (mouse), **178**, 713
- Calcium green
  - binding to calcium, analysis, **180**, 209
- Calcium orange
  - binding to calcium, analysis, **180**, 209
- Calcium pump, *see* ATPase, Ca^{2+}
- Calgizzarin
  - calcium-binding, cDNA clone, isolation and sequencing (rabbit lung), **181**, 644
- Calmodulin
  - activation, role in carbachol enhancement of forskolin-stimulated cAMP accumulation in neuroblastoma SH-SY5Y cells (human), **178**, 116
  - association with nuclei isolated from rat hepatocytes, **181**, 1548
  - binding protein, high-molecular-weight, tissue distribution (bovine), **181**, 493
  - calcium-free, digestion by HIV-1 protease, **178**, 892
  - role in collagenase and proteoglycanase activity regulation in chondrocytes from osteoarthritic cartilage (human), **174**, 1204
- Calorimetry
  - differential scanning, in study of actin stabilization by phalloidin, **181**, 542
- Calpastatin
  - erythrocyte levels, decrease in spontaneously hypertensive rats: relationship to hypertension, **175**, 486
- Calphostin C
  - light-dependent inhibition of protein kinase C, **176**, 288
- Calponin
  - inhibition of heavy meromyosin actin-activated ATPase, mechanism (chicken gizzard), **176**, 1487
- Calreticulin
  - mammalian, related 60-kDa calcium-binding protein, expression in frog brain, **175**, 444
  - same isoform expression in fast- and slow-twitch skeletal muscles (rabbit), **177**, 979
- Calsequestrin
  - cerebellar, purification and characterization (chicken), **181**, 28
  - laminin receptor role, analysis (chicken muscle), **174**, 1208
- *Candida albicans*
  - morphogenesis, association with overexpression of actin gene, **179**, 423
  - serotype A strains grown in yeast extract-enriched Sabouraud liquid medium at pH 2.0, elaboration of mannans without β-1,2 linkage and phosphate group, **175**, 1003
- Cannabinoid receptors
  - detection by photoaffinity labeling (mouse), **176**, 492
- Capillaries
  - renal glomerular, in low-sodium rats, angiotensin II-hypersensitive contraction and ANF refractoriness, role of glibenclamide-sensitive K^+ channels, **181**, 871
- Carbachol
  - enhancement of forskolin-stimulated cAMP accumulation by calmodulin activation in neuroblastoma SH-SY5Y cells (human), **178**, 116
  - and epidermal growth factor, comparative effects on phosphoinositide synthesis and breakdown in pancreatic acinar cells (rat), **178**, 780
  - and glucose, synergistic stimulation of phosphatidic acid accumulation in pancreatic islets (rat), **180**, 960
  - induced catecholamine secretion in cultured bovine adrenal medullary cells, inhibition by okadaic acid, **174**, 77

Carbohydrate analysis
  human von Willebrand factor: application of horseradish peroxidase-conjugated lectins, **178**, 1253
Carbohydrates
  diminished supply after TCDD treatment, contribution to TCDD lethality (chicken embryo), **174**, 1267
  in monocyte chemotactic protein-1, structural characterization (human), **178**, 1400
  role in plasma thiostatin: destruction of cysteine proteinase inhibitor activity by deglycosylation (rat), **179**, 927
Carbon-centered radicals
  decrease in skeletal muscle of vitamin E-supplemented rats, **179**, 859
Carbonic anhydrase II
  structural properties at pH 9.5, X-ray crystallographic study (human), **181**, 579
Carbon monoxide
  successive exposures, effects on delayed neuronal death under normal body temperature (mouse), **179**, 836
Carbon tetrachloride
  post-translational reduction of cytochrome P450IIE, **179**, 449
Carbonyl reductase
  role in tetrahydrobiopterin biosynthesis (human), **175**, 738
Carboplatin
  interaction with thiotransferase *in vitro*, **180**, 735
Carboxyatractyloside
  sensitive and -insensitive ADP-binding sites of nonspecific mitochondrial inner membrane pores, cyclosporin sensitivity, modulation (rat liver), **180**, 33
6-Carboxy-eosin
  in fluorescent monitoring of conformational transitions of detergent-solubilized Na^+,K^+-ATPase, **174**, 63
Carboxyl groups
  in position 4 of deltorphins, role in deltorphin high delta receptor affinity and analgesic activity (rat), **180**, 1290
N-Carboxymethylchitosan-*N,O*-sulfate
  antiviral activity against human immunodeficiency virus type 1, **174**, 489
Carboxypeptidase A
  inhibitor, molecular dynamics
    analysis of Pro-36-Gly mutant (potato), **176**, 627
    fold stability and fluctuations (potato), **176**, 616
  prepro-, cDNA cloning and sequencing (bovine pancreas), **175**, 110
Cardiomyocytes
  endothelin-1-induced protein synthesis *in vitro*, inhibition by antisense oligonucleotide against early growth response gene-1 (rat), **181**, 22
  levels of mRNA encoding sarcoplasmic reticulum Ca^{2+}-ATPase, diabetes-induced decrease (rat), **178**, 906
  synthesis and secretion of atrial natriuretic peptide, stimulation by ouabain and digoxin (rat), **176**, 875
Cardiomyopathy
  idiopathic, mtDNA from patients, comparison with Parkinson's disease and mitochondrial encephalomyopathy patients, **177**, 518
  Syrian hamster strain with, myocytolysis, pathological role of vitamin E deficiency, **181**, 145
Carnitine
  free and total levels in plasma, analytical method (human), **176**, 1617
  systemic deficiency, associated juvenile visceral steatosis, analysis in C3H-H-2° strain (mouse), **174**, 1090
Carnitine palmitoyltransferase
  activity and sensitivity to malonyl-CoA inhibition in peritoneal macrophages, effects of cholesterol loading (mouse), **177**, 1121
  mitochondrial, proteolysis by nagarse and trypsin, inhibition by malonyl-CoA (rat liver), **178**, 600
Cartilage
  articular, plasminogen activator inhibitor-1 production, inhibition by interleukin-1 (human), **174**, 251
  growth plate, tibial dyschondroplastic, nonreducible crosslink formation in, analysis (chicken), **179**, 1582
  preosseus, chondrocytes, energy state assessment by ^{31}P NMR (pig), **180**, 216
  proteoglycan core protein, synthesizing cell populations in early limb bud, identification (chicken), **174**, 688
Casein kinase I
  purification and characterization (bovine sperm), **179**, 592
Casein kinase II
  physiological function *in vivo*, requirement of phosphotransferase (*Drosophila melanogaster*), **181**, 524
  polyamine binding activity, analysis, **180**, 945
  and polyamines, interaction in response of adrenocortical cells to ACTH (bovine), **180**, 623
  stimulation by insulin (3T3-L1 cells), **177**, 1019
Catalase
  evaluation of amitrole as substrate (bovine liver), **180**, 585
Catecholamines
  carbachol-induced secretion in cultured bovine adrenal medullary cells, inhibition by okadaic acid, **174**, 77
Catecholine
  inhibition and irreversible inactivation of bovine choline acetyltransferase, **175**, 407
Catechol-*O*-methyltransferase
  purification from human placenta and partial sequencing: comparison with rat hepatic enzyme, **174**, 995
Catechol oxidase
  detection and quantification in crayfish and insect hemolymph, **180**, 748
Catenating enzyme
  ATP-independent, isolation and characterization (*Leishmania donovani*), **180**, 279
Cathepsin B
  and cathepsin L, activities in isolated osteoclasts (chicken, rat), **179**, 63
  selective inhibition by Z-Phe–AlaCH$_2$F, suppression of collagen digestion by fibroblasts and osteoclasts (rabbit calvariae), **178**, 178
Cathepsin D
  encoding gene, identification of estrogen-responsive sequences in 5′ proximal flanking region (MCF-7 cells), **174**, 816
  hepatic, cDNA isolation and sequencing and structure of mature enzyme forms (rat), **179**, 190
  isozymes with different specificities, occurrence in skeletal muscle (macaque), **176**, 798

lysosomal targeting, linked region, analysis of homologous area in β-hexosaminidase B, **179**, 477
  synthesis and processing in cultured hepatocytes, inhibitory effects of bafilomycin A_1 (rat), **178**, 369
Cathepsin E
  autocatalytic formation from procathepsin E: structural comparison of precursor and activated forms (human stomach), **175**, 152
Cathepsin H
  synthesis and processing in cultured hepatocytes, inhibitory effects of bafilomycin A_1 (rat), **178**, 369
Cathepsin L
  and cathepsin B, activities in isolated osteoclasts (chicken, rat), **179**, 63
  selective inhibition by Z-Phe–AlaCH_2F, suppression of collagen digestion by fibroblasts and osteoclasts (rabbit calvariae), **178**, 178
Cell adhesion
  B16 melanoma cells to fibronectin or vitronectin, effects of cyclic RGD peptides, **177**, 74
  cancer cells to vascular endothelium, mediation by sialyl Lewis a antigen (human), **179**, 713
  hepatocytes to galactoside surfaces, associated redistribution of coated pits and asialoglycoprotein receptors to substratum (rat), **180**, 1304
  platelets to leukocytes via GMP-140/PADGEM protein, enhancement by interleukin-1β and interferon-γ (human), **179**, 756
Cell adhesion molecules
  CD11a and ICAM-1, role in vascular endothelial cell injury by activated neutrophils (bovine, human), **177**, 664
  CD44, detection in reticulocyte cDNA library (human), **178**, 1127
  LECAM-1, role in CD18-independent adhesion of neutrophils to endothelium (human), **174**, 236
  vascular, VCAM1, expression and functional characterization of soluble form (human), **178**, 1498
Cell cultures
  adrenal capillary endothelial cells, properties (human), **174**, 903
  breast cancer cells on extracellular matrix or in two-compartment chambers, transferrin secretion, stimulation by cAMP (human), **177**, 1041
  Candida albicans serotype A strains grown in yeast extract-enriched Sabouraud liquid medium at pH 2.0, elaboration of mannans without β-1,2 linkage and phosphate group, **175**, 1003
  osteoblasts, stage, effect on expression of helix–loop–helix DNA-binding protein negative regulator Id (mouse), **180**, 1194
  trophic conditions, differential regulation of phosphorylating and non-phosphorylating forms of $NADP^+$-dependent glyceraldehyde-3-phosphate dehydrogenase (*Chlorella fusca*), **181**, 1077
Cell cycle
  Ehrlich ascites cells, effect on eEF-2-specific Ca^{2+}- and calmodulin-dependent protein kinase III: increased activity during S-phase, **180**, 1372
  neuroblastoma cells, arrest at G_1 phase, induction by Δ^{12}-prostaglandin J_2, comparison with heat shock effects (human), **179**, 1662
  Raji and WISH cells, associated mitotin mRNA expression at constant levels, **177**, 395
Cell death
  neuronal, through internucleosomal DNA cleavage, triggering by glutamate (rat), **179**, 39
  relationship to cell proliferation: sulfated glycoprotein 2 and ornithine decarboxylase mRNA accumulation patterns in phytohemagglutinin-stimulated lymphocytes (human), **180**, 59
Cell density
  effect on growth hormone receptor induction by dexamethasone in cultured hepatocytes (rat), **174**, 928
  regulation of c-*myc* gene expression in hepatocytes *in vitro* (rat), **178**, 480
Cell fusion
  myoblasts in culture, inhibition by okadaic acid (chicken embryo), **176**, 1044
Cell lineages
  related expression of MIPP gene, analysis (mouse), **177**, 1062
Cell lines, *see also specific cell types*
  AA-2 and MT-2, HIV-1 IIIB replication in, inhibition by ligands of poly(ADP-ribose) polymerase, **180**, 504
  ATL-2, conditioned medium, isolation of neu protein-specific activating factor and characterization (human), **179**, 1536
  CHO (Chinese hamster ovary), *see* CHO cells
  COS (African green monkey kidney)
    expression of
      guanylate cyclase-coupled heat stable enterotoxin receptor cDNA isolated from human colonic cell line, **179**, 1455
      L-gulono-γ-lactone oxidase, **177**, 659
      human GM_2 activator protein cDNA, **177**, 1217
    production of mature vasoactive endothelin-1 after expression of human preproendothelin-1 cDNA, **175**, 697
  human, HIV-1-induced syncytium formation and cytopathology, inhibition by complestatin, **179**, 243
  mammalian
    efficient transfection with liposomes containing cationic cholesterol derivative, **179**, 280
    normal and transformed, expression of high-molecular-weight type V transforming growth factor β receptors, **179**, 378
  murine, detection of guanidine group-specific ADP-ribosyltransferase, **176**, 301
  R2 (murine pre-B cell), v-Ha-*ras*-expressing, tumorigenesis, selection for c-*myc* activation, **178**, 1343
  Sf (*Spodoptera frugiperda*)
    baculovirus-mediated expression of
      biologically active ovine trophoblastic interferon, **181**, 443
      human thyroid hormone β1 receptor, **175**, 285
      rabbit hepatic cytochrome P450F1, **175**, 394
      α1 subunit of AMPA-selective murine glutamate receptor channel, **181**, 756

    heterologous expression of active manganese peroxidase with baculovirus expression system, **179**, 897
    infected with recombinant baculovirus, precursor synthesis of soluble human insulin receptor ectodomain, **177**, 764
Cell migration
  endothelial, microvascular, effect of hepatocyte growth factor *in vitro* (human), **179**, 1042
Cell motility
  MDCK cells, effects of hepatocyte growth factor with deletion of kringle domains or N-terminal hairpin structure, **181**, 691
  osteoclasts, calcitonin-induced inhibition, selective antagonism by human calcitonin gene-related peptide-(Val^8Phe^{37}) (rat), **179**, 134
Cell proliferation
  aortic smooth muscle cells, inhibition by clearance receptor-binding atrial natriuretic peptides (rat aorta), **179**, 1606
  Balb/c 3T3 fibroblasts expressing human estrogen receptor, effect of estradiol, **176**, 1473
  endothelial, microvascular, effect of hepatocyte growth factor *in vitro* (human), **179**, 1042
  HepG2 cells, effects of hepatocyte growth factor with deletion of kringle domains or N-terminal hairpin structure, **181**, 691
  HT29 cells overproducing protein kinase C, modulation by hexamethylene bisacetamide, **181**, 809
  MC3T3-E1 osteoblasts
    monocyte-mediated effects of elevated extracellular calcium levels, **181**, 1425
    in presence of human monocytes, effect of estradiol-17β, **178**, 866
  melanocytes, stimulation by hepatocyte growth factor (human), **176**, 45
  melanoma cells, effects of histamine H2 receptor antagonists (human, mouse), **177**, 545
  mitogen-induced, lymphocytes, associated induction of DNA polymerase β (human), **181**, 623
  osteoblasts, regulation by parathyroid hormone, linkage to cAMP-dependent protein kinase activation, **177**, 365
  RC-3 hepatoma cells, inhibitory effects of recombinant tumor necrosis factor α, prevention by dexamethasone (rat), **181**, 1524
  relationship to cell death: sulfated glycoprotein 2 and ornithine decarboxylase mRNA accumulation patterns in phytohemagglutinin-stimulated lymphocytes (human), **180**, 59
  role of
    Op18 phosphoprotein (human), **179**, 1649
    protein kinase C activation by phosphatidylinositol 4,5-bisphosphate, **175**, 852
  smooth muscle cells, stimulation by lactosylceramide (rabbit aorta), **181**, 554
  splenocytes, suppression by β-$endorphin_{1-31}$, *N*-acetyl-β-$endorphin_{1-31}$ antagonism (mouse), **175**, 936
  spontaneous, splenic lymphocytes, inhibition by thyrotropin-releasing hormone (mouse), **181**, 562
Central nervous system
  dysgenesis, in trisomy 16 fetuses, relationship to increased neuronal production of class I MHC $H\text{-}2K^k$ mRNA and protein (mouse), **179**, 102
  tumor cell lines, RAG-2 gene expression (mouse), **181**, 151
Cerebellum
  calsequestrin, purification and characterization (chicken), **181**, 28
  paraneoplastic degeneration, identification of antibody to zinc finger protein in affected patient, **178**, 198
Cerebroside-sulfatase
  binding and uptake in NIH-3T3 cells, effect of insulin-like growth factor II overexpression (mouse), **179**, 108
Ceruloplasmin
  stimulation of thymidine incorporation by CCL-39 lung fibroblasts in absence of serum or growth factors (Chinese hamster), **180**, 790
Cetrimonium bromide
  selective dissociation of fibroblast intermediate filament, **175**, 768
Cetyltrimethylammonium bromide, *see* Cetrimonium bromide
CGP 42112A
  radioiodinated, as selective high-affinity ligand for characterization of angiotensin II receptors (human, rat), **181**, 1365
Charybdotoxin
  containing cationic clusters within α-helical structure, activation of GTP-binding proteins (scorpion venom), **178**, 400
Chelation
  calcium, induction of glutathione efflux from tumor cells, prevention by ruthenium red and neomycin, **176**, 276
Chemiluminescence
  luminol-enhanced
    increase in thrombospondin-exposed monocytes upon receptor triggering (human), **177**, 1087
    in monitoring oxygen radical production in isolated perfused liver during ischemia–reperfusion (rat), **174**, 217
Chemoattractants
  monocyte, JE, encoding gene, transforming growth factor β-induced expression in osteoblastic cells MC3T3-E1 (mouse), **180**, 1130
Chemotaxis
  MC3T3-E1 cells, enhancement by platelet-derived growth factor B chain homodimer, **175**, 745
Chief cells
  gastric, cholecystokinin receptors, characterization (guinea pig), **174**, 1055
Chitin synthetase 1
  function in yeast cells, role of proteinase B, **174**, 204
Chlamydia spp.
  binding to phosphatidylethanolamine in HeLa cells and to asialo-GM_1 and -GM_2, **175**, 1082
Chlamydomonas reinhardtii
  photobehavioral responses, essential role of retinal isomerization at 13-ene, **178**, 1273
Chloramphenicol acetyltransferase
  –HIV-1 proteinase fusion protein, autocleaving, bacterial expression: purification of 99-residue proteinase, **175**, 784

Chloride
  concentration, effect on hemoglobin function (water buffalo), **177**, 956
  conductance in pancreatic zymogen granules, cholecystokinin-stimulated, effects of epidermal growth factor and calcium omission (rat), **181**, 827
  endogenous, conductance in oocytes, regulation: role of Ca^{2+} and cAMP (*Xenopus laevis*), **180**, 1377
Chloride channels
  large-conductance, activation by bombesin in Swiss 3T3 fibroblasts, **177**, 292
  sarcoplasmic reticulum, purification of 100-kDa protein (rabbit muscle), **176**, 38
Chloride currents
  Ca^{2+}-dependent, induction in oocytes by inositol tetrakisphosphates as second messengers (*Xenopus laevis*), **179**, 641
4-Chlorobenzoate dehalogenase
  dehalogenation reaction, requirement of ATP and CoA (*Pseudomonas* sp.), **176**, 1106
Chlorolignin
  high-molecular-weight, degradation by *Phanerochaete chrysosporium* manganese peroxidase, **178**, 1092
CHO cells
  biological activity of human interleukin-5, role of C-terminal amino acid sequence, **178**, 514
  human recombinant IGFBP-3 expressed in, purification and characterization, **178**, 625
  surface imaging by scanning tunneling microscopy, **177**, 636
  transfected with m_1-muscarinic receptor gene, effects of atropine: role of G proteins, **177**, 784
  type K1, transfected with human thyrotropin receptor cDNA, bioactivity of Graves' disease IgG, comparison with reference thyroid bioassay, **179**, 1543
Cholecystokinin
  octapeptide, induced inositol 1,4,5-trisphosphate production and $[Ca^{2+}]_i$ increase in pancreatic acinar cells, inhibition by epidermal growth factor (rat), **180**, 900
  stimulated Cl^- conductance in pancreatic zymogen granules, effects of epidermal growth factor and calcium omission (rat), **181**, 827
  sulfation by tyrosyl protein sulfotransferase, evidence for ordered reaction mechanism (rat brain), **181**, 989
Cholecystokinin receptors
  on gastric chief cell membranes, characterization (guinea pig), **174**, 1055
Cholera toxin
  B subunit, enhancement of epidermal growth factor- and insulin-induced DNA synthesis in hepatocytes (rat), **174**, 372
  effect on erythrocyte Ca-ATPase (human), **181**, 208
  mono(ADP-ribosyl)ation of poly(ADP-ribose)polymerase, **181**, 1412
Cholesterol
  high-density lipoprotein, as mechanistic probe for side-chain cleavage reaction, **179**, 161
  loading of macrophages, effects on carnitine palmitoyltransferase activity and sensitivity to malonyl-CoA inhibition (mouse), **177**, 1121
  lowering agents lovastatin, simvastatin, and pravastatin, tissue selectivity *in vivo* (rat), **158**, 667; *erratum*, **174**, 1053
  moiety of low-density lipoprotein, oxidation in presence of endothelial cells or Cu^{2+}: identification of major products, **176**, 431
  normal synthesis, role of peroxisomes (human fibroblasts), **181**, 537
  side-chain cleavage in reconstituted enzyme system, stimulation by endozepine, **180**, 609
Cholesterol 7-hydroperoxides
  7α- and 7β-, identification as aging markers (rat skin), **178**, 242
Cholesterol sulfate
  characteristic expression in endometrium during implantation (rabbit), **178**, 145
Choline acetyltransferase
  inhibition and irreversible inactivation by redox reactive reagents (bovine), **175**, 407
Choline-phosphate cytidylyltransferase
  translocation in HL-60 cells, modulation by oleic acid and antitumoral alkylphospholipid, **176**, 157
Cholinergic receptors
  in snakes, molecular dissection: avoidance of effects of own toxins (cobra), **179**, 648
Chondrocytes
  articular, transforming growth factor β mRNA, detection by polymerase chain reaction (human), **180**, 602
  energy state in preosseus cartilage, ^{31}P NMR assessment (pig), **180**, 216
  from osteoarthritic cartilage, calmodulin-dependent collagenase and proteoglycanase activities (human), **174**, 1204
  plasminogen activator inhibitor-1 production, inhibition by interleukin-1 (human), **174**, 251
Chondromodulin I
  purification and molecular cloning (fetal bovine cartilage), **175**, 971
Chorionic villous cells
  secretion of human chorionic gonadotropin, enhancement by human macrophage colony-stimulating factor, **178**, 1099
Chromaffin cells
  adrenal
    adrenaline- and noradrenaline-containing subpopulations, presence of muscarinic receptors (bovine), **177**, 913
    nicotinic receptor-activated inward current, inhibition by somatostatin (guinea pig), **174**, 750
Chromatin
  conformation, effect on patterns of nuclear protein phosphorylation in HL-60 cells (human), **180**, 329
Chromatography, *see also specific techniques*
  RNA polymerase sigma-70 holoenzyme separation from core enzyme on heparin–Sepharose (*Escherichia coli*), **179**, 1107
Chromatosomes
  neutron scattering studies (chicken erythrocytes), **179**, 810
Chromophores
  P460, at hydroxylamine oxidoreductase active site, Soret

- resonance Raman spectroscopic evidence for heme-like structure (*Nitrosomonas europaea*), **174**, 358

Chromosomes
- 2, localization of insulin-like growth factor-binding protein IGFBP-2 gene (human), **176**, 1250
- 3, localization of tracheo-bronchial mucin gene (human), **175**, 414
- 4, localization of endothelin ETA receptor (human), **181**, 184
- 5
  - with familial adenomatous polyposis gene, tumor-suppressive activity (human), **174**, 298
  - localization of α-1,3-mannosyl-glycoprotein β-1,2-*N*-acetylglucosaminyltransferase gene (human), **176**, 608
- 7, Zn-α_2-glycoprotein gene assignment (human), **177**, 696
- 9p22–pter, mapping of human CAS2 gene homologous to murine *b* locus, **178**, 227
- 11, p15 region, assignment of adult skeletal muscle gene (human), **180**, 1241
- 20, localization of immunophilin FKBP-12 gene (human), **179**, 1427
- assignment of S-100 protein α- and β-subunit genes (human), **175**, 185; *erratum*, **177**, 894
- electrophoretic separation in polyacrylamide solutions using constant field (*Saccharomyces pombe*), **179**, 482
- mapping of calcineurin catalytic subunit genes (human), **181**, 252
- polytene, mapping of glutathione transferase subunit 1 gene to 87B (fruit fly), **178**, 1205
- yeast artificial, *see* Yeast artificial chromosomes

Chymotrypsin
- inactivation by human mucus proteinase inhibitor: localization of inhibitory activity in carboxy-terminal domain (bovine), **179**, 1587

α-Chymotrypsin
- activity in reverse micelles, substrate effects, **178**, 1105
- inactivation by halo enol lactones: burst kinetics and enantioselectivity, **178**, 1335

CI-972
- inhibition of human MOLT-4 lymphoblasts, **178**, 1351

Cimetidine
- effects on melanogenesis and proliferation in cultured melanoma cells (human, mouse), **177**, 545

Circadian rhythm
- tyrosine aminotransferase expression, age effects (rat), **175**, 104

Circular dichroism
- in analysis of role of internucleotide phosphate linkage on base stacking in 3′–5′ and 2′–5′ RNA: RNA hexamer AACCUU, **180**, 1251

Cisplatin
- effect on N^3-methyladenine-DNA-glycosylase and O^6-methylguanine-DNA-methyltransferase mRNA levels in hepatoma cells (rat), **176**, 1086
- induction of small heat shock protein hsp25 and thermotolerance in Ehrlich ascites tumor cells, **180**, 243
- interaction with thiotransferase *in vitro*, **180**, 735
- treatment of human and phage DNA *in vitro*, degree, correlation with microfluorometric measurements of DNA size, **179**, 1344

Citrate synthase
- filament-forming protein-associated activity, demonstration (*Tetrahymena thermophila*), **174**, 1028

L-Citrulline
- direct formation from arginine in jejunal enterocytes, stimulation by D-glucose (pig), **177**, 1171

Clonidine
- inhibition of pancreatic beta cell replication and insulin secretion, mediation by pertussis toxin-sensitive G protein regulating islet cAMP content (rat), **180**, 152

Cloning
- α_1-acid glycoprotein cDNA (rabbit), **178**, 507
- adducin 63 cDNA (rat), **177**, 939
- α_{1A} adrenergic receptor cDNA (human), **179**, 1485
- angiotensin II receptor cDNA (rat), **177**, 299
- arylamine *N*-acetyltransferase genes (human liver), **177**, 1252
- azurocidin cDNA (human neutrophils), **177**, 688
- 2B7 cDNA (rat), **177**, 867
- calcium-binding polypeptide cDNA similar to calcineurin β-subunit (rat testis), **180**, 1476
- calgizzarin cDNA (rabbit lung), **181**, 644
- cAMP-dependent protein kinase regulatory subunit RIβ cDNA (human), **176**, 166
- cathepsin D cDNA (rat liver), **179**, 190
- cDNA expressing functional DNA glycosylase excising 3-methyladenine and 7-methylguanine (human), **176**, 1170
- chondromodulin I cDNA (fetal bovine cartilage), **175**, 971
- class theta glutathione *S*-transferase Yrs subunit cDNA (rat liver), **181**, 1294
- common precursor cDNA for putative hemorrhagic protein and rhodostomin (snake venom), **181**, 585
- cytochrome aa_3 gene (*Halobacterium halobium*), **181**, 316
- elongation factor 1β cDNA (human), **177**, 312
- endothelin ET_A receptor cDNA (human placenta), **180**, 1265; **181**, 184
- endothelin ET_B receptor cDNA, non-isopeptide-selective
  - in human liver, **177**, 34
  - in human placenta, **178**, 248, 656
- epidermal cell differentiation inhibitor gene (*Staphylococcus aureus*), **174**, 459
- exon 5-deleted mRNA encoding functional interleukin-2 receptor α-subunit (human), **180**, 1390
- fibroblast-derived tumor cytotoxic factor/hepatocyte growth factor cDNA (human), **180**, 1151
- fibroblast growth factor receptor cDNA (murine SC-3 breast cancer cells), **176**, 31
- follicle-stimulating hormone receptor cDNA (human), **175**, 1125
- glutamic acid decarboxylase cDNA (human brain, pancreatic islets), **176**, 1239
- glutathione synthetase large subunit gene (*Schizosaccharomyces pombe*), **181**, 430
- GM_2 activator protein cDNA (human), **177**, 1217
- H^+-ATP synthase
  - human coupling factor 6 of import precursor cDNA in mitochondria, **178**, 793

  subunit b import precursor cDNA (human), **178**, 1014
  histamine H_2 receptor gene
    in human, **178**, 1386
    in rat, **179**, 1470
  H^+,K^+-ATPase β subunit cDNA (human gastric mucosa), **180**, 39
  H-protein cDNA (human liver), **176**, 711
  human xeroderma pigmentosum group A complementing gene homologs (chicken, frog, fruit fly), **181**, 1231
  infectious HIV-1 mn strain, **179**, 1377
  inositol 1,4,5-trisphosphate 3-kinase cDNA (human brain), **174**, 529
  insulin-like growth factor-binding protein cDNA
    bIGFBP-3 (bovine), **177**, 1025
    in human osteosarcoma, **176**, 219
  interferon-γ genomic DNA by PCR-based exon amplification for expression in *Escherichia coli* (pig), **180**, 1408
  leukotriene A_4 hydrolase cDNA (mouse), **176**, 1516
  library-independent, genomic fragments adjacent to vector integration sites: isolation of EB4-PSV gene from *Dictyostelium* gene disruption transformant, **181**, 884
  lignin peroxidase gene from white-rot fungus *Trametes versicolor*, **179**, 428
  lipopolysaccharide-binding protein CAP18 cDNA (rabbit), **179**, 170
  mammalian calcineurin B homolog cDNA in *Saccharomyces cerevisiae*, **180**, 1159
  O^6-methylguanine-DNA-methyltransferase cDNA (rat hepatoma cells), **177**, 597
  monocyte chemoattractant protein-1 cDNA (rat), **174**, 504
  muscle-type tropomyosin cDNA (human epithelial cells), **177**, 1068
  phosphofructokinase 1 gene (*Thermus thermophilus*), **176**, 1313
  pregnancy-specific β_1-glycoprotein type II cDNA (human), **176**, 1532
  preprocarboxypeptidase A cDNA (bovine pancreas), **175**, 110
  preproendothelin-1 cDNA (rat), **175**, 44
  ras p21-like G protein cDNA (rat liver), **177**, 1224
  retinoic acid-induced heparin-binding protein cDNA (chicken), **175**, 617
  rhodanese (human), **180**, 887
  ribophorin II cDNA (rat), **176**, 1482
  sepiapterin reductase cDNA (human), **179**, 183
  serotonin 5-HT2 and 5-HT1C receptor cDNAs (human), **181**, 1469
  serum amyloid A gene (rabbit), **180**, 1258
  serum amyloid A protein cDNA (rabbit liver), **178**, 68
  squamous cell carcinoma antigen cDNA (human), **181**, 51
  substance P receptor (human), **179**, 1232
  thromboxane A synthase cDNA (human platelets), **178**, 1479
  thromboxane synthase cDNA (human), **177**, 286
  thyroid peroxidase-specific human Fab fragment: expression of thyroid lymphocyte-derived Ig genes in bacteriophage λ library, **179**, 372
  tracheo-bronchial mucin cDNA (human), **175**, 414
  transglutaminase cDNA (human keratinocytes), **175**, 906
  trypsin gene (*Streptomyces griseus*), **181**, 707
  type II cAMP-dependent protein kinase regulatory subunit, RIIβ promoter region (mouse), **178**, 221
  type II phospholipase A_2 cDNA (human placenta), **178**, 1298
  tyrosine hydroxylase cDNA (murine brain), **176**, 1610
  vacuolar H^+-ATPase 16-kDa subunit cDNA (murine cerebellum), **176**, 1062
  zinc-finger genes related to *KROX-20* and *KROX-24* (guppy, zebrafish), **179**, 1220
  Zn-α_2-glycoprotein cDNA (human prostate), **177**, 696
Clostridium thermoaceticum
  utilization of methoxylated aromatic compounds: expression and specificity of CO-dependent O-demethylating activity, **180**, 416
Clusterin
  enhancement of insoluble immune complex formation (human), **177**, 985
CMP-*N*-acetylneuraminate–β-galactoside α-2,3-sialyltransferase
  post-translational regulation by N-glycosylation (C6 glioma cells), **178**, 1437
CMP-sialic acid:lactosylceramide α2-3 sialyltransferase
  purification from liver: effects of protease inhibitors on enzyme activity (rat), **175**, 325
Cobalamin
  binding proteins, synthesis and secretion (opossum kidney cells), **179**, 543
Cobalt
  albumin fragmentation by sulfite in presence of, role of sulfate radicals, **176**, 1306
Coelomocytes
  stimulation by interleukin-1 (starfish), **180**, 579
Coenzyme A
  and ATP, requirement for dehalogenation reaction of *Pseudomonas* 4-chlorobenzoate dehalogenase, **176**, 1106
Coenzyme Q_{10}
  augmentation of T4/T8 lymphocyte ratios in normal subjects, relevance to patients with AIDS-related complex, **176**, 786
  protective effect on exercise-induced muscular injury (rat), **176**, 349
Colforsin
  induced synthesis of group II phospholipase A_2 and prostaglandin E_2 in mesangial cells, prevention by dexamethasone (rat), **180**, 46
  derivatives, inhibition of transepithelial vinblastine secretion mediated by P-glycoprotein (MDCK cells), **181**, 671
  stimulation of
    cAMP accumulation, carbachol enhancement by calmodulin activation in neuroblastoma SH-SY5Y cells (human), **178**, 116
    cerebral adenylate cyclase, melatonin-induced inhibition, blockage by pertussis toxin (chicken), **178**, 786
    group II phospholipase A_2 synthesis and secretion in mesangial cells (rat), **174**, 268
  and verapamil, sensitive K^+ current, detection in tracheal epithelial cells (human), **179**, 1155

Colipase
  porcine, monoclonal antibodies, antigen specificity, **177**, 726
Collagen
  digestion by fibroblasts and osteoclasts, suppression by Z-Phe–AlaCH_2F selection inhibition of cysteine proteinases (rabbit calvariae), **178**, 178
  gene expression, changes during matrix-induced bone formation (rat), **177**, 427
  induced calcium mobilization in platelets, inhibition by antiplatelet agent (human), **177**, 888
  nonreducible crosslinking in tibial dyschondroplastic growth plate cartilage (chicken), **179**, 1582
  precursor, *see* Procollagen
  synthesis in MC3T3-E1 osteoblastic cells, effects of bone morphogenetic proteins, **174**, 96
  type I
    α1 and α2 chains, and prolyl 4-hydroxylase α-subunit, encoding mRNAs in growing tendon fibroblasts, correlation of steady-state levels (chicken embryo), **174**, 169
    α1 and α2 genes, coordinately expressed promoters, conservation of binding sites for regulatory factors (mouse), **177**, 538
  type VII, gene expression in normal and transformed epidermal keratinocytes in culture, up-regulation by transforming growth factor β (human), **180**, 673
Collagenase
  calmodulin-dependent, activity in chondrocytes from osteoarthritic cartilage (human), **174**, 1204
  inhibition by sulfur-based substrate analogs (human fibroblasts, neutrophils), **176**, 173
  type IV, –gelatinase, 68–72-kDa and 92-kDa enzymes secreted by invasive human fibrosarcoma, comparative role in invasion, **181**, 1539
Colony-stimulating factor
  granulocyte–macrophage
    and 8-Cl-cAMP, cooperative effect on HL-60 cell differentiation, **177**, 1133
    stimulation of diacylglycerol generation in bone marrow-derived macrophages (mouse), **179**, 586
  macrophage
    enhancement of human chorionic gonadotropin secretion by chorionic villous cells and placental tPA30-1 cells, **178**, 1099
    induction of osteoclast formation *in vitro* (mouse), **177**, 526
  type 1, production by mesangial cells (mouse), **177**, 1194
Complement
  C3a
    differential effects on glucose output and flow during ortho- and retrograde liver perfusion (rat), **176**, 1218
    human recombinant, expression in *Escherichia coli*, **175**, 1131
  C3d, derived synthetic peptide, enhancement of *in vitro* phosphorylation of Raji cell 105-kDa protein (human), **175**, 823
  C4b, binding protein, α-chain gene organization (human), **174**, 222
  C5a, and neutrophil-activating peptide/IL-8, differential effects on PAF and leukotriene B_4 production by neutrophils (human), **176**, 972
  dependent phagocytosis of liposomes, suppression by GM_1 ganglioside and sulfatide, **176**, 866
Complementation groups
  E, xeroderma pigmentosum, demonstration of ultraviolet damage-specific DNA-binding protein (human), **175**, 1139
Complement receptors
  and Fc receptors, mediated phagocytosis, comparative effects on macrophage hydrogen peroxide production and phagocytic function (rat), **180**, 268
Complestatin
  inhibition of HIV-1-induced syncytium formation and cytopathology in cell lines (human), **179**, 243
Complex I, *see* NADH-CoQ oxidoreductase
Computed tomography
  single-photon emission, radioiodinated ligands for, binding to transfected cell membranes expressing single muscarinic receptor subtype (rat), **179**, 768
Computer applications
  analysis of 6-pyruvoyl tetrahydropterin stereostructure and quantum chemical properties, **176**, 52
Concanavalin A
  activation of lymphocytes, effects on tRNA (rat), **180**, 638
Conceptus
  derived tissues, detection of organogenesis-stage cytochrome P4501A1 by PCR (rat), **178**, 236
Connexin-43
  extracellular domains, linkage by intramolecular disulfide bonds: maintenance of connexon integrity by non-covalent bonds (rat), **178**, 1312
Connexons
  integrity, maintenance by non-covalent bonds: linkage of connexin-43 extracellular domains by intramolecular disulfide bonds (rat), **178**, 1312
ω-Conotoxin receptors
  monoclonal antibodies immunoprecipitating, recognition of 28- and 36-kDa proteins in brain (bovine, chicken), **181**, 59
Constipation
  morphine-induced, modulation by endogenous nitric oxide (mouse), **181**, 889
Contraction
  angiotensin II-hypersensitive, glomerular capillaries in low-sodium rats, role of glibenclamide-sensitive K^+ channels, **181**, 871
  aortic, endothelin-induced, irreversibility, relationship to binding of endothelin to receptor (rat), **179**, 1408
  –excitation, uncoupling during ischemia in blood-perfused heart (dog), **179**, 502
  smooth muscle
    rectosigmoid, sustained, in response to bombesin, role of heat shock protein hsp27 (rabbit), **181**, 1192
    tracheal, field stimulation-induced, and acetylcholine release, effects of L-N^G-nitro-arginine (guinea pig), **179**, 1017
    uterine, Ca^{2+}-independent, role of protein kinase C (rat), **179**, 487

Copper
  low-density lipoprotein oxidation in presence of, analysis, **176**, 431
Coprinus congregatus
  signal transduction: role of G proteins in blue light polymorphogenesis, **179**, 1225
Corpora allata
  allatostatin receptor proteins, photoaffinity labeling (*Diploptera punctata*), **181**, 736
Corticosterone
  lipoprotein-supported production in adrenal cells, inhibition by okadaic acid (rat), **179**, 726
Cortisone
  and thyroxine, modulation of intestinal lactase and sucrase mRNA levels and activities (suckling rat), **180**, 174
Cosmid libraries
  derived YAC clone in region of human mcf-2 gene, fidelity, **181**, 877
Coumarin
  inhibition of HIV-1 IIIB replication in AA-2 and MT-2 cell cultures, **180**, 504
  major metabolite *o*-hydroxyphenylacetaldehyde formed by gerbil, human, and rat hepatic microsomes, isolation, **179**, 197
Coupling factor 6
  H$^+$-ATP synthase in mitochondria, import precursor cDNA, molecular cloning (human), **178**, 793
Coxsackievirus
  3C protease, incorporation into β-galactosidase: expression of functional β-galactosidase in *Escherichia coli*, **177**, 243
CP-96,345
  and spantide II, comparative role in blockade of tachykinin-induced smooth muscle contractions (guinea pig, rabbit), **178**, 297
Creatine kinase
  isoenzyme CD-BB, comparative production in hybridomas and parental cells (mouse), **179**, 1529
p-Cresol
  formation from menthofuran, **177**, 440
Cromakalim
  activation of pre- and post-synaptic ATP-sensitive K$^+$ channels in substantia nigra (rat), **174**, 909
  effect on basilar artery smooth muscle cells, mediation by Ca^{2+}-activated K$^+$ channels (rat), **181**, 172
Crosslinking
  Fc receptors in human neutrophils and rat basophilic leukemia cells: tyrosine phosphorylation as common early signaling event, **177**, 192
  hemoglobin in T-state by bis(3,5-dibromosalicyl) fumarate, subsequent thermal stability, **174**, 518
  interstrand, hexadeoxynucleotide d(TACGTA) upon reaction with *trans*-diamminedichloroplatinum(II), **175**, 537
  nonreducible, collagen in tibial dyschondroplastic growth plate cartilage (chicken), **179**, 1582
  reversible, placental thyroid hormone nuclear receptor, induction by Zn^{2+}: effect on hormone binding (human), **175**, 250
  substrates to p66 subunit of heterodimeric HIV-1 reverse transcriptase, **174**, 785
  vitronectin in endothelial cell substratum (human), **174**, 465
Cross-reactivity
  immunological, between proton-pumping inorganic pyrophosphatases from *Rhodospirillum rubrum* and mung bean, **181**, 962
Crypt–villus axis
  small intestine, distribution of Na$^+$/glucose cotransporter SGLT1 protein and mRNA (rabbit), **181**, 1208
Crystal growth
  biomineralized calcium carbonate, phase transition observation (*Cristaria plicata*), **176**, 654
αB-Crystallin
  mRNA
    increment in brain of patient with infantile-type Alexander's disease, **179**, 1030
    in skeletal muscle, effects of mechanical tension and denervation (rat), **181**, 1323
Crystallins
  synchronous scan fluorescence spectroscopy (bovine), **176**, 1351; *erratum*, **177**, 1325
Crystallization
  recombinant interferon-γ (rabbit), **178**, 634
  transthyretin variants (human), **179**, 804
CTP:phosphocholine cytidylyltransferase, *see* Choline-phosphate cytidylyltransferase
C-type natriuretic peptide
  gene and precursor structures (human), **175**, 645
  immunoreactive
    characterization (human brain, heart), **179**, 535
    tissue distribution and characterization (pig), **175**, 759
  inhibition of vascular smooth muscle cell proliferation (rat), **177**, 927
  isolation and identification (chicken brain), **174**, 142
Cyanide
  and epoxides, β-hydroxynitrile formation from, catalysis by hydrogen-halide-lyase, **180**, 124
Cyanobacteria
  photosynthetic membrane surfaces within whole cells, platinum deposition: implications for hydrogen generation, **175**, 1029
Cyclic AMP
  activation of α-myosin heavy chain gene expression in cultured fetal cardiac myocytes (rat), **174**, 1196
  analog 8-Cl-cAMP, and granulocyte-macrophage colony-stimulating factor, cooperative effect on HL-60 cell differentiation, **177**, 1133
  arginine vasopressin-induced production in renal papillary collecting tubule cells, enhancement by high potassium (rat), **177**, 840
  and Ca^{2+}, role in regulation of endogenous chloride conductance in oocytes (*Xenopus laevis*), **180**, 1377
  chromatographic detection in axenic cultures of *Lemna paucicostata*, **178**, 1113
  forskolin-stimulated accumulation, carbachol enhancement by calmodulin activation in neuroblastoma SH-SY5Y cells (human), **178**, 116

  leukocyte levels, determination by competition binding assay (human), **178**, 980
  and lipopolysaccharide, synergistic induction of ornithine decarboxylase gene expression in macrophage-like cell line RAW264, **175**, 48
  pertussis toxin-sensitive G proteins regulating, mediation of α-adrenergic inhibition of pancreatic beta cell replication and insulin secretion (rat), **180**, 152
  production
    in L6 myocytes, stimulation by amylin via calcitonin gene-related peptide receptors (rat), **177**, 771
    PTH-stimulated, in UMR-106 cells, desensitization induced by phorbol ester, **176**, 764
  response elements
    binding to nuclear factors in NG108-15 cells, effects of chronic exposure to morphine or ethanol, **174**, 25
    binding protein CRE-BP1, phosphorylation by cAMP-dependent protein kinase and protein kinase C (human), **181**, 629
    and NF1-CTF site, in phospho*enol*pyruvate carboxykinase gene promoter, interaction with hepatocyte nucleoprotein (rat), **181**, 367
    serine dehydratase gene, identification (rat), **176**, 385
  stimulation of transferrin secretion by breast cancer cells in different culture conditions (human), **177**, 1041
Cyclic AMP phosphodiesterase
  calmodulin-dependent and -independent, differential regulation by fatty acids (quail oviduct), **177**, 324
Cyclic GMP
  neuronal, elevation following L-glutamate activation, role in neuronal injury (rat), **181**, 456
  role in
    atrial natriuretic factor protective effect on cells damaged by oxygen radicals, **174**, 549
    eclosion hormone-mediated signal transduction in metamorphoses (silkworm), **180**, 881
Cyclic GMP phosphodiesterase
  calmodulin-dependent, inhibition by peptide and non-peptide angiotensin receptor ligands (bovine brain), **179**, 85
  retinal
    β-subunit, identification of γ-subunit interaction sites (bovine), **178**, 474
    γ-subunit
      functional analysis with mutant synthetic peptides (bovine), **181**, 306
      identification of functional residues in inhibitory region (bovine), **181**, 1094
β-Cyclodextrins
  conformational space of α 1-4 glycosidic linkage, molecular dynamics simulation, **178**, 192
1,2-Cyclohexanedione
  modification of arginine at active site of *Aspergillus ficuum* phytase, role in enzyme inactivation, **178**, 45
Cycloheximide
  augmentation of protein thermostability (CHO cells), **177**, 575
  inhibition of protein synthesis, superinduction of TCDD-inducible aldehyde dehydrogenase expression (rat hepatoma cells), **180**, 953
8-Cyclopentyl-1,3-dipropylxanthine
  binding to A$_1$ adenosine receptors, effects of sulfhydryl reagents (porcine brain), **181**, 213
Cyclopeptides
  as suicide substrate, comparative inactivation of plasminogen activators and plasmin, **178**, 352
Cyclophellitol
  inactivation of *Agrobacter* and almond β-glucosidases, characterization, **177**, 532
Cyclophilin
  cyclosporin A affinity and catalytic efficiency, reduction by Trp^{121}-to-Ala^{121} mutation (human), **176**, 1142
6α,7α-Cyclopropane
  substituted androst-4-ene compounds, preparation and evaluation as competitive aromatase inhibitors, **177**, 401
Cyclosporin A
  cyclophilin affinity for, reduction by Trp^{121}-to-Ala^{121} mutation in cyclophilin (human), **176**, 1142
  sensitivity of nonspecific mitochondrial inner membrane pores, modulation by ADP at carboxyatractyloside-sensitive and -insensitive sites (rat liver), **180**, 33
  suppression of induction of interleukin-8/neutrophil-activating peptide-1 gene family members in T cells (human), **181**, 179
Cystatin
  family II, presence of two domains with proteinase inhibitory activities (human), **175**, 1070
Cysteine
  in class π glutathione *S*-transferase, role in enzyme activity (human), **181**, 748
  Cys^{12}, *S*-prenylation, effect on conformation of **a**-factor (yeast), **181**, 1125
  free, replacement, in thermostabilization of recombinant human and bovine CuZn superoxide dismutases, **181**, 474
  replacement of proximal histidine in myoglobin by site-directed mutagenesis: mutant characterization and catalytic activities (human), **180**, 138
  role in glutathione transferase P (7-7) activity, analysis by oligonucleotide site-directed mutagenesis (rat), **179**, 790
  single residue in α family glutathione *S*-transferase, functional role (chicken liver), **180**, 323
Cysteine proteinase inhibitors
  Z-Phe–AlaCH$_2$F, effects on collagen digestion by fibroblasts and osteoclasts (rabbit calvariae), **178**, 178
Cystic fibrosis
  epithelial cells from affected patients, increased expression of 14-kDa Ca^{2+}-binding protein CFA, **174**, 1281
  pancreatic adenocarcinoma cells from patient, high intracellular pH, decrease by retrovirus-mediated CFTR gene transfer, **180**, 342
Cystic fibrosis transmembrane conductance regulator
  development of high-affinity antibodies and localization in sweat gland (human), **181**, 36
  encoding gene, retrovirus-mediated transfer to pancreatic adenocarcinoma cells from cystic fibrosis patient, decrease of intracellular pH (human), **180**, 342

Cytochrome aa_3
- encoding gene, molecular cloning (*Halobacterium halobium*), **181**, 316

Cytochrome b
- mutations in Leber hereditary optic neuropathy (human), **181**, 1358

Cytochrome b_5
- mRNAs, hepatic and reticulocyte, isolation from single gene (human), **178**, 38

Cytochrome bc_1 complex
- mitochondrial, electron flow, effects of thyroid hormones (rat liver), **178**, 73

Cytochrome b_6-f complex
- inhibitory effects of dicyclohexylcarbodiimide (spinach), **179**, 507

Cytochrome c_3
- octahemic, and hydrogenase, from *Desulfovibrio desulfuricans*, electron exchange reaction between, kinetic studies, **179**, 605

Cytochrome-*c* oxidase
- induction after adriamycin-induced oxidative stress in liver of rats fed dietary olive oil, **181**, 375
- interaction with thioridazine: enzyme activity and drug binding studies (bovine heart), **179**, 1063
- purified, polyphasic reduction of oxygen to water (bovine, porcine heart), **176**, 150
- subunit genes, cloning: subunit II nucleotide and amino acid sequence (*Synechococcus vulcanus*), **181**, 437

Cytochrome-*c* peroxidase
- recombinant, proper folding without conformational annealing, **176**, 1469

Cytochrome oxidase, *see* Cytochrome-*c* oxidase

Cytochrome P450
- 1A1
  - induction in fetal liver by single dose of 3-methylcholanthrene (rat), **176**, 280
  - organogenesis-stage, mRNA detection in conceptive tissues by PCR (rat), **178**, 236
- 2B, induction by phenobarbital, effect of interleukin-6 (rat hepatocytes), **178**, 1049
- 2B1, phosphorylation and degradation in isolated hepatocytes, hormonal effects (rat), **174**, 37
- 2C9, expressed in COS cells, hydroxylation of tolbutamide and phenytoin (human liver), **175**, 1112; *erratum*, **180**, 1527
- 2C24, cDNA cloning and regulation (rat), **180**, 645
- 2E, post-translational reduction by substrate CCl_4, **179**, 449
- 2E1, phosphorylation and degradation in isolated hepatocytes, hormonal effects (rat), **174**, 37
- F1, baculovirus-mediated expression and characterization (rabbit liver), **175**, 394
- ethanol-inducible, acetaldehyde as substrate (rat), **179**, 689
- low-spin forms, quantitation by NADPH-dependent reduction of amaranch in hepatic microsomes (rat), **179**, 945
- mammalian and rainbow trout enzymes, comparison: structural similarity between human P450IIIA4 and trout P450 LMC5, **176**, 558
- polyaromatic hydrocarbon-inducible, induction by estradiol-17β (chicken liver), **175**, 928
- putative hepatic isozyme, induction by 2-amino-1-methyl-6-phenylimidazo[4,5-*b*]pyridine (rat), **174**, 797
- stereoselectivity, fluoro group-mediated reversal: 6-fluorobenzo(c)phenanthrene conversion to K-region oxide by hepatic microsomes from 3-methylcholanthrene-treated rats, **181**, 1516
- steroid hydroxylase, gene localization in *Hind*III fragment of genomic DNA (*Rhizopus nigricans*), **178**, 1078
- testosterone 6β-hydroxylase, gene structure (rat), **177**, 68
- vaccinia virus-expressed, metabolic activation of pneumotoxin 3-methylindole (human), **181**, 100

Cytochrome P450$_{11\beta}$
- and cytochrome P450$_{aldo}$, gene 5′-flanking regions, structural differences (rat), **180**, 1187

Cytochrome P450$_{aldo}$
- and cytochrome P450$_{11\beta}$, gene 5′-flanking regions, structural differences (rat), **180**, 1187

Cytochrome P450$_{scc}$
- and electron carriers, reconstituted system, side-chain cleavage of cholesterol, stimulation by endozepine, **180**, 609
- purification and properties (porcine testis), **176**, 1501
- tryptophan residues, nanosecond fluorescence, effect of substrate binding, **181**, 1493

Cytokeratins
- crosslinked polypeptides, demonstration in transplantable hepatoma cells (rat), **176**, 441
- retinoylation in normal epidermal keratinocytes (human), **180**, 393

Cytokines
- activated endothelial cells, expression of nitric oxide synthase isotype inhibited by arginine analogs (mouse), **178**, 823
- effects on vascular permeability factor mRNA levels in U937 cells (human), **180**, 572

Cytolipin H
- stimulation of smooth muscle cell proliferation (rabbit aorta), **181**, 554
- sulfated, activation of and binding to erythrocyte multicatalytic proteinase (human), **174**, 1133

Cytolysis
- myocytes in cardiomyopathic hamster strain, pathological role of vitamin E deficiency, **181**, 145

Cytopathology
- HIV-1-induced, in human cell lines, inhibition by complestatin, **179**, 243

Cytoprotection
- gastric, by intracisternal injection of interleukin-1β (rat), **174**, 1117

Cytotoxicity
- activated macrophages toward syngeneic islet cells, mediation by arginine-dependent nitric oxide generation (rat), **175**, 752
- bone marrow-derived macrophages against tumor cells, effects of macrophage interactions with bacteria, **177**, 821
- diphtheria toxin, role of amino terminus (human T cells), **180**, 545

  exotoxin A, role of C-terminal amino acid residues (*Pseudomonas aeruginosa*), **180**, 1498
  growth state-dependent, *N*-dodecylimidazole in cultured cells, relationship to multidrug resistance, **176**, 1377
  tiazofurin and arabinose and xylose analogs to K562 cells (human), **180**, 933
  tumor necrosis factor-induced, in L929 cells, relationship to TNF-induced interleukin-6 expression, **178**, 993

D

Dactinomycin
  identification as competitive neurokinin-2 receptor antagonist (*Streptomyces* spp.), **180**, 1342
Daunorubicin
  augmented microsomal lipid peroxidation and oxygen consumption, attenuation by calcium channel antagonists (rat), **179**, 1101
DDT
  binding polypeptides, designed, structure–function studies, **179**, 1212
Decyltetraoxyethylene
  in resolution of *Rhodocyclus gelatinosus* photoreceptor unit components by temperature-induced phase separation, **177**, 1107
Deet
  reversible inhibition of urea cycle and gluconeogenesis (rat), **179**, 1264
Deglycosylation
  hyosophorin during early embryogenesis, free glycan chain liberated by, identification (medaka fish), **180**, 1165
  plasma thiostatin, destruction of cysteine proteinase inhibitor activity: role of carbohydrate in plasma thiostatin (rat), **179**, 927
Degradation
  intermolecular, signal peptidase I *in vitro* (*Escherichia coli*), **181**, 650
Degranulation
  mast cell, role of granule proteoglycan processing (dog), **179**, 140
  peritoneal mast cells, lysophosphatidylserine-dependent, suppression by group II phospholipase A_2 inhibitors (rat), **181**, 714
Dehydroepiandrosterone, *see* Prasterone
Dehydrogenases
  long-chain, sequence comparisons, **177**, 218
Deltorphin I
  in analysis of ligand-binding domains of μ- and δ-opioid receptors and additional address subsite on δ receptor (rat brain), **179**, 1161
Deltorphin II
  [D-Ala^2]-, analogs with high affinity and selectivity for δ-opioid receptor: role of hydrophobic valine residues, **180**, 822
Deltorphins
  high delta receptor affinity and analgesic activity, role of carboxyl group in position 4 (rat), **180**, 1290
  tetrapeptide analogs, opioid receptor selectivity reversal, **178**, 110
Dementia
  Alzheimer-type, detection of inter-α-trypsin inhibitor active component in brain tissues of affected individuals, **174**, 1015
O-Demethylase
  related activity, CO-dependent, expression and specificity in *Clostridium thermoaceticum*: utilization of methoxylated aromatic compounds, **180**, 416
Denervation
  skeletal muscle, effect on αB-crystallin mRNA levels (rat), **181**, 1323
Deoxycytidine
  incorporation into DNA and phospholipid precursors in infant tonsillar lymphocytes, **174**, 680
Deoxycytidine kinase
  and thymidine kinases 1 and 2, comparative substrate specificities for antiviral and cytostatic nucleoside analogs (human spleen), **176**, 586
Deoxyfructosyl-lysine
  in glycohemoglobin, monoclonal antibodies to, production with purified human glycated hemoglobin free of hemoglobin A_{1c}, **176**, 207
2-Deoxyglucose
  uptake in pancreatic acini, effect of islet amyloid polypeptide in absence and presence of insulin (mouse), **180**, 1513
6-Deoxy D-myoinositol 1,4,5-trisphosphate
  and D-myoinositol 1,4,5-trisphosphate, comparative binding and Ca^{2+} release activity in parotid microsomes (rat), **175**, 894
Deoxyribonuclease I
  hypersensitive sites of fibronectin gene 5′ region, mapping (rat liver), **181**, 131
  lysosomal, purification from *Drosophila melanogaster*, **181**, 44
Dephosphorylation
  –phosphorylation, cyclic, rhodopsin in bovine retina, mediation by protein kinase FA, **178**, 1306
Depolarization
  synaptosomal membrane, and Ca^{2+} transients, simultaneous measurement (rat), **181**, 797
Depolymerization
  lignin by *Phanerochaete chrysosporium* manganese peroxidase *in vitro*, **176**, 269
Depression
  spreading, in amphibian retina, demonstration of associated heat production, **174**, 293
Dermenkephalin
  in analysis of ligand-binding domains of μ- and δ-opioid receptors and additional address subsite on δ receptor (rat brain), **179**, 1161
  conformational meaning of δ address, **173**, 521; *erratum*, **174**, 1053
Dermorphin
  bioactivity, topochemical analysis, **181**, 664
Desensitization
  platelets, in differentiation of multiple pathways of thrombin-induced activation (human), **181**, 636
  to prolonged bradykinin, demonstration in inositol phos-

phate response: $InsP_3$ and $InsP_4$ levels in neuronal cells (mouse), **181**, 997
Desulfovibrio desulfuricans
  proline synthesis, role of L-Δ^1-pyrroline-5-carboxylate reductase, **179**, 1088
Desulfovibrio gigas
  reconstituted electron chain from, sulfite reduction by hydrogen, calcium requirement, **180**, 238
Desulfovibrio vulgaris
  rubrerythrin, intrapeptide sequence homology: identification of potential ligands to di-iron site, **181**, 337
Detergents
  various, bacteriorhodopsin incubated with, spectroscopic analysis of monomers, **181**, 1301
Detoxification
  senecionine in tissues by flavin-containing monooxygenase (guinea pig), **178**, 546
Deuterium
  solvent isotope effects, in identification of slow step after peptide bond cleavage by porcine pepsin, **176**, 65
Deuterium oxide
  and H_2O, dihexadecylphosphatidylcholine dispersions in, comparative thermotropic transitions between interdigitated gel phase and ripple phase, **174**, 102
  protection against hydrostatic pressure damage in yeast, **174**, 1141
Development
  amoeba, associated [^{3}H]inositol incorporation into inositol polyphosphates (*Dictyostelium discoideum*), **181**, 191
  related changes in
   expression of angiotensin receptor subtypes (rat), **179**, 1361
   hepatic nuclear lamina organization (mouse), **179**, 1082
Dexamethasone
  effects on
   expression of helix–loop–helix DNA-binding protein negative regulator Id in early and confluent osteoblastic MC3T3E$_1$ cell line (mouse), **180**, 1194
   nucleotide pyrophosphatase in plasmacytoma cells (mouse), **175**, 637
  induced thymocyte death, associated cellular accumulation of sulfated glycoprotein-2 mRNA (rat), **175**, 810
  induction of growth hormone receptors in cultured hepatocytes, effect of cell density (rat), **174**, 928
  prevention of
   cytokine- and forskolin-induced synthesis of group II phospholipase A_2 and prostaglandin E_2 in mesangial cells (rat), **180**, 46
   growth inhibitory effects of recombinant tumor necrosis factor α in RC-3 hepatoma cells, **181**, 1524
  stimulation of
   hepatic ornithine decarboxylase, prevention by adrenergic blockade (rat), **174**, 915
   15-hydroxyprostaglandin dehydrogenase (NAD^+) synthesis and activity in erythroleukemia cells (human), **177**, 1258
  and TCDD, effects on thymocyte proliferation and number, comparison (mouse), **178**, 16
D-factor
  induction of myelomonocytic leukemia cell differentiation, associated phosphorylation of heat shock protein hsp27 (mouse), **176**, 979
DG-5128
  stimulation of insulin secretion by islet cells, mechanisms (rat), **176**, 1545
Diabetes
  associated elevation of protein-tyrosine-phosphatase levels in plasma membranes (human placenta, rat liver), **180**, 463
  associated retinopathy, role of vitamin B_6 deficiency (human), **179**, 615
  induced decrease in mRNA coding for sarcoplasmic reticulum Ca^{2+}-ATPase in cardiomyocytes (rat), **178**, 906
  induction by streptozocin, role of nitric oxide (mouse), **178**, 913
  non-insulin-dependent, adipocytes from affected patients, altered expression of naturally occurring insulin receptor variants, **181**, 1419
  and obesity, associated glucose transporter gene expression in liver and muscle, analysis (rat), **175**, 995
  spontaneous, effects on hepatic fatty acid metabolism (rat), **176**, 1157
  streptozotocin-induced, effect on glucose transporter gene expression in small intestine (rat), **181**, 1110
Diacylglycerol
  and arachidonic acid, synergistic activation of rat protein kinase C *in vitro* and *in vivo* (*Hermissenda* neurons), **179**, 1522
  dCDP-, incorporation of deoxycytidine in infant tonsillar lymphocytes, **174**, 680
  fecal excretion, and colonic mucosal uptake and metabolism (rat), **181**, 1028
  formation in
   bone marrow-derived macrophages, stimulation by granulocyte–macrophage colony-stimulating factor and interleukin-3 (mouse), **179**, 586
   neutrophils during phagocytosis of opsonized yeast particles (human), **177**, 948
  and ionomycin, synergism with lysophosphatidylcholine in human T-cell activation, **178**, 1378
  and phosphatidic acid, role in neutrophil superoxide release: divergent effects of propranolol (human), **175**, 423
  production and composition in docosahexaenoic acid supplemented cultured cardiomyocytes during α_1-adrenergic-stimulated phosphoinositide breakdown (rat), **174**, 869
  stimulation of spermatozoal Ca^{2+}-dependent phospholipase A_2 (sheep), **176**, 294
1,2-Diacylglycerol
  antigen-induced formation in RBL-2H3 cells, role of phosphatidylcholine, **177**, 336
  increase in aortic smooth muscle cells, stimulation by endothelin (bovine), **162**, 381; retraction, **180**, 1164
Diacylglycerol kinase
  80K, EF-hand motifs, regulatory role, assessment by truncation and deletion mutants (pig), **181**, 1015

- 4,6-Diamino-5-formamidopyrimidine
  - detection in DNA from neoplastic liver of carcinogen-exposed sole, **173**, 614; *erratum*, **175**, 359
- *trans*-Diamminedichloroplatinum(II)
  - reaction with hexadeoxynucleotide d(TACGTA): interstrand crosslinking of d(TACGTA), **175**, 537
- Diaphragm
  - mitochondrial DNA, age-associated accumulation of 8-hydroxydeoxyguanosine (human), **179**, 1023
- Diazo-2
  - skeletal muscle relaxation with, effects of changes in pH (*Rana temporaria*), **181**, 1337
- 2,5-Di-(*tert*-butyl)-hydroquinone
  - inhibition of microsomal calcium sequestration, impairment of protein synthesis initiation in perfused liver (rat), **177**, 1082
- Dibutyryl cyclic CMP
  - differential modulation of neutrophil activation (human), **174**, 258
- Dicarboxylates
  - non-peptide, inhibition of HIV-1 proteinase, **176**, 241
- *cis*-Dichlorodiammineplatinum II, *see* Cisplatin
- 2,6-Dichlorophenolindophenol
  - dye bypass of antimycin A block, in analysis of thyroid hormone effects on electron flow in mitochondrial bc_1 complex (rat liver), **178**, 73
- *Dictyostelium discoideum*
  - adenylate cyclase regulation, role of $G_\alpha 2$ protein, **175**, 55
  - *ble* gene of *Streptoalloteichus hindustanus* as selectable marker for, conferral of phleomycin resistance, **180**, 1403
  - development of amoebas, [^{3}H]inositol incorporation into inositol polyphosphates during, **181**, 191
  - guanylate cyclase regulation by $G_\alpha 2$ protein, **176**, 1245
  - identification of endogenous biotinylated proteins, **174**, 990
  - transient expression of eight distinct G protein α subunits during developmental program, **179**, 1141
- Dicyclohexylcarbodiimide
  - inhibitory effects on spinach cytochrome b_6-f complex, **179**, 507
- 2′,3′-Didehydro-2′,3′-dideoxythymidine
  - anti-HIV, structural studies, **175**, 298
- 2′,3′-Dideoxyinosine
  - inhibition of HIV replication in peripheral blood lymphocytes, potentiation by EICAR and ribavirin, **178**, 563
- 2′,3′-Dideoxynucleosides
  - with anti-HIV activity, furanose ring conformations, ^{1}H NMR study, **179**, 386
  - and 3′-azido-3′-deoxythymidine, 5′-triphosphates, differential inhibition of DNA polymerase γ (bovine testis), **179**, 776
- Diet
  - chronic iron overload, associated hepatic energy state, ^{31}P NMR study (rat), **176**, 1262
  - effect on *c-myc* mRNA expression in adipose tissue, muscle, and liver (chicken), **180**, 1
  - monosaturated fatty acid, upregulation of hepatic expression of apolipoprotein A-I gene (rat), **180**, 162
  - olive oil-containing, with adriamycin-induced oxidative stress, effects on hepatic cytochrome oxidase induction (rat), **181**, 375
- *N,N*-Diethylhydroxylamine
  - function as electron donor to photosystem II (beet spinach), **179**, 1127
- *N,N*-Diethyl-2-[4-(phenylmethyl)phenoxy] ethanamine hydrochloride
  - stimulation of *in vivo* tumor growth and phorbol ester-induced inflammation (mouse, rat), **179**, 1297
- *N,N*-Diethyl-*m*-toluamide, *see* Deet
- Differentiation
  - adipogenic, 3T3-L1 preadipocytes, inhibition by endothelin-1, **177**, 854
  - B cells decorated with artificial antigen receptors, inhibition by triamcinolone acetonide (human), **179**, 1276
  - eosinophils, effects of L-tryptophan product constituents: implications for pathogenesis of eosinophilia–myalgia syndrome (human), **178**, 1008
  - erythroid, associated enhancer-dependent expression of chicken β^H-globin gene, **177**, 97
  - erythroleukemia cells
    - associated modulation of B2-containing RNA (mouse), **175**, 91
    - hexamethylenebisacetamide-induced, role of secretion and membrane binding of differentiation-enhancing factor, **179**, 153
    - IW32, effect of podophyllotoxin: expression of c-*myc* proto-oncogene (mouse), **179**, 1241
    - K562, potent induction by bufalin (human), **178**, 686
  - HL-60 cells
    - associated induction of platelet-activating factor receptor gene expression (human), **181**, 1580
    - cooperative effect of 8-Cl-cAMP and granulocyte-macrophage colony-stimulating factor, **177**, 1133
    - induction by regiospecifically acetylated spermidines (human), **180**, 591
    - retinoic acid- or 1,25-dihydroxyvitamin D_3-induced, enhancement by barbiturates (human), **178**, 263
  - L6 muscle cells, associated differential expression of GLUT1 and GLUT4 glucose transporters (rat), **175**, 652
  - megakaryocytic, L8057 leukemia cells, effect of erythroid differentiation factor (mouse), **181**, 1042
  - myelomonocytic leukemia cells, induction by leukemia inhibitory factor/D-factor, associated phosphorylation of heat shock protein hsp27 (mouse), **176**, 979
  - osteoclast-like cells in bone marrow cultures exposed to 1,25-dihydroxyvitamin D_3 (human), **176**, 1189
  - PC12 cells, correlation with annexin II and p11 increases, **177**, 1188
  - TPA-induced, T cells, effect on membrane GTP-binding proteins (human), **178**, 138
- Differentiation-enhancing factor
  - enhancement of hexamethylenebisacetamide-induced differentiation of erythroleukemia cells, role of DEF secretion and membrane binding, **179**, 153
- Difluoroketones
  - with potent HIV-1 protease inhibitory activity, synthesis and antiviral activities *in vitro*, **175**, 914

Digitonin
  permeabilized hepatocytes, HMG-CoA reductase, *in situ* assay (rat), **180**, 525
Digoxin
  stimulation of atrial natriuretic peptide synthesis and secretion by cardiocytes (rat), **176**, 875
Dihexadecylphosphatidylcholine
  dispersions in H_2O and D_2O, comparative thermotropic transitions between interdigitated gel phase and ripple phase, **174**, 102
24,25-Dihydrolanosterol
  specificities of rat liver and yeast lanosterol 14α-demethylase for, comparison, **178**, 1064
Dihydrolipoyl transacylase
  mRNA from thiamine-responsive maple syrup urine disease patient, detection of 17-bp insertion and missense mutation, **174**, 804
Dihydroriboflavin
  oxidation, coupling to formation of higher valence states of hemeproteins, **181**, 197
5α-Dihydrotestosterone
  effect on intracellular calcium in human prostate cancer cells, **179**, 90
  rapid homologous up-regulation of binding capacity of androgen receptors in intact MCF-7 cells (human), **181**, 383
Dihydrotetramethylrosamine
  as fluorogenic peroxidase substrate, evaluation *in vitro* and in *Amoeba proteus*, **175**, 387
1,25-Dihydroxyvitamin D
  serum, augmentation by bisphosphonate YM175 via stimulation of renal 1-hydroxylase activity (rat), **180**, 1172
1,25-Dihydroxyvitamin D_3
  and analogs, antiproliferative effect on human colon adenocarcinoma cells, effect of extracellular calcium, **179**, 57
  attenuation of mesenteric resistance artery contractility loss in culture (rat), **174**, 11
  augmentation of epidermal growth factor receptor gene expression in BT-20 mammary carcinoma cells, **176**, 1
  binding sites in classical and nonclassical target tissues, comparison (rat), **180**, 867
  effects on pancreatic, intestinal, and renal calbindin-D_{28K} levels (chicken), **176**, 1057
  induced differentiation of
    leukemia HL-60 cells, enhancement by barbiturates (human), **178**, 263
    osteoclast-like cells in bone marrow cultures (human), **176**, 1189
  inhibition of
    alkaline phosphatase in MC3T3-E1 cells, modulation by murine recombinant leukemia inhibitory factor, **175**, 577
    interleukin-1-induced IL-8 expression and production (human), **176**, 1020
1α,25-Dihydroxyvitamin D_3
  inhibition of human monocyte infection by HIV-1, **176**, 852
1,25-Dihydroxyvitamin D_3 receptors
  tissue distribution in male rat, **181**, 611
Di-iron sites
  rubredoxin, identification of potential ligands (*Desulfovibrio vulgaris*), **181**, 337
Diltiazem
  attenuation of daunorubicin-augmented microsomal lipid peroxidation and oxygen consumption (rat), **179**, 1101
3β[*N*-(*N'*,*N'*-Dimethylaminoethane)-carbamoyl cholesterol
  cationic liposomes containing, for efficient transfection of mammalian cells, **179**, 280
cis-2,6-Dimethyl-1-benzylpiperidine
  microsomal metabolism: generation and fate of enamines (rabbit liver), **179**, 1368
1,2-Dimethyl-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline
  identification in parkinsonian and normal brain (human), **177**, 603
Dimethyldithiocarbamate
  induction of cadystin synthesis in *Schizosaccharomyces pombe*, **176**, 1068
N,N-Dimethylepinephrine, *see* Catecholine
Dimethyl sulfoxide
  protection against hydrostatic pressure damage in yeast, **174**, 1141
  protein separation and purification in, **176**, 1462
1,2-Dimyristoyl-*sn*-glycero-3-phosphocholine
  –bacteriorhodopsin vesicles produced by detergent-free method, phospholipid composition and physical properties, **180**, 939
Dinitrophenol
  regulation of intracellular acetyl-CoA carboxylase: mimicry of action of 5′-AMP-activated protein kinase, **181**, 1486
2,4-Dinitrophenyl
  palmitate-conjugated monoclonal IgA antibody to, B cells decorated with, differentiation, inhibition by triamcinolone acetonide (human), **179**, 1276
Dioxin, *see* 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin
Dioxygenase
  and fatty acid lyase activities, occurrence in single protein: oxodiene formation during lipoxygenase-catalyzed reaction (vetch), **180**, 1002
Dipeptidyl carboxypeptidase I
  microsatellite, cosegregation with blood pressure in F_2 generation from WKY/SHRSP cross (rat), **181**, 941
Diphenol oxidase, *see* Catechol oxidase
Diphtheria toxin
  amino terminus, role in cytotoxicity (human T cells), **180**, 545
1,3-Di(2-pyrenyl)propane
  intramolecular excimerization, in monitoring bacterial membrane lipid fluidity, **176**, 356
Disulfide bonds
  Cys326–Cys339 in fibrinogen γ chain 259–411, role in calcium binding (human), **174**, 853
  intramolecular, linkage of connexin-43 extracellular domains: maintenance of connexon integrity by non-covalent bonds (rat), **178**, 1312

Disulfides
  class I, insulin receptor, quantitation (human placenta), **176**, 1178
  –sulfhydryl exchange reaction with biological disulfides, inactivation of glutathione *S*-transferase (human placenta), **174**, 580
S-D-Dithiomandeloylglutathione
  as alternate substrate for lactoylglutathione lyase, synthesis and characterization, **181**, 657
Dityrosine
  fluorometric characterization: complex formation with boric acid and borate ion, **178**, 60
Diuretic hormone
  identification and characterization (*Locusta migratoria*), **179**, 1036
DMPC, *see* 1,2-Dimyristoyl-*sn*-glycero-3-phosphocholine
DNA
  adducts, formed from carcinogenic diol-epoxides, direct labeling with *cis* vic-diol group-specific fluorescent reporter compound, **180**, 1233
  Alu repeats
    interaction with nuclear protein, binding specificity (human), **178**, 613
    surrounding ferredoxin gene, evolution (human), **177**, 120
  B block region of transcription factor IIIA gene, specific binding of transcription factor IIIC (*Xenopus laevis*), **175**, 1036
  binding proteins
    expression in melanocytes and melanoma cells, relationship to differential genomic susceptibility (mouse), **178**, 1036
    nuclear, 55-kDa, purification (HeLa cells), **174**, 542
    sequence-specific, interaction with regulatory regions of histone H3 and H4 genes (wheat), **176**, 1593
    ultraviolet damage-specific, demonstration in xeroderma pigmentosum complementation group E (human), **175**, 1139
  binding site of GAL4 zinc finger protein, spectroscopic studies (yeast), **175**, 492
  bovine papillomavirus type 1, region immediately adjacent to origin of replication, *in vitro* interaction with nuclear matrix, **176**, 479
  complementary
    N-acetylgalactosamine-6-sulfatase, Morquio disease-associated, isolation, characterization, and expression (human), **181**, 677
    α_1-acid glycoprotein, molecular cloning and nucleotide sequence (rabbit), **178**, 507
    adducin 63, cloning and sequencing (rat), **177**, 939
    adenylylcyclase, sequence: evidence for consensus cyclase-specific domain (human brain), **179**, 455
    α_{1A} adrenergic receptor, molecular cloning and sequencing (human), **179**, 1485
    α_{o2}, encoded G_o protein α-subunit, identification as 39-kDa pertussis toxin substrate, **175**, 473
    angiotensin II receptor, cloning and sequencing (rat), **177**, 299
    arylphorin, complete sequence (*Calliphora vicina*), **177**, 963
    azurocidin, cloning and sequencing (human neutrophils), **177**, 688
    2B7, cloning (rat), **177**, 867
    biliary glycoprotein variant clones, identification in human leukocyte library, **176**, 578
    calcium-binding polypeptide similar to calcineurin β-subunit, cloning and sequencing (rat testis), **180**, 1476
    calcium-binding protein calgizzarin, cloning and sequencing (rabbit lung), **181**, 644
    cAMP-dependent protein kinase regulatory subunit RIβ, cloning and sequencing (human), **176**, 166
    cathepsin D, isolation and sequencing (rat liver lysosomes), **179**, 190
    chondromodulin I, cloning and sequencing (fetal bovine cartilage), **175**, 971
    class theta glutathione *S*-transferase Yrs subunit, cloning and sequencing (rat liver), **181**, 1294
    common precursor for putative hemorrhagic protein and rhodostomin, cloning and sequence analysis (snake venom), **181**, 585
    conserved sequences, amplification, in identification of skeletal muscle protein-tyrosine phosphatases (rat), **178**, 1291
    cytochrome P450 IIC24, cloning and regulation (rat), **180**, 645
    dopamine D_3 receptors, cloning of distinct forms (human, rat), **180**, 1031
    elongation factor 1β, cloning and sequencing (human), **177**, 312
    endothelin receptor ET_A, cloning
      and characterization (human placenta), **180**, 1265
      gene localization to chromosome 4 (human), **181**, 184
    endothelin receptor ET_B, cloning and
      functional expression (human), **178**, 656
      isolation and sequencing (human), **178**, 248
      sequencing (human liver), **177**, 34
    expressing functional DNA glycosylase excising 3-methyladenine and 7-methylguanine, cloning and sequencing (human), **176**, 1170
    fibroblast growth factor receptor
      cloning (murine SC-3 breast cancer cells), **176**, 31
      ectoplasmic domain, isolation from fibroblasts (mouse), **178**, 8
    follicle-stimulating hormone receptor, cloning and sequencing (human), **175**, 1125
    β-galactoside-binding protein overexpressed during glucocorticoid-induced cell death, isolation of clone (CEM C7 cells), **178**, 746
    glutamic acid decarboxylase, cloning and partial sequencing (human brain, pancreatic islets), **176**, 1239
    GM_2 activator protein, isolation, sequencing, and expression (human), **177**, 1217
    growth hormone, nucleotide sequence (turkey), **173**, 967; *erratum*, **175**, 729
    guanylate cyclase-coupled heat stable enterotoxin receptor, isolation from human colonic cell line and expression in transfected COS-7 cells, **179**, 1455
    H^+-ATP synthase subunit b import precursor, cloning and sequencing (human), **178**, 1014

  hck tyrosine kinase, identification from megakaryocytes (rat), **181**, 1137
  H^+,K^+-ATPase β subunit, cloning (human gastric mucosa), **180**, 39
  H-protein, cloning and sequencing (human liver), **176**, 711
  human xeroderma pigmentosum group A complementing protein, cloning and sequencing of homologs from chicken, frog, and fruit fly, **181**, 1231
  import precursor of human coupling factor 6 of H^+-ATP synthase in mitochondria, molecular cloning, **178**, 793
  inositol 1,4,5-trisphosphate 3-kinase, cloning (human brain), **174**, 529
  insulin-like growth factor-binding proteins
    cloning and sequencing (human osteosarcoma), **176**, 219
    IGFBP-3, cloning and sequencing (bovine), **177**, 1025
  leukotriene A_4 hydrolase, cloning, sequencing, and expression (mouse), **176**, 1516
  lipopolysaccharide-binding protein CAP18 (rabbit), **179**, 170
  mammalian calcineurin B homolog, cloning in *Saccharomyces cerevisiae*, **180**, 1159
  membrane-associated maternal protein xlcaax-1, identification (*Xenopus laevis*), **179**, 1635
  O^6-methylguanine-DNA-methyltransferase, cloning and sequencing (rat hepatoma cells), **177**, 597
  monocyte chemoattractant protein-1, cloning (rat), **174**, 504
  muscle-type tropomyosin, cloning and sequencing (human epithelial cells), **177**, 1068
  NK-1 receptors, isolation from lung and characterization (human), **180**, 1110
  orphan RDC4 receptor, encoding of 5-HT_{1D} serotonin receptor, **180**, 1460
  peripheral myelin P0 protein, isolation and sequencing (human fetus), **180**, 515
  peripheral myelin P2 protein, isolation and sequencing (human fetus), **181**, 204
  phosphofructokinase, isolation and sequence (human platelets), **180**, 197
  phospholipase A_2 type II, cloning and overexpression in C127 cells (human placenta), **178**, 1298
  platelet activating factor receptor, characterization (human), **180**, 105
  pregnancy-specific β_1-glycoprotein type II, cloning and sequencing (human), **176**, 1532
  preprocarboxypeptidase A, cloning and sequencing (bovine pancreas), **175**, 110
  preproendothelin-1
    cloning and sequencing (rat), **175**, 44
    expression in COS cells, subsequent cellular production of mature vasoactive endothelin-1, **175**, 697
  proteasome subunit XC3, isolation and sequencing (*Xenopus laevis*), **178**, 1233
  ras p21-like G protein, cloning and characterization (rat liver), **177**, 1224
  retinoic acid-induced heparin-binding protein, cloning and sequencing (chicken), **175**, 617
  rhodopsin, isolation and characterization (lamprey), **174**, 1125
  ribophorin II, cloning and sequencing (rat), **176**, 1482
  sepiapterin reductase, cloning and sequencing (human), **179**, 183
  serotonin 5-HT2 and 5-HT1C receptors, cloning and sequencing (human), **181**, 1469
  serum amyloid A protein, cloning and nucleotide sequence (rabbit liver), **178**, 68
  sialoglycoprotein LGP85 in lysosomal membranes, isolation and sequencing of clone (rat liver), **178**, 444
  spermidine/spermine N^1-acetyltransferase, full-length, characterization (human), **179**, 407
  squamous cell carcinoma antigen, cloning and sequencing: member of serine protease inhibitors (human), **181**, 51
  testis-specific calcineurin B-related protein, cloning (rat), **179**, 1325
  thromboxane synthase, cloning and sequencing
    from lung (human), **177**, 286
    from platelets (human), **178**, 1479
  thyrotropin receptor, transfected non-thyroid mammalian cells, bioactivity of Graves disease IgG, comparison with reference thyroid bioassay (human), **179**, 1543
  tissue factor, cloning and amino acid sequence (bovine), **181**, 1145
  tracheo-bronchial mucin, cloning and sequencing (human), **175**, 414
  transcobalamin II, functional expression in oocytes (*Xenopus laevis*), **181**, 1151
  transglutaminase, cloning and sequencing (human keratinocytes), **175**, 906
  tumor cytotoxic factor/hepatocyte growth factor from fibroblasts, cloning (human), **180**, 1151
  tyrosinase, expression in Swiss 3T3 fibroblasts, **178**, 739
  tyrosine hydroxylase, cloning and sequencing (murine brain), **176**, 1610
  vacuolar H^+-ATPase 16-kDa subunit, cloning and sequencing (murine cerebellum), **176**, 1062
  Zn-α_2-glycoprotein, cloning and sequencing (human prostate), **177**, 696
in cortical neurons, internucleosomal cleavage, triggering by glutamate (rat), **179**, 39
crosslinking drug L-phenylalanine mustard, effects on protein synthesis in human lymphoma cells, **176**, 717
degradation in neurons, induction by 1-methyl-4-phenylpyridinium (rat), **181**, 1442
exogenous, expression in hepatocytes after liposome-mediated transfection *in vivo* (rat), **174**, 1223
extrinsic, demonstration in plasma immune complexes in systemic lupus erythematosus patient, **174**, 323
genomic
  adjacent to vector integration sites, library-independent cloning: isolation of EB4-PSV gene from *Dictyostelium* gene disruption transformant, **181**, 884
  *Hind*III fragment, localization of P450 steroid hydroxylase gene (*Rhizopus nigricans*), **178**, 1078
  identification of sequence homologous to histo-blood

    group ABH genes and α1→3 galactosyltransferase pseudogene (human), **175**, 986
  interferon-γ, cloning by PCR-based exon amplification for expression in *Escherichia coli* (pig), **180**, 1408
  methylation, analysis during natural and conditional cell aging of fibroblasts (mouse), **178**, 269
α-globin gene domain-containing 1.7-kbp fragment, sequence-specific protein binding sites, correlation with replication and matrix binding (chicken), **179**, 512
–histone H5 interaction, model: simultaneous minor and major groove binding, **174**, 898
HIV-1 proviral, synthesis, role of viral proteinase, **179**, 17
8-hydroxyguanine residues, removal by human neutrophil endonuclease, **178**, 1472; *erratum*, **180**, 462
incorporation of deoxycytidine in infant tonsillar lymphocytes, **174**, 680
interactions with SP1 zinc finger domains, modulation by transition metals, **176**, 551
internucleosomal fragmentation, role of Ca^{2+}/Mg^{2+}-dependent nuclease and effect of Zn^{2+} (human lymphocytes), **181**, 915
in vivo transfer in heart, in assessment of thyroid hormone regulation of α-myosin heavy chain promoter activity (rat), **179**, 1269
kinetoplast minicircle, replication, catenated dimers and knotted DNA structures as putative intermediates (*Trypanosoma cruzi*), **174**, 958
linear, ligation, enhancement by HMG 14 and protamine: DNA ligation inhibition by HMG 14 phosphorylation at Ser 20, **174**, 660
methylmethane sulfonate-damaged, viability and processing in *xth nth nfo* cells of *Escherichia coli*, effect of *rec* mutations, **180**, 774
mitochondrial
  age-associated accumulation of 8-hydroxydeoxyguanosine (human diaphragm), **179**, 1023
  age-associated 5 kb deletion, detection by PCR and restriction mapping (human), **178**, 124
  with deletion, age-associated accumulation in heart, quantitative analysis (human), **180**, 894
  guanosine conversion to 8-hydroxyguanosine after azidothymidine administration (murine liver), **176**, 87
  from idiopathic cardiomyopathy patients, comparison with Parkinson's disease and mitochondrial encephalomyopathy patients, **177**, 518
  mutations
    in complex I genes, detection in Leber's hereditary optic neuropathy (human), **174**, 1324
    in family with myoclonic epilepsy and ragged-red fiber disease, analysis, **174**, 1109
    inducing Leber's hereditary optic neuropathy, detection by PCR with allele-specific priming (human), **175**, 631
    in patients with mitochondrial myopathy, encephalopathy, lactic acidosis, and stroke-like episodes, characterization, **174**, 861
    point, distinct clustering in patients with mitochondrial encephalomyopathies and Parkinson's disease, **176**, 938
    in $tRNA^{Lys}$ gene, quantitation in patients with myoclonic epilepsy and ragged-red fiber disease, **179**, 880
  pathogenetic deletions: molecular basis for asymmetric distribution (human), **174**, 244
  restriction enzyme analysis in colorectal tumors (human), **180**, 85
from neoplastic liver of carcinogen-exposed sole, detection of 4,6-diamino-5-formamidopyrimidine, 8-hydroxyguanine, and 8-hydroxyadenine, **173**, 614; *erratum*, **175**, 359
non-B sequences, effects on eukaryotic gene expression (hamster fibroblasts), **181**, 818
phage and human, microfluorometric size measurements, correlation with degree of *in vitro* cisplatin treatment, **179**, 1344
photocleavage by *p*-nitrobenzoyl group covalently linked to proflavine, **181**, 1266
plasmid, containing estrogen responsive elements, topology, alteration by estrogen receptor, **176**, 486; *erratum*, **177**, 1325
poly(dG-m^{5}dC), left-handed, lack of mithramycin binding in presence of Mg^{2+}, **177**, 511
potential non-B sequences, inhibition and enhancement of eukaryotic gene expression, **180**, 1273
primer site of reverse transcriptase template, inhibitory binding of adenosine diphosphoribosyl transferase, **180**, 496
–protein complex formation, inhibition by end-filling of oligonucleotide duplex containing MDBP site from human *hsp70* promoter, **178**, 927
purines and pyrimidines in, absolute electron affinities, determination from reversible reduction potentials, **180**, 841
replication origin of α-globin gene domain, mapping of nearby nuclear matrix attachment regions and topoisomerase II binding and reaction sites (chicken), **177**, 265
ribosomal, intergenic spacer sequences, transcription in normal and regenerating liver, comparison (rat), **176**, 1333
Shope fibroma virus, T2 open reading frame, encoding of soluble form of tumor necrosis factor receptor, **176**, 335
single-stranded, promoter-containing, binding of nuclear 42-kDa phosphoprotein (*Chironomus tentans*), **176**, 1565
SP1 cognate target site, altered binding to SP1 protein with amino acid-substituted zinc finger domain (human), **175**, 333
superhelical density changes, monitoring by polarized light scattering, **177**, 1313
synthetic and bovine thymic, AAF-modified, nuclease P_1-mediated fluorescence postlabeling assay, **177**, 151
thyroid lobe, [^{3}H]thymidine uptake *in vitro*, effect of melatonin (rat), **181**, 1187
between tRNA gene bipartite internal promoters, physical effects of transcription factor IIIC–promoter binding (yeast), **176**, 826
YAC clone in region of human mcf-2 gene, fidelity, **181**, 877

DNA-directed RNA polymerase
  sigma-70 holoenzyme, separation from core enzyme on heparin–sepharose columns (*Escherichia coli*), **179**, 1107
  sigma subunit footprint, reexamination (*Escherichia coli*), **177**, 140
  thermostable, purification and properties (*Calderobacterium hydrogenophilum*), **175**, 949
DNA glycosylase
  3-methyladenine- and 7-methylguanine-excising, cDNA cloning and sequencing (human), **176**, 1170
DNA libraries
  complementary, reticulocyte, detection of cell adhesion molecule CD44 (human), **178**, 1127
DNA methyltransferase
  purification from cultured rice cells and characterization, **177**, 711
DNA polymerase α
  in proliferatively activated hepatocytes, effect of prazosin (rat), **177**, 973
DNA polymerase β
  induction during proliferation of mitogen-stimulated lymphocytes (human), **181**, 623
DNA polymerase γ
  differential inhibition by 5′-triphosphates of 3′-azido-3′-deoxythymidine and 2′,3′-dideoxynucleosides (bovine testis), **179**, 776
DNA probes
  in detection of single *Plasmodium falciparum* parasites in infected blood, **175**, 179
DNase I, *see* Deoxyribonuclease I
DNA synthesis
  in alveolar macrophages, inhibitory factor in lung-conditioned medium (human), **180**, 1207
  differential effects of DNA adducts induced by carcinogenic and noncarcinogenic azo dyes *in vitro* (*Escherichia coli*), **179**, 817
  enhancement by platelet-derived growth factor B chain homodimer (MC3T3-E1 cells), **175**, 745
  in hepatocytes
    effects of hepatocyte growth factor with deletion of kringle domains or N-terminal hairpin structure (rat), **181**, 691
    induction by epidermal growth factor and insulin, enhancement by cholera toxin B subunit (rat), **174**, 372
  in hepatoma cell line, effect of interferon-α (human), **178**, 378
  inhibition by bombesin and SMS 201-995 in thyroid lobes *in vitro* (rat), **178**, 520
  insulin-like growth factor I-induced, effects of pravastatin (FRTL-5 cells), **177**, 17
  by pancreatic beta cells, α-adrenergic inhibition, mediation by pertussis toxin-sensitive G protein regulating islet cAMP content (rat), **180**, 152
  in renal tubular epithelial cells in secondary culture, stimulation by hepatocyte growth factor (rabbit), **174**, 831
  stimulation by
    epidermal growth factor, comparison in periportal and perivenous hepatocytes (rat), **181**, 1201
    hepatocyte growth factor (human melanocytes), **176**, 45
DNA topoisomerase I
  negative regulation by zinc and endogenous macromolecule (human, rat), **178**, 414
DNA topoisomerase II, *see* DNA topoisomerase (ATP-hydrolyzing)
DNA topoisomerase (ATP-hydrolyzing)
  binding and reaction sites near replication origin of α-globin gene domain, mapping (chicken), **177**, 265
  mitochondrial, inhibition by amsacrine and teniposide (bovine thymus), **176**, 690
Docosahexaenoic acid
  supplemented cultured cardiomyocytes, diacylglycerol production and composition during α_1-adrenergic-stimulated phosphoinositide breakdown (rat), **174**, 869
N-Dodecylimidazole
  growth state-dependent cytotoxicity in cultured cells, relationship to multidrug resistance, **176**, 1377
Dolichol-phosphate-mannose synthase
  translocation into canine pancreatic microsomal membranes (yeast), **174**, 1337
Dopachrome isomerase
  electrochemical identification in *Drosophila melanogaster*, **180**, 724
Dopa decarboxylase, *see* Aromatic-L-amino-acid decarboxylase
Dopamine
  agonists, inhibition of type 2A protein phosphatase in brain (rat), **176**, 737
  content in PC12h cells, effect of Ca^{2+}/calmodulin-dependent protein kinase II inhibitor KN-93, **181**, 968
Dopamine β-monooxygenase
  N,N,N′,N′-tetramethyl-1,4-phenylenediamine as facile electron donor and chromophoric substrate, **175**, 920
Dopamine receptors
  D_2, long and short isoforms, differentiation by antipeptide antibodies, **179**, 824
  D_3
    gene transcription: shorter variants produced by different alternative splicing processes (rat), **176**, 1584
    identification of alternative transcripts (human, rat), **180**, 1031
  D_5, encoding pseudogene, transcription in brain tissues (human), **181**, 16
Dosimeter
  biological, for monitoring solar UV-B radiation, description, **177**, 48
Doxorubicin
  antitumor activity, effect of schisanhenol (mouse), **178**, 207
  induced oxidative stress, in rats fed dietary olive oil, effects on hepatic cytochrome oxidase induction, **181**, 375
Drug delivery
  systems for amphotericin B delivery, inhibition of interaction between AmB and lipoproteins (human), **181**, 722
Drugs
  passive absorption across intestinal epithelium, analysis with Caco-2 cell monolayers as model (human), **175**, 880

  - transdermal transport, lecithin organogels as matrices for, **177**, 897

- dTDPglucose 4,6-dehydratase
  - from *Salmonella typhimurium* LT2, high-level expression and purification, **174**, 846
- DuP 532
  - as nonpeptide angiotensin II receptor antagonist, characterization, **177**, 209
- DUP 714
  - inhibition of platelet responses to thrombin (human), **179**, 1500
- Dyad symmetry element
  - mediation of c-*fos* transcriptional activation by phorbol ester (human T cells), **181**, 353
- Dyschondroplasia
  - tibial, affected growth plate cartilage, nonreducible cross-link formation in, analysis (chicken), **179**, 1582
- Dysgenesis
  - neural, in trisomy 16 fetuses, relationship to increased neuronal production of class I MHC H-2K^k mRNA and protein (mouse), **179**, 102
- Dystrophin
  - immunochemical assay in tissue and cell culture homogenates by polyacrylamide gel electrophoresis (human, mouse, rat), **181**, 1164

E

- Ecdysone 20-monooxygenase
  - effects of ecdysone agonist RH 5849 (*Manduca sexta*), **176**, 522
- Eclosion hormone
  - mediated signal transduction in metamorphoses, role of cyclic GMP (silkworm), **180**, 881
- Ecto-protein kinase
  - neutrophil, phosphorylation of basic fibroblast growth factor (human), **174**, 49
- Edema
  - promoting actions of inflammatory mediators, inhibition by calcitonin gene-related peptide (hamster, human, rat), **180**, 1429
- Edman degradation
  - glycopeptides: identification of N- and O-glycosylation sites, **178**, 1194
- EF-hand motifs
  - 80K diacylglycerol kinase, regulatory role, assessment by truncation and deletion mutants of enzyme (pig), **181**, 1015
- EGF, *see* Epidermal growth factor
- EICAR, *see* 5-Ethynyl-1-β-D-ribofuranosylimidazole-4-carboxamide
- Eicosanoids
  - metabolism in osteogenic osteosarcoma cells, modulation by transforming growth factor β (human), **178**, 940
- Eicosapentaenoic acid
  - cytochrome P450 metabolite 17R(18S)epoxyeicosatetraenoic acid, metabolism to prostaglandins in simian seminal vesicles, **178**, 1444
- Eicosapentaenoic acid ethyl ester
  - ingestion, reduction of low-density lipoprotein susceptibility to Cu^{2+}-catalyzed oxidative modification (rabbit), **175**, 61
- Elafin
  - inhibition of neutrophil proteinase 3, **174**, 6
- Elastase
  - identification as constituent product of T cells, **181**, 232
- Elastin
  - gene expression in smooth muscle cells, effect of β-aminopropionitrile *in vitro* (rat), **179**, 939
- Electrical fields
  - stimulated contractions and acetylcholine release in isolated tracheal smooth muscle, effect of L-N^G-nitro-arginine (guinea pig), **179**, 1017
- Electric currents
  - through lymphocyte potassium channel RGK5, inactivation, role of histidine in channel pore (rat), **179**, 1384
- Electromagnetic fields
  - coherence time, effect on ornithine decarboxylase activity (L929 cells), **178**, 862
- Electron affinity
  - absolute, purines and pyrimidines in DNA and RNA, determination from reversible reduction potentials, **180**, 841
- Electron exchange reaction
  - between octaheme cytochrome c_3 and hydrogenase from *Desulfovibrio desulfuricans*, kinetic studies, **179**, 605
- Electron paramagnetic resonance
  - in monitoring enzymatic activity *in situ* (bollworm larva), **179**, 520
- Electron spin resonance
  - measurement of pulmonary nitroxide radical clearance *in vivo* (mouse), **177**, 874
- Electron transport
  - in filarial parasite *Setaria digitata*
    - oxidative phosphorylation coupled to, characterization, **177**, 318
    - role of quinones, **174**, 386
  - through mitochondrial bc_1 complex, effects of thyroid hormones, analysis by dye bypasses of antimycin A block (rat), **178**, 73
  - plasma membrane, effects of monoclonal antibodies to transferrin receptor, **176**, 1437
  - reconstituted chain from *Desulfovibrio gigas*, sulfite reduction by hydrogen, calcium requirement, **180**, 238
- Elongation factors
  - eEF-1, copurification with aminoacyl-tRNA synthetase complex (rabbit reticulocytes), **177**, 757
  - eEF-2, Ca^{2+}- and calmodulin-dependent protein kinase III, increased activity during S-phase in Ehrlich ascites cells, **180**, 1372
  - EF-1β, cDNA cloning and sequencing: amino acid sequence deduction (human), **177**, 312
  - EF-2, phosphorylation on tyrosine, serine, and threonine (chicken embryo), **175**, 400
- Embryo
  - blastulation-stage, free glycan chain liberated by hyosophorin de-*N*-glycosylation during, identification (medaka fish), **180**, 1165

- evidence for inactive plasma membrane-associated precursor of active cytoplasmic ornithine decarboxylase (mouse), **174**, 497
- expression of genes encoding insulin and insulin-like growth factor I receptors from blastoderm stage through organogenesis (chicken), **176**, 1393
- implantation stage, staining with lacto-*N*-fucopentaose I-bearing fluorescent probe on mural side of trophectoderm (mouse), **181**, 1004
- injection with single-stranded *Adh* genes, subsequent tissue-specific expression (*Drosophila melanogaster*), **174**, 1300
- preimplantation, chemically induced viral resistance (bovine), **175**, 10

Embryogenesis
- early, associated activin mRNA expression: effect of expression level on body axis formation (*Xenopus laevis*), **181**, 684

Enamines
- generation and fate in microsomal metabolism of cyclic tertiary amines (rabbit liver), **179**, 1368

Enantioselectivity
- α-chymotrypsin inactivation by halo enol lactones, **178**, 1335

Encephalomyopathies
- mitochondrial
  - distinct clustering of point mutations in mtDNA of affected patients, **176**, 938
  - and Parkinson's disease, mtDNA from patients, comparison with idiopathic cardiomyopathy patients, **177**, 518

Encephalopathy
- and mitochondrial myopathy, lactic acidosis, and stroke-like episodes, characterization of associated mtDNA mutations (human), **174**, 861

Endometrium
- characteristic expression of cholesterol sulfate during implantation (rabbit), **178**, 145

Endonuclease
- capable of removing 8-hydroxyguanine from DNA, identification in human neutrophils, **178**, 1472; *erratum*, **180**, 462
- restriction, *see* Restriction endonucleases

Endonucleolytic cleavage
- specific, insulin-like growth factor II mRNAs (human, mouse), **179**, 1509

Endopeptidase
- atrial peptide-degrading, isolation and characterization (bovine kidney), **175**, 886
- neutral
  - degradation of brain natriuretic peptide: species-specific proteolytic sites (human, pig, rat), **175**, 22
  - endothelin-metabolizing, detection in vascular A10 cell membranes (rat), **176**, 423

Endoplasmic reticulum
- rough, from hepatoma and regenerating liver, GTP-dependent membrane fusion, analysis (rat), **176**, 1494

Endoribonuclease
- spermidine-dependent, detection and characterization in murine FM3A cells, **176**, 1163

β-Endorphin$_{1-31}$
- suppression of splenocyte proliferation, *N*-acetyl-β-endorphin$_{1-31}$ antagonism (mouse), **175**, 936

Endothelial cells
- adrenal capillary, isolation and properties in culture (human), **174**, 903
- aortic
  - biotransformation of organic nitrates to nitric oxide (pig), **180**, 286
  - ecto-ATPase and ecto-ADPase activities, role of ATP diphosphohydrolase (bovine), **180**, 1200
  - expression of proteoglycan and glycosaminoglycan free chains (bovine), **179**, 1281
  - flow-induced Ca^{2+} response *in vitro*, effect of extracellular ATP level (fetal bovine), **179**, 1192
  - prostacyclin production, stimulation by neuropeptide Y (pig), **179**, 309
- capillary
  - adenylate cyclase, inhibition by endothelins (rat brain), **180**, 169
  - angiogenin receptors, characterization (bovine brain), **176**, 833
- cerebral, cytokine-activated, expression of nitric oxide synthase isotype inhibited by arginine analogs (mouse), **178**, 823
- crosslinking and phosphorylation of substratum vitronectin (human), **174**, 465
- hybrid cell line EA.hy 926, expression and release of endothelin-1 (human), **181**, 529
- and Kupffer cells, hepatic, clearance of monomeric and polymeric fractions of formaldehyde-treated albumin: evidence for scavenger receptor heterogeneity (rat), **180**, 23
- microvascular
  - migration and proliferation, effect of hepatocyte growth factor *in vitro* (human), **179**, 1042
  - plasminogen activator inhibitor-1 induction by chondrocyte-derived transforming growth factor β, **176**, 633
  - plasminogen activators and plasminogen activator inhibitor-1 mRNA, induction by vascular endothelial growth factor (bovine), **181**, 902
- umbilical vein
  - intracellular calcium levels and prostacyclin production, effects of 14 amino acid peptide derived from amino terminus of cleaved thrombin receptor (human), **179**, 1656
  - retinoic acid receptor transcripts, characterization (human), **179**, 32
- vascular
  - L-arginine uptake and nitric oxide release, stimulation by bradykinin and ATP (porcine aorta), **180**, 926
  - conversion of big endothelin-1 to endothelin-1, inhibition by phosphoramidon (bovine), **174**, 779
  - cultured, identification of G protein-coupled endothelin receptors (bovine), **174**, 1343
  - cytosol, detection of phosphoramidon-sensitive endothelin-converting enzyme (bovine), **176**, 860
  - derived cytosolic and membrane-bound metalloproteinases with endothelin converting activity, differ-

    - entiation by *N*-ethylmaleimide (porcine aorta), **178**, 531
  - endothelium-derived relaxing factor synthase: identification as particulate enzyme system (bovine), **176**, 1417
  - injury by activated neutrophils, role of adhesion molecules CD11a and ICAM-1 (bovine, human), **177**, 664
  - intracellular calcium levels, endothelin effects *in situ* (pig), **181**, 1352
  - low-density lipoprotein oxidation in presence of, analysis (human), **176**, 431
  - pepstatin accumulation and effect on endothelin-1 processing (bovine), **177**, 1006
  - release of prostacyclin, induction by endothelin-1 (bovine), **177**, 171
  - responses to transforming growth factor β hybrid molecule (bovine, rat), **175**, 589
  - specific binding of vascular permeability factor, **175**, 68
  - synthesis of
    - 1-acyl-2-[^{3}H]acetyl-*sn*-glycero-3-phosphocholine (human), **176**, 1557
    - platelet-activating factor 1-*O*-hexadecyl molecular species (human), **177**, 357
  - tube formation *in vitro*, autocrinological role of basic fibroblast growth factor (bovine), **180**, 1098

- Endothelin-1
  - in aqueous solution, conformation: NMR-derived constraints combined with distance geometry and molecular dynamics calculations, **178**, 570
  - big
    - conversion to ET-1
      - in cultured endothelial cells, inhibition by phosphoramidon (bovine), **174**, 779
      - in isolated mesenteric artery, phosphoramidon sensitivity (rat), **177**, 1127
      - by two types of metalloproteinases in vascular smooth muscle cells (pig), **178**, 899
    - C-terminal region, role in specific conversion by phosphoramidon-sensitive endothelin-converting enzyme (human), **180**, 1019
    - intracisternal administration, effects on cerebral arteries in absence or presence of phosphoramidon pretreatment (dog), **178**, 24
  - and big ET-1, continuous iv infusion, hemodynamic effects, comparison (rat), **179**, 1122
  - binding sites in rat cardiac membranes, inhibitory effect of [D-Arg^1,D-Phe,D-Try^{7,9},Leu^{11}]substance P, **179**, 130
  - biotinylated at lysine-9 side chain, in evaluation of endothelin receptor populations, **181**, 1245
  - calcium responses to, inhibition by SK&F 96365 (NG108-15 cells), **177**, 1141
  - complex with binding protein, detection by low-temperature gel electrophoresis, **176**, 392
  - containing cationic clusters within α-helical structure, activation of GTP-binding proteins (venom), **178**, 400
  - effect on intracellular calcium levels in vascular endothelial cells *in situ* (pig), **181**, 1352
  - and ET-3
    - and ET-2, hepatic binding sites, subcellular distribution and partial characterization (human), **181**, 840
    - inhibition of adenylate cyclase in cerebral capillary endothelial cells (rat), **180**, 169
    - role in blood pressure alterations in patients with chronic hemodialysis, comparison, **178**, 276
  - expression and release by EA.hy 926 endothelial hybrid cells (human), **181**, 529
  - induced contractions of tracheal and bronchial strips, role of Na$^+$/H$^+$ exchange (guinea pig), **175**, 583
  - induced myocardial protein synthesis, inhibition by antisense oligonucleotide against early growth response gene-1 (rat), **181**, 22
  - induction of prostacyclin release from aortic endothelial cells (bovine), **177**, 171
  - inhibition of adipogenic differentiation of 3T3-L1 preadipocytes, **177**, 854
  - linear peptide analog [Ala^{1,3,11,15}]ET-1 and truncated peptide analogs, binding to ETs-nonselective ET$_B$ receptors, **179**, 286
  - local formation and degradation in airway tissues, effects of phosphoramidon (guinea pig), **179**, 830
  - long-lasting vasoconstriction and regional extraction in splanchnic and renal tissues (human), **180**, 1298
  - mature vasoactive, production in COS cells following expression of human preproendothelin-1 cDNA, **175**, 697
  - metabolizing neutral endopeptidase, detection in vascular A10 cell membranes (rat), **176**, 423
  - prepro-, cDNA cloning, sequencing, and tissue distribution (rat), **175**, 44
  - processing in vascular endothelial cells, effect of pepstatin (bovine), **177**, 1006
  - stimulation of phospholipid degradation in isolated heart (rat), **174**, 952
  - synthesis by neutrophils, analysis (human), **174**, 613

- Endothelin-2
  - and ET-1 and ET-3, hepatic binding sites, subcellular distribution and partial characterization (human), **181**, 840

- Endothelin-3
  - effect on
    - intracellular calcium levels in vascular endothelial cells *in situ* (pig), **181**, 1352
    - pituitary hormone secretion *in vitro* (rat), **174**, 338
  - and ET-1
    - and ET-2, hepatic binding sites, subcellular distribution and partial characterization (human), **181**, 840
    - inhibition of adenylate cyclase in cerebral capillary endothelial cells (rat), **180**, 169
    - role in blood pressure alterations in patients with chronic hemodialysis, comparison, **178**, 276
  - stimulation of nitric oxide production in cultured endothelial cells via phosphoinositide breakdown (bovine), **174**, 228

- Endothelin-converting enzyme
  - detection in carotid artery smooth muscle (bovine), **174**, 446

- membrane-bound and cytosolic metalloproteinase, derived from vascular endothelial cells, differentiation by *N*-ethylmaleimide (pig), **178**, 531
- phosphoramidon-sensitive
  - detection in cytosol of vascular endothelial cells (bovine), **176**, 860
  - substrate structural requirement for specific conversion: role of big ET-1 C-terminal region (bovine), **180**, 1019

Endothelin receptors
- binding of endothelin, relationship to irreversibility of ET-induced contractile response (rat aorta), **179**, 1408
- ET_A
  - cDNA cloning and characterization (human placenta), **180**, 1265
  - cloning and chromosomal localization (human), **181**, 184
  - isolation of antagonist (*Streptomyces misakiensis*), **178**, 132
- ET_B
  - cDNA cloning
    - and functional expression (human), **178**, 656
    - and sequencing (human liver), **177**, 34
  - ETs-nonselective, binding of [$Ala^{1,3,11,15}$]ET-1 and truncated peptide analogs, **179**, 286
- G protein-coupled, identification in cultured endothelial cells (bovine), **174**, 1343
- high-affinity subtypes ET_A and ET_B, identification in human tissues, **180**, 475
- placental, non-isopeptide-selective, cDNA, cloning, isolation, and sequencing (human), **178**, 248
- populations, evaluation with ET-1 biotinylated at lysine-9 sidechain, **181**, 1245
- subtypes, discrimination with sarafotoxin S6c (rat), **175**, 556

Endothelins
- induced contractile responses, irreversibility, relationship to binding of endothelin to receptor (rat aorta), **179**, 1408
- mediated increase in cytosolic free calcium in neutrophils, inhibition by L-arginine (human), **178**, 884
- stimulation of sustained 1,2-diacylglycerol increase and protein kinase C activation in aortic smooth muscle cells (bovine), **162**, 381; retraction, **180**, 1164

Endothelin/sarafotoxin receptors
- from different tissues, heterogeneity, role of differential glycosylation (guinea pig, rat), **178**, 921

Endothelium
- capillary and large vessel, mitogenic effects of interleukin-4 (human), **174**, 1287
- vascular
  - cancer cell adhesion to, mediation by sialyl Lewis a antigen (human), **179**, 713
  - CD18-independent neutrophil adhesion to, role of cell adhesion molecule LECAM-1 (human), **174**, 236

Endothelium-derived relaxing factor
- relationship to L-arginine, analysis with N_W-nitro L-arginine benzyl ester probe (rat aorta), **179**, 1677

Endothelium-derived relaxing factor synthase
- identification as particulate enzyme system in vascular endothelial cells (bovine), **176**, 1417

Endotoxic shock
- effect on glucose transporter mRNA levels in tissues (rat), **176**, 535
- subsequent arterial blood pressure and cardiac output, effects of N^G-monomethyl-L-arginine (dog), **178**, 1135

Endotoxin
- effects on Ca^{2+}-induced Ca^{2+} release from cardiac sarcoplasmic reticulum (dog), **174**, 1248

δ-Endotoxin
- differential inhibition of leucine and aspartic acid uptake into brush border membrane vesicles from *Manduca sexta* midgut (*Bacillus thuringiensis*), **181**, 1089

Endozepine
- stimulation of side-chain cleavage of cholesterol in reconstituted enzyme system, **180**, 609

Energy status
- hepatic, in chronic dietary iron overload, ^{31}P NMR study (rat), **176**, 1262

Energy transfer
- related kinetics of C-phycocyanin from *Westiellopsis prolifica*, analysis by pump-probe techniques, **179**, 558

Enhancers
- AP-1, AP-2, AP-3, and NF-I/CTF, nuclear factors binding, differential expression in various lung cancer cell types (human), **180**, 1064
- role in expression of chicken β^H-globin gene during erythroid differentiation, **177**, 97

Enkephalins
- peroxidase-catalyzed oxidation, **179**, 147

Enoyl-CoA hydratase
- –3-hydroxyacyl-CoA dehydrogenase bifunctional enzyme, import into hepatoma cell peroxisomes *in vitro* (human), **178**, 1084

Entactin
- –fibronectin complex, formation of extracellular matrix in embryonal carcinoma-derived cell line 4CQ, **178**, 1219

Enterocytes
- jejunal, direct conversion of arginine to citrulline, stimulation by D-glucose (pig), **177**, 1171

Enterotoxin receptors
- heat-stable, guanylate cyclase-coupled, cDNA, isolation from human colonic cell line and expression in transfected COS-7 cells, **179**, 1455

Enterotoxins
- heat-stable, produced by enterotoxigenic *Escherichia coli*, carba-analogs, synthesis and biological properties, **176**, 958

Enzymes
- serum, cleaving epidermal inhibitory pentapeptide, identification and partial characterization, **175**, 978

Eosinophilia–myalgia syndrome
- pathogenesis, implications of effects of L-tryptophan product constituents on eosinophil differentiation and interleukin-6 induction (human), **178**, 1008

Eosinophils
- differentiation, effects of L-tryptophan product constituents: implications for pathogenesis of eosinophilia–myalgia syndrome (human), **178**, 1008

- Epidermal growth factor
  - and carbachol, comparative effects on phosphoinositide synthesis and breakdown in pancreatic acinar cells (rat), **178**, 780
  - effect on cholecystokinin-stimulated Cl$^-$ conductance in pancreatic zymogen granules (rat), **181**, 827
  - and hepatocyte growth factor, comparative effects on [Ca^{2+}]$_c$ and inositol trisphosphate production (rat hepatocytes), **181**, 1173
  - induced c-*myc* expression in hepatocytes, increase mediated by prostaglandins E$_2$ and F$_{2\alpha}$ (rat), **178**, 1240
  - inhibition of cholecystokinin octapeptide-induced inositol 1,4,5-trisphosphate production and [Ca^{2+}]$_i$ increase in pancreatic acinar cells (rat), **180**, 900
  - and insulin, induction of DNA synthesis in hepatocytes, enhancement by cholera toxin B subunit (rat), **174**, 372
  - mRNA, content in mammary glands, effects of lactogenic hormones (mouse), **181**, 1063
  - related transforming growth factor, expression by fetal murine salivary mesenchyme cells in culture, **175**, 37
  - signaling pathway, inhibition by lovastatin (human fibroblasts), **180**, 1284
  - stimulation of DNA synthesis in periportal and perivenous hepatocytes, comparison (rat), **181**, 1201
- Epidermal growth factor receptors
  - deletion-mutant, in human glioma D-298 MG, characterization: effect of type II mutation on receptor function, **178**, 1413
  - gene expression in BT-20 mammary carcinoma cells, augmentation by 1,25-dihydroxyvitamin D$_3$, **176**, 1
  - interaction with G$_i$ and G$_s$ proteins in pancreatic acinar cells (rat), **175**, 380
- Epidermal inhibitory pentapeptide
  - cleavage by serum enzyme: enzyme identification and partial characterization, **175**, 978
- Epidermolysis bullosa
  - dystrophic, severe recessive, skin fibroblasts from patients, increased expression of matrix metalloproteinase 3 gene, **174**, 1003
- Epilepsy
  - myoclonus, associated with ragged-red fibers
    - induction by mitochondrial DNA mutation (human), **174**, 1109
    - mitochondrial DNA carrying tRNA^{Lys} mutation in affected patients, quantitation, **179**, 880
- 24(*R*,*S*),25-Epiminolanosterol
  - regulation of sterol biosynthesis (sunflower), **177**, 566
- Epinephrine
  - containing chromaffin cells, presence of muscarinic receptors (bovine), **177**, 913
  - effects on CYP2B1 and CYP2E1 phosphorylation and degradation in isolated hepatocytes (rat), **174**, 37
  - stimulated phosphoinositide turnover in hepatocytes, effect of okadaic acid (rat), **179**, 852
- Episialin
  - encoding gene and promoter, sequencing: rapid evolution of protein repetitive domain (mouse), **181**, 121
- Epithelial cells
  - from cystic fibrosis patients, increased expression of 14-kDa Ca^{2+}-binding protein CFA, **174**, 1281
  - hepatic, protein disulfide isomerase expression, effect of transforming growth factor β1 (rat), **174**, 478
  - intestinal, Caco-2, monolayers as model for analysis of passive drug absorption across intestinal epithelium (human), **175**, 880
  - ovarian surface, response to and expression of amphiregulin (human), **180**, 481
  - renal
    - glomerular, growth factor-like effect of urokinase-type plasminogen activator (human), **176**, 1408
    - intermediate filament and nuclear matrix networks, modification by extracellular matrix (rat), **179**, 340
    - LLC-PK$_1$, Ca^{2+}-dependent cell–cell junctions and E-cadherin immunofluorescence pattern, effect of cadmium (pig), **181**, 1118
    - MDCK
      - development of tight junctions in, role of phosphorylation (dog), **181**, 548
      - motility, effects of hepatocyte growth factor with deletion of kringle domains or N-terminal hairpin structure (dog), **181**, 691
      - P-glycoprotein-mediated vinblastine secretion, inhibition by forskolin derivatives (dog), **181**, 671
    - morphologic transformation *in vitro*, effect of extracellular matrix interactions (rat), **179**, 333
    - OK, synthesis and secretion of cobalamin-binding proteins (opossum), **179**, 543
    - tubular, *in vitro* mitogenic effects of hepatocyte growth factor (rabbit), **174**, 831
  - tracheal
    - detection of forskolin and verapamil-sensitive K$^+$ current (human), **179**, 1155
    - synthesis of platelet-activating factor 1-*O*-hexadecyl molecular species (human, sheep), **177**, 357
  - various types, growth stimulation by hepatocyte growth factor/hepatopoietin A (human, mouse, rat), **174**, 331
- Epithelium
  - bladder, vanadate-sensitive and -resistant H$^+$ transport in isolated vesicles, effects of valinomycin (turtle), **176**, 1285
- Epitope mapping
  - human chorionic gonadotropin receptor-bound agonistic and antagonistic forms, comparison, **178**, 699
- Eponemycin
  - inhibition of angiogenesis in chorioallantoic membranes *in vivo* (chicken embryo), **181**, 1070
- Epoxides
  - and cyanide, β-hydroxynitrile formation from, catalysis by hydrogen-halide-lyase, **180**, 124
- 17*R*(18*S*)Epoxyeicosatetraenoic acid
  - metabolism to prostaglandins in simian seminal vesicles, **178**, 1444
- Equine chorionic gonadotropin
  - and equine luteinizing hormone, β-subunits with identical amino acid sequence: analysis of asparagine-linked oligosaccharide chains, **174**, 940

- Equine infectious anemia virus
  - reverse transcriptase, purification and kinetic characterization, **180**, 1365
- Erythrocytes
  - calpastatin levels, decrease in spontaneously hypertensive rats: relationship to hypertension, **175**, 486
  - detection of 1-alkyl-2-acyl-*sn*-glycero-3-phosphoinositol, **175**, 673
  - distribution of tyrosine- and serine/threonine-protein kinases, effect of intracellular pH changes (human), **178**, 1021
  - fluoride interactions with superoxide dismutase and hemoglobin, ^{19}F NMR study (human), **174**, 163
  - hemin isolation and identification as endogenous NA$^+$/K$^+$-ATPase inhibitor (pig), **178**, 95
  - light-dependent generation of hydroxyl radicals, demonstration by spin trapping (human), **179**, 1305
  - membranes
    - detection of influenza virus-reactive glycophorins (human), **178**, 79
    - normal and sickle, phospholipid packing, effects of inserted oxysterols, **180**, 730
    - scanning tunneling microscopy (human), **181**, 600
- Erythrogenic toxin A
  - induction of heat shock protein expression in neutrophils (human), **179**, 872
- Erythroid differentiation factor
  - effect on megakaryocytic differentiation of megakaryoblastic leukemia cell line L8057 (mouse), **181**, 1042
- Erythrophagocytosis
  - stress protein synthesis during, effects of flavonoids and protein kinase C inhibitors (human), **180**, 308
- Erythropoietin
  - effects on cytosolic free Ca^{2+} levels and thrombin-induced changes in platelets from spontaneously hypertensive rats, **177**, 991
  - and interleukin-3, induced growth and differentiation signals and associated tyrosine kinases, comparison (mouse), **181**, 1103
  - production, inhibition by phorbol ester, association with down-regulation of protein kinase C α isoenzyme in hepatoma cells (human), **179**, 1441
  - recombinant human, N-deglycosylated, biological activity and structural stability, **176**, 698
- D-Erythrulose 1-phosphate
  - slow reversible inhibition of aldolase (rabbit muscle), **176**, 511
- *Escherichia coli*
  - exponentially growing, induction kinetics of RNA and proteins, **180**, 913
  - expression of
    - bovine lung prostaglandin F synthase, **181**, 272
    - full-length nonstructural protein NS1 from bluetongue virus serotype 17, **180**, 994
    - functional β-galactosidase containing coxsackievirus 3C protease, **177**, 243
    - HIV-1 proteinase as part of autocleaving fusion protein: purification of 99-residue proteinase, **175**, 784
    - human cerebral hexokinase: enzyme purification and characterization, **177**, 305
    - human recombinant C3a, **175**, 1131
    - human T-cell leukemia virus type I protease, **181**, 1281
    - murine tyrosine hydroxylase, **178**, 664
    - parathyroid hormone analog (8–84), direction by internal ribosome-binding site, **181**, 481
    - porcine phospholipase A$_2$ and subsequent purification, **176**, 371
    - rat hepatic fructose-1,6-bisphosphatase, **176**, 137
  - gene expression from multicopy T7 promoter vectors in absence of T7 RNA polymerase, **181**, 1056
  - genomic porcine interferon-γ DNA for expression in, cloning by PCR-based exon amplification, **180**, 1408
  - infection by bacteriophage T7: quantifiable phenotype of viral propagation, **174**, 1009
  - *met*H gene, identification of transcriptional start and MetR binding sites, **175**, 1057
  - NAD(P)H oxidation by hydrogen peroxide, **178**, 54
  - plasmid expression of rat thyrotropin receptor: identification of immunogenic region with synthetic peptides, **179**, 319
  - P1-lysogenic, selective expression of cloned genes, T7 infection-dependent system for, evaluation, **179**, 1200
  - purification of recombinant human tumor necrosis factor precursor from, **179**, 683
  - survival at high temperatures, requirement of protease Do, **176**, 730
  - *xth nth nfo* cells, viability and processing of DNA damaged by methylmethane sulfonate, effect of *rec* mutations, **180**, 774
- Esterase
  - activity associated with ACTH synthetic fragments, characterization (human), **177**, 235
- Estradiol
  - effect on growth of Balb/c 3T3 fibroblasts expressing human estrogen receptor, **176**, 1473
- Estradiol-17β
  - effect on osteoblastic MC3T3-E1 cell proliferation in presence of human monocytes, **178**, 866
  - induction of polyaromatic hydrocarbon-inducible cytochrome P450 in liver (chicken), **175**, 928
  - *in vivo* regulation of apolipoprotein A-I gene expression at translational level (mouse), **181**, 1407
- Estradiol 17β-dehydrogenase
  - inhibiting heterocyclic analogs of estrone, analysis: role of hydrogen bonding in steroidogenesis (human), **180**, 1057
- Estrogen receptors
  - alteration of topology of plasmid DNA containing estrogen responsive elements, **176**, 486; *erratum*, **177**, 1325
  - human, expressing Balb/c 3T3 fibroblasts: effect of estradiol on cell growth, **176**, 1473
  - independent inhibition of breast cancer cell growth by genistein (human), **179**, 661
  - on MCF-7 cells, binding to estrogens: differential cell responses depending on type of ligand–receptor interaction, **174**, 276
  - presence in mammary tumors, correlation with naltrexone antitumor activity (rat), **175**, 625
- Estrogens
  - binding to estrogen receptors on MCF-7 cells: differential

cell responses depending on type of ligand–receptor interaction, **174**, 276
induction of c-*fos* expression in uterine luminal and glandular epithelia (rat), **175**, 480
regulated destabilization of *Xenopus* albumin mRNA, role of translation, **174**, 825
responsive elements, plasmid DNA with, topology, alteration by estrogen receptor, **176**, 486; *erratum*, **177**, 1325
responsiveness of bovine and rat oxytocin gene promoters, comparison, **175**, 117
responsive sequences in 5′ proximal flanking region of cathepsin D gene (MCF-7 cells), **174**, 816

Estrone
heterocyclic analogs inhibiting estradiol 17β-dehydrogenase, analysis: role of hydrogen bonding in steroidogenesis (human), **180**, 1057

Ethanol
chronic exposure of NG108-15 cells, effects on nuclear factor binding to cAMP response element, **174**, 25
inducible cytochrome P450, acetaldehyde as substrate (rat), **179**, 689

1,1′-Ethylidene bis(tryptophan)
effects on eosinophil differentiation and interleukin-6 induction: implications for pathogenesis of eosinophilia–myalgia syndrome (human), **178**, 1008

N-Ethylmaleimide
differential effects on agonist binding to A_1 adenosine receptors in presence and absence of ligand (porcine brain), **181**, 213
differentiation of endothelial cell-derived metalloproteinases with endothelin converting activity (porcine aorta), **178**, 531

5-Ethynyl-1-β-D-ribofuranosylimidazole-4-carboxamide
potentiation of 2′,3′-dideoxyinosine inhibition of HIV replication in peripheral blood lymphocytes, **178**, 563

Evolution
Alu repeats surrounding ferredoxin gene (human), **177**, 120
RAS protein family: comparative analysis of full-length amino acid sequences, **176**, 1130
significance of sequences of tissue-specific parvalbumins from chicken muscle and thymus, **181**, 226

Excitation
–contraction, uncoupling during ischemia in blood-perfused heart (dog), **179**, 502

Excretion
fecal, labeled diacylglycerol after oral administration (rat), **181**, 1028

Exercise
induced muscular injury, protective effect of coenzyme Q_{10} (rat), **176**, 349
muscular, phosphate transport rate during recovery from, correlation with cytosolic pH, ^{31}P NMR study (human), **178**, 871
subsequent phosphate transport kinetics in skeletal muscle, *in vivo* NMR study (human), **176**, 1204

Exocytosis
in colonic goblet cells, visualization by video-enhanced light microscopy (rabbit), **176**, 466
mast cell, analysis: role of granule proteoglycan processing in degranulation (dog), **179**, 140

Exoenzyme C3
ADP-ribosylation of small G proteins in bovine neutrophils, effect on cell motility (*Clostridium botulinum*), **180**, 615

Exoenzyme S
from *Pseudomonas aeruginosa*, glycolipid receptor binding specificity, **175**, 1076

Exotoxin A
C-terminal amino acid residues, role in cell toxicity and pathogenesis, characterization (*Pseudomonas aeruginosa*), **180**, 1498

Extracellular matrix
cell interactions with, effects on morphologic transformation *in vitro* (rat), **179**, 333
consisting of entactin–fibronectin complex, synthesis in embryonal carcinoma-derived cell line 4CQ, **178**, 1219
hepatic, sequestration of hepatocyte growth factor (rat), **174**, 90
modifications of intermediate filament and nuclear matrix networks in renal epithelial cells (rat), **179**, 340
and/or osteoblast cell surface, association with osteoclast resorption-stimulating activity (rat), **181**, 67

Eye, *see specific parts*

F

Fab fragments
thyroid peroxidase-specific, generation by cloning thyroid lymphocyte-derived Ig genes in bacteriophage λ library (human), **179**, 372

Factor II, *see* Prothrombin

Factor VIII
and von Willebrand factor, binding affinity, definition (human), **180**, 231

Factor XIII
osteopontin function as substrate (human), **177**, 1205

Farnesyl-diphosphate farnesyltransferase
inhibition by prenyl substrate analogs (IM-9, Molt-4 cells), **181**, 729

Farnesyl transferase, *see* Farnesyl-diphosphate farnesyltransferase

Fatty acid lyase
and dioxygenase activities, occurrence in single protein: oxodiene formation during lipoxygenase-catalyzed reaction (vetch), **180**, 1002

Fatty acids
competitive inhibition of triiodothyronine binding to α_1 and β_1 thyroid hormone receptors, **179**, 1011
differential regulation of calmodulin-dependent and -independent cAMP phosphodiesterases (quail oviduct), **177**, 324
and fatty acyl CoA esters, differential interaction with purified/reconstituted mitochondrial uncoupling protein (hamster brown adipose tissue), **175**, 1104
hepatic metabolism, effects of spontaneous diabetes (rat), **176**, 1157

- *in situ* binding to liver fatty acid-binding protein, analysis with 3-[^{125}I]iodo-4-azido-N-hexadecylsalicylamide (Hep G2 cells, rat hepatocytes), **180**, 407
- long-chain, acylation of adipocyte proteins, stimulation by insulin (rat), **177**, 797
- monounsaturated, dietary, upregulation of hepatic expression of apolipoprotein A-I gene (rat), **180**, 162
- very-long-chain, peroxisomal oxidation in dermal fibroblasts (human), **178**, 842

Fatty-acid synthase
- gene expression in hepatocytes, suppression by arachidonic acid (rat), **177**, 1056

Fatty acyl CoA esters
- and fatty acids, differential interaction with purified/reconstituted mitochondrial uncoupling protein (hamster brown adipose tissue), **175**, 1104

Fc receptors
- and complement receptors, mediated phagocytosis, comparative effects on macrophage hydrogen peroxide production and phagocytic function (rat), **180**, 268
- crosslinking in human neutrophils and rat basophilic leukemia cells: tyrosine phosphorylation as common early signaling event, **177**, 192
- FcεR1, related signalling pathway, functional responses in, role of tyrosine kinase (RBL-2H3 cells), **179**, 551
- role in augmented luminol-enhanced chemiluminescence displayed by thrombospondin-exposed monocytes (human), **177**, 1087

Fecapentaene-12
- effects on protein kinase C, **176**, 505

Ferredoxin
- gene, surrounding *Alu* repeats, evolution (human), **177**, 120

Ferredoxin–NADP$^+$ reductase
- and adrenodoxin and P450scc, reconstituted system, side-chain cleavage of cholesterol, stimulation by endozepine, **180**, 609

Ferrocene
- derivatives, permeation through planar bilayer lipid membrane, microvoltammetric study, **180**, 1330

Ferrochelatase
- encoding gene, associated with human erythropoietic protoporphyria, identification of two point mutations, **181**, 594

Ferrocytochrome *c*-551
- proton resonance assignments (*Pseudomonas aeruginosa*), **178**, 309

α-Fetoprotein
- and albumin, gene expression in HuH-7 hepatoma cells, differential regulation by transforming growth factor β1 (human), **174**, 1294; *erratum*, **175**, 1165

Fetuin
- separation of muscle growth-promoting activity from, **178**, 959

Fetus
- trisomy 16-affected, neural dysgenesis and increased neuronal production of class I MHC H-2K^k mRNA and protein, relationship (mouse), **179**, 102

Fiber cells
- specific 94-kDa protein, defect in lens of inherited microphthalmic mutant *Elo* mouse, **179**, 1175

Fibrils
- amyloid, formation, acceleration by Gln for Glu substitution in peptides homologous to amyloid, **179**, 1247; *erratum*, **180**, 1528
- amyloid-like, *in vitro* formation by transthyretin and synthetic fragments, **175**, 1159

Fibrin
- fragments, role in fibrinogen synthesis by hepatoma cells (rat), **175**, 562

Fibrinogen
- binding domain, of glycoprotein IIb/IIIa, peptides APLHK, EHIPA, and GAPL as hydropathically equivalent peptide mimics, **180**, 1446
- binding by platelets, thrombin-induced, inhibition by DUP 714 (human), **179**, 1500
- degradation products, effects on plasmin denaturation and kringle domains (human), **178**, 360
- γ chain 259–411, mutagenesis: characterization of role of disulfide bond Cys326–Cys339 in calcium binding (human), **174**, 853
- synthesis by hepatoma cells, role of fibrin fragments (rat), **175**, 562

Fibroblast growth factor
- acidic
  - monoclonal antibodies: preparation, characterization, and use in enzyme immunoassay (human), **175**, 291
  - mRNA, amplification and sequencing (porcine heart), **180**, 853
- basic
  - autocrinological role in tube formation of vascular endothelial cells *in vitro* (bovine), **180**, 1098
  - effect on proliferation of neuroblastoma cells with normal and enhanced *MYCN* oncogene expression (human), **179**, 1449
  - increased expression in normal renal fibroblasts after transformation by simian sarcoma virus (rat), **180**, 423
  - induction of cytosolic Ca^{2+} mobilization in pancreatic acinar cells (rat), **177**, 166
  - induction by platelet-derived growth factor, role in PDGF stimulatory effect on vascular smooth muscle cell migration, **174**, 1260
  - inhibition of
    - gastric acid and pepsin secretion (rat), **175**, 527
    - gastric ulceration via central nervous system (rat), **177**, 809
  - phosphorylation by
    - neutrophil ecto-protein kinase (human), **174**, 49
    - protein kinase C: identification of cryptic phosphorylation site, **175**, 31
  - sandwich enzyme immunoassay (human), **175**, 229
  - serum levels, increase in renal cell carcinoma patients, **180**, 386
  - stimulation of prostaglandin $F_{2\alpha}$ and progesterone production in corpus luteum (rat), **178**, 393
  - up-regulation of fibroblast growth factor receptor mRNA levels in murine mammary tumor cells, **174**, 136

Fibroblast growth factor receptors
  altered expression in neuroblastoma cells, association with enhanced *MYCN* oncogene expression (human), **179**, 1449
  ectoplasmic domain, cDNA, isolation from fibroblasts (mouse), **178**, 8
  expression of two isoforms, direction by alternative gene splicing (human), **174**, 946
  gene expression in glioma and meningioma tissue samples (human), **177**, 1
  mRNA levels in murine mammary tumor cells, up-regulation by basic FGF or testosterone, **174**, 136
  in SC-3 breast cancer cells, cDNA cloning (mouse), **176**, 31
Fibroblasts
  N-acetylgalactosamine-6-sulfatase-deficient, expression of transfected enzyme cDNA, **181**, 677
  BALB/c 3T3
    expressing human estrogen receptor: effect of estradiol on cell growth (mouse), **176**, 1473
    transformed, myristoylated alanine-rich protein kinase C substrate in, decreased expression, **178**, 494
  BALB3T3, overexpression of β-galactoside-binding protein, association with transformation (mouse), **179**, 272
  BHK-21, intermediate filament, selective dissociation by cetyltrimethylammonium bromide, **175**, 768
  C127, overexpression of recombinant human type II phospholipase A_2, enhancement of stimulated arachidonic acid release, **178**, 1298
  CEF
    fra-2 gene transcription and Fra-2 protein phosphorylation, stimulation by serum (chicken embryo), **174**, 934
    thymidine secretion, quantification and time course (chicken embryo), **177**, 259
  C3H10T1/2
    identification of soluble 70-kDa serine proteinase inhibited by Bowman–Birk inhibitor (mouse), **178**, 856
    phorbol ester-enhanced X-ray-induced transformation, suppression by protease inhibitors: role of protein kinase C (mouse), **176**, 18
  derived tumor cytotoxic factor/hepatocyte growth factor, cDNA cloning, purification, and characterization (human), **180**, 1151
  dermal
    cholesterol synthesis, role of peroxisomes (human), **181**, 537
    from patients with severe recessive dystrophic epidermolysis bullosa, increased expression of matrix metalloproteinase 3 gene, **174**, 1003
    peroxisomal oxidation of very-long-chain fatty acids (human), **178**, 842
  detection of binding sites for inhibitory diffusible factor 45/mIGFBP-3 (chicken embryo), **179**, 495
  digestion of collagen, suppression by Z-Phe–AlaCH_2F selective inhibition of cysteine proteinases (rabbit calvariae), **178**, 178
  diploid
    FS-4, tumor necrosis factor-stimulated proliferation, antagonism by prostaglandins (human), **174**, 758
    TIG-1, life span extension, cooperative effect of antisense-retinoblastoma and antisense-p53 oligomers (human), **179**, 528
  embryonic, natural and conditional aging: genetic vs epigenetic control (mouse), **178**, 269
  eukaryotic gene expression, effects of non-B DNA sequences (Chinese hamster), **181**, 818
  expression of proteoglycan and glycosaminoglycan free chains (chicken, mouse), **179**, 1281
  gene expression in, inhibition and enhancement by potential non-B DNA sequences (hamster), **180**, 1273
  growth factor signaling pathways, inhibition by lovastatin (human), **180**, 1284
  in infantile α-*N*-acetylgalactosaminidase deficiency, defective processing of enzyme precursor, **175**, 1097
  JAS 3, fibronectin mRNA splicing, changes with *in vitro* passage (human fibroblasts), **178**, 620
  membrane permeability, effect of A23187 (mouse), **178**, 830
  NIH 3T3
    mitogenic effects of midkine (mouse), **177**, 652
    platelet-derived growth factor-stimulated, formation pathway of D-3 phosphate-containing inositol phospholipids (mouse), **175**, 568
    polyoma middle T-transformed, bradykinin-induced $[Ca^{2+}]_i$ oscillation, role of protein kinase C, **176**, 813
    ras-transformed, bradykinin-evoked Ba^{2+} current oscillation in (mouse), **178**, 713
    sorting of lysosomal enzymes, effect of insulin-like growth factor II overexpression (mouse), **179**, 108
    thymidine secretion, quantification and time course (mouse), **177**, 259
    tissue transglutaminase induction by retinoids, **175**, 1119
    transformant induced by *ret*^{TPC}, TPA responsive element motif, phosphorylation state and activity (mouse), **179**, 1331
  NRK
    expressing human c-*fos* gene, altered response to growth factors and retinoic acid (rat), **181**, 1273
    ts110-MSV-M-transformed, temperature-sensitive synthesis of metalloproteinase (rat), **178**, 453
  primary, treatment with okadaic acid, induction of vimentin hyperphosphorylation (human), **177**, 1165
  pulmonary
    CCL-39, thymidine incorporation in absence of serum or growth factors, stimulation by ceruloplasmin (Chinese hamster), **180**, 790
    type III procollagen predominance over type I on cell surface (rat), **174**, 1048
  Rat-1
    differential internalization kinetics of human insulin receptor isoforms A and B, **177**, 1013
    *rap*1 protein phosphorylation by protein kinase A: lack of kinase effect on *rap*2 protein, **175**, 430
  renal, transformation by simian sarcoma virus, association with increased basic fibroblast growth factor expression (rat), **180**, 423

stably transfected, transmembrane signalling by N-formyl peptide receptor (mouse), **179**, 471
  Swiss 3T3
    expression of tyrosinase cDNA (mouse), **178**, 739
    large-conductance chloride channels, activation by bombesin, **177**, 292
    protein kinase C
      distribution during mitogenic stimulation with insulin-like growth factor I and bombesin, temporal changes, **177**, 480
      down-regulation, relationship to phosphorylating activity (mouse), **176**, 1227
  synovial, urokinase-type plasminogen activator, stimulation by oncostatin M (human), **180**, 652
  tendon, steady-state levels of collagen I $\alpha 1$ and $\alpha 2$ chain and prolyl 4-hydroxylase α-subunit mRNAs during growth, correlation (chicken embryo), **174**, 169
  3T3-L1, F_A and casein kinase II stimulation by insulin, **177**, 1019
  tumoral, reverse transcription intermediate for marked LINE transposon in, evidence (rat), **181**, 863
  virus-transformed, exhibition of increased resistance to monensin and nigericin (mouse, rat), **174**, 483
Fibronectin
  B16 melanoma cell adhesion to, effects of cyclic RGD peptides, **177**, 74
  encoding gene, 5′ region, mapping of DNase I-hypersensitive sites (rat liver), **181**, 131
  –entactin complex, formation of extracellular matrix in embryonal carcinoma-derived cell line 4CQ, **178**, 1219
  gene expression, changes during matrix-induced bone formation (rat), **177**, 427
  –integrin binding, promotion of hyperpolarization in erythroleukemia cells (mouse), **177**, 1266
  mRNA splicing, changes with *in vitro* passage (human fibroblasts), **178**, 620
Filaments
  intermediate, *see* Intermediate filament
  paired helical, in Alzheimer's disease, presence of glycolipid in core structure (human), **181**, 771
Fimbriae
  component protein, purification, characterization, and immunolocalization (*Porphyromonas gingivalis*), **175**, 713
FK-506
  binding protein FKBP
    effect on protein kinase C (human), **180**, 846
    sequence comparison with ryanodine receptor (rabbit muscle), **178**, 1288
    stabilization by ligand binding, **179**, 741
Flagella
  spermatozoal, inner arm ATPase fraction inducing axonemal outer doublet microtubule sliding, purification and properties (sea urchin), **175**, 173
Flavin reductase
  green heme binding, and flavin reductase, evidence for identical protein components (bovine erythrocytes), **178**, 315
Flavobacterium sp.
  pentachlorophenol-degrading, cell-free extracts, biodegradation of triiodophenol, **174**, 43
Flavonoids
  prevention of stress protein synthesis during erythrophagocytosis (human), **180**, 308
N-(5-Fluoresceinyl),*N*′-(3-boronatophenyl)thiourea
  cis vic-diol group-specific, role in direct labeling of DNA adducts formed from carcinogenic diol-epoxides, **180**, 1233
Fluorescence
  nanosecond, tryptophan residues in cytochrome $P450_{scc}$, effect of substrate binding, **181**, 1493
Fluorescence postlabeling assay
  nuclease P_1-mediated, AAF-modified d(TACGTA) and bovine thymic DNA, description, **177**, 151
Fluorescence spectroscopy
  synchronous scan, bovine crystallins and human ocular lenses, **176**, 1351; *erratum*, **177**, 1325
Fluorescent indicators
  for calcium and magnesium, rate constants, ion selectivity, and thermodynamic properties: effects of pH, **177**, 184
Fluorescent labeling
  tubulin, rhizoxin derivatives as probe, **178**, 558
Fluorescent probes
  apohorseradish peroxidase-complexed, oxygen quenching: oxygen diffusion near HRP heme binding site, **178**, 104
  partition coefficients with phospholipid membranes, **181**, 166
  for retinoic acid receptors
    design and preparation, **179**, 259
    molecular measures for ligand binding pocket (HeLa cells), **180**, 249
  terbium(III), in analysis of calcium-binding sites on bovine serum albumin, **177**, 474
Fluoride
  interactions with superoxide dismutase and hemoglobin in erythrocytes, ^{19}F NMR study (human), **174**, 163
6-Fluorobenzo(c)phenanthrene
  conversion to K-region oxide by hepatic microsomes from 3-methylcholanthrene-treated rats: fluoro group-mediated reversal of cytochrome P450 stereoselectivity, **181**, 1516
Fluorometry
  in characterization of dityrosine: complex formation with boric acid and borate ion, **178**, 60
  continuous
    in assay of phosphorylase kinase (rabbit muscle), **174**, 344
    protein kinase C synthetic peptide substrate, **176**, 1454
  micro-, *see* Microfluorometry
FMRF-amide
  and L-Arg–L-Phe, augmentation of blood pressure and heart rate in anesthetized rats, mechanism, **175**, 318
Follicle-stimulating hormone
  interaction with FSH receptor, role of sulfhydryl groups, **176**, 1256

- receptor-binding regions, sense–antisense similarity to FSH receptor (human), **179**, 266
- secretion
  - in pituitary cell culture, stimulation by endothelin-3 (rat), **174**, 338
  - by rat anterior pituitary cells, suppression by recombinant human follistatin mutants, **179**, 352

Follicle-stimulating hormone receptors
- cDNA cloning and sequencing (human), **175**, 1125
- and FSH receptor-binding regions, sense–antisense similarity (human), **179**, 266
- interaction with FSH, role of sulfhydryl groups, **176**, 1256

Follistatin
- gene expression during early embryonic development (*Xenopus laevis*), **174**, 1022
- mRNA, ontogeny of steady-state levels in tissues, prediction of organ-specific functions (rat), **180**, 223
- site-specific mutagenesis (human), **179**, 352

Footprinting
- sigma subunit of DNA-directed RNA polymerase, reevaluation (*Escherichia coli*), **177**, 140

Formaldehyde
- treated albumin, monomeric and polymeric fractions, clearance by hepatic endothelial and Kupffer cells: scavenger receptor heterogeneity (rat), **180**, 23

Formaldehyde dehydrogenase
- glutathione-dependent, identity with class III alcohol dehydrogenase (human liver), **178**, 1371

N-Formyl-methionyl-leucyl-phenylalanine
- effect on neutrophils, comparison with *Icaria* chemotactic peptide and $[\text{Lys}^7]$ analog, **175**, 165
- and neutrophil-activating peptide/IL-8, differential effects on PAF and leukotriene B_4 production by neutrophils (human), **176**, 972
- stimulated neutrophils, oxidative burst response, inhibition by serum amyloid A (human), **176**, 1100

N-Formyl peptide receptors
- components, isolation and partial characterization (human neutrophils), **174**, 84
- mediated transmembrane signaling, analysis in stably transfected fibroblasts (mouse), **179**, 471

Forskolin, *see* Colforsin

Fructose-1,6-bisphosphatase
- rat hepatic, expression in *Escherichia coli*, **176**, 137

Fructose-2,6-bisphosphate
- muscular levels, increase in patients with glycogenosis types V and VII, **176**, 7

Fructose-bisphosphate aldolase
- isozyme B, gene regulatory regions: liver-specific proximal promoter and intronic activator (rat), **176**, 722
- isozyme C, gene structure and regional expression (rat brain), **174**, 1035
- slow reversible inhibition by D-erythrulose 1-phosphate (rabbit muscle), **176**, 511

Fructose 6-phosphatase,2-kinase:fructose 2,6-bisphosphatase
- cardiac, characterization of isozymic forms (bovine), **180**, 470

Fulicin
- D-asparagine-containing, isolation from ganglia (*Achatina fulica*), **178**, 486

Fumagillin
- synthetic analog AGM-1470, anti-angiogenic action, comparison with parent compound, **174**, 1070

Furanose ring
- 2′,3′-dideoxynucleosides with anti-HIV activity, ^{1}H NMR study, **179**, 386

G

Galactose
- dependent expression of recombinant aequorin in yeast cells, evaluation, **174**, 115
- residues, glucuronosyl transfer to, in biosynthesis of HNK-1 antigens and xylose-containing glycosaminoglycans, enzymes involved, **179**, 416

α-Galactosidase
- isozyme purification and characterization (coffee bean), **181**, 1564

β-Galactosidase
- functional, containing coxsackievirus 3C protease, expression in *Escherichia coli*, **177**, 243

β-Galactoside
- binding lectin, purification and characterization (frog eggs), **178**, 407
- binding protein, overexpressed during glucocorticoid-induced cell death, cDNA clone, isolation (CEM C7 cells), **178**, 746

Galactosides
- surfaces, hepatocyte adhesion to, associated redistribution of coated pits and asialoglycoprotein receptors to substratum (rat), **180**, 1304

Galactosylceramide
- sulfated, activation of and binding to erythrocyte multicatalytic proteinase (human), **174**, 1133

α1→3 Galactosyltransferase
- pseudogene, sequence homologous to, identification in human genomic DNA, **175**, 986

β-1,4-Galactosyltransferase
- gene structure and expression (human), **176**, 1269

Gangliosides
- GM_1, suppression of complement-dependent phagocytosis of liposomes, **176**, 866
- GM_2, activator protein, cDNA isolation, sequencing, and expression (human), **177**, 1217
- GM_3, stimulation of low-density lipoprotein uptake and processing by macrophages (mouse), **177**, 582
- hepatic levels, effect of partial hepatectomy (rat), **174**, 638
- sulfated, inhibition of human immunodeficiency virus type 1 infection, **175**, 1

Gastric acid
- secretion, inhibition by basic fibroblast growth factor (rat), **175**, 527

Gastrin receptors
- detection in gastric carcinoid tumor membrane preparation (*Mastomys natalensis*), **177**, 739

Gastrin-releasing peptide
- related immunoreactive substance
  - high levels in human milk, **176**, 931

    level and origin in mammary gland and role during pregnancy (rat), **180**, 455
Gastrointestinal tract
  mammalian, islet amyloid polypeptide identification and characterization, **181**, 293
Gastrotropin
  identification of rat ileal 14-kDa bile acid transport protein as, **177**, 1147
GDP
  dialdehyde analog, effect on NADPH oxidase cytosolic components (human neutrophils), **177**, 504
  –eIF-2, conversion to GTP–eIF-2 by eIF-2B, requirement of Met-tRNA$_f^{Met}$, **181**, 1500
GDP dissociation inhibitor
  for *rho* proteins, tissue and subcellular distributions (rat), **175**, 199
  for *smg* p25A, tissue and subcellular distribution, antibody-based study (rat), **174**, 556
GDP dissociation stimulator
  smg, induced *smg* p21 activation, initiation by protein kinase A phosphorylation of *smg* p21, **177**, 1319
Gelatinase
  –type IV collagenase, 68–72-kDa and 92-kDa enzymes secreted by invasive human fibrosarcoma, comparative role in invasion, **181**, 1539
Gel electrophoresis
  with constant field, *Saccharomyces pombe* chromosomes in agarose gel, **179**, 482
  low-temperature, detection of endothelin-1–binding protein complex, **176**, 392
  polyacrylamide, in immunochemical detection of dystrophin in tissue and cell culture homogenates (human, mouse, rat), **181**, 1164
  and polymerase chain reaction, genotyping of apolipoprotein B 3′ hypervariable region by, comparison, **181**, 846
Genes
  acid β-galactosidase, organization, **178**, 158
  acid α-glucosidase, expression and promoter region identification (human), **176**, 1509
  actin
    isolation and partial characterization (*Ascaris suum*), **178**, 578
    overexpression, association with *Candida albicans* morphogenesis, **179**, 423
  acyl-CoA oxidase, identification of two *cis*-acting regulatory sequences in peroxisome proliferator-responsive enhancer region (rat liver), **175**, 866
  ada, transcription, inhibitory effects of cadmium and mercury, **179**, 1517
  ADH6, cloned, enzymatic properties (human), **181**, 743
  adult skeletal muscle, expression and assignment to chromosome 11p15 (human), **180**, 1241
  albumin and α-fetoprotein, expression in HuH-7 hepatoma cells, differential regulation by transforming growth factor β1 (human), **174**, 1294; *erratum*, **175**, 1165
  alcohol dehydrogenase, single-stranded, injection into *Drosophila*, subsequent tissue-specific expression, **174**, 1300
  aldolase B, regulatory regions: liver-specific proximal promoter and intronic activator (rat), **176**, 722
  aldolase C, brain-specific, structure and regional expression (rat), **174**, 1035
  alkaline phosphatase
    bone/liver/kidney/placenta-type, alternative promoters, role in tissue-specific and dexamethasone-inducible enzyme expression (rat), **176**, 1149
    bone/liver/kidney-type, relative promoter for exon 1B, characterization: cell- and tissue-specific expression (mouse), **179**, 1352
  angiotensin I-converting enzyme, cosegregation with blood pressure in F_2 generation from WKY/SHRSP cross (rat), **181**, 941
  angiotensinogen, expression in transgenic mice and transfected cells (human), **180**, 1103
  angiotensin II receptor, regulation (rat), **177**, 299
  apolipoprotein A-I, expression regulation *in vivo* by estradiol and testosterone at translational level (mouse), **181**, 1407
  apolipoprotein B, identification of upstream suppressor site (human), **176**, 1116
  arylamine *N*-acetyltransferase, partial nucleotide sequences and restriction maps (human liver), **177**, 1252
  arylphorin, complete sequence (*Calliphora vicina*), **177**, 963
  bacteriophage T4, regulatory signals, chimeric phage for estimation, construction method, **179**, 620; *erratum*, **180**, 462
  bilirubin UDP-glucuronosyltransferase, defect in hyperbilirubinemic Gunn rat, characterization, **177**, 1161
  ble, as selectable marker for *Dictyostelium discoideum*, conferral of phleomycin resistance (*Streptoalloteichus hindustanus*), **180**, 1403
  bone matrix and cartilage, changes in expression during matrix-induced bone formation (rat), **177**, 427
  brown, murine, human homolog CAS2, mapping to human chromosome 9p22–pter, **178**, 227
  calcineurin catalytic subunit, chromosomal mapping (human), **181**, 252
  calcitonin/calcitonin gene-related peptide I, point mutation, deregulation of pre-mRNA alternative processing, **178**, 985
  cAMP response element in, binding to nuclear factors, effects of chronic exposure to morphine or ethanol (NG108-15 cells), **174**, 25
  CAS2 protein, homologous to murine *b* locus, mapping to chromosome 9p22–pter (human), **178**, 227
  cathepsin D, identification of estrogen-responsive sequences in 5′ proximal flanking region (MCF-7 cells), **174**, 816
  C4b-binding protein α-chain, organization (human), **174**, 222
  c-EJ-Ha-*ras*, transfected adrenocortical cells, aldosterone synthesis, stimulation by ACTH and angiotensin II (rat), **175**, 596
  c-*erbB*-2, encoded protein, induction of short-term growth of murine FDC-P2 cells after interleukin-3 depletion, **181**, 981

c-*fos*
  and c-*jun*
    and *jun-B*, induction by angiotensin II, effects of atrial natriuretic polypeptide (rat vascular cells), **176**, 1601
    transcript levels in liver, increase associated with aging (rat), **178**, 1485
  expression in uterine luminal and glandular epithelia, induction by estrogen (rat), **175**, 480
  human, expressing NRK cells, altered response to growth factors and retinoic acid, **181**, 1273
  transcriptional activation by phorbol ester, mediation by dyad symmetry element (human T cells), **181**, 353
CFTR, retrovirus-mediated transfer to pancreatic adenocarcinoma cells from cystic fibrosis patient, decrease of intracellular pH (human), **180**, 342
c-*jun*
  and c-*fos*
    and *jun-B*, induction by angiotensin II, effects of atrial natriuretic polypeptide (rat vascular cells), **176**, 1601
    transcript levels in liver, increase associated with aging (rat), **178**, 1485
  constitutive expression in cell lines infected with HTLV-I/II, **181**, 976
cloned, selective expression in P1-lysogenic *Escherichia coli*, T7 infection-dependent system for, evaluation, **179**, 1200
CLS4/CDC24, encoded protein, *DBL*-homologous region, role in Ca^{2+}-modulated bud assembly (yeast), **181**, 604
c-*myc*
  activation, dissociation from mitogenic responses of neonatal vascular smooth muscle cells (rat), **181**, 617
  cell density-dependent expression in hepatocytes (rat), **178**, 480
  EGF-induced expression in hepatocytes, increase mediated by prostaglandins E_2 and $F_{2\alpha}$ (rat), **178**, 1240
  enhanced expression during tumorigenesis of v-Ha-*ras*-expressing murine pre-B cell line, **178**, 1343
  expression during podophyllotoxin-induced IW32 erythroleukemia cell differentiation (mouse), **179**, 1241
  mRNA for, expression in adipose tissue, muscle, and liver, effect of dietary manipulation (chicken), **180**, 1
  transactivation by full-length and truncated versions of hepatitis B virus X protein, **176**, 985
collagen
  α1(I) and α2(I) chains, coordinately expressed promoters, conservation of binding sites for regulatory factors (mouse), **177**, 538
  type VII, expression in normal and transformed epidermal keratinocytes in culture, up-regulation by transforming growth factor β (human), **180**, 673
C-type natriuretic peptide, isolation and structural analysis (human), **175**, 645
cytochrome aa_3, molecular cloning (*Halobacterium halobium*), **181**, 316
cytochrome *b*, mutations in Leber hereditary optic neuropathy (human), **181**, 1358
cytochrome b_5, isolation of hepatic and reticulocyte mRNAs (human), **178**, 38
cytochrome-*c* oxidase subunits, cloning: subunit II nucleotide and amino acid sequence (*Synechococcus vulcanus*), **181**, 437
cytochrome $P450_{\text{aldo}}$ and $P450_{11\beta}$, 5′-flanking regions, structural differences (rat), **180**, 1187
cytochrome P450 steroid hydroxylase, localization in *Hind*III fragment of genomic DNA (*Rhizopus nigricans*), **178**, 1078
cytokine, expression kinetics in lipopolysaccharide-stimulated whole blood (human), **174**, 18
determining serotype specificity of *Vibrio cholerae* O1, identification, **175**, 679
dopamine D_3 receptor, transcription: shorter variants produced by different alternative splicing processes (rat), **176**, 1584
early growth response, Egr-1, antisense oligonucleotide against, inhibition of endothelin-1-induced myocardial protein synthesis (rat), **181**, 22
EB4-PSV, isolation from *Dictyostelium* gene disruption transformant: library-independent cloning of DNA adjacent to vector integration sites, **181**, 884
elastin, expression in smooth muscle cells, effect of β-aminopropionitrile *in vitro* (rat), **179**, 939
epidermal cell differentiation inhibitor, cloning and sequencing (*Staphylococcus aureus*), **174**, 459
epidermal growth factor receptor, expression in BT-20 mammary carcinoma cells, augmentation by 1,25-dihydroxyvitamin D_3, **176**, 1
episialin, and promoter, sequencing: rapid evolution of protein repetitive domain (mouse), **181**, 121
expression in
  eukaryotic cells, inhibition and enhancement by potential non-B DNA sequences, **180**, 1273; **181**, 818
  vascular smooth muscle cells, modulation by high- and low-density lipoproteins (human), **178**, 1465
familial adenomatous polyposis, chromosome 5 with, tumor-suppressive activity (human), **174**, 298
fatty acid synthase, expression in hepatocytes, suppression by arachidonic acid (rat), **177**, 1056
ferredoxin, surrounding *Alu* repeats, evolution (human), **177**, 120
ferrochelatase, associated with human erythropoietic protoporphyria, identification of two point mutations, **181**, 594
α-fetoprotein and albumin, expression in HuH-7 hepatoma cells, differential regulation by transforming growth factor β1 (human), **174**, 1294; *erratum*, **175**, 1165
fibroblast growth factor receptor
  expression in glioma and meningioma tissue samples (human), **177**, 1
  isolation and analysis of FGF receptor isoform expression (human), **174**, 946
fibronectin, 5′ region, mapping of DNase I-hypersensitive sites (rat liver), **181**, 131
follistatin, expression during early embryonic development (*Xenopus laevis*), **174**, 1022
fra-2, transcription in chicken embryo fibroblasts, stimulation by serum, **174**, 934

- β-1,4-galactosyltransferase, structure and expression (human), **176**, 1269
- α-globin
  - 1.7-kbp DNA fragment containing, sequence-specific protein binding sites, correlation with replication and matrix binding (chicken), **179**, 512
  - replication origin, mapping of nearby nuclear matrix attachment regions and topoisomerase II binding and reaction sites (chicken), **177**, 265
- β^H-globin, enhancer-dependent expression during erythroid differentiation (chicken), **177**, 97
- glucose transporter
  - expression in
    - liver and muscle of obese and diabetic rats, **175**, 995
    - small intestine of streptozotocin-induced diabetic rat, **181**, 1110
  - GLUT1 and GLUT3, expression analysis in different mammalian species, **174**, 470
- γ-glutamyl transpeptidase, tissue-specific methylation in 5′ flanking region (rat), **177**, 229
- glutathione synthetase large subunit, cloning and sequencing (*Schizosaccharomyces pombe*), **181**, 430
- glutathione transferase
  - class H_b, identification as dispersed family (human), **180**, 15
  - class π
    - minimal promoter and downstream *cis*-acting element (human), **176**, 233
    - negative element, binding silencer factor B, similarity to or identity with *trans*-activator LAP/IL6-DBP, **179**, 293
  - subunit 1, sequencing, chromosomal assignment, and expression (fruit fly), **178**, 1205
- glycophorin A, full-length, construction by recombinant polymerase chain reaction (mouse), **177**, 202
- heat shock proteins 60 and 10 of thermophilic bacterium PS3, structure, **179**, 565
- hemopoietic specific, encoding small G protein, overexpression during T-cell activation (human), **175**, 451
- histamine H_2 receptor, cloning and
  - sequencing (human), **178**, 1386
  - tissue expression (rat), **179**, 1470
- histo-blood group ABH, sequence homologous to, identification in human genomic DNA, **175**, 986
- histone H3 and H4, regulatory regions, interaction with sequence-specific DNA-binding proteins (wheat), **176**, 1593
- HLA-DRα, methylation pattern, analysis in transgenic mice, **175**, 459
- H-protein, partial structure (human), **178**, 1072
- *htrA*, product identity with *Escherichia coli* protease Do, **176**, 730
- hydroxysteroid sulfotransferase-a, age- and gender-related expression in liver (rat), **175**, 1051
- immunoglobulin, thyroid lymphocyte-derived, cloning in bacteriophage λ library, in generation of human Fab fragment specific for thyroid peroxidase, **179**, 372
- immunophilin FKBP-12, assignment to chromosome 20 (human), **179**, 1427
- insulin, restriction fragment length polymorphism, nonassociation with essential hypertension (human), **181**, 486
- insulin-like growth factor I, transcription initiation in two leader exons, occurrence from disperse versus localized sites (rat), **176**, 887
- insulin-like growth factor-binding protein IGFBP-2, structure and chromosomal localization (human), **176**, 1250
- insulin-like growth factor I receptor
  - expression from blastoderm stage through organogenesis (chicken embryo), **176**, 1393
  - promoter region, analysis (human), **177**, 1113
- insulin receptor
  - expression from blastoderm stage through organogenesis (chicken embryo), **176**, 1393
  - restriction fragment length polymorphism, association with essential hypertension (human), **181**, 486
  - transactivation by CAAT/enhancer-binding protein (human), **174**, 721
- interleukin-8, expression in synovial cells, induction by interleukin-1 (human), **174**, 411
- interleukin-8/neutrophil-activating peptide-1 family, induction in T cells, suppression by cyclosporin A (human), **181**, 179
- interphotoreceptor retinoid-binding protein, retina-specific expression from promoter in transgenic mice, conferral by 212 bp of 5′-flanking region (human), **181**, 159
- *jun-B*
  - and c-*fos* and c-*jun*, induction by angiotensin II, effects of atrial natriuretic polypeptide (rat vascular cells), **176**, 1601
  - constitutive expression in cell lines infected with HTLV-I/II, **181**, 976
  - expression in primary B cells mediated by surface immunoglobulin receptor (mouse), **175**, 77
- laminarinase, nucleotide sequence (*Clostridium thermocellum*), **181**, 507
- laminin receptor, high-affinity, identification as member of multicopy gene family (mouse), **175**, 84
- LCAT, missense mutation in exon 6, identification in LCAT deficiency (human), **178**, 460
- lecithin:cholesterol acyltransferase, familial deficiency, molecular defect in: complete deficient-type disease from single nucleotide insertion (human), **181**, 933
- leukocidin S-component, nucleotide sequence (methicillin-resistant *Staphylococcus aureus*), **181**, 138
- LF-B1, expression in hepatoma cells and liver, relationship to L-type pyruvate kinase gene expression, **176**, 1074
- lichenase, isolation and biotechnologically relevant properties of encoded enzyme (*Clostridium thermocellum*), **177**, 447
- lignin peroxidase, from white-rot fungus *Trametes versicolor*, cloning and characterization, **179**, 428
- low-density lipoprotein receptor, allele-specific transcripts in individuals with heterozygous familial hypercholesterolemia, detection by polymerase chain reaction, **178**, 1319
- luciferase, nucleotide sequence (*Photobacterium phosphoreum*), **176**, 541

lysosomal α-glucosidase, point mutation causing infantile glycogenosis type II, identification, **179**, 919
α-1,3-mannosyl-glycoprotein β-1,2-*N*-acetylglucosaminyltransferase, organization and localization to chromosome 5 (human), **176**, 608
matrix metalloproteinase 3, increased expression in skin fibroblasts from patients with severe recessive dystrophic epidermolysis bullosa, **174**, 1003
mcf-2, fidelity of YAC clone in region of, analysis (human), **181**, 877
*met*H, identification of transcriptional start and MetR binding sites (*Escherichia coli*), **175**, 1057
methicillin resistance, Southern hybridization analysis of deletion (*Staphylococcus aureus*), **176**, 1319
MIPP, cell lineage-specific expression (mouse), **177**, 1062
m1 muscarinic acetylcholine receptor, expressing HeLa cells, phospholipase D activation and phosphatidylethanol formation upon stimulation (human), **176**, 453
monocyte chemoattractant JE, transforming growth factor β-induced expression in osteoblastic cells MC3T3-E1 (mouse), **180**, 1130
monocyte chemotactic peptide, expression in synovial cells, induction by interleukin-1 (human), **174**, 411
mucin, expression in airways following infection and irradiation (rat), **181**, 1
multidrug resistance, independence from genistein inhibition of breast cancer cell growth (human), **179**, 661
MYCN, enhanced expression in neuroblastoma cells, association with altered FGF receptor expression and cellular growth response to basic FGF (human), **179**, 1449
myelin-associated glycoprotein, isolation and structure (mouse), **178**, 282
myeloperoxidase, expression in human myeloid leukemic cells: identification as primary response gene in HL60 cells, **176**, 1345
α-myosin heavy chain
  5′ exon structure, determination (human heart), **179**, 1255
  expression in cultured fetal cardiac myocytes, activation by cAMP (rat), **174**, 1196
nef protein, HIV-1, and thyrotropin receptor, nucleotide and amino acid homology, **181**, 498
nerve growth factor family, regional expression in brain during development (rat), **174**, 379
neuroendocrine protein 7B2, expression: production of two mRNAs differing by one codon via alternate splicing (human), **174**, 156
neurofibromatosis type 1
  product identification as GTPase-activating protein toward *ras* p21, **177**, 83
  transcripts with 63-base insert in region coding for GTPase activating protein-related domain, expression by brain tumors (human), **181**, 955
neutrophil elastase, expression: positive and negative regulatory elements in 5′ flanking region (human), **181**, 1462
NK-2 receptor, isolation and characterization (human lung), **177**, 8
ornithine decarboxylase
  expression in macrophage-like cell line RAW264, synergistic induction by lipopolysaccharide and cAMP, **175**, 48
  position-independent aberrant expression in transgenic mouse, **180**, 262
oxytocin, promoters in bovine and rat, comparative estrogen responsiveness, **175**, 117
p53
  mutations
    in colorectal tumors, analysis (human), **177**, 901
    timing and role in recurrence of glioma (human), **180**, 1145
  and Rb, antisense oligomers to mRNA from, cooperative effect on life span extension in human diploid fibroblasts, **179**, 528
P12O, regulatory element corresponding to -1430/-1327 region, HeLa nuclear proteins binding to, purification (human), **180**, 805
pectin lyase, nucleotide sequence (*Erwinia carotovora* Er), **176**, 321
phosphofructokinase 1, cloning and sequencing (*Thermus thermophilus*), **176**, 1313
Pit-1 transcription factor, Pit-1 binding site 3′ to transcription start site, inhibition of transcription elongation *in vitro*, **177**, 790
platelet-activating factor receptor, expression induction during HL-60 cell differentiation (human), **181**, 1580
platelet-derived growth factor A chain, activation, dissociation from mitogenic responses of neonatal vascular smooth muscle cells (rat), **181**, 617
poly(ADP-ribose) synthetase, exogenous, expression in macrophages, inhibitory effect on MHC class II antigen induction by interferon-γ (mouse), **175**, 685
pp63, encoding insulin receptor tyrosine kinase inhibitor, expression in proliferating liver and liver tumors (rat), **180**, 967
pseudo-, *see* Pseudogenes
pyruvate carboxylase isozymes, identification (yeast), **176**, 1210
pyruvate kinase, L-type, expression in hepatoma cells and liver, relationship to LF-B1 gene expression, **176**, 1074
RAG-2, expression in central nervous system tumor cell lines (mouse), **181**, 151
RAS family, evolutionary grouping, **176**, 1130
reporter, expression from multicopy T7 promoter vectors at single copy rates in absence of T7 RNA polymerase, **181**, 1056
ret, products, identification as membrane-bound glycoproteins tyrosine phosphorylated *in vivo*, **181**, 416
ret$^{\mathrm{TPC}}$, induced NIH3T3 transformant, TPA responsive element motif, phosphorylation state and activity (mouse), **179**, 1331
ribophorin II, chromosomal localization (rat), **176**, 1482
selenium-dependent glutathione peroxidase, active transcription in selenium-deficient rats, **181**, 1431
serine dehydratase, identification of glucocorticoid- and cAMP-responsive elements (rat), **176**, 385

  serine–pyruvate aminotransferase, point mutation in coding region, induction of primary hyperoxaluria type I (human), **176**, 1093
  serum amyloid A, cloning, characterization, and sequence analysis (rabbit), **180**, 1258
  S-100 protein α- and β-subunit, structure and chromosomal assignment (human), **175**, 185; *erratum*, **177**, 894
  testosterone 6β-hydroxylase, structure (rat), **177**, 68
  thyroid hormone receptor β, single base mutation in hormone-binding domain in generalized thyroid hormone resistance (human), **178**, 606
  thyrotropin receptor
    expression in FRTL-5 cells, down-regulation by cytosolic calcium increases, mechanism, **176**, 94
    and HIV-1 nef protein, nucleotide and amino acid homology, **181**, 498
    structural analysis (human), **177**, 679
  tracheo-bronchial mucin, mapping to chromosome 3 (human), **175**, 414
  transcription factor IIIA, B block region, specific binding of transcription factor IIIC (*Xenopus laevis*), **175**, 1036
  transthyretin, Arg 58 mutant in hereditary polyneuropathy, detection by nonisotopic single-strand conformation polymorphism analysis (human), **180**, 380
  trk, proto-oncogenic, 140-kd, nerve growth factor binding to encoded protein, stimulation of association with *src* homology domain of phospholipase C γ1, **179**, 217
  tRNA, bipartite internal promoters, binding to transcription factor IIIC, physical effects on intervening DNA (yeast), **176**, 826
  tRNA^{thr}, mitochondrial, point mutation, induction of fatal infantile respiratory enzyme deficiency (human), **176**, 1112
  trypsin, molecular cloning and nucleotide sequence (*Streptomyces griseus*), **181**, 707
  tyrosine kinase receptor, overexpression in murine C127 cells: characterization of encoded products (human), **177**, 90
  v-Ha-*ras*, expressing murine pre-B cell line, tumorigenesis, selection for c-*myc* activation, **178**, 1343
  WDNM1, product identification as member of four-disulfide core protein family, **176**, 247
  xeroderma pigmentosum group A complementing, human, cloning and sequencing of homologs from chicken, *Drosophila melanogaster*, and *Xenopus laevis*, **181**, 1231
  zinc-finger, related to *KROX-20* and *KROX-24*, cloning (guppy, zebrafish), **179**, 1220
  Zn-α_2-glycoprotein, chromosomal assignment (human), **177**, 696

Genistein
  inhibition of growth of breast cancer cells: independence from estrogen receptors and multidrug resistance gene (human), **179**, 661

Genotyping
  apolipoprotein B 3′ hypervariable region by polymerase chain reaction and gel electrophoresis, comparison, **181**, 846

Gentamicin
  treated rats, myelin bodies isolated from renal cortex, lipid and protein composition, **181**, 894

Geranylgeranyltransferase
  for *rho*A p21, partial purification and characterization (bovine brain), **175**, 720

Germinal vesicles
  ras-induced breakdown in *Xenopus* oocytes, inhibition by *rap*-1B protein, **174**, 1

GHRH, *see* Growth hormone-releasing hormone

GHRP, *see* Growth hormone-releasing peptide

Glibenclamide, *see* Glyburide

α-Globin
  gene domain
    1.7-kbp DNA fragment, sequence-specific protein binding sites, correlation with replication and matrix binding (chicken), **179**, 512
    replication origin, mapping of nearby nuclear matrix attachment regions and topoisomerase II binding and reaction sites (chicken), **177**, 265

β^H-Globin
  gene, enhancer-dependent expression during erythroid differentiation (chicken), **177**, 97

Glucagon
  and amylin, comparative potency and efficacy in raising plasma glucose levels in fasted anesthetized rats, **181**, 1288
  effect on amylin and insulin cosecretion in cultured islet β cells, **179**, 1

Glucagon-like peptide$_{(7-36)}$amide
  stimulated insulin secretion in islets, Na^+ dependency (rat), **179**, 701

1,4α-Glucan branching enzyme
  amylopectin branching enzyme BE-I, sequence conservation of catalytic regions of amylolytic enzymes (maize), **181**, 87

Glucan 1,4-α-glucosidase
  gene expression and promoter region identification (human), **176**, 1509

Glucocorticoid receptors
  binding of agonist and antagonist steroid ligands, comparative effects of SH-modifying agents (rat liver), **174**, 1239
  steroid-binding core fragment, 16-kDa, association with heat shock protein 90 (rat), **176**, 1338

Glucocorticoids
  induced cell death, β-galactoside binding protein overexpressed during, cDNA clone, isolation (human), **178**, 746
  inhibition of inositol phosphate formation in hepatic macrophages, **178**, 974
  regulation of interleukin-1β production in monocytes: mechanism dependent on monocyte activation signal (human), **180**, 1383
  responsive element of serine dehydratase gene, identification (rat), **176**, 385

Gluconeogenesis
  reversible inhibition by *N,N*-diethyl-*m*-toluamide (rat), **179**, 1264
Glucose
  and carbachol, synergistic stimulation of phosphatidic acid accumulation in pancreatic islets (rat), **180**, 960
  concentration, effect on angiotensin II-induced hypertrophy of cultured proximal tubular cells (mouse), **176**, 902
  effect on amylin and insulin cosecretion in cultured islet β cells, **179**, 1
  induced insulin secretion at physiological and higher concentrations, α- and β-anomeric preferences (rat), **180**, 709
  insulin-dependent transport in soleus muscle, inhibition by phenylarsine oxide (rat), **176**, 201
  output during ortho- and retrograde liver perfusion, differential effects of C3a (rat), **176**, 1218
  plasma levels in fasted anesthetized rats, comparative effects of amylin and glucagon, **181**, 1288
  stimulation of direct conversion of arginine to citrulline in jejunal enterocytes (pig), **177**, 1171
  transport in adipocytes and skeletal muscle, effects of palmitate: mechanism of glucose transport stimulation in adipocytes (rat), **177**, 343
  utilization by tumor cells, role of post-translational modification of mitochondrial hexokinase (human, rat), **178**, 648
Glucose-1,6-bisphosphate
  muscular levels, decrease in patients with glycogenosis types V and VII, **176**, 7
Glucose-6-phosphate dehydrogenase
  deficient individuals, identification of nucleotide base substitutions (human), **180**, 988
Glucose/sodium cotransporter
  SGLT1, protein and mRNA, distribution on crypt–villus axis of small intestine (rabbit), **181**, 1208
Glucose transporters
  gene expression in
    heart, developmental regulation (rat), **177**, 1095
    liver and muscle of obese and diabetic rats, **175**, 995
    small intestine of streptozotocin-induced diabetic rat, **181**, 1110
  GLUT-1
    detection in adult and fetal lung (mouse), **180**, 367
    single amino acid substitution at residue 415, effect on transport activity (rabbit), **176**, 922
  GLUT-1 and GLUT3, tissue distribution and expression analysis in different mammalian species, **174**, 470
  GLUT-1 and GLUT4
    differential expression during differentiation of L6 muscle cells (rat), **175**, 652
    mRNAs, solution hybridization assay (rat), **179**, 1420
  GLUT4
    divergent mRNA and protein levels in skeletal muscle of insulin-resistant rats, **181**, 240
    role in palmitate stimulation of glucose transport in adipocytes (rat), **177**, 343
  mRNAs, tissue levels, alteration during endotoxic shock (rat), **176**, 535
α-Glucosidase
  lysosomal, gene, identification of point mutation causing infantile glycogenosis type II, **179**, 919
β-Glucosidase
  inactivation by cyclophellitol, characterization (*Agrobacter* sp., almond), **177**, 532
Glucuronides
  ATP-dependent transport across hepatic canalicular membranes (rat), **176**, 622
Glucuronosyl
  transfer to galactose residues in biosynthesis of HNK-1 antigens and xylose-containing glycosaminoglycans, enzymes involved, **179**, 416
Glucuronosyltransferase
  in glucuronosyl transfer to galactose residues in biosynthesis of HNK-1 antigens and xylose-containing glycosaminoglycans, analysis, **179**, 416
Glutamate
  triggering of internucleosomal DNA cleavage in neuronal cells (rat), **179**, 39
L-Glutamate
  induced neuronal injury, role of L-arginine/nitric oxide pathway (rat), **181**, 456
Glutamate–ammonia ligase
  ammonium-inactivated *in vivo*, reactivation *in vitro* (*Synechocystis* sp.), **181**, 780
Glutamate decarboxylase
  exchangeable protons, ^{1}H NMR spectra (human), **178**, 385
Glutamate receptor channels
  AMPA-selective
    Ca^{2+} permeability, determination by single amino acid residue (*Xenopus laevis*), **180**, 813
    α1 subunit, functional expression in baculovirus expression system (mouse), **181**, 756
Glutamate receptors
  chimeric subunit: modification of channel properties by discrete changes, **177**, 1183
Glutamic acid
  in β-amyloid, glutamine substitution, acceleration of amyloid fibril formation, **179**, 1247; *erratum*, **180**, 1528
  or aspartic acid, detection in active site of prolidase (porcine liver), **180**, 401
Glutamic acid decarboxylase
  cDNA cloning and partial sequencing (human brain, pancreatic islets), **176**, 1239
Glutamine
  substitution for glutamic acid in β-amyloid, acceleration of amyloid fibril formation, **179**, 1247; *erratum*, **180**, 1528
Glutamine synthetase, *see* Glutamate–ammonia ligase
γ-L-Glutamyl-L-thiothreonylglycine
  synthesis and characterization as steric probe of yeast glyoxalase I active site, **177**, 252
γ-L-Glutamyl-L-*allo*-thiothreonylglycine
  synthesis and characterization as steric probe of yeast glyoxalase I active site, **177**, 252

γ-Glutamyltransferase
- active transport of amino acids through Caco-2 cell monolayers, **178**, 1028
- encoding gene, tissue-specific methylation in 5′ flanking region (rat), **177**, 229

γ-Glutamyl transpeptidase, *see* γ-Glutamyltransferase

Glutaredoxin, *see* Glutathione–homocystine transhydrogenase

Glutathione
- conjugates, ATPase catalyzing ATP hydrolysis in presence of, purification and characterization (human liver), **175**, 1090
- efflux from tumor cells induced by calcium chelation, prevention by ruthenium red and neomycin, **176**, 276
- intracellular, in isolated hepatocytes, effects of 1-bromoalkanes (rat), **179**, 436

Glutathione–homocystine transhydrogenase
- interaction with platinum complexes *in vitro*, **180**, 735

Glutathione peroxidase
- selenium-dependent, encoding gene, active transcription in selenium-deficient rats, **181**, 1431

Glutathione synthase
- large subunit gene, cloning and sequencing (*Schizosaccharomyces pombe*), **181**, 430

Glutathione transferase
- class α, CL 3-3, role of cysteine residue (chicken liver), **180**, 323
- class H$_b$, encoding genes, identification as dispersed gene family (human), **180**, 15
- class π
  - activity, role of cysteine, analysis by oligonucleotide site-directed mutagenesis (rat), **179**, 790
  - encoding gene
    - minimal promoter and downstream *cis*-acting element (human), **176**, 233
    - negative element, binding silencer factor B, similarity to or identity with *trans*-activator LAP/IL6-DBP, **179**, 293
  - equilibrium unfolding (porcine lung), **180**, 294
  - purification from porcine lens and characterization, **176**, 966
  - role of cysteine and histidine residues (human), **181**, 748
- class θ, Yrs subunit, cDNA cloning and sequencing (rat liver), **181**, 1294
- inactivation by SH/SS exchange reaction with biological disulfides (human placenta), **174**, 580
- subunit 1, gene sequencing, chromosomal assignment, and expression (fruit fly), **178**, 1205

Glutathione *S*-transferase, *see* Glutathione transferase

Glyburide
- effect on amylin and insulin cosecretion in cultured islet β cells, **179**, 1
- sensitive K$^+$ channels, role in angiotensin II-hypersensitive contraction and ANF refractoriness of glomeruli in low-sodium rats, **181**, 871

Glycan chains
- free, liberated by de-*N*-glycosylation of hyosophorin during early embryogenesis, identification (medaka fish), **180**, 1165

Glycans
- sulfated, effect on selectin GMP-140 binding to sialosyl-Le^a and -Le^x (human platelets), **181**, 1223

Glyceraldehyde
- reaction with NADP$^+$, aldose reductase-mediated, enantiospecific change in products, **175**, 943

Glyceraldehyde-3-phosphate dehydrogenase
- identification of ATP-binding heat-inducible 37-kDa protein in BALB/c 3T3 cells as, **176**, 59

Glyceraldehyde-3-phosphate dehydrogenase (NADP$^+$)
- phosphorylating and non-phosphorylating, differential regulation by trophic conditions (*Chlorella fusca*), **181**, 1077

Glycerophosphate acyltransferase
- mitochondrial, stimulation by lysophosphatidic acid-binding cytosolic protein (rat liver), **175**, 339

Glycine
- cleavage system: H-protein primary structure (human liver), **176**, 711
- terminated α-helices
  - identification of common structural features, **180**, 660
  - recognition by sequence patterns, **180**, 666

Glycine decarboxylase, *see* Glycine dehydrogenase (decarboxylating)

Glycine dehydrogenase (decarboxylating)
- mRNA, three-base deletion, induction of nonketotic hyperglycinemia (human), **174**, 1176

Glycogen
- ^{14}C-labeled, accumulation in muscles, amylin-induced inhibition, reversal by amylin or CGRP fragments (rat), **181**, 116

Glycogenosis
- infantile, type II, point mutation in lysosomal α-glucosidase gene causing, identification, **179**, 919
- types V and VII, effects on fructose-2,6- and glucose-1,6-bisphosphate levels in muscles (human), **176**, 7

Glycogen phosphorylase
- activation by amylin via cAMP-independent mechanism (rat muscle), **174**, 716

Glycogen synthase
- inactivation by amylin via cAMP-independent mechanism (rat muscle), **174**, 716

Glycogen synthase kinase 3, *see* Protein kinase FA

Glycohemoglobin
- deoxyfructosyl-lysine residues, monoclonal antibodies to, production with purified human glycated hemoglobin free of hemoglobin A$_{1c}$, **176**, 207

Glycolipid receptors
- binding of exoenzyme S from *Pseudomonas aeruginosa*, specificity, **175**, 1076

Glycolipids
- presence in Alzheimer's disease paired helical filament core structures (human), **181**, 771

N-Glycolylneuraminic acid
- specific lectin, purification from albumin gland of *Pila globosa*, **178**, 85

Glycolysis
- in permeabilized Ehrlich ascites tumor cells, effect of magnesium, **179**, 1000

- in platelets, stimulation by inositol phosphoglycan (human), **180**, 1041

Glycopeptides
- Edman degradation: identification of N- and O-glycosylation sites, **178**, 1194

Glycophorins
- influenza virus-reactive, other than glycophorin A, detection in erythrocyte membranes (human), **178**, 79
- murine
  - characterization: species specificity, **176**, 820
  - full-length gene, construction by recombinant polymerase chain reaction, **177**, 202

Glycoproteins
- IIb/IIIa complex, fibrinogen-binding domain, peptides APLHK, EHIPA, and GAPL as hydropathically equivalent peptide mimics, **180**, 1446
- IIIb, -deficient platelets, normal binding to thrombospondin (human), **179**, 985
- CD9, signal-initiating, on plasma membrane, association with small GTP-binding proteins (human platelets), **179**, 401
- CD43, expression of Tn antigen (Jurkat cells), **179**, 762
- gp32, simian immunodeficiency virus, N-terminal domain peptides, fusogenic activity, **175**, 872
- gp120, HIV-1, V3-loop, protein and DNA sequence homologies with Ig variable regions, **179**, 1056
- gp170, multidrug resistance-conferring, independence from genistein inhibition of breast cancer cell growth (human), **179**, 661
- HIV, recognition by anti-carbohydrate antibodies in normal human serum, **177**, 279
- membrane-bound, tyrosine phosphorylated *in vivo*, identification of *ret* oncogene products as, **181**, 416
- M_r 145,000, isolation as low-density lipoprotein receptor by rapid purification method (*Trypanosoma brucei brucei*), **178**, 185
- myelin-associated, gene isolation and structure (mouse), **178**, 282
- neo-, *see* Neoglycoproteins
- P-, *see* P-glycoprotein
- putative, hepatitis C virus, detection of hypervariable regions, **175**, 220
- sulfated, type 2, and ornithine decarboxylase, mRNA accumulation patterns in phytohemagglutinin-stimulated lymphocytes: relationship of cell proliferation to cell death (human), **180**, 59
- Zn-α_2-, cDNA cloning and sequencing (human prostate), **177**, 696

Glycosaminoglycans
- free chains, expression in keratinocytes, endothelium, and mesenchymal cells (bovine, chicken, human, mouse), **179**, 1281
- xylose-containing, biosynthesis, glucuronosyl transfer to galactose residues in, enzymes involved, **179**, 416

α 1-4 Glycosidic linkage
- β-cyclodextrin, conformational space, molecular dynamics simulation, **178**, 192

Glycosylation
- differential, role in heterogeneity of endothelin/sarafotoxin receptors from different tissues (guinea pig, rat), **178**, 921
- erythropoietin, functional role, analysis with N-deglycosylated recombinant hormone (human), **176**, 698
- high-affinity thrombin receptors, role in thrombin binding (murine embryonic fibroblasts), **180**, 349
- immunoglobulin μ heavy chain at Asn-402, effect of Asn → Ser-406 substitution (murine cell lines), **179**, 1627
- insulin receptor, mapping of sites (human), **174**, 735
- potential sites in luteinizing hormone receptor, site-directed mutagenesis, effects on binding activity (rat), **181**, 804
- role in secretion and permeability-enhancing activity of vascular permeability factor (guinea pig), **179**, 1568

N-Glycosylation
- CMP-*N*-acetylneuraminate–β-galactoside α-2,3-sialyltransferase in C6 glioma cells: post-translational regulation, **178**, 1437
- sites in glycopeptides, identification by Edman degradation, **178**, 1194

O-Glycosylation
- serine and threonine residues, effect of flanking sequences, **180**, 1024
- sites in glycopeptides, identification by Edman degradation, **178**, 1194

Glycosyl bond
- conformation in nucleosides, implications of correlations between NMR spectral patterns of nucleosides, **180**, 273

Glyoxalase I, *see* Lactoylglutathione lyase

Goblet cells
- colonic, exocytosis, visualization by video-enhanced light microscopy (rabbit), **176**, 466

Gold
- –amine oxidase complexes, binding and internalization by rat hepatocytes *in vitro* (bovine serum), **179**, 1169

Gonadotropin-releasing hormone
- antagonists with N$^{\omega}$-cyano-modified guanidine moieties: synthesis, characterization, and testing, **176**, 406

Gonadotropins, *see specific gonadotropins*

G proteins
- assay in clathrin-coated placental vesicles (human), **174**, 197
- and calcium, regulation of IgE receptor-mediated RBL-2H3 mast cell secretion (rat), **174**, 1064
- coupled endothelin receptors, identification in cultured endothelial cells (bovine), **174**, 1343
- direct activation by venom peptides containing cationic clusters within α-helical structure (bovine brain), **178**, 400
- electrophoretic mobility, pertussis toxin-induced alteration in, role of ADP-ribosylation, **180**, 1227
- G_α 2
  - regulation of guanylate cyclase (*Dictyostelium discoideum*), **176**, 1245
  - role in adenylate cyclase regulation (*Dictyostelium discoideum*), **175**, 55
- G_i
  - activation by insulin-like growth factor II receptor peptide Arg^{2410}–Lys^{2423}, effects of single residue substitutions, **179**, 10

interaction with epidermal growth factor and insulin receptors in pancreatic acinar cells (rat), **175**, 380
G_o, α-subunit encoded by α_{o2} cDNA, identification as 39-kDa pertussis toxin substrate, **175**, 473
G_s
interaction with epidermal growth factor receptors in pancreatic acinar cells (rat), **175**, 380
mono-ADP-ribosylation by arginine-specific ADP-ribosyltransferase, stimulation of adenylate cyclase system (human platelets), **176**, 1014
GTPase activity, modulation by protein kinase C catalytic fragment (human brain), **174**, 593
identification in contact sites between inner and outer mitochondrial membranes (rat liver), **180**, 1453
low-molecular-weight, association with zymogen granule membranes (rat pancreas), **174**, 600
pertussis toxin-sensitive, regulating islet cAMP content, mediation of α-adrenergic inhibition of pancreatic beta cell replication and insulin secretion (rat), **180**, 152
phospholipase C-linked, role in Ca^{2+}-dependent amylase secretion by pancreatic acini (rat), **174**, 536
ras p21-like, cDNA cloning and characterization (rat liver), **177**, 1224
regulation of phospholipase A_2 in pancreatic zymogen granule membranes, **177**, 22
role in
atrial natriuretic factor protective effect on cells damaged by oxygen radicals, **174**, 549
atropine action on rat parotid acini and M_1-CHO cells, **177**, 784
blue light polymorphogenesis: signal transduction in *Coprinus congregatus*, **179**, 1225
endothelin-3 stimulation of nitric oxide production in cultured endothelial cells (bovine), **174**, 228
small
ADP-ribosylation in neutrophils by C3 exoenzyme of *Clostridium botulinum*, effect on cell motility (bovine), **180**, 615
association with signal-initiating membrane protein CD9 (human platelets), **179**, 401
encoding hemopoietic specific gene, overexpression during T-cell activation (human), **175**, 451
α subunits
proteins resembling, identification in muscle (locust), **180**, 1075
transient expression of eight distinct forms during developmental program (*Dictyostelium discoideum*), **179**, 1141
in T-cell membranes, effect of mitogen-induced activation and phorbol ester-induced differentiation (human), **178**, 138
Granules
mast cell, proteoglycan processing, uncoupling from degranulation (dog), **179**, 140
polymorphonuclear cell, in hepatic interlobular connective tissue, localization of ADP-ribose acceptor protein p33 (chicken), **180**, 64
zymogen, *see* Zymogen granules
Granulosa cells
production of activin-binding protein *in vitro* (rat), **176**, 413
Graves disease
associated IgG
binding of thyrotropin receptor sequence-derived synthetic oligopeptide P-195 (human), **178**, 165
bioactivities in non-thyroid mammalian cells transfected with human thyrotropin receptor cDNA and reference thyroid bioassay, comparison, **179**, 1543
and idiopathic myxedema, derived immunoglobulins, and thyrotropin, sites of interaction with TSH receptor/LH-CG receptor chimeras, comparison, **179**, 70
Gravidin
identity with IgA secretory component (human), **176**, 447
Growth cones
isolated neuronal, membrane skeleton, association with protein kinase C type II (rat), **178**, 751
Growth factors
altered response of NRK cells expressing human c-*fos* gene, **181**, 1273
autocrine, for HL-60 cells: identification of endogenous transferrin-related 41-kDa polypeptide, **176**, 473
endothelial cell, pleiotropin-related, mitogenic properties (bovine brain), **180**, 145
SLF, mRNA expression in Sertoli cells (mouse), **176**, 910
vascular endothelial, induction of plasminogen activators and plasminogen activator inhibitor-1 in bovine microvascular endothelial cells, **181**, 902
Growth hormone
binding protein, mRNA, identification in liver (rat), **180**, 489
cDNA nucleotide sequence (turkey), **173**, 967; *erratum*, **175**, 729
release by GHRP and GHRH, effects of bombesin/substance P antagonists (rat), **180**, 156
Growth hormone receptors
induction by dexamethasone in cultured hepatocytes, effect of cell density (rat), **174**, 928
Growth hormone-releasing hormone
induced growth hormone release, effects of bombesin/substance P antagonists (rat), **180**, 156
Growth hormone-releasing peptide
induced growth hormone release, effects of bombesin/substance P antagonists (rat), **180**, 156
specific binding to anterior pituitary and hypothalamic membranes, demonstration and characterization (rat), **178**, 31
Growth inhibitory factor
for DNA synthesis in alveolar macrophages, detection in lung-conditioned medium (human), **180**, 1207
GTP
dependent membrane fusion during hepatocarcinogenesis and liver regeneration, analysis (rat), **176**, 1494
dialdehyde analog, effect on NADPH oxidase cytosolic components (human neutrophils), **177**, 504
–eIF-2, formation from GDP–eIF-2 mediated by eIF-2B, requirement of Met-$tRNA_f^{Met}$, **181**, 1500
induced connection of inositol 1,4,5-trisphosphate- and

  - caffeine-sensitive calcium pools in pancreatic microsomal vesicles, increase by H$^+$ uptake, **180**, 755

GTPase
- activating protein, toward *ras* p21, neurofibromatosis type 1 gene product identification as, **177**, 83
- G protein-associated, modulation by protein kinase C catalytic fragment (human brain), **174**, 593

GTPγS
- dependent protein factor, activation of phospholipase D (human granulocytes), **175**, 236
- modulation of phospholipase A_2 in pancreatic zymogen granule membranes: evidence for G protein regulation, **177**, 22

Guanine nucleosides
- NMR spectral parameters, correlations and implications for conformation about glycosyl bond, **180**, 273

Guanosine
- in hepatic mitochondrial DNA, conversion to 8-hydroxyguanosine after azidothymidine administration (mouse), **176**, 87

Guanylate cyclase
- cores of atrial natriuretic peptide receptor, overexpression as homodimers, **180**, 538
- coupled heat stable enterotoxin receptor cDNA, isolation from human colonic cell line and expression in transfected COS-7 cells, **179**, 1455
- regulation by $G_\alpha 2$ protein (*Dictyostelium discoideum*), **176**, 1245
- soluble, catalytic and regulatory activity, requirement of both enzyme subunits (rat lung), **174**, 351

Guanylyl cyclase, *see* Guanylate cyclase

L-Gulono-γ-lactone oxidase
- expression in COS-1 cells, **177**, 659

H

H-7
- differential effects on specific and phorbol ester-induced promiscuous cytolytic activity by T cells (mouse), **179**, 720
- effects on protein tyrosine kinase and protein kinase C of human neutrophils, **178**, 423

Hairpin structures
- N-terminal, in hepatocyte growth factor, deletion, effects on related biological activities, **181**, 691

Halo enol lactones
- inactivation of α-chymotrypsin: burst kinetics and enantioselectivity, **178**, 1335

Halohydrin hydrogen-halide-lyase
- catalysis of β-hydroxynitrile synthesis from epoxides and cyanide, **180**, 124

Haloperidol
- treated schizophrenic patients, urine, identification of potentially neurotoxic pyridinium metabolite, **181**, 573

Halothane
- metabolism in rats: partial processing of trifluoroacetylated protein adducts in Kupffer cells, **175**, 256
- metabolite, covalent binding to inactive endoplasmic reticulum protein highly homologous to phosphatidylinositol-specific phospholipase C-α, **178**, 679

Haptoglobin
- effect on bradykinin- and thrombin-induced prostaglandin biosynthesis in isolated osteoblasts (mouse), **178**, 343

Heart, *see also* Myocardium
- acute myocardial infarction, associated increase of brain natriuretic peptide secretion (human), **180**, 431
- age-associated accumulation of mitochondrial DNA with deletion, quantitative analysis (human), **180**, 894
- binding sites for 1,25-dihydroxyvitamin D_3, comparison with classical target tissue (rat), **180**, 867
- blood-perfused, excitation–contraction uncoupling during ischemia (dog), **179**, 502
- effects of achatin I (African giant snail), **177**, 847
- expression of
  - glucose transporters, developmental regulation (rat), **177**, 1095
  - Na,K-ATPase isoforms (human), **179**, 1434
- immunoreactive C-type natriuretic peptide, characterization (human), **179**, 535
- interleukin and IL-1 receptor mRNA, detection by polymerase chain reaction (human), **181**, 520
- isolated, degradation of phospholipids, stimulation by endothelin-1 (rat), **174**, 952
- isolated membranes, endothelin-1 binding sites, inhibitory effect of [D-Arg^1,D-Phe,D-Try^{7,9},Leu^{11}]substance P (rat), **179**, 130
- output after endotoxic shock, effect of N^G-monomethyl-L-arginine (dog), **178**, 1135
- quantitation of ryanodine receptors (rabbit), **175**, 858

Heart rate
- augmentation by FMRF-amide and L-Arg–L-Phe in anesthetized rats, mechanism, **175**, 318

Heat
- induced stimulation of photosystem I-mediated oxygen uptake, role of superoxide dismutase (spinach), **174**, 696

Heat shock
- induction of
  - cell cycle arrest at G_1 phase, comparison with effects of Δ^{12}-prostaglandin J_2 (human neuroblastoma cells), **179**, 1662
  - nuclear accumulation of nascent polypeptides (CHO cells), **176**, 1525
- protection against hydrostatic pressure damage in yeast, **174**, 1141

Heat shock proteins
- expression in neutrophils, induction by bacterial toxins (human), **179**, 872
- hsp10 and hsp60, of thermophilic bacterium PS3, gene structure, **179**, 565
- hsp25, induction by cisplatin in Ehrlich ascites tumor cells, **180**, 243
- hsp27
  - diminished phosphorylation in infant acute lymphoblastic leukemia (human), **175**, 134
  - phosphorylation in myelomonocytic leukemia cells, association with differentiation induced by leukemia inhibitory factor/D-factor (mouse), **176**, 979

  - role in sustained smooth muscle contraction in response to bombesin (rabbit), **181**, 1192
- hsp70, promoter-associated MDBP site, oligonucleotide duplex with, end-filling, inhibition of protein–DNA complex formation, **178**, 927
- HSP72, expression in human neutrophils, induction by hepoxilin A_3, **179**, 52
- hsp90, association with 16-kDa steroid-binding core fragment of glucocorticoid receptors (rat), **176**, 1338
- induction in leukocytes by 12-hydroxyeicosatetraenoic acid (human), **175**, 804

Helicobacter pylori
- lipopolysaccharide, inhibition of rat gastric mucosal laminin receptors, **175**, 963

Hemagglutinin
- purification and characterization as protease (*Porphyromonas gingivalis*), **178**, 336

Heme
- binding protein, green, and flavin reductase, evidence for identical protein components (bovine erythrocytes), **178**, 315
- binding site of horseradish peroxidase, oxygen diffusion near, **178**, 104
- containing proteins, formation of higher valence states, coupling of dihydroriboflavin oxidation to, **181**, 197
- Fe^{3+}-, center of horseradish peroxidase, axial symmetry, enhancement by ascorbate, **180**, 597
- related structure of hydroxylamine oxidoreductase P460 chromophore, Soret resonance Raman spectroscopic evidence (*Nitrosomonas europaea*), **174**, 358
- resonances in met-azido myoglobin, assignment by ^{1}H NMR (horse), **175**, 515

Hemin
- isolation from erythrocytes and identification as endogenous NA$^+$/K$^+$-ATPase inhibitor (pig), **178**, 95

Hemodialysis
- chronic, treated patients
  - acute and chronic blood pressure alterations, differential roles of endothelin-1 and ET-3, **178**, 276
  - purification and partial characterization of 85-kDa amyloidosis-related protein, **176**, 1037

Hemodynamics
- endothelin-1 and big ET-1 continuous iv infusion, comparison (rat), **179**, 1122

Hemoglobin
- crosslinked in T-state by bis(3,5-dibromosalicyl) fumarate, thermal stability, **174**, 518
- function, effects of pH, temperature, and chloride concentration (water buffalo), **177**, 956
- glycated, free of hemoglobin A_{1c}, purification and use in production of monoclonal antibodies to deoxyfructosyl-lysine residues in glycohemoglobin (human), **176**, 207
- interactions with fluoride in erythrocytes, ^{19}F NMR study (human), **174**, 163

α-Hemoglobin
- carboxyl methylation site, identification (human), **180**, 742

Hemolymph
- crayfish and insect, detection and quantification of phenol oxidases, **180**, 748
- prophenoloxidase activation in, protease inhibitor controlling, purification (*Locusta migratoria*), **179**, 841

Hemoproteins
- –butyl peroxide complex, coordination structure and chemical reactivity, **176**, 675

Heparin
- binding protein
  - basic, cystine-rich, isolation and partial characterization (bovine platelets), **174**, 70
  - 19-kDa, regulation by retinoic acid (chicken embryo), **174**, 708
  - retinoic acid-induced, cDNA cloning and sequencing (chicken), **175**, 617
- selective modulation of protein kinase FA antagonistic activities, **176**, 145

Heparin-binding factors
- midkine, primary structure, strong conservation between human and mouse, **176**, 792

Hepatectomy
- partial
  - effect on hepatic ganglioside levels (rat), **174**, 638
  - subsequent downregulation of hepatocyte growth factor receptors (rat), **176**, 599

Hepatitis
- chemically induced, associated downregulation of hepatocyte growth factor receptors (rat), **176**, 599
- fulminant, occurrence with autoimmune antibodies to hepatic microsomal proteins (LEC rat), **179**, 1134

Hepatitis B virus
- replication in human hepatoma cells, inhibition by cellular uptake of asialofetuin-tacked liposomes encapsulating interferon-γ, **174**, 839
- surface antigens, recombinant vaccinia virus with coding sequence for, infected lymphocytes, production of 22-nm HBsAg particles (human), **179**, 1479
- X protein, full-length and truncated versions, transactivation of c-*myc* proto-oncogene, **176**, 985

Hepatitis C virus
- four types, distribution in Japan, **181**, 279
- hypervariable regions in putative envelope glycoprotein, **175**, 220

Hepatocyte growth factor
- deletion of kringle domains or N-terminal hairpin structure, effects on related biological activities, **181**, 691
- effect on migration and proliferation of human microvascular endothelial cells *in vitro*, **179**, 1042
- and epidermal growth factor, comparative effects on $[Ca^{2+}]_c$ and inositol trisphosphate production (rat hepatocytes), **181**, 1173
- fibroblast-derived, cDNA cloning, purification, and characterization (human), **180**, 1151
- mitogenic effects on cultured renal tubular epithelial cells (rabbit), **174**, 831
- mRNA, expression in regenerating liver after partial hepatectomy (rat), **177**, 559
- native and recombinant, heavy chain N-terminal amino acid, identification (human), **175**, 660
- production by promyelocytic leukemia cell line HL-60 (human), **181**, 323

  role in liver regeneration after partial hepatectomy (rat), **177**, 330
  and scatter factor from embryonic lung fibroblasts, comparison (human), **180**, 765
  sequestration in extracellular matrix of normal adult liver (rat), **174**, 90
  stimulation of
    epithelial cell proliferation (human, mouse, rat), **174**, 331
    melanocyte DNA synthesis and growth (human), **176**, 45
Hepatocyte growth factor receptors
  identification and characterization in liver: downregulation after partial hepatectomy and during induced hepatitis (rat), **176**, 599
Hepatocytes, *see also* Liver
  adhesion to galactoside surfaces, associated redistribution of coated pits and asialoglycoprotein receptors to substratum (rat), **180**, 1304
  binding and internalization of bovine serum amine oxidase–gold complexes *in vitro* (rat), **179**, 1169
  $[Ca^{2+}]_c$ and inositol trisphosphate production, comparative effects of epidermal growth factor and hepatocyte growth factor (rat), **181**, 1173
  c-*myc* gene expression
    cell density dependence (rat), **178**, 480
    EGF-induced, increase mediated by prostaglandins E_2 and $F_{2\alpha}$ (rat), **178**, 1240
  CYP2B1 and CYP2E1 phosphorylation and degradation, hormonal effects (rat), **174**, 37
  cytochrome P450IIB induction by phenobarbital, effect of interleukin-6 (rat), **178**, 1049
  digitonin-permeabilized, HMG-CoA reductase, *in situ* assay (rat), **180**, 525
  DNA synthesis
    effects on hepatocyte growth factor with deletion of kringle domains or N-terminal hairpin structure (rat), **181**, 691
    induced by epidermal growth factor and insulin, enhancement by cholera toxin B subunit (rat), **174**, 372
  excretion of aflatoxin metabolites *in vitro* (rat), **178**, 1002
  exogenous DNA expression after liposome-mediated transfection *in vivo* (rat), **174**, 1223
  fatty acid synthase gene expression, suppression by arachidonic acid (rat), **177**, 1056
  growth hormone receptor induction by dexamethasone in primary culture, effect of cell density (rat), **174**, 928
  hormone- and mastoparan-stimulated turnover in, effect of okadaic acid (rat), **179**, 852
  isolated, intracellular glutathione, effects of 1-bromoalkanes (rat), **179**, 436
  isolated nuclei, association with calmodulin (rat), **181**, 1548
  loss of plasma membrane integrity during chemical hypoxia, role of pH-dependent phospholipase A_2 (rat), **174**, 654
  periportal and perivenous, DNA synthesis stimulation by epidermal growth factor, comparison (rat), **181**, 1201
  proliferatively activated, DNA polymerase α activity, effect of prazosin (rat), **177**, 973
  synthesis and phosphorylation of 67-kDa extracellular polypeptide reacting with anti-MYC antisera (rat), **180**, 631
  synthesis and processing of cathepsins D and H in culture, inhibitory effects of bafilomycin A_1 (rat), **178**, 369
Hepatopoietin A
  stimulation of epithelial cell proliferation (human, mouse, rat), **174**, 331
Hepoxilin A_3
  induction of heat shock protein HSP 72 expression in human neutrophils, **179**, 52
Heterophils
  from interlobular connective tissue, granules, localization of ADP-ribose acceptor protein p33 (chicken), **180**, 64
Heterozygosity
  compound, for mutant hepatic lipase in familial hepatic lipase deficiency, **179**, 78
Hexamethylenebisacetamide
  induced differentiation of erythroleukemia cells, role of secretion and membrane binding of differentiation-enhancing factor, **179**, 153
  modulation of growth in protein kinase C-overproducing HT29 cells, **181**, 809
Hexokinase
  expression in *Escherichia coli*: enzyme purification and characterization (human brain), **177**, 305
  mitochondrial, post-translational modification, role in glucose utilization by tumor cells (human, rat), **178**, 648
  protein kinase activity (rat brain), **177**, 1101
β-Hexosaminidase, *see* β-*N*-Acetylhexosaminidase
High-performance liquid chromatography
  detection of cAMP in axenic cultures of *Lemna paucicostata*, **178**, 1113
  reverse-phase
    protein kinase C synthetic peptide substrate, **176**, 1454
    trypsin digests of cytoplasmic and plasma membrane insulin receptor substrates, **176**, 1402
Hippocampus
  identification of high-affinity endothelin-1 subtypes (human), **180**, 475
Histamine
  anti-IgE-induced release from peritoneal mast cells, effect of 2-nitro-4-carboxyphenyl-*N*,*N*-diphenylcarbamate (rat), **181**, 1313
  edema-promoting actions, inhibition by calcitonin gene-related peptide (hamster, human, rat), **180**, 1429
  induction of inositol phosphate accumulation in type-2 astrocytes (rat), **177**, 734
  and leukotrienes, release in basophils, interleukin-8 as inhibitor and inducer (human), **179**, 628
Histamine receptors
  H_1
    biochemical characterization in adrenal medulla (bovine), **177**, 1233
    stimulation in macrophage-like P388D1 cells, induction of intracellular calcium increase, **181**, 1156
    synaptic and extra-synaptic distribution in brain (guinea pig, rat), **174**, 1043

- H_2
  - antagonists, effects on melanogenesis and proliferation in cultured melanoma cells (human, mouse), **177**, 545
  - detection on gastric carcinoma cells: augmentation by retinoic acid treatment (human), **176**, 1027
  - gene cloning and sequencing
    - human, **178**, 1386
    - rat, **179**, 1470
- H_3, presynaptic localization in brain (rat), **177**, 907

Histatin
- human salivary, inhibition of protease produced by *Bacteroides gingivalis*, **174**, 625

Histidine
- in class π glutathione *S*-transferase, role in enzyme activity (human), **181**, 748
- proximal residue in myoglobin, alteration to cysteine or tyrosine by site-directed mutagenesis: mutant characterization and catalytic activities (human), **180**, 138

Histidine decarboxylase
- and dopa decarboxylase, immuno-cross-reactivity (guinea pig, rat), **173**, 1299; *erratum*, **176**, 947

Histone kinase, *see* Protamine kinase

Histones
- H1b and H1d, sequence identity with adenylate cyclase inhibitor from pancreatic cancer, **176**, 255
- H3 and H4, encoding genes, regulatory regions, interaction with sequence-specific DNA-binding proteins (wheat), **176**, 1593
- H5, interaction with DNA, model: simultaneous minor and major groove binding, **174**, 898

HIV, *see* Human immunodeficiency virus

HMG-CoA reductase, *see* Hydroxymethylglutaryl-CoA reductase (NADPH)

Horseradish peroxidase
- catalyzed oxidation of enkephalins, **179**, 147
- compounds 0, I, and II, models: reaction of N_α-acetyl microperoxidase-8 with hydrogen peroxide, **179**, 1320
- dual oxygenase and peroxidase activities, analysis by phenylhydrazine treatment, **180**, 360
- Fe^{3+}-heme center, axial symmetry, enhancement by ascorbate, **180**, 597
- oxygen diffusion near heme binding site, **178**, 104

H-protein
- gene partial structure (human), **178**, 1072
- primary structure deduced from cloned cDNA (human liver), **176**, 711

HTLV, *see* Human T-cell leukemia virus

Human chorionic gonadotropin
- receptor-bound agonistic and antagonistic forms, epitope mapping, comparison, **178**, 699
- secretion by chorionic villous cells and placental tPA30-1 cells, enhancement by human macrophage colony-stimulating factor, **178**, 1099

Human chorionic gonadotropin receptors
- –LH receptor–TSH receptor chimeras, sites of interaction with Ig from Graves' disease and idiopathic myxedema patients and TSH, comparison, **179**, 70

Human cytomegalovirus
- replication, inhibition by oxetanocin G, mechanism, **176**, 805

Human immunodeficiency virus
- antiviral agent 2′,3′-didehydro-2′,3′-dideoxythymidine, structural studies, **175**, 298
- 2′,3′-dideoxynucleosides with antiviral activity against, sugar pucker, ^{1}H NMR study, **179**, 386
- glycoproteins, recognition by anti-carbohydrate antibodies in normal human serum, **177**, 279
- nef protein, and human thyrotropin receptor, nucleotide and amino acid homology, **181**, 498
- protease, inhibitors, rapid identification by synthesis and screening of defined peptide mixtures, **181**, 402
- reverse transcriptase, inhibition by asterriquinone and analogs, **174**, 56
- type 1
  - antiviral activity of *N*-carboxymethylchitosan-*N,O*-sulfate, **174**, 489
  - envelope protein gp120 V3-loop, protein and DNA sequence homologies with Ig variable regions, **179**, 1056
  - heterodimeric reverse transcriptase, crosslinking of substrates exclusively to p66 subunit, **174**, 785
  - HTLV-IIIB isolate, replication in AA-2 and MT-2 cell cultures, inhibition by ligands of poly(ADP-ribose) polymerase, **180**, 504
  - induced syncytium formation and cytopathology, inhibition by complestatin (human), **179**, 243
  - infection of
    - human monocytes, inhibition by 1α,25-dihydroxyvitamin D_3, **176**, 852
    - T cells, inhibition by sulfated gangliosides, **175**, 1
  - mn strain, isolation and characterization of infectious clone, **179**, 1377
  - normal and mutant, incorporation of tRNA, **174**, 1272
  - protease
    - bacterial expression as part of autocleaving fusion protein: purification of 99-residue proteinase, **175**, 784
    - binding to inhibitors containing isomers of phenylstatine, stereochemistry, **180**, 187
    - inhibition by L-694,746, **181**, 1456
    - inhibition by non-peptide dicarboxylates, **176**, 241
    - potent inhibitors with antiviral activities *in vitro*, **175**, 914
    - substrate analog inhibitors containing phenylnorstatine as transition state element, **180**, 181
  - proviral DNA synthesis, role of viral proteinase, **179**, 17
  - replication
    - inhibition by phosphorothioate analogs of oligodeoxyribonucleotides (human T cells), **179**, 1614
    - in monocyte/macrophages and peripheral blood lymphocytes, inhibitory effects of acyclic nucleoside phosphonate analogs (human), **178**, 329
    - in peripheral blood lymphocytes, inhibition by 2′,3′-dideoxyinosine, potentiation by EICAR and ribavirin, **178**, 563
  - reproduction
    - inhibition by peptides derived from N- and C-termini of HIV-1 protease, **179**, 847
    - in lymphoid cell cultures, effect of TCDD, **179**, 46

    - Rev functional conversion to HTLV-1 Rex by mutation, **178**, 1226
    - 72-amino acid nucleocapsid protein NCp7, large-scale chemical synthesis in active form, **180**, 1010
- Human T-cell leukemia virus
  - type I
    - protease, expression in *Escherichia coli*, **181**, 1281
    - protein *p27rex*, stabilization of interleukin-2 receptor α-subunit mRNA: role of *p27rex* nucleolar localization signal, **175**, 98
  - types I and II, infected cell lines, constitutive expression of c-*jun* and *jun-B* genes, **181**, 976
- Human T-lymphotropic virus, *see* Human T-cell leukemia virus
- Hyaluronic acid
  - binding protein, autophosphorylation *in vitro* and enhanced phosphorylation in rat histiocytoma, **177**, 1291
- Hydrocortisone
  - and prolactin, effects on epidermal growth factor mRNA content in mammary glands (mouse), **181**, 1063
- Hydrogen
  - generation by cyanobacteria: implications of platinum deposition at photosynthetic membrane surfaces within whole cells, **175**, 1029
  - ionic, uptake by pancreatic microsomal vesicles, increase of GTP-induced connection of inositol 1,4,5-trisphosphate- and caffeine-sensitive calcium pools, **180**, 755
  - reduction of sulfite in reconstituted electron transfer chain from *Desulfovibrio gigas*, calcium requirement, **180**, 238
  - –sodium antiport
    - activation by lactoferrin (K562 cells), **176**, 498
    - down-regulation, role of protein kinase C activation by phosphatidylinositol 4,5-bisphosphate, **175**, 852
  - –sodium exchange, role in
    - acetylcholine-induced aortic relaxation (rat), **177**, 407
    - endothelin-1-induced contractions of tracheal and bronchial strips (guinea pig), **175**, 583
  - vanadate-sensitive and -resistant transport in vesicles from bladder epithelium, effects of valinomycin (turtle), **176**, 1285
- Hydrogenase
  - Ni-Fe-Se, and octaheme cytochrome c_3, from *Desulfovibrio desulfuricans*, electron exchange reaction between, kinetic studies, **179**, 605
- Hydrogen bonding
  - role in steroidogenesis: analysis of estradiol 17β-dehydrogenase-inhibiting heterocyclic analogs of estrone (human), **180**, 1057
- Hydrogen peroxide
  - hyperpolarization of vascular smooth muscle cells (pig), **176**, 378
  - inactivation of mitochondrial F_1 ATPase, mediation by not-tightly-bound iron ions (bovine heart), **181**, 764
  - oxidation of NAD(P)H (*Escherichia coli*), **178**, 54
  - and peroxidase, albumin fragmentation by sulfite in presence of, role of sulfate radicals, **176**, 1306
  - production in macrophages after phagocytosis mediated by Fc or complement receptors, comparison (rat), **180**, 268
  - reaction with N_α-acetyl microperoxidase-8, high-valent intermediates: models for compounds 0, I, and II of horseradish peroxidase (horse), **179**, 1320
- Hydrogen radicals
  - decrease in skeletal muscle of vitamin E-supplemented rats, **179**, 859
- Hydrolases
  - acid, lysosomal, targeting in cultured hepatocytes, inhibition by bafilomycin A_1 (rat), **178**, 369
- Hydrolysis
  - epidermal inhibitory pentapeptide by serum enzyme: enzyme identification and partial characterization, **175**, 978
- Hydroperoxyl radicals
  - NAD(P)H autoxidation initiated by, steady-state kinetics, **176**, 846
- Hydrophobicity
  - arginyl-tRNA synthetase, role of NH_2-terminal extension (rat), **180**, 702
- 3-Hydroxyacyl-CoA dehydrogenase
  - –enoyl-CoA hydratase bifunctional enzyme, import into hepatoma cell peroxisomes *in vitro* (human), **178**, 1084
- 8-Hydroxyadenine
  - detection in DNA from neoplastic liver of carcinogen-exposed sole, **173**, 614; *erratum*, **175**, 359
- N^ω-Hydroxy-L-arginine
  - induction of vasorelaxation of intrapulmonary artery (bovine), **176**, 528
- *sn*-2-ω-Hydroxycarboxylate
  - phospholipids with, identification in cerebral lipid extract (bovine), **177**, 466
- 22R-Hydroxycholesterol
  - binding to cytochrome $P450_{scc}$, effect on nanosecond fluorescence of tryptophan residues, **181**, 1493
- 8-Hydroxydeoxyguanosine
  - age-associated accumulation in mitochondrial DNA (human diaphragm), **179**, 1023
- 12-Hydroxyeicosatetraenoic acid
  - induction of heat shock proteins in leukocytes (human), **175**, 804
  - production increase in lymphocytes during selenium deficiency (bovine), **181**, 389
  - role in regulation of platelet activation (bovine), **179**, 345
- 20-Hydroxyeicosatetraenoic acid
  - detection in urine (rat), **180**, 445
- 8-Hydroxyguanine
  - detection in DNA from neoplastic liver of carcinogen-exposed sole, **173**, 614; *erratum*, **175**, 359
  - removal from DNA by human neutrophil endonuclease, **178**, 1472; *erratum*, **180**, 462
- 8-Hydroxyguanosine
  - formation from guanosine in hepatic mitochondrial DNA after azidothymidine administration (mouse), **176**, 87
- Hydroxylamine oxidoreductase
  - P460 chromophore, Soret resonance Raman spectroscopic evidence for heme-like structure (*Nitrosomonas europaea*), **174**, 358

1-Hydroxylase, *see* Alkane 1-monooxygenase
Hydroxyl radicals
  light-dependent generation in erythrocytes, demonstration by spin trapping (human), **179**, 1305
Hydroxymethylglutaryl-CoA reductase (NADPH)
  in digitonin-permeabilized hepatocytes, *in situ* assay (rat), **180**, 525
β-Hydroxynitriles
  halohydrin hydrogen-halide-lyase-catalyzed synthesis from epoxides and cyanide, **180**, 124
o-Hydroxyphenylacetaldehyde
  isolation as major coumarin metabolite formed by gerbil, human, and rat hepatic microsomes, **179**, 197
15-Hydroxyprostaglandin dehydrogenase (NAD^+)
  synthesis and activity in erythroleukemia cells, regulation by dexamethasone and phorbol ester (human), **177**, 1258
  tyrosine 151, site-directed mutagenesis, effect on enzyme activity (human placenta), **176**, 840
Hydroxystearic acid
  identification in Lewis lung carcinoma cells, **178**, 1260
Hydroxysteroid sulfotransferase a
  gene, age- and gender-related expression in liver (rat), **175**, 1051
4-Hydroxytamoxifen
  partitioning in biomembranes, spectrophotometric measurement, **176**, 1079
5-Hydroxytryptamine, *see* Serotonin
Hyosophorin
  de-*N*-glycosylation during early embryogenesis, free glycan chain liberated by, identification (medaka fish), **180**, 1165
Hyperbilirubinemia
  associated genetic defect of bilirubin UDP-glucuronosyltransferase in Gunn rat, characterization, **177**, 1161
Hypercalcemia
  parathyroid hormone-related protein-induced, blockage by interleukin-4 *in vivo* (mouse), **178**, 694
Hypercholesterolemia
  heterozygous familial, allele-specific transcripts of low-density lipoprotein receptor gene in affected individuals, detection by polymerase chain reaction, **178**, 1319
Hyperglycinemia
  nonketotic, induction by three-base deletion in glycine decarboxylase mRNA (human), **174**, 1176
Hyperoxaluria
  primary, type I, induction by point mutation in coding region of serine–pyruvate aminotransferase gene (human), **176**, 1093
Hyperphosphorylation
  vimentin in okadaic acid-treated primary fibroblasts (human), **177**, 1165
Hyperpolarization
  erythroleukemia cells, promotion by fibronectin–integrin binding (mouse), **177**, 1266
  vascular smooth muscle cells by hydrogen peroxide (pig), **176**, 378
Hypertension
  effect on portal vein responsiveness to phorbol 12,13-dibutyrate (rat), **176**, 1552
  essential, association with insulin receptor gene RFLP: nonassociation of insulin gene RFLP (human), **181**, 486
  malignant, association with increased adrenal angiotensin II levels in affected spontaneously hypertensive stroke-prone rats, **178**, 151
  spontaneous
    affected SHRSP rats, F_2 generation from cross with normotensive rats, cosegregation of blood pressure and angiotensin I-converting enzyme, **181**, 941
    relationship to decreased calpastatin levels (rat), **175**, 486
Hypertrophy
  angiotensin II-induced, cultured proximal tubular cells, effect of glucose concentration (mouse), **176**, 902
Hypervariable regions
  3′ to apolipoprotein B gene, genotyping results by polymerase chain reaction and gel electrophoresis, comparison, **181**, 846
Hypotension
  platelet-activating factor-mediated, elicitation by magnetic fields after intravenous injection with iron beads (rat), **180**, 315
Hypothalamus
  and anterior pituitary, membranes, specific binding of growth hormone-releasing peptide, demonstration and characterization (rat), **178**, 31
  protein kinase C stimulation by prolactin (rat), **176**, 660
Hypothermia
  damage to cells and cell membranes, protective effects of fish antifreeze proteins (immature bovine oocytes), **180**, 566
Hypoxia
  chemical, in hepatocytes, associated loss of plasma membrane integrity, role of pH-dependent phospholipase A_2 (rat), **174**, 654
  induced neuronal injury, role of L-arginine/nitric oxide pathway (rat), **181**, 456

I

Immune complexes
  insoluble, rate of formation, enhancement by clusterin (human), **177**, 985
  in plasma of systemic lupus erythematosus patient, demonstration of extrinsic DNA, **174**, 323
Immunoassay
  bioluminescent, based on monomeric Fab′–aequorin conjugate, **174**, 1331
  enzyme-based
    for human acidic fibroblast growth factor, **175**, 291
    for human basic fibroblast growth factor, **175**, 229
Immunofluorescence
  E-cadherin, pattern in epithelial LLC-PK_1 cell line, effect of cadmium (porcine kidney), **181**, 1118
Immunoglobulin binding factor
  and prostatic secretory protein, structural identity (human seminal plasma), **180**, 356

Immunoglobulin receptors
  IgE, mediated RBL-2H3 mast cell secretion, regulation by GTP-binding proteins and calcium (rat), **174**, 1064
  surface, mediation of *jun-B* gene expression in primary B cells (mouse), **175**, 77
Immunoglobulins
  encoding genes, thyroid lymphocyte-derived, cloning in bacteriophage λ library, in generation of human Fab fragment specific for thyroid peroxidase, **179**, 372
  Graves' disease-associated, binding of thyrotropin receptor sequence-derived synthetic oligopeptide P-195 (human), **178**, 165
  from Graves' disease patients and idiopathic myxedema patients, and thyrotropin, sites of interaction with TSH receptor/LH-CG receptor chimeras, comparison, **179**, 70
  IgA
    2,4-dinitrophenyl-specific palmitate-conjugated, decorated B cells, differentiation, inhibition by triamcinolone acetonide (human), **179**, 1276
    secretory component, identity with gravidin (human), **176**, 447
  IgG
    Graves' disease-associated, bioactivities in non-thyroid cells transfected with thyrotropin receptor cDNA and reference thyroid bioassay, comparison, **179**, 1543
    stimulated monocytes, production of transforming growth factor β in active form (human), **174**, 885
  IgM, μ heavy chain, Asn $\rightarrow$ Ser-406 substitution, effect on glycosylation at Asn-402 (murine cell lines), **179**, 1627
  thyrotropin-binding inhibitor, related activity of antibodies to extracellular loops of human thyrotropin receptor membrane-spanning region (human), **181**, 1035
  variable regions, protein and DNA sequence homologies with HIV-1 envelope protein gp120 V3-loop, **179**, 1056
Immunophilin
  FKBP-12, encoding gene, assignment to chromosome 20 (human), **179**, 1427
Immunosuppression
  macrophages by hyperbaric oxygenation (mouse), **179**, 886
Implantation
  characteristic expression of cholesterol sulfate in rabbit endometrium during, **178**, 145
Infection
  Sendai virus, and SO$_2$ irritation, effects on mucin gene expression in airways (rat), **181**, 1
  T7, dependent system for selective expression of cloned genes in P1-lysogenic *Escherichia coli*, evaluation, **179**, 1200
Inflammation
  phorbol ester-induced, stimulation by *N,N*-diethyl-2-[4-(phenylmethyl)phenoxy] ethanamine hydrochloride (murine epidermis), **179**, 1297
  relationship to blood coagulation: stimulation of neutrophil tissue kallikrein by thrombin (human), **176**, 315
Influenza virus
  reactive glycophorins, other than glycophorin A, detection in erythrocyte membranes (human), **178**, 79
Initiation factors
  eIF-2
    peptide P(45-56) corresponding to residues 45-56, synthesis, **178**, 430
    phosphorylation at serine-51, associated inhibition of peptide chain initiation in reticulocyte lysates (rabbit), **176**, 993
  eIF-2B, mediated conversion of eIF-2–GDP to eIF-2–GTP, requirement of Met-tRNA$_f^{Met}$, **181**, 1500
  IF2β, tandem translation: purification and characterization of two active forms (*Escherichia coli*), **181**, 1572
Inorganic pyrophosphatase
  proton-pumping, from *Rhodospirillum rubrum* and mung bean, immunological cross-reactivity, **181**, 962
Inorganic pyrophosphate
  phosphate donor function in protein phosphorylation in yeast mitochondria, **178**, 1359
Inositol
  ^{3}H-labeled, incorporation into inositol polyphosphates during *Dictyostelium* development, **181**, 191
Inositol phosphates
  accumulation in type-2 astrocytes, induction by histamine (rat), **177**, 734
  formation in hepatic macrophages, inhibition by glucocorticoids, **178**, 974
Inositol phosphoglycan
  stimulation of glycolysis in platelets (human), **180**, 1041
Inositol phospholipids
  D-3 phosphate-containing, formation pathway in platelet-derived growth factor-stimulated fibroblasts (mouse), **175**, 568
  ether-containing, detection in bovine erythrocytes, **175**, 673
Inositol polyphosphates
  incorporation of [^{3}H]inositol during *Dictyostelium* development, **181**, 191
Inositol 1,3,4,5-tetrakisphosphate
  formation in cardiomyocytes, effects of α-adrenergic and K-opioidergic stimulation, comparison (rat), **179**, 972
  levels in cultured pulmonary vascular smooth muscle cells, increase by stretch (rat), **180**, 982
  mass measurements in bradykinin-stimulated neuronal cell lines: desensitization in inositol phosphate response (mouse), **181**, 997
  or metabolite Ins(1,3,4,6)P$_3$, induction of Ca^{2+}-dependent chloride currents in *Xenopus* oocytes, **179**, 641
Inositol trisphosphate
  levels in cultured pulmonary vascular smooth muscle cells, increase by stretch (rat), **180**, 982
  production in hepatocytes, comparative effects of epidermal growth factor and hepatocyte growth factor (rat), **181**, 1173
  and thapsigargin, sensitive intracellular Ca^{2+} pools, comparative roles in plasma membrane Ca^{2+} entry in neuronal cell lines, **180**, 1518
Inositol 1,4,5-trisphosphate
  α_1-adrenergic and muscarinic-cholinergic stimulated pro-

    duction in parotid acini, analysis (rat), **176**, 1291
  and caffeine, sensitive calcium pools in pancreatic microsomal vesicles, GTP-induced connection, increase by H$^+$ uptake, **180**, 755
  cholecystokinin octapeptide-induced production in pancreatic acinar cells, inhibition by epidermal growth factor (rat), **180**, 900
  formation in cardiomyocytes, effects of α-adrenergic and K-opioidergic stimulation, comparison (rat), **179**, 972
  and Ins(1,3,4,5)P$_3$, and metabolites, effects on Ca^{2+}-dependent chloride currents in oocytes (*Xenopus laevis*), **179**, 641
  mass measurements in bradykinin-stimulated neuronal cell lines: desensitization in inositol phosphate response (mouse), **181**, 997
Inositol 1,4,5-trisphosphate 3-kinase
  molecular cloning and expression (human brain), **174**, 529
Inositol 1,4,5-trisphosphate receptors
  phosphorylation at serines 1755 and 1589 by cAMP-dependent protein kinase, **175**, 192
Insulin
  action in adipocytes, inhibition by amiloride, mechanisms (rat), **176**, 1277
  activation of phosphatidylinositol-3-kinase via insulin receptor types A and B, **174**, 123
  and amylin
    cosecretion from cultured islet β cells, modulation by nutrient secretagogues, islet hormones, and hypoglycemic agents, **179**, 1
    secretion from perfused pancreas, dissociation in insulin-resistant diabetic rat, **180**, 782
  and beta-cell tropin, comparative effects on lipogenesis in brown adipocytes from lactating and non-lactating rats, **181**, 1437
  dependent glucose transport in soleus muscle, inhibition by phenylarsine oxide (rat), **176**, 201
  downregulation of insulin receptor mRNA steady-state level (human), **175**, 520
  effects on CYP2B1 and CYP2E1 degradation in isolated hepatocytes (rat), **174**, 37
  and epidermal growth factor, induction of DNA synthesis in hepatocytes, enhancement by cholera toxin B subunit (rat), **174**, 372
  gene RFLP, nonassociation with essential hypertension (human), **181**, 486
  and islet amyloid polypeptide, additive effect on 2-deoxyglucose uptake in pancreatic acini (mouse), **180**, 1513
  resistant rats, skeletal muscle glucose transporter GLUT4, divergent mRNA and protein levels, **181**, 240
  secretion
    glucagon-like peptide$_{(7-36)}$amide-stimulated, in islets, Na$^+$ dependency (rat), **179**, 701
    induced by glucose at physiological and higher glucose concentrations, α- and β-anomeric preferences (rat), **180**, 709
    by isolated rat pancreatic islets, effects of human and rat amylin, **177**, 932
    by pancreatic beta cells, α-adrenergic inhibition, mediation by pertussis toxin-sensitive G protein regulating islet cAMP content (rat), **180**, 152
    stimulation by DG-5128 in islet cells, mechanisms (rat), **176**, 1545
  sensitive myelin basic protein phosphorylation on tyrosine residues (rat brain), **179**, 392
  signaling pathway, inhibition by lovastatin (human fibroblasts), **180**, 1284
  stimulated serine/threonine phosphorylation of insulin receptor, analysis, **179**, 962
  stimulation of
    F$_A$ and casein kinase II in 3T3-L1 cells, **177**, 1019
    phospholipase C, mediation by human insulin receptor isotypes A and B, comparison, **181**, 566
    protein acylation by long-chain fatty acids (rat adipocytes), **177**, 797
  synthesis and release by pancreatic B cells: measurement of equilibrium (rat), **178**, 1182
  transmembrane signaling via insulin receptor mutated at tyrosines 1158, 1162, and 1163 (human), **179**, 912
Insulin-degrading enzyme
  associated metals, identification (human placenta; rat liver, muscle), **181**, 1398
Insulin-like growth factor
  binding proteins, *see* Insulin-like growth factor binding proteins
Insulin-like growth factor I
  and bombesin, mitogenic stimulation of Swiss 3T3 cells, associated temporal changes in intracellular protein kinase C distribution, **177**, 480
  effects on macrophage growth and differentiation in bone marrow cultures (rat), **174**, 647
  encoding gene, transcription initiation in two leader exons, occurrence from disperse versus localized sites (rat), **176**, 887
  induced Ca^{2+} influx and DNA synthesis in FRTL-5 cells, effects of pravastatin, **177**, 17
  induced stimulation of osteoblasts, inhibition by intact truncated insulin-like growth factor-binding protein IGBP-3 (human, rat), **179**, 579
  induction of Na$^+$/H$^+$ antiporter activation and intracellular Ca^{2+} mobilization in thyroid cells, relationship (pig), **177**, 113
  mRNA, complete nucleotide sequence (human), **175**, 507
  signaling pathway, inhibition by lovastatin (human fibroblasts), **180**, 1284
Insulin-like growth factor II
  fixing in bone, role of bone-derived IGF-binding protein (human), **176**, 756
  mRNAs, specific endonucleolytic cleavage (human, mouse), **179**, 1509
  mutants, construction and expression: Tyr^{27} substitution and/or deletion of residues 62–67 (human), **181**, 907
  overexpression in NIH-3T3 cells, effect on sorting of lysosomal enzymes, **179**, 108
Insulin-like growth factor binding proteins
  bone-derived, role in IGF-II fixing in bone (human), **176**, 756
  cDNA cloning and sequencing (human osteosarcoma), **176**, 219
  identification in serum by NH$_2$-terminal amino acid sequence (pig), **181**, 1131

  IGFBP-1, demonstration of cell growth inhibitory activity, **174**, 673
  IGFBP-2, gene structure and chromosomal localization (human), **176**, 1250
  IGFBP-3
    cDNA cloning and sequencing (bovine), **177**, 1025
    recombinant, expressed in CHO cells, purification and characterization (human), **178**, 625
  purification from U-2 osteosarcoma cells, **176**, 213; *erratum*, **177**, 895
Insulin-like growth factor I receptors
  gene expression from blastoderm stage through organogenesis (chicken embryo), **176**, 1393
  gene promoter region, analysis (human), **177**, 1113
Insulin-like growth factor II receptors
  associated peptide Arg^{2410}–Lys^{2423}, G protein activation, effects of single residue substitutions, **179**, 10
Insulin receptors
  associated tyrosine kinase
    autophosphorylation and activation, inhibition by pertussis toxin, **181**, 1479
    cytoplasmic and plasma membrane substrates, reverse-phase chromatography of trypsin digests, **176**, 1402
    inhibitor pp63, encoding gene, expression proliferating liver and liver tumors (rat), **180**, 967
    phosphorylation of tyrosines 1158, 1162, and 1163 on synthetic dodecapeptide, **174**, 772
  class I disulfides, quantitation (human placenta), **176**, 1178
  encoding gene
    expression from blastoderm stage through organogenesis (chicken embryo), **176**, 1393
    RFLP, association with essential hypertension (human), **181**, 486
    transactivation by CAAT/enhancer-binding protein (human), **174**, 721
  glycosylation sites, mapping (human), **174**, 735
  insulin-stimulated serine/threonine phosphorylation, analysis, **179**, 962
  interaction with G$_i$ proteins in pancreatic acinar cells (rat), **175**, 380
  mRNA steady-state level, down-regulation by insulin (human), **175**, 520
  mutated at tyrosines 1158, 1162, and 1163, role in transmembrane signalling by insulin (human), **179**, 912
  naturally occurring variants, altered expression in adipocytes from non-insulin-dependent diabetes patients, **181**, 1419
  plasma membrane, 180-kDa substrate, identification as protein-tyrosine-phosphatase and elevated levels in diabetic plasma membranes (human placenta, rat liver), **180**, 463
  soluble ectodomain precursor, synthesis in insect cells infected with recombinant baculovirus (human), **177**, 764
  types A and B
    comparative mediation of insulin stimulation of phospholipase C, **181**, 566
    differential internalization kinetics (human), **177**, 1013
    role in insulin activation of phosphatidylinositol-3-kinase (human), **174**, 123
Integration sites
  vector, in genomic DNA, library-independent cloning of adjacent fragments: isolation of EB4-PSV gene from *Dictyostelium* gene disruption transformant, **181**, 884
Integrins
  –fibronectin binding, promotion of hyperpolarization in erythroleukemia cells (mouse), **177**, 1266
  gene expression, changes during matrix-induced bone formation (rat), **177**, 427
  mRNAs, analysis in human and rodent tumor cells, **176**, 108
  β_7 subunit, N-terminal sequence identity with M290 antigen expressed on intestinal intraepithelial lymphocytes (mouse), **176**, 1443
Interferon-α
  reduction of c-*myc* protein levels and DNA synthesis by inhibition of putrescine synthesis in hepatoma cell line (human), **178**, 378
Interferon-γ
  encapsulating asialofetuin-tacked liposomes, uptake by human hepatoma cells: inhibition of hepatitis B virus replication, **174**, 839
  enhancement of platelet adhesion to leukocytes via GMP-140/PADGEM protein (human), **179**, 756
  genomic DNA, cloning by PCR-based exon amplification for expression in *Escherichia coli* (pig), **180**, 1408
  induction of
    HLA class I antigen expression on Huh 6 cells: analysis of signal transduction pathways, **177**, 610
    MHC class II antigen, inhibitory effect of exogenous poly(ADP-ribose) synthetase gene expression (murine macrophages), **175**, 685
  recombinant, crystallization and preliminary X-ray diffraction studies (rabbit), **178**, 634
Interferons
  ovine trophoblastic, oTP, biologically active, expression with baculovirus expression system, **181**, 443
Interleukin-1
  induced IL-8 expression and production, inhibition by 1,25-dihydroxyvitamin D$_3$ (human), **176**, 1020
  induction of
    bone resorption and prostanoid synthesis in calvarial bone, potentiation by bradykinin (neonatal mouse), **175**, 775
    IL-8 and monocyte chemotactic peptide gene expression in synovial cells (human), **174**, 411
  inhibition of plasminogen activator inhibitor-1 production in articular cartilage and chondrocytes (human), **174**, 251
  intrapulmonary, mediation of acute immune complex alveolitis (rat), **175**, 604
  release from cultured osteoblastic cells, effect of parathyroid hormone (mouse), **179**, 236
  stimulation of coelomocytes (starfish), **180**, 579
  and ultraviolet light and β-melanotropin, interactions in murine melanoma and human squamous carcinoma cells, **175**, 839
Interleukin-1β
  enhancement of platelet adhesion to leukocytes via GMP-140/PADGEM protein (human), **179**, 756

  - induction of
    - L-arginine-derived relaxing factor production in aortic smooth muscle cells (rat), **176**, 114
    - group II phospholipase A_2 synthesis
      - and prostaglandin E_2 synthesis, in mesangial cells, prevention by dexamethasone (rat), **180**, 46
      - and secretion, in mesangial cells (rat), **174**, 268
    - nitric oxide synthase in mesangial cells, inhibition by transforming growth factor β_2 (rat), **175**, 372
  - intracisternal injection, gastric cytoprotection (rat), **174**, 1117
  - mRNA levels in brain, effect of kainic acid (rat), **176**, 593
  - production in monocytes, regulation by glucocorticoids: mechanism dependent on monocyte activation signal (human), **180**, 1383
- Interleukin-3
  - depletion in FDC-P2 cells, subsequent induction of short-term cell growth by active c-*erbB*-2 protein (mouse), **181**, 981
  - and erythropoietin, induced growth and differentiation signals and associated tyrosine kinases, comparison (mouse), **181**, 1103
  - stimulation of diacylglycerol generation in bone marrow-derived macrophages (mouse), **179**, 586
- Interleukin-4
  - blockage of parathyroid hormone-related protein-induced hypercalcemia *in vivo* (mouse), **178**, 694
  - mitogenic effects on capillary and large vessel endothelium (human), **174**, 1287
- Interleukin-5
  - biological activity in CHO cells, role of C-terminal amino acid sequence (human), **178**, 514
- Interleukin-6
  - effect on phenobarbital induction of cytochrome P450IIB in hepatocytes (rat), **178**, 1049
  - gene expression kinetics in lipopolysaccharide-stimulated whole blood (human), **174**, 18
  - induction in eosinophils, effects of L-tryptophan product constituents: implications for pathogenesis of eosinophilia–myalgia syndrome (human), **178**, 1008
  - mRNA levels in brain, effect of kainic acid (rat), **176**, 593
  - release from cultured osteoblastic cells, effect of parathyroid hormone (mouse), **179**, 236
  - tumor necrosis factor-induced expression in L929 cells, relationship to TNF-induced cytotoxicity, **178**, 993
- Interleukin-8
  - and fMLP or C5a, differential effects on PAF and leukotriene B_4 production by neutrophils (human), **176**, 972
  - gene expression
    - kinetics in lipopolysaccharide-stimulated whole blood (human), **174**, 18
    - in synovial cells, induction by interleukin-1 (human), **174**, 411
  - IL-1-induced expression and production, inhibition by 1,25-dihydroxyvitamin D_3 (human), **176**, 1020
  - inhibition and induction of histamine and leukotriene release in basophils (human), **179**, 628
  - –neutrophil-activating peptide-1, gene family members, induction in T cells, suppression by cyclosporin A (human), **181**, 179
- Interleukin-1 receptors
  - mRNA, detection in human heart by polymerase chain reaction, **181**, 520
  - phosphorylation at single threonine residue, induction by phorbol ester (mouse), **177**, 61
- Interleukin-2 receptors
  - functional α-subunit, encoding by exon 5-deleted mRNA (human T-cells), **180**, 1390
  - α-subunit mRNA, stabilization by HTLV-I protein *p27rex*: role of *p27rex* nucleolar localization signal, **175**, 98
- Interleukin-8 receptors
  - cDNA, characterization (rabbit), **179**, 784
- Interleukins
  - effects on plasma arginine vasopressin and oxytocin levels (rat), **174**, 1189
  - mRNAs, detection in human heart by polymerase chain reaction, **181**, 520
- Intermediate filament
  - fibroblast, selective dissociation by cetyltrimethylammonium bromide, **175**, 768
  - and nuclear matrix, networks in renal epithelial cells, modification by extracellular matrix (rat), **179**, 340
- Internalization
  - human insulin receptor isoforms A and B in Rat1 fibroblasts, comparative kinetics, **177**, 1013
- Inter-α-trypsin inhibitor
  - active component, detection in brain tissues of individuals with Alzheimer-type dementia, **174**, 1015
- Intestine
  - binding sites for 1,25-dihydroxyvitamin D_3, comparison with nonclassical target tissue (rat), **180**, 867
  - colon
    - derived T84 cell line, guanylate cyclase-coupled heat stable enterotoxin receptor cDNA from, expression in transfected COS-7 cells (human), **179**, 1455
    - mucosa, uptake and metabolism of $[^{14}C]$diacylglycerol (rat), **181**, 1028
  - ileal brush border membrane vesicles, taurocholic acid uptake, effect of antiserum to 99-kDa polypeptide (rat), **179**, 204
  - passive drug absorption across epithelium, analysis with Caco-2 cell monolayers as model (human), **175**, 880
  - plasma membrane Ca-pump mRNA, effect of vitamin D (rat), **179**, 749
  - purification of neuromedin N: identification as NMN-125 (dog), **179**, 301
  - small
    - crypt–villus axis, distribution of Na^+/glucose cotransporter SGLT1 protein and mRNA (rabbit), **181**, 1208
    - detection of MHC class II antigen-associated invariant chain mRNA (mouse), **179**, 1642
    - in streptozotocin-induced diabetic rat, expression of glucose transporter genes, **181**, 1110
- Intrinsic factor-cobalamin receptors
  - mRNA translation and expression *in vitro* (rat kidney), **177**, 751

5-Iodo-6-amino-1,2-benzopyrone
  inhibition of HIV-1 IIIB replication in AA-2 and MT-2 cell cultures, **180**, 504
3-Iodo-4-azido-*N*-hexadecylsalicylamide
  ^{125}I-labeled, in analysis of *in situ* binding of fatty acids to liver fatty acid-binding protein (Hep G2 cells, rat hepatocytes), **180**, 407
Iodonium biphenyl
  inhibition of superoxide-generating oxidase in cell-free system, analysis (bovine neutrophils), **175**, 143
Ion channels
  membrane-spanning helices of constituent proteins, conserved positioning of proline residues, **175**, 733
  nonselective cationic, voltage-, calcium-, and ATP-sensitive, detection in colonic tumor cells (human), **176**, 1196
  partially purified from hepatic mitochondria, patch clamp analysis (rat), **175**, 305
Ion-exchange chromatography
  myosin light chain kinase, identification of different enzyme forms (chicken gizzard smooth muscle), **175**, 277
Ionomycin
  and diacylglycerol, synergism with lysophosphatidylcholine in human T-cell activation, **178**, 1378
Iron
  beads, intravenous injection, subsequent elicitation by magnetic fields of platelet-activating factor-mediated hypotension (rat), **180**, 315
  binding protein, identified in liver, purification and characterization (rat), **181**, 409
  chronic dietary overload, associated hepatic energy state, ^{31}P NMR study (rat), **176**, 1262
  cluster in ribonucleotide reductase B2 protein, mixed valent state (*Escherichia coli*), **176**, 705
  dependent lipid peroxidation, inhibition by phosphatidylserine, **179**, 1077
  Fe^{3+}-heme center of horseradish peroxidase, axial symmetry, enhancement by ascorbate, **180**, 597
  induction of oxidative modification of glycated low-density lipoprotein (human), **177**, 433
  ions not tightly bound in F_1 ATPase, mediation of enzyme inactivation by H_2O_2 (bovine heart), **181**, 764
Irritation
  SO_2-induced, and viral infection, effects on mucin gene expression in airways (rat), **181**, 1
Ischemia
  in blood-perfused heart, associated excitation–contraction uncoupling (dog), **179**, 502
  –reperfusion, in isolated perfused liver, associated oxygen radical production, monitoring by luminol-enhanced chemiluminescence (rat), **174**, 217
Islet amyloid polypeptide
  and insulin, additive effect on 2-deoxyglucose uptake in pancreatic acini (mouse), **180**, 1513
  mammalian gastrointestinal tract, identification and characterization, **181**, 293
Islet cells
  insulin secretion
    DG-5128-stimulated, mechanisms (rat), **176**, 1545
    effects of human and rat amylin, **177**, 932
    glucagon-like peptide$_{(7-36)}$amide-stimulated, Na^+ dependency (rat), **179**, 701
    glucose-induced, at physiological and higher glucose concentrations, α- and β-anomeric preferences (rat), **180**, 709
  phosphatidic acid accumulation, synergistic stimulation by glucose and carbachol (rat), **180**, 960
  syngeneic, killing by activated macrophages via arginine-dependent nitric oxide generation (rat), **175**, 752
L-Isoaspartyl/D-aspartyl protein methyltransferase
  isozymes I and II, identification of distinct C-terminal sequences (human erythrocytes), **175**, 351; *erratum*, **176**, 549
Isoelectric focusing
  identification of acidic variant of serum amyloid A in family of Turkish origin, characterization, **181**, 1097
Isoleucine
  effect on acetohydroxy acid synthase expression in *gyrB* mutant of *Salmonella typhimurium*, **178**, 934
  tRNA, formation in liver, stimulation by spermine: correlation with structural change of acceptor stem (rat), **177**, 745
Isoleucine–tRNA ligase
  bound Mg(α,β-methylene)ATP, NOE conformational studies (*Escherichia coli*), **176**, 682
Isoleucyl-tRNA synthetase, *see* Isoleucine–tRNA ligase
Isomerization
  retinal at 13-ene, essential role in *Chlamydomonas reinhardtii* photobehavioral responses, **178**, 1273
Isoproterenol
  modulation of acetylcholine inhibition of K^+ current in intestinal smooth muscle cells (rabbit), **179**, 327

K

K252a
  and derivative KT5926, potent and preferential inhibition of Ca^{2+}/calmodulin-dependent protein kinase II, **181**, 423
Kainic acid
  effects on cytokine mRNA levels in brain (rat), **176**, 593
Kallikrein
  tissue, thrombin-stimulated release from neutrophils: relationship between blood coagulation and inflammation (human), **176**, 315
Keratinocytes
  epidermal
    normal and transformed, type VII collagen gene expression *in vitro*, up-regulation by transforming growth factor β (human), **180**, 673
    retinoylation of cytokeratins (human), **180**, 393
  expression of proteoglycan and glycosaminoglycan free chains (human), **179**, 1281
  growth
    inhibition by antisense c-myc mRNA oligomer, lack of coupling to differentiation induction (human), **174**, 287

stimulation by hepatocyte growth factor/hepatopoietin A (mouse), **174**, 331
3-Ketoacyl-CoA thiolase, *see* Acetyl-CoA acyltransferase
Ketogenesis
  hepatic, effect of spontaneous diabetes (rat), **176**, 1157
3-Ketothiolase
  deficiency, structural mutation ^{347}Ala to Thr in affected German family, **179**, 124
Kidney
  cortex, of gentamicin-treated rats, isolated myelin bodies, lipid and protein composition, **181**, 894
  detection of high levels of osteogenic protein OP-1 mRNA (mouse), **179**, 116
  1,25-dihydroxyvitamin D_3 binding sites, comparison with nonclassical target tissue (rat), **180**, 867
  distribution of platelet-activating factor receptors (guinea pig), **177**, 54
  early proximal tubules, detection of arginine vasopressin subtype V_p (rat), **180**, 131
  embryonic 293 cells, expression of transfected angiotensinogen gene (human), **180**, 1103
  endothelin-1 vasoconstrictive effects and regional extraction (human), **180**, 1298
  glomeruli, in low-sodium rats, angiotensin II-hypersensitive contraction and ANF refractoriness, role of glibenclamide-sensitive K^+ channels, **181**, 871
  intraperoxisomal forms of alanine–glyoxylate aminotransferase, description (chicken, pigeon), **176**, 1450
  papillary collecting tubule cells, arginine vasopressin-induced cAMP production, enhancement by high potassium (rat), **177**, 840
  proximal tubule cells
    angiotensin II-induced hypertrophy in culture, effect of glucose concentration (mouse), **176**, 902
    epithelial, normal and transformed, growth stimulation by hepatocyte growth factor/hepatopoietin A (rat), **174**, 331
  senecionine in, detoxification by flavin-containing monooxygenase (guinea pig), **178**, 546
Killer cells
  lymphokine-activated, cytotoxicity against human retinoblastoma cells *in vitro*, enhancement by PSK, **174**, 107
  natural, *see* Natural killer cells
Kinesin
  $\alpha_2\beta_2$ and α_2 forms, characterization (bovine brain), **174**, 810
Kinetics
  burst, α-chymotrypsin inactivation by halo enol lactones, **178**, 1335
  internalization, human insulin receptor isoforms A and B in Rat1 fibroblasts, comparison, **177**, 1013
  phosphofructokinase from polymorphonuclear leukocytes (human), **178**, 672
  talin–actin binding (chicken), **178**, 718
Kinetoplasts
  minicircle DNA, replication, catenated dimers and knotted DNA structures as putative intermediates (*Trypanosoma cruzi*), **174**, 958
Kininogen
  T-, developmental and tissue-specific expression (rat), **174**, 417
KRESTIN, *see* PSK
Kringle domains
  deletion in hepatocyte growth factor, effects on related biological activities, **181**, 691
  relationship to plasmin denaturation (human), **178**, 360
KT5926
  and related K252a, potent and preferential inhibition of Ca^{2+}/calmodulin-dependent protein kinase II, **181**, 423
Kupffer cells
  and endothelial cells, hepatic, clearance of monomeric and polymeric fractions of formaldehyde-treated albumin: scavenger receptor heterogeneity (rat), **180**, 23
  partial processing of trifluoroacetylated protein adducts in halothane-treated rats, **175**, 256

L

L-694,746
  inhibition of HIV-1 protease, **181**, 1456
Lactase
  intestinal, mRNA levels and activities, modulation by cortisone and thyroxine (suckling rat), **180**, 174
Lactate dehydrogenase
  isozyme A(M), deficiency, related mutations, analysis by DNA conformation polymorphism with polyacrylamide gradient gel and silver staining (human), **180**, 1083
Lactoferrin
  activation of plasma membrane NADH oxidase and Na^+/H^+ antiport (human, rat), **176**, 498
  mRNA, sequence analysis and expression in mammary gland (bovine), **180**, 75
Lacto-*N*-fucopentaose
  type 1, bearing fluorescent probe, staining of implanting embryo on mural side of trophectoderm (mouse), **181**, 1004
  type III, oligosaccharide, Le^x group, solution conformation by ^{1}H NMR spectroscopy and quantum mechanical calculations, **180**, 1214
Lactoperoxidase
  identification of amitrole as substrate, **180**, 585
Lactosylceramide, *see* Cytolipin H
Lactoylglutathione lyase
  active site, glutathione derivatives as steric probes, synthesis and characterization (yeast), **177**, 252
  S-D-*dithio*mandeloylglutathione as alternate substrate, synthesis and characterization, **181**, 657
Laminarinase
  gene nucleotide sequence (*Clostridium thermocellum*), **181**, 507
Laminin
  related peptides, inhibitory effects on experimental metastasis (mouse), **174**, 1159

Laminin receptors
  calsequestrin role as, analysis (chicken muscle), **174**, 1208
  gastric mucosal, inhibition by *Helicobacter pylori* lipopolysaccharide (rat), **175**, 963
  high-affinity
    identification as member of multicopy gene family (mouse), **175**, 84
    67-kDa, biosynthesis, **177**, 177
Lanosterol 14α-demethylase
  from rat liver and yeast, different specificities for 24-methylene-24,25-dihydrolanosterol and 24,25-dihydrolanosterol, **178**, 1064
Lanosterol 14α-methyl demethylase
  identification in human tissues, **177**, 497
Laparotomy
  stimulation of hepatic ornithine decarboxylase, prevention by adrenergic blockade (rat), **174**, 915
Lasers
  induced reconnection of severed axons, demonstration (*Lumbricus terrestris*), **180**, 874
Lauryl sucrose
  in amphotericin B delivery, inhibition of interaction between AmB and lipoproteins (human), **181**, 722
Leaves
  atrial natriuretic peptide concentrations (*Dracena godseffiana*), **179**, 695
Lecithin
  organogels, as matrices for transdermal transport of drugs, **177**, 897
Lecithin–cholesterol acyltransferase, *see* Phosphatidylcholine–sterol acyltransferase
Lectins, *see also specific lectins*
  β-galactoside-binding, subunit purification and characterization (frog eggs), **178**, 407
  N-glycolylneuraminic acid-specific, purification from albumin gland of *Pila globosa*, **178**, 85
  horseradish peroxidase-conjugated, in carbohydrate analysis of human von Willebrand factor, **178**, 1253
Leishmania mexicana
  proliferation, control by modulation of polyamine intracellular levels, **180**, 797
Lens
  fiber cell-specific 94-kDa protein, defect in inherited microphthalmic mutant *Elo* mouse, **179**, 1175
  normal and cataractous, synchronous scan fluorescence spectroscopy (human), **176**, 1351; *erratum*, **177**, 1325
Leucine
  and aspartic acid, uptake into brush border membrane vesicles from *Manduca sexta* midgut, differential inhibition by *Bacillus thuringiensis* δ-endotoxin, **181**, 1089
Leucyl aminopeptidase
  identity with prolyl aminopeptidase: structural and immunological evidence, **178**, 1459
Leukemia
  infant acute lymphoblastic, diminished phosphorylation of heat shock protein hsp27 (human), **175**, 134
Leukemia inhibitory factor
  induction of myelomonocytic leukemia cell differentiation, associated phosphorylation of heat shock protein hsp27 (mouse), **176**, 979
  mRNA levels in brain, effect of kainic acid (rat), **176**, 593
  murine recombinant, modulation of 1,25-dihydroxyvitamin D_3 inhibitory effect on alkaline phosphatase in MC3T3-E1 cells, **175**, 577
Leukocidin
  S-component gene, nucleotide sequence (methicillin-resistant *Staphylococcus aureus*), **181**, 138
Leukocyte elastase
  gene expression: positive and negative regulatory elements in 5′ flanking region (human), **181**, 1462
  inactivation by human mucus proteinase inhibitor: localization of inhibitory activity in carboxy-terminal domain (human), **179**, 1587
  inhibitor ONO-5046, biochemical and pharmacological properties (human), **177**, 814
  and medullasin, comparison: primary structure and elastinolytic activity (human bone marrow), **178**, 501
  primary structure and elastinolytic activity (human bone marrow), **178**, 501
Leukocytes
  cAMP content, determination by competition binding assay (human), **178**, 980
  cDNA library, identification of clones encoding three biliary glycoprotein variants (human), **176**, 578
  heat shock protein induction by 12-hydroxyeicosatetraenoic acid (human), **175**, 804
  mononuclear, plasma membrane-rich fractions, high-affinity binding of aldosterone (human), **181**, 1306
  polymorphonuclear, *see* Neutrophils
Leukotriene A_4 hydrolase
  cDNA cloning, sequencing, and expression (mouse), **176**, 1516
Leukotriene B_4
  biosynthesis from arachidonic acid in B lymphocytes (human), **178**, 302
  edema-promoting actions, inhibition by calcitonin gene-related peptide (hamster, human, rat), **180**, 1429
  induced neutrophil migration, inhibition by lipoxin A_4: structure–function relationships, **180**, 1416
  production by neutrophils, differential effects of neutrophil-activating peptide/IL-8 and fMLP or C5a (human), **176**, 972
Leukotrienes
  and histamine, release in basophils, interleukin-8 as inhibitor and inducer (human), **179**, 628
LH-RH, *see* Luteinizing hormone-releasing hormone
Lichenase
  gene isolation and biotechnologically relevant properties (*Clostridium thermocellum*), **177**, 447
Light
  blue, induced polymorphogenesis, role of G proteins: signal transduction in *Coprinus congregatus*, **179**, 1225
  dependent generation of hydroxyl radicals in erythrocytes, demonstration by spin trapping (human), **179**, 1305
  role in protein kinase C inhibition by calphostin C, **176**, 288
  ultraviolet, *see* Ultraviolet light
  ultraweak, emission from dark-adapted leaves of paraquat-

    resistant and susceptible tobacco plants, comparison, **178**, 438
Light microscopy
  video-enhanced, visualization of exocytosis in colonic goblet cells (rabbit), **176**, 466
Lignin
  depolymerization *in vitro* by *Phanerochaete chrysosporium* manganese peroxidase, **176**, 269
Ligninase
  degradation of azo dyes, role of veratryl alcohol (*Phanerochaete chrysosporium*), **178**, 1056
Lignin peroxidase
  from white-rot fungus *Trametes versicolor*, encoding gene, cloning and characterization, **179**, 428
Limb bud
  early, identification of cell populations synthesizing cartilage proteoglycan core protein (chicken), **174**, 688
Lipase, *see* Triacylglycerol lipase
Lipid peroxidation
  glycated low-density lipoprotein in presence of iron (human), **177**, 433
  iron-dependent, inhibition by phosphatidylserine, **179**, 1077
  microsomal
    daunorubicin-augmented, attenuation by calcium channel antagonists (rat), **179**, 1101
    inhibition by vitamin E derivatives (rat liver), **174**, 1103
  myoglobin-induced, initiating agents, identification (human), **179**, 1414
Lipids
  bacterial membrane, fluidity, monitoring by intramolecular excimerization of 1,3-di(2-pyrenyl)propane, **176**, 356
  composition of myelin bodies isolated from renal cortex of gentamicin-treated rats, **181**, 894
  extracts
    cerebral, identification of *sn*-2-ω-hydroxycarboxylate-containing phospholipids (bovine), **177**, 466
    hepatic mitochondrial, ^{1}H NMR studies (rat), **179**, 904
  as fuel source, increased reliance on, induction by TCDD (chicken embryo), **174**, 1267
Lipocalins
  identification of oncogene protein 24p3 as member, **180**, 69
Lipogenesis
  in brown adipocytes from lactating and non-lactating rats, comparative effects of insulin and beta-cell tropin, **181**, 1437
Lipolysis
  in 3T3-L1 adipocytes, enhancement after prolonged exposure to tolbutamide, **181**, 1385
Lipophorin
  low-density, surface apolipophorin III, displacement by human apolipoprotein A-I, **179**, 734
Lipopolysaccharide
  binding protein CAP18, cDNA sequence (rabbit), **179**, 170
  and cAMP, synergistic induction of ornithine decarboxylase gene expression in macrophage-like cell line RAW264, **175**, 48
  Helicobacter pylori, inhibition of rat gastric mucosal laminin receptors, **175**, 963
  induction of
    group II-like phospholipase A_2 in liver of BCG-primed rats, **174**, 1077
    nitrite formation in macrophages, suppression by poly(ADP-ribose) polymerase inhibitors (mouse), **179**, 865
  stimulated monocytes, production of transforming growth factor β in active form (human), **174**, 885
  stimulated whole blood, cytokine gene expression kinetics (human), **174**, 18
Lipoprotein receptors
  low-density
    allele-specific transcripts in individuals with heterozygous familial hypercholesterolemia, detection by polymerase chain reaction, **178**, 1319
    isolation as glycoprotein of M_r 145,000 by rapid purification method (*Trypanosoma brucei brucei*), **178**, 185
  for oxidized low-density lipoproteins, role in macrophage uptake of oxidized LDL (human, mouse), **179**, 359
Lipoproteins
  high-density
    cholesterol in, as mechanistic probe for side chain cleavage reaction, **179**, 161
    from patient with apolipoprotein E deficiency, inhibition of platelet function, **181**, 1331
  high- and low-density, modulation of gene expression in vascular smooth muscle cells (human), **178**, 1465
  incorporated pregnenolone fatty acid esters, action as substrate for ovarian progestin synthesis (porcine granulosa cells), **179**, 1576
  low-density
    glycated, oxidative modification in presence of iron (human plasma), **177**, 433
    oxidation in presence of endothelial cells or Cu^{2+}: identification of major products, **176**, 431
    oxidized, uptake by macrophages, role of receptors for oxidized LDL (human, mouse), **179**, 359
    susceptibility to Cu^{2+}-catalyzed oxidative modification, reduction by eicosapentaenoic acid ethyl ester ingestion (rabbit), **175**, 61
    uptake and processing by macrophages, stimulation by ganglioside GM_3 (mouse), **177**, 582
  plasma, interaction with amphotericin B, inhibition by delivery systems (human), **181**, 722
  supported corticosterone production in adrenal cells, inhibition by okadaic acid (rat), **179**, 726
Liposomes
  asialofetuin-tacked, interferon-γ-encapsulating, uptake by human hepatoma cells: inhibition of hepatitis B virus replication, **174**, 839
  complement-dependent phagocytosis, suppression by GM_1 ganglioside and sulfatide, **176**, 866
  containing cationic cholesterol derivative, for efficient transfection of mammalian cells, **179**, 280
  mediated transfection of exogenous DNA into hepatocytes *in vivo*, subsequent DNA expression (rat), **174**, 1223
  reconstituted adenylate cyclase, catalytic activity, role of transmembrane Ca^{2+} gradient (bovine brain), **175**, 366

Lipoxin A_4
  and all-*trans* isomer, metabolism by human leukocytes and rat hepatic microsomes, **177**, 134
  inhibition of leukotriene B_4-induced neutrophil migration: structure–function relationships, **180**, 1416
Lipoxin B_4
  and all-*trans* isomer, metabolism by human leukocytes and rat hepatic microsomes, **177**, 134
Lipoxins
  formation and proliferative effects in bone marrow (human), **180**, 255
Lipoxygenase
  associated dioxygenase and fatty acid lyase activities: catalysis of oxodiene formation (vetch), **180**, 1002
  cerebral activity, reevaluation of past findings (rat), **174**, 729
  inhibition by anacardic acids, **176**, 775
5-Lipoxygenase
  activity in B lymphocytes (human), **178**, 302
Lithium
  effect on second messenger accumulation in NG108-15 cells, **174**, 606
Liver, *see also* Hepatocytes
  aflatoxin B_1 disposition *in vivo* (rat), **179**, 1095
  apolipoprotein A-I gene expression, upregulation by monosaturated fatty acid diet (rat), **180**, 162
  carcinogenesis and regeneration, associated GTP-dependent membrane fusion, analysis (rat), **176**, 1494
  c-*fos* and c-*jun* transcript levels, increase associated with aging (rat), **178**, 1485
  c-myc mRNA expression, effect of dietary manipulation (chicken), **180**, 1
  cytochrome oxidase induction after adriamycin-induced oxidative stress in rats fed dietary olive oil, **181**, 375
  cytochrome P450IA1 induction by single dose of 3-methylcholanthrene (fetal rat), **176**, 280
  demonstration as principal site of T-kininogen expression (rat), **174**, 417
  endothelial and Kupffer cells, clearance of monomeric and polymeric fractions of formaldehyde-treated albumin: scavenger receptor heterogeneity (rat), **180**, 23
  endothelin-1, -2, and -3 binding sites, partial characterization and subcellular distribution (human), **181**, 840
  energy state in chronic dietary iron overload, ^{31}P NMR study (rat), **176**, 1262
  extracellular matrix, sequestration of hepatocyte growth factor (rat), **174**, 90
  fatty acid metabolism, effects of spontaneous diabetes (rat), **176**, 1157
  ganglioside levels, effect of partial hepatectomy (rat), **174**, 638
  glucose output and flow during ortho- and retrograde perfusion, differential effects of C3a (rat), **176**, 1218
  glucose transporter gene expression in obese and diabetic rats, **175**, 995
  growth hormone-binding protein mRNA, identification (rat), **180**, 489
  group II-like phospholipase A_2 induction by lipopolysaccharide (BCG-primed rat), **174**, 1077
  hepatocyte growth factor receptors, identification: downregulation after partial hepatectomy and during induced hepatitis (rat), **176**, 599
  hydroxysteroid sulfotransferase-a gene, age- and gender-related expression (rat), **175**, 1051
  interlobular connective tissue, polymorphonuclear cell granules in, localization of ADP-ribose acceptor protein p33 (chicken), **180**, 64
  iron-binding protein, purification and characterization (rat), **181**, 409
  isolated perfused, oxygen radical production during ischemia–reperfusion, monitoring by luminol-enhanced chemiluminescence (rat), **174**, 217
  isoleucine tRNA formation, stimulation by spermine, correlation with structural change of acceptor stem (rat), **177**, 745
  L-type pyruvate kinase gene and LF-B1 gene expression, relationship (rat), **176**, 1074
  lysosomal membranes, 85-kDa sialoglycoprotein, cDNA clone, isolation and sequencing (rat), **178**, 444
  mevalonate-5-diphosphate decarboxylase induction and stabilization (rat), **181**, 1449
  neoplastic, from carcinogen-exposed sole, detection of 4,6-diamino-5-formamidopyrimidine, 8-hydroxyguanine, and 8-hydroxyadenine in DNA, **173**, 614; *erratum*, **175**, 359
  nonparenchymal cells, growth stimulation by hepatocyte growth factor/hepatopoietin A (rat), **174**, 331
  nuclear lamina, organization, developmental changes (mouse), **179**, 1082
  nuclear retinoic acid receptor mRNA levels, differential effects of all-*trans*-retinoic acid and *cis*-retinoic acid (rat), **180**, 1137
  perfused, protein synthesis initiation, impairment by inhibition of microsomal calcium sequestration (rat), **177**, 1082
  and placenta, derived monoamine oxidase A, differences in substrate specificities (human), **181**, 1084
  polyaromatic hydrocarbon-inducible cytochrome P450, induction by estradiol-17β (chicken), **175**, 928
  proliferating cells, expression of pp63 gene encoding insulin receptor tyrosine kinase inhibitor (rat), **180**, 967
  proteolysis stimulated by ATP and ATP + ubiquitin, analysis (rat), **179**, 1400
  putative cytochrome P450 isozyme induction by 2-amino-1-methyl-6-phenylimidazo[4,5-*b*]pyridine (rat), **174**, 797
  regeneration
    associated prostaglandin E_2 receptor downregulation, physiological significance (rat), **176**, 226
    effect on transcription of rDNA intergenic spacer sequences, comparison (rat), **176**, 1333
    after partial hepatectomy
      associated expression of hepatocyte growth factor mRNA (rat), **177**, 559
      role of hepatocyte growth factor (rat), **177**, 330
  and reticulocyte cytochrome b_5 mRNAs, isolation from single gene (human), **178**, 38
  senecionine in, detoxification by flavin-containing monooxygenase (guinea pig), **178**, 546

  - in tumor-bearing rats, hepatic pyruvate carboxylase activity, ^{13}C NMR study, **179**, 366
- Long interspersed nucleotidic elements
  - marked transposon, evidence for reverse transcription intermediate (rat tumoral cells), **181**, 863
- Lovastatin
  - inhibition of growth factor signaling pathways (human fibroblasts), **180**, 1284
  - tissue selectivity *in vivo* (rat), **158**, 667; *erratum*, **174**, 1053
- Lubrication
  - boundary, related properties of statherin from saliva, analysis (human), **180**, 91
- Luciferase
  - bacterial, *see* Alkanal monooxygenase (FMN-linked)
- Luminol
  - enhanced chemiluminescence, in monitoring oxygen radical production in isolated perfused liver during ischemia–reperfusion (rat), **174**, 217
- Lung
  - acute immune complex alveolitis, mediation by intrapulmonary interleukin-1 (rat), **175**, 604
  - adult and fetal, detection of GLUT-1 glucose transporter protein (mouse), **180**, 367
  - binding sites for 1,25-dihydroxyvitamin D_3, comparison with classical target tissue (rat), **180**, 867
  - bronchi, local formation and degradation of endothelin-1, effects of phosphoramidon (guinea pig), **179**, 830
  - clearance of nitroxide radicals, ESR measurement *in vivo* (mouse), **177**, 874
  - nuclear retinoic acid receptor mRNA levels, differential effects of all-*trans*-retinoic acid and *cis*-retinoic acid (rat), **180**, 1137
  - senecionine in, detoxification by flavin-containing monooxygenase (guinea pig), **178**, 546
- Luteal cells
  - prostaglandin $F_{2\alpha}$ and progesterone production, stimulation by basic fibroblast growth factor (rat), **178**, 393
- Luteinizing hormone
  - equine, and equine chorionic gonadotropin, β-subunits with identical amino acid sequence: analysis of asparagine-linked oligosaccharide chains, **174**, 940
  - secretion in pituitary cell culture, stimulation by endothelin-3 (rat), **174**, 338
- Luteinizing hormone receptors
  - binding activity, effects of site-directed mutagenesis of potential glycosylation sites (rat), **181**, 804
- Luteinizing hormone-releasing hormone
  - and antagonist Antide, comparative susceptibility to enzymatic hydrolysis, **176**, 25
  - antagonist argtide, evaluation, **180**, 374
- Luteotropin, *see* Prolactin
- Lymphoblastoid cells
  - B, high-level expression of functional platelet-activating factor receptors (human), **180**, 1318
  - familial Alzheimer disease, abnormal and deficient processing of β-amyloid precursor protein, **175**, 361
- Lymphoblasts
  - MOLT-4, inhibition by purine-nucleoside phosphorylase inhibitor CI-972 (human), **178**, 1351
- Lymphocytes
  - activation, effects on tRNA (rat), **180**, 638
  - B, *see* B cells
  - cultured cell lines, HIV-1 reproduction, effect of TCDD (human), **179**, 46
  - 12-hydroxy-5,8,10,14-eicosatetraenoic acid production, increase during selenium deficiency (bovine), **181**, 389
  - infected with recombinant vaccinia virus with coding sequence for hepatitis B virus surface antigens, production of 22 nm HBsAg particles (human), **179**, 1479
  - micronuclei, spontaneous and mitomycin C-induced, effects of extremely low frequency pulsed magnetic fields (human), **176**, 194
  - mitogen-stimulated, proliferation, associated induction of DNA polymerase β (human), **181**, 623
  - peripheral blood
    - HIV-1 replication inhibition by 2′,3′-dideoxyinosine, potentiation by EICAR and ribavirin (human), **178**, 563
    - and monocyte/macrophages, HIV-1 replication, inhibitory effects of acyclic nucleoside phosphanate analogs (human), **178**, 329
    - sulfite as essential metabolite for, evidence (human), **179**, 611
  - proliferation, role of Op18 phosphoprotein (human), **179**, 1649
  - splenic
    - proliferation *in vitro*, inhibition by porphyrins (mouse), **174**, 313
    - spontaneous proliferation, inhibition by thyrotropin-releasing hormone (mouse), **181**, 562
  - T, *see* T cells
  - thyroid, derived Ig genes, expression in bacteriophage λ library, in cloning human Fab fragment specific for thyroid peroxidase, **179**, 372
  - tonsillar, deoxycytidine incorporation into DNA and phospholipid precursors, **174**, 680
- Lysine
  - and kringles and fibrinogen degradation products, effects on plasmin denaturation (human), **178**, 360
  - Lys-9, sidechain, endothelin-1 biotinylated at, in evaluation of endothelin receptor populations, **181**, 1245
- Lysolecithin
  - activation of hemolymph phenoloxidase (lobster), **176**, 1371
- Lysophosphatidic acid
  - binding protein, cytosolic, stimulation of mitochondrial glycerophosphate acyltransferase (rat liver), **175**, 339
- Lysophosphatidylcholine
  - synergism with diacylglycerol and ionomycin in human T-cell activation: role as second messenger, **178**, 1378
- Lysophosphatidylserine
  - dependent degranulation of peritoneal mast cells, suppression by group II phospholipase A_2 inhibitors (rat), **181**, 714
- Lysosomes
  - associated DNase, purification (*Drosophila melanogaster*), **181**, 44

  - associated enzymes, sorting in NIH-3T3 cells, effect of insulin-like growth factor II overexpression (mouse), **179**, 108
  - membrane, 85-kDa sialoglycoprotein, cDNA clone, isolation and sequencing (rat liver), **178**, 444
  - targeting of cathepsin D to, associated region, analysis of homologous area in β-hexosaminidase B, **179**, 477

M

- Macromolecules
  - endogenous, negative regulation of Scl-70/topoisomerase I (human, rat), **178**, 414
- Macrophages
  - activated, killing of syngeneic islet cells via arginine-dependent nitric oxide generation (rat), **175**, 752
  - alveolar
    - DNA synthesis, inhibitory factor in lung-conditioned medium (human), **180**, 1207
    - evidence for presence of platelet-activating factor receptor (human), **177**, 704
  - bone marrow-derived
    - diacylglycerol generation, stimulation by granulocyte–macrophage colony-stimulating factor and interleukin-3 (mouse), **179**, 586
    - interaction with bacteria, effects on L-arginine metabolism and tumoricidal activity (rat), **177**, 821
  - cell-surface binding sites for cationized bovine serum albumin, **181**, 787
  - growth and differentiation in bone marrow cultures, effects of insulin-like growth factor I (rat), **174**, 647
  - hepatic, formation of inositol phosphates, inhibition by glucocorticoids, **178**, 974
  - hydrogen peroxide production and phagocytic function after phagocytosis mediated by Fc or complement receptors, comparison (rat), **180**, 268
  - immunosuppressive effect of hyperbaric oxygenation (mouse), **179**, 886
  - lipopolysaccharide-induced nitrite formation, suppression by poly(ADP-ribose) polymerase inhibitors (mouse), **179**, 865
  - –monocytes, and peripheral blood lymphocytes, HIV-1 replication, inhibitory effects of acyclic nucleoside phosphanate analogs (human), **178**, 329
  - oxidized low-density lipoprotein receptor, role in cellular uptake of oxidized LDL (human, mouse), **179**, 359
  - peritoneal
    - arachidonic acid release, receptor-mediated activation, role of extracellular calcium influx (mouse), **180**, 1036
    - carnitine palmitoyltransferase activity and sensitivity to malonyl-CoA inhibition, effects of cholesterol loading (mouse), **177**, 1121
    - from various murine strains, uridine uptake: short-term and two-step stimulation model, **177**, 1299
  - phagocytosis of individual zymosan particles, associated single pulses of $[Ca^{2+}]_i$ (mouse), **177**, 460
  - protein kinase C actions, improved selectivity of RO 31-7549 and RO 31-8220 over staurosporine for, **181**, 396
  - related P388D1 cells, stimulation of histamine H1 receptors, induction of intracellular calcium increase, **181**, 1156
  - related RAW264 cells, ornithine decarboxylase gene expression, synergistic induction by lipopolysaccharide and cAMP, **175**, 48
  - uptake and processing of low-density lipoproteins, stimulation by ganglioside GM_3 (mouse), **177**, 582
  - various cell lines, expression of activation-associated marker proteins, **176**, 882; *erratum*, **177**, 895
- Magnesium
  - and calcium, synergistic effect in phospholipase A_2 activation in hepatic macrophages (rat), **175**, 532
  - effect on glycolysis of permeabilized Ehrlich ascites tumor cells, **179**, 1000
  - fluorescent indicators, rate constants, ion selectivity, and thermodynamic properties: effects of pH, **177**, 184
  - lack of mithramycin binding to left-handed poly(dG-m^5dC) in presence of, **177**, 511
- Magnetic fields
  - elicitation of platelet-activating factor-mediated hypotension after intravenous injection with iron beads (rat), **180**, 315
  - pulsed, extremely low frequency, effects on spontaneous and mitomycin C-induced micronuclei in lymphocytes (human), **176**, 194
- Malonyl-CoA
  - carnitine palmitoyltransferase sensitivity to inhibition by, effects of cholesterol loading (murine macrophages), **177**, 1121
  - inhibition of proteolysis of carnitine palmitoyltransferase, **178**, 600
- Mammary gland
  - expression of lactoferrin mRNA (bovine), **180**, 75
  - gastrin releasing peptide-related immunoreactive substance, levels and origin (rat), **180**, 455
- Manganese
  - association with insulin-degrading enzyme (human placenta, rat liver, muscle), **181**, 1398
- Manganese peroxidase
  - active, heterologous expression in Sf9 cells with baculovirus expression system (*Phanerochaete chrysosporium*), **179**, 897
  - degradation of high-molecular-weight chlorolignin (*Phanerochaete chrysosporium*), **178**, 1092
  - lignin depolymerization *in vitro* (*Phanerochaete chrysosporium*), **176**, 269
- Mannans
  - without β-1,2 linkage and phosphate group, elaboration by *Candida albicans* serotype A strains, **175**, 1003
- Manno-oligosaccharides
  - released from phosphopeptidomannan, ^1H NMR analysis (*Candida albicans*), **181**, 1251
- α-1,3-Mannosyl-glycoprotein β-1,2-*N*-acetylglucosaminyltransferase
  - gene organization and localization to chromosome 5 (human), **176**, 608

Maple syrup urine disease
  dihydrolipoyl transacylase mRNA from thiamine-responsive patient, detection of 17-bp insertion and missense mutation, **174**, 804
Mass spectrometry
  laser desorption, matrix-assisted, analysis of underivatized oligosaccharides, **177**, 644
Mast cell-degranulating peptide
  D- and L- isomers with cationic clusters within α-helical structure, activation of GTP-binding proteins (honeybee venom), **178**, 400
Mast cells
  exocytosis: role of granule proteoglycan processing in degranulation (dog), **179**, 140
  peritoneal
    antigen-induced phospholipase D activation, role of protein kinase C (rat), **175**, 159
    anti-IgE-induced histamine release, effect of 2-nitro-4-carboxyphenyl-*N*,*N*-diphenylcarbamate (rat), **181**, 1313
    lysophosphatidylserine-dependent degranulation, suppression by group II phospholipase A_2 inhibitors (rat), **181**, 714
  RBL-2H3, antigen-induced diacylglycerol formation, role of phosphatidylcholine, **177**, 336
  from spontaneously hypertensive and normotensive rats, release of nitric oxide, comparison, **177**, 1178
Mastoparan
  containing cationic clusters within α-helical structure, activation of GTP-binding proteins (wasp venom), **178**, 400
  enhancement of membrane permeability in parotid acinar cells, role of G protein activation (rat), **177**, 802
  induction of cytosolic Ca^{2+} oscillations in pancreatic acinar cells (rat), **177**, 159
  stimulated phosphoinositide turnover in hepatocytes, effect of okadaic acid (rat), **179**, 852
Medullasin, *see* Leukocyte elastase
Megakaryocytes
  differentiation, inducing protein, purification from fibrous histiocytoma cell line: N-terminal sequence homology with activin A (human), **174**, 1163
  identification of *hck* tyrosine kinase cDNA (rat), **181**, 1137
Meiosis
  pachytene spermatocytes *in vitro* (rat), **179**, 1115
Melanocytes
  DNA synthesis and growth, stimulation by hepatocyte growth factor (human), **176**, 45
  and melanoma cells, differential genomic susceptibility, relationship to expression of DNA-binding proteins (mouse), **178**, 1036
Melanogenesis
  effects of histamine H2 receptor antagonists (human, murine melanoma cells), **177**, 545
β-Melanotropin
  and interleukin-1 and UV light, interactions in murine melanoma and human squamous carcinoma cells, **175**, 839
Melatonin
  binding proteins, affinity labeling (hamster brain), **178**, 1147
  effects on [^{3}H]thymidine uptake by DNA of thyroid lobes *in vitro* (rat), **181**, 1187
  induced inhibition of forskolin-stimulated cerebral adenylate cyclase, blockage by pertussis toxin (chicken), **178**, 786
Melibiose permease
  Asp55 substitution in putative helix II, abolishment of Na^+-mediated activation of sugar binding (*Escherichia coli*), **178**, 1176
Melphalan
  effects on synthesis of low-molecular-weight proteins in lymphoma cells (human), **176**, 717
Membrane fusion
  inducing peptides, N-terminal modification, blockade of fusion activity, **179**, 1050
Membrane potential
  depolarization, and Ca^{2+} transients, in synaptosomes, simultaneous measurement (rat), **181**, 797
Membranes
  anterior pituitary and hypothalamic, specific binding of growth hormone-releasing peptide, demonstration and characterization (rat), **178**, 31
  associated maternal protein xlcaax-1, cDNA identification (*Xenopus laevis*), **179**, 1635
  bacterial, lipid fluidity, monitoring by intramolecular excimerization of 1,3-di(2-pyrenyl)propane, **176**, 356
  basement, reconstituted, invasion by human fibrosarcoma cells, suppression by transforming growth factor β, **176**, 129
  biological, anticancer drug partitioning in, spectrophotometric measurement, **176**, 1079
  bound glycoproteins, *ret* oncogene products identified as, tyrosine phosphorylation *in vivo* (murine cell lines), **181**, 416
  brush border
    ileal, taurocholic acid uptake in vesicles from, effect of antiserum to 99-kDa polypeptide (rat), **179**, 204
    leucine and aspartic acid uptake in vesicles from, differential inhibition by *Bacillus thuringiensis* δ-endotoxin (*Manduca sexta* midgut), **181**, 1089
  cardiac, endothelin-1 binding sites, inhibitory effect of [D-Arg^1,D-Phe,D-Try^{7,9},Leu^{11}]substance P (rat), **179**, 130
  cellular
    damage from hypothermia, protective effects of fish antifreeze proteins (immature bovine oocytes), **180**, 566
    phosphoinositidase C, topological regulation (human), **178**, 773
    transfected, expressing single muscarinic receptor subtype, binding of radioiodinated SPECT ligands (rat), **179**, 768
  cerebral, agonist binding to A_1 adenosine receptors, differential effects of *N*-ethylmaleimide in presence and absence of ligand (pig), **181**, 213
  chorioallantoic, angiogenesis *in vivo*, inhibition by eponemycin (chicken embryo), **181**, 1070

- erythrocyte
  - detection of influenza virus-reactive glycophorins (human), **178**, 79
  - fragments, Ca-ATPase, effect of cholera toxin (human), **181**, 208
  - normal and sickle, phospholipid packing, effects of inserted oxysterols, **180**, 730
  - scanning tunneling microscopy (human), **181**, 600
- erythroleukemia cells, binding of differentiation-enhancing factor, role in hexamethylenebisacetamide-induced differentiation, **179**, 153
- fusion, inducing peptides, N-terminal modification, blockade of fusion activity, **179**, 1050
- gastric carcinoid tumor, detection of gastrin receptors (*Mastomys natalensis*), **177**, 739
- gastric chief cell, cholecystokinin receptors, characterization (guinea pig), **174**, 1055
- lipid, planar bilayer, permeation by ferrocene derivatives, microvoltammetric study, **180**, 1330
- lysosomal, 85-kDa sialoglycoprotein, cDNA clone, isolation and sequencing (rat liver), **178**, 444
- microsomal, canine pancreatic, translocation of yeast dolichol-phosphate-mannose synthase into, **174**, 1337
- mitochondrial
  - identification of GTP-binding protein in contact sites between inner and outer membranes (rat liver), **180**, 1453
  - inner
    - channel activity modulation by calcium (murine liver, rat heart), **176**, 1183
    - nonspecific pore sensitivity to cyclosporin, modulation by ADP at carboxyatractyloside-sensitive and -insensitive sites (rat liver), **180**, 33
- and nuclei, lysis by cytolytic T cell clones, relationship (mouse), **179**, 1562
- phospholipid, partition coefficients of fluorescent probes with, **181**, 166
- photosynthetic, within whole cyanobacterial cells, surface platinum deposition: implications for hydrogen generation, **175**, 1029
- plasma, *see* Plasma membranes
- rough microsomes, GTP-dependent fusion, effect of cAMP-dependent protein phosphorylation (rat liver), **179**, 463
- T-cell, GTP-binding proteins, effect of mitogen-induced activation and phorbol ester-induced differentiation (human), **178**, 138
- thylakoid, *see* Thylakoids
- transmembrane helices of ion channel proteins, conserved positioning of proline residues, **175**, 733
- vascular A10 cell, detection of endothelin-metabolizing neutral endopeptidase (rat), **176**, 423
- zymogen granule, pancreatic
  - associated low-molecular-weight GTP-binding proteins (rat), **174**, 600
  - phospholipase A_2 regulation by G proteins, **177**, 22

Membrane skeleton
- from isolated nerve growth cones, protein kinase C type II association with (rat), **178**, 751

Menthofuran
- *p*-cresol formation from, **177**, 440

Mepacrine, *see* Quinacrine

Mercury
- inhibitory effect on transcription of *ada* gene, **179**, 1517

Meromyosin
- heavy, actin-activated ATPase, inhibition by calponin (chicken gizzard), **176**, 1487

Mesangial cells
- cytokine- and forskolin-induced synthesis of group II phospholipase A_2 and prostaglandin E_2, prevention by dexamethasone (rat), **180**, 46
- cytosolic calcium levels *in vitro*, effects of vitamin D_3 metabolites, single cell analysis (rat), **180**, 833
- nitric oxide synthase induction by interleukin 1β and tumor necrosis factor α, inhibition by transforming growth factor β_2 (rat), **175**, 372
- phorbol ester long-term treatment, subsequent differential recovery of protein kinase C α and ε isozymes (rat kidney), **180**, 1422
- production of colony-stimulating factor 1 (mouse), **177**, 1194
- synthesis and secretion of group II phospholipase A_2, stimulation by interleukin-1β, tumor necrosis factor, or forskolin (rat), **174**, 268

Mesenchymal cells
- salivary, *in vitro* expression of epidermal growth factor-related transforming growth factor (fetal mouse), **175**, 37

Metabolic inversion
- 6′ chiral center of simvastatin, analysis (dog, rat), **181**, 1508

Metallopeptidase
- cerebral, cleaving -Lys-Leu- in model peptide, identification: processing of Alzheimer A4/β-amyloid protein precursor (human), **179**, 1148

Metalloproteinase
- with endothelin converting activity, cytosolic and membrane-bound, derived from vascular endothelial cells, differentiation by N-ethylmaleimide (pig), **178**, 531
- matrix, type 3, *see* Stromelysin
- temperature-sensitive synthesis in 6m2 cells (rat), **178**, 453
- two types converting big endothelin-1 to ET-1, identification in vascular smooth muscle cells (pig), **178**, 899

Metalloproteins
- zinc, with two finger motifs, mammalian spermatid-specific protein TP2 as, identification (rat), **179**, 1491

Metallothionein
- additive induction by cadmium and zinc (LLC-PK1 cells), **177**, 224

Metals
- transition, modulation of interactions of SP1 zinc finger domains with cognate DNA target sites, **176**, 551

Metamorphosis
- associated eclosion hormone-mediated signal transduction, role of cyclic GMP (silkworm), **180**, 881

Metastasis
- B16 melanoma cells, effects of cyclic RGD peptides (mouse), **177**, 74

inhibitory effects of laminin-related peptides (mouse), **174**, 1159
potential of transitional cell carcinoma of urinary bladder, association with expression of carbohydrate signal sialyl dimeric Le^x antigen (human), **181**, 1218

Met-azido myoglobin
heme resonances, assignment by ^{1}H NMR (horse), **175**, 515

Metformin
effect on amylin and insulin cosecretion in cultured islet β cells, **179**, 1

Methicillin
resistance, encoding gene, Southern hybridization analysis of deletion (*Staphylococcus aureus*), **176**, 1319

2-Methoxy-4-aminoazobenzene
and carcinogenic azo dye, induced DNA adducts, differential effects on DNA synthesis *in vitro* (*Escherichia coli*), **179**, 817

3-Methoxy-4-aminoazobenzene
and noncarcinogenic azo dye, induced DNA adducts, differential effects on DNA synthesis *in vitro* (*Escherichia coli*), **179**, 817

3-Methoxybenzamide
suppression of lipopolysaccharide-induced nitrite formation in macrophages (mouse), **179**, 865

N^3-Methyladenine-DNA-glycosylase
mRNA, increase in hepatoma cells treated with DNA-damaging agents (rat), **176**, 1086

3β-Methyl-androst-5-en-17-one
effect on attacks of lactating female intruders by castrated males: implications for brain neurosteroids (mouse), **174**, 892

N^G-Methyl-L-arginine
inactivation of macrophage nitric oxide synthase (mouse), **177**, 828

Methylation
carboxyl, site in α-hemoglobin, identification (human), **180**, 742
genomic DNA, analysis during natural and conditional aging of fibroblasts (mouse), **178**, 269
HLA-DRα gene, pattern, analysis in transgenic mice, **175**, 459
tissue-specific, 5′ flanking region of γ-glutamyl transpeptidase gene (rat), **177**, 229

3-Methylcholanthrene
single dose, induction of cytochrome P450IA1 in fetal liver (rat), **176**, 280
treated rats, hepatic microsomes from, conversion of 6-fluorobenzo(c)phenanthrene to K-region oxide: fluoro group-mediated reversal of cytochrome P450 stereoselectivity, **181**, 1516

Methylcoenzyme M methylreductase
inhibition by uridine 5′-diphospho-*N*-acetylglucosamine derivative, **174**, 619

2-Methyl-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline
identification in parkinsonian and normal brain (human), **177**, 603

24-Methylene-24,25-dihydrolanosterol
specificities of rat liver and yeast lanosterol 14α-demethylase for, comparison, **178**, 1064

O^6-Methylguanine-DNA-methyltransferase cDNA cloning and sequencing (rat hepatoma cells), **177**, 597
mRNA, increase in hepatoma cells treated with DNA-damaging agents (rat), **176**, 1086

2-Methyl-9-hydroxyellipticinium
effect on N^3-methyladenine-DNA-glycosylase and O^6-methylguanine-DNA-methyltransferase mRNA levels in hepatoma cells (rat), **176**, 1086

Methyl-hydroxypropyl-cellulose
different chain lengths, solutions, polystyrene sulfate particles in, size separation, **180**, 1070

3-Methylindole
metabolic activation by vaccinia virus-expressed cytochrome P450s, **181**, 100

5-(*N*-Methyl-*N*-[^{3}H]isobutyl)amiloride
in estimation of Na$^+$/H$^+$ exchanger carrier density and turnover rate in platelets (human), **176**, 639

Methylmalonyl-CoA mutase
absence in *Aspergillus nidulans*, **177**, 1076

Methylmethane sulfonate
damaged DNA, viability and processing in *xth nth nfo* cells of *Escherichia coli*, effect of *rec* mutations, **180**, 774

1-Methyl-4-phenylpyridinium
induction of apoptosis and DNA degradation in neurons (rat), **181**, 1442

1-Methyl-1,2,3,4-tetrahydro-β-carboline-3-carboxylic acid
effects on eosinophil differentiation and interleukin-6 induction: implications for pathogenesis of eosinophilia–myalgia syndrome (human), **178**, 1008

Methyltransferase
B$_{12}$-dependent, encoding *met*H gene, identification of transcriptional start and MetR binding sites (*Escherichia coli*), **175**, 1057

Mevalonate
metabolism, shunt pathway intermediary alcohols, oxidation by hepatic alcohol dehydrogenases (human), **174**, 701

Mevalonate-5-diphosphate decarboxylase
assay modification and activity induction and stabilization in liver (rat), **181**, 1449

Mibolerone
effect on intracellular calcium in human prostate cancer cells, **179**, 90

Micelles
mixed, lecithin–glycocholic acid, in amphotericin B delivery, inhibition of interaction between AmB and lipoproteins (human), **181**, 722
reverse, α-chymotrypsin activity in, substrate effects, **178**, 1105

Microelectrodes
in electrochemical study of permeation of ferrocene derivatives through planar bilayer lipid membrane, **180**, 1330

Microfluorometry
phage and human DNA size measurements, correlation with degree of *in vitro* cisplatin treatment, **179**, 1344

β$_2$-Microglobulin
immunoreactivity and mitogenic effects in bone-derived cells (human), **175**, 795

Micronuclei

- spontaneous and mitomycin C-induced, in lymphocytes, effects of extremely low frequency pulsed magnetic fields (human), **176**, 194

Microphthalmos

- inherited, associated defect of fiber cell-specific 94-kDa protein in lens from *Elo* mutant (mouse), **179**, 1175

Microscopy, *see specific techniques*

Microsomes

- daunorubicin-augmented lipid peroxidation and oxygen consumption, attenuation by calcium channel antagonists (rat), **179**, 1101
- hepatic
  - calcium sequestration, inhibition: impairment of protein synthesis initiation in perfused liver (rat), **177**, 1082
  - lipid peroxidation, inhibition by vitamin E derivatives (rat), **174**, 1103
  - major coumarin metabolite *o*-hydroxyphenylacetaldehyde formed by gerbil, human, and rat hepatic microsomes, isolation, **179**, 197
  - metabolism of
    - cyclic tertiary amines: generation and fate of enamines (rabbit), **179**, 1368
    - lipoxins A_4 and B_4 and all-*trans* isomers (rat), **177**, 134
  - from 3-methylcholanthrene-treated rats, conversion of 6-fluorobenzo(c)phenanthrene to K-region oxide: fluoro group-mediated reversal of cytochrome P450 stereoselectivity, **181**, 1516
  - NADPH-dependent reduction of amaranch in, in quantitation of cytochrome P450 low-spin forms (rat), **179**, 945
  - UV-induced reactions of photosensitive organic hydroperoxide: generation of oxy- and chromanoxyl free radicals (rat), **175**, 129
- identification of $\Delta^{5,7}$-sterol-Δ^7-reductase (*Zea mays*), **181**, 465
- pancreatic
  - translocation of yeast dolichol-phosphate-mannose synthase into membranes (dog), **174**, 1337
  - vesicles, inositol 1,4,5-trisphosphate- and caffeine-sensitive calcium pools in, GTP-induced connection, increase by H^+ uptake, **180**, 755
- parotid, binding and Ca^{2+} release activity of D-myoinositol 1,4,5-trisphosphate and 6-deoxy derivative, comparison (rat), **175**, 894
- rough, GTP-dependent membrane fusion, effect of cAMP-dependent protein phosphorylation (rat liver), **179**, 463

Microspheres

- intravenously injected, nonphagocytic uptake in spleen: effects of particle size and hydrophilic coating (rat), **177**, 861

Microtubules

- assembly, inhibition by mitoxantrone (bovine brain), **180**, 118
- destabilization by *cdc2*/H1 histone kinase via phosphorylation of proline-rich region in microtubule-binding domain of MAP-4, **179**, 1620

Midkine

- primary structure, strong conservation between human and mouse, **176**, 792
- recombinant, purification from L cells and analysis of biological activities, **177**, 652

Mifepristone

- and triamcinolone acetonide, binding to hepatic glucocorticoid receptor, comparative effects of SH-modifying agents (rat), **174**, 1239

Milk

- detection of benzodiazepines (human), **175**, 1042
- high levels of gastrin-releasing peptide-like immunoreactive substance (human), **176**, 931

Mithramycin, *see* Plicamycin

Mitochondria

- cerebral
  - age-dependent decrease in RNA synthesis (rat), **176**, 645
  - NADH-CoQ oxidoreductase, inhibition by arachidonic acid (rat), **178**, 1120
- complex I, DNA mutations in Leber's hereditary optic neuropathy (human), **174**, 1324
- DNA
  - carrying $tRNA^{Lys}$ mutation, quantitation in MERRF patients, **179**, 880
  - with deletion, age-associated accumulation in heart, quantitative analysis (human), **180**, 894
  - from idiopathic cardiomyopathy patients, comparison with Parkinson's disease and mitochondrial encephalomyopathy patients, **177**, 518
  - mutation
    - in humans with myoclonic epilepsy and ragged-red fiber disease, **174**, 1109
    - inducing Leber's hereditary optic neuropathy, detection by PCR with allele-specific priming (human), **175**, 631
    - in patients with mitochondrial myopathy, encephalopathy, lactic acidosis, and stroke-like episodes, characterization, **174**, 861
  - pathogenetic deletions: molecular basis for asymmetric distribution (human), **174**, 244
  - point mutations, distinct clustering in patients with mitochondrial encephalomyopathies and Parkinson's disease, **176**, 938
  - restriction enzyme analysis in colorectal tumors (human), **180**, 85
- hepatic
  - bc_1 complex, electron flow, effects of thyroid hormones, analysis by dye bypasses of antimycin A block (rat), **178**, 73
  - DNA
    - age-associated 5-kb deletion, detection by PCR and restriction mapping (human), **178**, 124
    - guanosine conversion to 8-hydroxyguanosine after azidothymidine administration (mouse), **176**, 87
  - identification of GTP-binding protein in contact sites between inner and outer membranes (rat), **180**, 1453
  - import machinery for precursor proteins, purification of putative 52-kDa component (rat), **180**, 450
  - lipid extracts from, ^1H NMR studies (rat), **179**, 904

    partially purified ion channel, patch clamp analysis (rat), **175**, 305
    respiration and Ca^{2+} transport, effects of amylrhodamine (rat), **175**, 1010
  hexokinase, post-translational modification, role in glucose utilization by tumor cells (human, rat), **178**, 648
  inner membrane
    channel activity, modulation by calcium (mouse, rat), **176**, 1183
    nonspecific pore sensitivity to cyclosporin, modulation by ADP at carboxyatractyloside-sensitive and -insensitive sites (rat liver), **180**, 33
  tRNA^{thr} gene, point mutation, induction of fatal infantile respiratory enzyme deficiency (human), **176**, 1112
  yeast
    import of chicken mitochondrial aspartate aminotransferase, comparison with import of cytosolic isoenzyme containing same presequence, **174**, 1232
    protein phosphorylation: inorganic pyrophosphate as phosphate donor, **178**, 1359
    uptake of bridged bis-methylpyridinium aldoximes and induction of petite phenotype, **179**, 992
Mitogenesis
  aortic smooth muscle cells, inhibition by clearance receptor-binding atrial natriuretic peptides (rat), **179**, 1606
  neonatal vascular smooth muscle cells, α-thrombin-induced, dissociation from activation of growth-related genes (rat), **181**, 617
Mitogenicity
  sphingosylphosphorylcholine: effect on various mammalian cell types, **181**, 361
Mitomycin C
  induced micronuclei in lymphocytes, effects of extremely low frequency pulsed magnetic fields (human), **176**, 194
Mitotin
  mRNA, expression at constant levels during cell cycle (Raji, WISH cells), **177**, 395
Mitoxantrone
  inhibition of microtubule assembly (bovine brain), **180**, 118
Models
  Caco-2 cell monolayers for analysis of passive drug absorption across intestinal epithelium (human), **175**, 880
  DNA–histone H5 interaction: simultaneous minor and major groove binding, **174**, 898
  short-term and two-step stimulation, for uridine uptake by macrophages from various murine strains, **177**, 1299
Molecular dynamics
  potato carboxypeptidase A inhibitor
    analysis of Pro-36-Gly mutant, **176**, 627
    fold stability and fluctuations, **176**, 616
  simulation: conformational space of α 1-4 glycosidic linkage in β-cyclodextrin, **178**, 192
Molecular structure, *see also* Amino acid sequence, Nucleotide sequence
  acidic ribosomal proteins, identification of bilateral hydrophobic zipper as hypothetical structure binding proteins together on ribosomes (yeast), **174**, 1318
  a-factor solution conformation, effect of Cys^{12} *S*-prenylation (yeast), **181**, 1125
  anti-HIV agent 2′,3′-didehydro-2′,3′-dideoxythymidine, **175**, 298
  asparagine-linked oligosaccharide chains in equine chorionic gonadotropin and luteinizing hormone β-subunits, comparison, **174**, 940
  carbonic anhydrase II at pH 9.5, X-ray crystallographic study (human), **181**, 579
  β-cyclodextrin: molecular dynamics study of α 1-4 glycosidic linkage, **178**, 192
  cytochrome P450, comparison of mammalian and rainbow trout enzymes: similarity between human P450IIIA4 and trout P450 LMC5, **176**, 558
  dermenkephalin, conformational meaning of δ address, **173**, 521; *erratum*, **174**, 1053
  DNA, superhelical density changes, monitoring by polarized light scattering, **177**, 1313
  endothelin-1 conformation in aqueous solution: NMR-derived constraints combined with distance geometry and molecular dynamics calculations, **178**, 570
  Forssman antigen solution conformation, analysis by NOE and exchange interactions, **174**, 1169
  α-helices terminated by glycine
    identification of common structural features, **180**, 660
    recognition by sequence patterns, **180**, 666
  horseradish peroxidase Fe^{3+}-heme center, axial symmetry, enhancement by ascorbate, **180**, 597
  Mg(α,β-methylene)ATP bound to isoleucyl-tRNA synthetase, NOE studies, **176**, 682
  Na$^+$,K$^+$-ATPase, conformational transitions upon detergent solubilization, fluorescent monitoring, **174**, 63
  nuclear and GTPase-linked plasma membrane receptors, comparison, **176**, 343
  polynucleotides with alternating purine-pyrimidine sequences, identification of unique B structures, **174**, 1313
  primary, trisialylated oligosaccharide (human milk), **177**, 720
  protoxin, toxic moiety, conformational change upon activation (*Bacillus thuringiensis*), **179**, 933
  6-pyruvoyl tetrahydropterin, computer studies of stereostructure and quantum chemical properties, **176**, 52
  recombinant cytochrome-*c* peroxidase: proper folding without conformational annealing, **176**, 1469
  recombinant plasminogen activator inhibitor-1 active and latent forms, spectroscopic study, **175**, 437
  secondary
    gastric H,K-ATPase: assignment of amino acid domain 888–907 to cytoplasmic face (pig), **180**, 1356
    large neuromedin N: NMN-125 (canine intestine), **179**, 301
    rRNA, effect of nucleolin, **177**, 673
  solution conformation of Le^x group of lacto-*N*-fucopentaose, **180**, 1214
  tetrapeptide Pro–D-Phe–Pro–Gly in aqueous solution, NMR analysis, **177**, 271
  trichotoxin N-terminal tripeptide Aib–Gly–Aib, **174**, 878

Monensin
  fibroblast resistance to, increase after viral transformation (mouse, rat), **174**, 483
Mono(ADP-ribosyl)ation
  poly(ADP-ribose)polymerase by cholera toxin, **181**, 1412
Monoamine oxidase, *see* Amine oxidase (flavin-containing)
Monoclonal antibodies
  to deoxyfructosyl-lysine residues in glycohemoglobin, production with purified human glycated hemoglobin free of hemoglobin A_{1c}, **176**, 207
  to 2,4-dinitrophenyl, palmitate-conjugated, B cells decorated with, differentiation, inhibition by triamcinolone acetonide (human), **179**, 1276
  to human acidic fibroblast growth factor, preparation, characterization, and use in enzyme immunoassay, **175**, 291
  immunoprecipitating ω-conotoxin receptor, recognition of 28- and 36-kDa proteins in brain (bovine, chicken), **181**, 59
  neutralization of pseudomonal exotoxin A-induced cell toxicity and pathogenesis (human), **180**, 1498
  to nitrosating enzyme, in detection of nitrosation-proficient denitrifying bacteria in biological fluids, **176**, 262
  to peripheral benzodiazepine receptors, activation of NADPH oxidase (human neutrophils), **176**, 1577
  to phosphorylated glial fibrillary acidic protein, use in nonradioactive assay for protein kinase, **175**, 1144
  to porcine colipase, antigen specificity, **177**, 726
  to transferrin receptor, effects on plasma membrane electron transport, **176**, 1437
Monocyte chemotactic peptide
  binding to monocytes, characterization (human), **176**, 309
  gene expression in synovial cells, induction by interleukin-1 (human), **174**, 411
Monocyte chemotactic protein-1
  carbohydrate structure (human), **178**, 1400
  molecular cloning and expression in spleen cells and tumor cell lines (rat), **174**, 504
Monocytes
  binding to monocyte chemotactic protein-1, characterization (human), **176**, 309
  CD36-mediated signal transduction, induction by anti-CD36 antibodies: comparison with effects of anti-thrombospondin antibodies (human), **175**, 263
  chemoattractant JE, encoding gene, transforming growth factor β-induced expression in osteoblastic cells MC3T3-E1 (mouse), **180**, 1130
  effect of thrombospondin: augmented luminol-enhanced chemiluminescence upon receptor triggering (human), **177**, 1087
  human, osteoblastic MC3T3-E1 cell proliferation in presence of, effect of estradiol-17β, **178**, 866
  IgG- or lipopolysaccharide-stimulated, production of transforming growth factor β in active form (human), **174**, 885
  infection by HIV-1, inhibition by 1α,25-dihydroxyvitamin D_3 (human), **176**, 852
  interleukin-1β production, regulation by glucocorticoids: mechanism dependent on monocyte activation signal (human), **180**, 1383
  –macrophages, and peripheral blood lymphocytes, HIV-1 replication, inhibitory effects of acyclic nucleoside phosphonate analogs (human), **178**, 329
  mediation of effects of elevated extracellular calcium on proliferation of MC3T3-E1 osteoblasts, **181**, 1425
N^G-Monomethyl-L-arginine
  effects on arterial blood pressure and cardiac output after endotoxic shock (dog), **178**, 1135
Monooxygenase
  flavin-containing, detoxification of tissue senecionine (guinea pig), **178**, 546
Monophenol monooxygenase
  detection and quantification in hemolymph (crayfish, fruit fly, locust), **180**, 748
Monophenol oxidase, *see* Monophenol monooxygenase
Morphiceptin
  bioactivity, topochemical analysis, **181**, 664
Morphine
  chronic exposure of NG108-15 cells, effects on nuclear factor binding to cAMP response element, **174**, 25
  induced constipation, modulation by endogenous nitric oxide (mouse), **181**, 889
Morphogenesis
  Candida albicans, association with overexpression of actin gene, **179**, 423
Morquio disease
  deficient enzyme *N*-acetylgalactosamine-6-sulfate sulfatase, full-length cDNA, isolation, characterization, and expression (human), **181**, 677
Motor neuron disease
  with adult form of β-hexosaminidase B deficiency, molecular basis (human), **181**, 108
MSH, *see* Melanotropin
Mucin
  gene expression in airways following infection and irradiation (rat), **181**, 1
  MUC1and MUC2, production by tumor cell lines (human), **178**, 593
  tracheo-bronchial, cDNA cloning and sequencing and gene mapping to chromosome 3 (human), **175**, 414
Mucosa
  colonic
    exocytosis in goblet cells, visualization by video-enhanced light microscopy (rabbit), **176**, 466
    uptake and metabolism of [^{14}C]diacylglycerol (rat), **181**, 1028
Mucus proteinase inhibitor
  inhibitory activity, localization in carboxy-terminal domain (human), **179**, 1587
Muscarinic receptors
  presence in adrenaline- and noradrenaline-containing chromaffin cell subpopulations (bovine), **177**, 913
  single subtypes, transfected cell membranes expressing, binding of radioiodinated SPECT ligands (rat), **179**, 768
Muscle
  exercise-induced injury, protective effect of coenzyme Q_{10} (rat), **176**, 349
  fructose-2,6- and glucose-1,6-bisphosphate levels, effects of glycogenosis types V and VII (human), **176**, 7

- identification of proteins resembling G protein α subunits (locust), **180**, 1075
- penis and radula retractor, effects of achatin I (African giant snail), **177**, 847
- skeletal, *see* Skeletal muscle
- smooth, *see* Smooth muscle

Muscle cells

- cardiac
  - α_1-adrenergic-stimulated phosphoinositide breakdown: diacylglycerol production and composition in docosahexaenoic acid supplemented cells (rat), **174**, 869
  - anoxia/reoxygenation injury, protection by acidotic pH (neonatal rat), **179**, 798
  - fetal, cultured, activation of α-myosin heavy chain gene expression by cAMP (rat), **174**, 1196
  - phosphoinositide formation, effects of α-adrenergic and K-opioidergic stimulation, comparison (rat), **179**, 972
- in cardiomyopathic hamster strain, cytolysis, pathological role of vitamin E deficiency, **181**, 145
- intracellular free Na$^+$, assay with sodium-binding benzofuran isophthalate (guinea pig), **175**, 611
- L6
  - cAMP production, stimulation by amylin via calcitonin gene-related peptide receptors (rat), **177**, 771
  - differentiation, associated differential expression of GLUT1 and GLUT4 glucose transporters (rat), **175**, 652
- satellite, growth-promoting activity for, separation from Pedersen fetuin (human), **178**, 959
- smooth, *see* Smooth muscle cells

Mutagenesis

- fibrinogen γ chain 259–411: characterization of role of disulfide bond Cys326–Cys339 in calcium binding (human), **174**, 853
- single amino acid substitution at residue 415 of GLUT1 glucose transporter, effect on transport activity (rabbit), **176**, 922
- site-directed
  - alteration of myoglobin proximal histidine to cysteine or tyrosine: mutant characterization and catalytic activities (human), **180**, 138
  - in analysis of role of cysteine in activity of glutathione transferase P (7-7) (rat), **179**, 790
  - aspartase, cysteine substitution with tryptophan at position 430: effects on enzyme properties (*Escherichia coli*), **177**, 414; *erratum*, **178**, 800
  - in characterization of proalbumin selective processing (rat), **175**, 690
  - cyclophilin, reduction of cyclosporin A affinity and catalytic efficiency (human), **176**, 1142
  - hepatocyte growth factor, effect on biological activity: deletion of HGF kringle domains or N-terminal hairpin structure, **181**, 691
  - human follistatin, **179**, 352
  - potential glycosylation sites in luteinizing hormone receptor, effects on binding activity (rat), **181**, 804
  - in preparation of viable transmembrane mutants of bacteriophage M13 coat protein, **180**, 687
  - tyrosine 151 of placental NAD$^+$-dependent 15-hydroxyprostaglandin dehydrogenase, effect on enzyme activity (human), **176**, 840

Mutants

- bacteriophage M13 coat protein, viable transmembrane, preparation by site-directed mutagenesis, **180**, 687
- deletion
  - C- and N-terminal, rat serotonin HT2 receptor, characterization in *Xenopus* oocytes, **178**, 1421
  - epidermal growth factor receptor in human glioma D-298 MG, characterization, **178**, 1413
- HIV-1 RevM10, functional conversion of Rev to HTLV-1 Rex, **178**, 1226
- human insulin-like growth factor II, construction and expression: Tyr^{27} substitution and/or deletion of residues 62–67, **181**, 907
- inherited microphthalmic, *Elo*, associated defect of fiber cell-specific 94-kDa protein in lens (mouse), **179**, 1175
- Pro-36-Gly, of potato carboxypeptidase A inhibitor, molecular dynamics study, **176**, 627
- *Pseudomonas aeruginosa*, ofloxacin resistance, association with elevated drug extrusion across inner membrane, **178**, 1043
- truncation and deletion, 80K diacylglycerol kinase, in assessment of regulatory role of enzyme EF-hand motifs (pig), **181**, 1015
- *Vibrio parahaemolyticus*, lacking H$^+$-translocating ATPase activity, Na$^+$-coupled ATP synthesis in, **179**, 224

Mutations

- Asn → Ser-406 in immunoglobulin μ heavy chain, effect on glycosylation at Asn-402 (murine cell lines), **179**, 1627
- Asp-55 in melibiose permease putative helix II, abolishment of Na$^+$-mediated activation of sugar binding (*Escherichia coli*), **178**, 1176
- associated with genetic defect of bilirubin UDP-glucuronosyltransferase in hyperbilirubinemic Gunn rat, characterization, **177**, 1161
- causing acid sphingomyelinase deficiency in Niemann-Pick disease type A, identification (human), **179**, 1187
- cytochrome *b* in Leber hereditary optic neuropathy (human), **181**, 1358
- deletion
  - 5 kb, age-associated, detection in mitochondrial DNA by PCR and restriction mapping (human liver), **178**, 124
  - methicillin resistance gene, Southern hybridization analysis (*Staphylococcus aureus*), **176**, 1319
  - three-base, in glycine decarboxylase mRNA, induction of nonketotic hyperglycinemia (human), **174**, 1176
- in lactate dehydrogenase A(M) deficiency, analysis by DNA conformation polymorphism with polyacrylamide gradient gel and silver staining (human), **180**, 1083
- LCAT gene, single nucleotide insertion, role in complete enzyme deficiency in familial lecithin:cholesterol acyltransferase deficiency (human), **181**, 933

  missense
    in exon 6 of LCAT gene, identification in LCAT deficiency (human), **178**, 460
    and 17-bp insertion, detection in dihydrolipoyl transacylase mRNA from thiamine-responsive maple syrup urine disease patient, **174**, 804
  mitochondrial DNA
    complex I, in Leber's hereditary optic neuropathy (human), **174**, 1324
    in family with myoclonic epilepsy and ragged-red fiber disease, **174**, 1109
    inducing Leber's hereditary optic neuropathy, detection by PCR with allele-specific priming (human), **175**, 631
    pathogenetic deletions: molecular basis for asymmetric distribution (human), **174**, 244
    in patients with mitochondrial myopathy, encephalopathy, lactic acidosis, and stroke-like episodes, characterization, **174**, 861
  p53 gene
    in colorectal tumors, analysis (human), **177**, 901
    timing and role in recurrence of glioma (human), **180**, 1145
  point
    calcitonin/calcitonin gene-related peptide I gene, deregulation of pre-mRNA alternative processing, **178**, 985
    causing infantile glycogenosis type II, identification in lysosomal α-glucosidase gene, **179**, 919
    in coding region of serine–pyruvate aminotransferase gene, induction of primary hyperoxaluria type I (human), **176**, 1093
    distinct clustering in mtDNA in patients with mitochondrial encephalomyopathies and Parkinson's disease, **176**, 938
    in hormone-binding domain of thyroid hormone receptor β gene, demonstration in generalized thyroid hormone resistance (human), **178**, 606
    identification in ferrochelatase gene associated with human erythropoietic protoporphyria, **181**, 594
    in mitochondrial $tRNA^{thr}$ gene, induction of fatal infantile respiratory enzyme deficiency (human), **176**, 1112
  rec, effect on viability and processing of DNA damaged by methylmethane sulfonate in *xth nth nfo* cells of *Escherichia coli*, **180**, 774
  structural, ^{347}Ala to Thr, detection in German family with 3-ketothiolase deficiency, **179**, 124
  $tRNA^{Lys}$, mitochondrial DNA carrying, quantitation in MERRF patients, **179**, 880
  valine to isoleucine at position 717 of amyloid precursor protein, association with familial Alzheimer's disease regardless of ethnic background, **178**, 1141
Mycoplasma hyorhinis
  specific high-affinity binding sites for human angiotensin II, characterization, **179**, 1391
Myelin
  associated glycoprotein, gene isolation and structure (mouse), **178**, 282
  peripheral
    P0 protein, cDNA isolation and sequencing (human fetus), **180**, 515
    P2 protein, cDNA isolation and sequencing (human fetus), **181**, 204
Myelin basic protein
  cerebral, phosphorylation at Tyr^{67} by thymic protein-tyrosine kinase $p56^{lck}$ (bovine), **178**, 1393
  derived phosphatase-resistant peptide, application in assay of protein kinase C in crude tissue extracts (rat), **180**, 694
  insulin-sensitive phosphorylation on tyrosine residues (rat brain), **179**, 392
  spontaneous adherence to human T lymphocytes (bovine brain), **180**, 1125
Myelin bodies
  isolated from renal cortex of gentamicin-treated rats, lipid and protein composition, **181**, 894
Myeloid cells
  FDC-P2, interleukin-3-dependent short-term growth induction by active c-*erbB*-2 protein after IL-3 depletion (mouse), **181**, 981
Myeloperoxidase
  activation associated with stimulation of neutrophil phagocytosis by A23187 (rat), **176**, 364
  animal-derived, protection of plants from microbial pathogens, evaluation, **178**, 1202
  gene expression in human myeloid leukemic cells: identification as primary response gene in HL60 cells, **176**, 1345
Myoblasts
  fusion in culture, inhibition by okadaic acid (chicken embryo), **176**, 1044
Myoglobin
  induced lipid peroxidation, initiating agents, identification (human), **179**, 1414
  proximal histidine, alteration to cysteine or tyrosine by site-directed mutagenesis: mutant characterization and catalytic activities (human), **180**, 138
D-Myoinositol 1,4,5-trisphosphate
  and 6-deoxy derivative, comparative binding and Ca^{2+} release activity in parotid microsomes (rat), **175**, 894
Myometrium
  Na^+/K^+-ATPase isozymes, effects of micromolar Ca^{2+} (rat), **174**, 969
Myopathy
  mitochondrial, and encephalopathy, lactic acidosis, and stroke-like episodes, characterization of associated mitochondrial DNA mutations (human), **174**, 861
Myosin
  –actin interaction, ATP-dependent, stimulation by okadaic acid, mechanism (bovine smooth muscle), **177**, 1155
  heavy chain
    encoding α gene
      5′ exon structure, determination (human heart), **179**, 1255
      expression, activation by cAMP in cultured fetal cardiac myocytes (rat), **174**, 1196
      promoter, regulation by thyroid hormone, assessment by *in vivo* DNA transfer (rat heart), **179**, 1269
    isoform MHC_3, detection in vascular smooth muscle (pig), **176**, 1365
  light chain, phosphorylation, absence during oxytocin-in-

    - duced contraction of uterine smooth muscle in Ca^{2+}-free medium (rat), **176**, 122
  - subfragment 1, binding of two actin monomers (rabbit muscle), **177**, 350
  - type II, differential expression in cerebral cortex (rat), **175**, 244
  - unphosphorylated, support of smooth muscle contraction, **178**, 967
- Myosin light chain kinase
  - anion-exchange chromatography, identification of different enzyme forms (chicken gizzard smooth muscle), **175**, 277
  - inhibitory Ca^{2+}-binding protein, purification (*Physarum polycephalum*), **176**, 564
- Myotubes
  - cell culture homogenates, detection of dystrophin by polyacrylamide gel electrophoretic immunochemical assay (mouse), **181**, 1164
- Myxedema
  - idiopathic
    - blocking antibodies from patients, epitope on high affinity thyrotropin binding site of rat thyrotropin receptor, characterization, **180**, 1118
    - and Graves' disease, derived immunoglobulins, and thyrotropin, sites of interaction with TSH receptor/LH-CG receptor chimeras, comparison, **179**, 70

N

- NAD$^+$ ADP-ribosyltransferase
  - inhibitors, suppression of lipopolysaccharide-induced nitrite formation in macrophages (mouse), **179**, 865
  - inhibitory binding at DNA primer site of reverse transcriptase template (bovine thymus), **180**, 496
  - ligands 1,2-benzopyrone and 5-iodo-6-amino-1,2-benzopyrone, inhibition of HIV-1 IIIB replication in AA-2 and MT-2 cell cultures, **180**, 504
  - mono(ADP-ribosyl)ation by cholera toxin (bovine thymus), **181**, 1412
- NADH
  - autoxidation initiated by hydroperoxyl radical, steady-state kinetics, **176**, 846
- NADH-CoQ oxidoreductase
  - mitochondrial, inhibition by arachidonic acid (rat brain), **178**, 1120
- NADH oxidase
  - plasma membrane, activation by lactoferrin (rat liver), **176**, 498
- NADH-quinone oxidoreductase
  - energy-transducing, identification of NADH-binding subunit (*Thermus thermophilus* HB-8), **174**, 667
- NADP$^+$
  - reaction with glyceraldehyde, aldose reductase-mediated, enantiospecific change in products, **175**, 943
- NADPH
  - autoxidation initiated by hydroperoxyl radical, steady-state kinetics, **176**, 846
  - dependent reduction of amaranch in hepatic microsomes, in quantitation of cytochrome P450 low-spin forms (rat), **179**, 945
  - oxidation by hydrogen peroxide (*Escherichia coli*), **178**, 54
- NADPH-cytochrome P450 reductase
  - multiple forms, identification in higher plants, **177**, 105
- NADPH oxidase
  - activation by
    - monoclonal antibody to peripheral benzodiazepine receptor (human neutrophils), **176**, 1577
    - protein kinase C isotypes (murine macrophages), **177**, 1033
  - cytosolic components, effects of GDP and GTP dialdehyde analogs (human neutrophils), **177**, 504
  - inactivation by affinity labeling with pyridoxal 5′-diphospho-5′-adenosine (human neutrophils), **181**, 1259
- NADPH peroxidase
  - characterization (*Escherichia coli*), **178**, 54
- Nagarse
  - proteolysis of carnitine palmitoyltransferase, inhibition by malonyl-CoA, **178**, 600
- Naloxone
  - resistant receptors, role in *N*-acetyl-β-endorphin$_{1-31}$ antagonism of β-endorphin$_{1-31}$ suppressive effect on splenocyte proliferation (mouse), **175**, 936
- Naltrexone
  - antitumor activity, evaluation and relationship to steroid hormone receptors (rat), **175**, 625
- Naphthalene-2-carboxylic acid, *see* Naphthoic acid
- Naphthoic acid
  - 6′-substituted analogs as retinoic acid receptor subtype-specific ligands, characterization, **179**, 1554
- Natriuretic peptides, *see specific types*
- Natural killer cells
  - related cell line YT, control of pteridine synthesis in, **176**, 1430
- Neoglycoproteins
  - lacto-*N*-fucopentaose I-bearing, staining of implanting embryo on mural side of trophectoderm (mouse), **181**, 1004
- Neomycin
  - prevention of glutathione efflux from tumor cells induced by calcium chelation, **176**, 276
- Nephropathy
  - puromycin-induced, effects of YM264 (rat), **176**, 781
- Nephrotic syndrome
  - associated secretion of atrial and brain natriuretic peptides, analysis (rat), **174**, 128
- Nerve growth factor
  - antibody Fab′ fragment, induction of amnesia and brain morphological changes (rat), **175**, 215; *erratum*, **179**, 1683
  - binding to 140-kd proto-oncogene product pp140$^{c\text{-}trk}$, stimulation of association with *src* homology domain of phospholipase C γ1, **179**, 217
  - gene family, regional expression in brain during development (rat), **174**, 379
- Nerves
  - isolated growth cones, membrane skeleton, protein kinase C type II association with (rat), **178**, 751

- Neurofibromatosis
  - type 1
    - encoding gene, product identification as GTPase-activating protein toward *ras* p21, **177**, 83
    - mRNA with 63-base insert in region coding for GTPase activating protein-related domain, expression by brain tumors (human), **181**, 955
- Neurokinin-2 receptors
  - dactinomycin as competitive antagonist, identification (*Streptomyces* spp.), **180**, 1342
- Neuromedin N
  - purification from intestine: identification as NMN-125 (dog), **179**, 301
- Neurons
  - apoptosis and DNA degradation, induction by 1-methyl-4-phenylpyridinium (rat), **181**, 1442
  - bradykinin-stimulated cell line, mass measurements of inositol 1,4,5-trisphosphate and inositol 1,3,4,5-tetrakisphosphate, **181**, 997
  - CA1, hippocampal, evoked synaptic potentials and population spike in, long-term potentiation, effects of adenosine A_2 receptor antagonist CP-66713 (guinea pig), **181**, 1010
  - cerebral cortical
    - internucleosomal DNA cleavage, triggering by glutamate (rat), **179**, 39
    - trophic effect of human β-amyloid precursor protein *in vitro* (rat), **181**, 265
  - delayed death induced by CO under normal body temperature, effects of successive exposures (mouse), **179**, 836
  - L-glutamate- or hypoxia-induced injury, role of L-arginine –nitric oxide pathway (rat), **181**, 456
  - pallial, right anterior, inhibitory effects of APGW-amide (*Achatina fulica*), **177**, 27
  - sympathetic, sprouting and survival, inhibition by β-amyloid from Alzheimer disease brain (chicken, rat), **174**, 572
  - in trisomy 16 fetuses, dysgenesis and increased production of class I MHC H-$2K^k$ mRNA and protein, relationship (mouse), **179**, 102
- Neuropathy
  - Leber hereditary optic
    - associated cytochrome *b* mutations (human), **181**, 1358
    - association with complex I mitochondrial DNA mutations (human), **174**, 1324
    - mutation detection by PCR with allele-specific priming (human), **175**, 631
- Neuropeptides
  - bombesin-like, cerebral, primary structure (frog), **178**, 526
  - fulicin, D-asparagine-containing, isolation from ganglia (*Achatina fulica*), **178**, 486
  - L-phenyllactyl-Phe–Lys–Ala-NH_2, isolation (sea anemone), **179**, 1205
- Neuropeptide Y
  - stimulation of prostacyclin production in porcine vascular endothelial cells, **179**, 309
- Neurosteroids
  - cerebral levels, effects of dehydroepiandrosterone and 3β-methyl-androst-5-en-17-one (mouse), **174**, 892
- Neurotoxicity
  - pyridinium metabolite with potential for, identification in urine of schizophrenic patients treated with haloperidol, **181**, 573
- Neurotransmitters
  - inhibitory, *Achatina fulica* APGW-amide identification as, **177**, 27
- Neutron scattering
  - in studies of chromatosomes (chicken erythrocytes), **179**, 810
- Neutrophil-activating peptide
  - and fMLP or C5a, differential effects on PAF and leukotriene B_4 production by neutrophils (human), **176**, 972
  - type 1, –interleukin-8, gene family members, induction in T cells, suppression by cyclosporin A (human), **181**, 179
  - type 2, binding with two affinities to neutrophil-activating peptide receptors (human), **180**, 301
- Neutrophil-activating peptide receptors
  - binding of neutrophil-activating peptide-2, affinities (human), **180**, 301
- Neutrophil elastase, *see* Leukocyte elastase
- Neutrophils
  - activated, injury of vascular endothelial cells, role of adhesion molecules CD11a and ICAM-1 (bovine, human), **177**, 664
  - activation
    - differential modulation by dibutyryl cCMP (human), **174**, 258
    - receptor-operated, differential effects of neutrophil-activating peptide/IL-8 and fMLP or C5a (human), **176**, 972
  - and basophilic leukemia cells, Fc receptor crosslinking in, tyrosine phosphorylation as common early signaling event (human, rat), **177**, 192
  - CD18-independent adhesion to endothelium, role of cell adhesion molecule LECAM-1 (human), **174**, 236
  - cytosolic free calcium increase mediated by endothelin, inhibition by L-arginine (human), **178**, 884
  - effects of *Icaria* chemotactic peptide, [Lys^7] analog, and FMLP peptide, comparison (guinea pig), **175**, 165
  - endothelin-1 synthesis, analysis (human), **174**, 613
  - expression of heat shock proteins
    - HSP 72, induction by hepoxilin A_3, **179**, 52
    - induction by bacterial toxins (human), **179**, 872
  - generated superoxide radicals, inactivation by nitric oxide (human), **181**, 1392
  - identification of endonuclease capable of removing 8-hydroxyguanine from DNA (human), **178**, 1472; *erratum*, **180**, 462
  - metabolism of lipoxins A_4 and B_4 and all-*trans* isomers (human), **177**, 134
  - migration, leukotriene B_4-induced, inhibition by lipoxin A_4: structure–function relationships, **180**, 1416
  - motility, effect of ADP-ribosylation of small G proteins by C3 exoenzyme of *Clostridium botulinum* (bovine), **180**, 615

  NADPH oxidase activation by monoclonal antibody to peripheral benzodiazepine receptor (human), **176**, 1577
  nuclei, β-subtype protein kinase C activity, enhancement by phorbol ester treatment (human), **181**, 348
  oxidative burst response after FMLP stimulation, inhibition by serum amyloid A (human), **176**, 1100
  phagocytosis
    of opsonized yeast particles, associated formation of diacylglycerol (human), **177**, 948
    stimulation by A23187, concomitant activation of myeloperoxidase (rat), **176**, 364
  phosphofructokinase, kinetic studies (human), **178**, 672
  protein-tyrosine kinase and protein kinase C, effects of staurosporine and H-7 (human), **178**, 423
  superoxide generation
    divergent effects of propranolol: role of phosphatidic acid and diacylglycerol (human), **175**, 423
    inhibition by pentoxifylline, role of adenosine receptors (human), **180**, 53
  tissue kallikrein release, stimulation by thrombin: relationship between blood coagulation and inflammation (human), **176**, 315
Nexin
  platelet-derived, reaction with thrombin, requirement of secondary recognition site in addition to catalytic site (human), **177**, 1198
Niacinamide
  suppression of lipopolysaccharide-induced nitrite formation in macrophages (mouse), **179**, 865
Nicotinamide, *see* Niacinamide
Nicotinic receptors
  activated inward current in chromaffin cells, inhibition by somatostatin (guinea pig), **174**, 750
Niemann-Pick disease
  type A, associated acid sphingomyelinase deficiency, molecular basis (human), **179**, 1187
Nifedipine
  attenuation of daunorubicin-augmented microsomal lipid peroxidation and oxygen consumption (rat), **179**, 1101
  effect on calcium release from isolated T-tubule–sarcoplasmic reticulum complex (rabbit muscle), **175**, 271; *erratum*, **176**, 549
Nigericin
  fibroblast resistance to, increase after viral transformation (mouse, rat), **174**, 483
Nimodipine
  effect on calcium release from isolated T-tubule–sarcoplasmic reticulum complex (rabbit muscle), **175**, 271; *erratum*, **176**, 549
Nitrates
  organic, biotransformation to nitric oxide in vascular smooth muscle and endothelial cells, **180**, 286
Nitric oxide
  arginine-dependent generation, mediation of syngeneic islet cell killing by activated macrophages (rat), **175**, 752
  L-arginine-derived, stimulation of endogenous ADP-ribosyltransferase (HL-60 cells, rat brain), **178**, 848
  –L-arginine pathway, role in neuronal injury induced by L-glutamate or hypoxia (rat), **181**, 456
  endogenous
    modulation of morphine-induced constipation (mouse), **181**, 889
    presence in exhaled air (guinea pig, human, rabbit), **181**, 852
  inactivation of
    ribonucleotide reductase activity in TA3 mammary tumor cells, **179**, 442
    superoxide radicals generated by neutrophils (human), **181**, 1392
  production in
    cultured endothelial cells, stimulation by endothelin-3 via phosphoinositide breakdown (bovine), **174**, 228
    vascular smooth muscle and endothelial cells by biotransformation of organic nitrates, **180**, 286
  release by
    mast cells from spontaneously hypertensive and normotensive rats, comparison, **177**, 1178
    vascular endothelial cells, stimulation by bradykinin and ATP (porcine aorta), **180**, 926
    vascular smooth muscle cells, analysis (human), **180**, 907
  role in
    catalysis of nitrosyl transfer by denitrifying bacteria, **175**, 901
    diabetes induction by streptozocin (mouse), **178**, 913
  synthesis in retina (bovine), **180**, 920
Nitric oxide synthase
  detection and activity in retina (bovine), **180**, 920
  inactivation by N^G-methyl-L-arginine (murine macrophages), **177**, 828
  induction by interleukin 1β and tumor necrosis factor α in mesangial cells, inhibition by transforming growth factor β_2 (rat), **175**, 372
  irreversible inhibition by L-N^G-nitroarginine *in vitro* and *in vivo* (rat brain), **176**, 1136
  isotype inhibited by arginine analogs, expression in cytokine-activated endothelial cells (mouse), **178**, 823
  modulation by Ca^{2+}- and calmodulin-dependent protein kinase II- and protein kinase C-induced phosphorylation (rat brain), **180**, 1396
  phosphorylation by protein kinase A (porcine, rat cerebellum), **181**, 921
  purification and characterization (human brain), **181**, 1372
Nitrite
  lipopolysaccharide-induced formation in macrophages, suppression by poly(ADP-ribose) polymerase inhibitors (mouse), **179**, 865
p-Nitroanilides
  effects on α-chymotrypsin activity in reverse micelles, **178**, 1105
L-N^G-Nitroarginine
  effects on field stimulation-induced contractions and acetylcholine release in tracheal smooth muscle (guinea pig), **179**, 1017
  irreversible inhibition of nitric oxide synthase *in vitro* and *in vivo* (rat brain), **176**, 1136

N_W-Nitro L-arginine benzyl ester
  application as probe in study of relationship of L-arginine and endothelium-derived relaxing factor (rat aorta), **179**, 1677
5-Nitro-2-[*N*-3-(4-azidophenyl)-propylamino]-benzoic acid
  synthesis and characterization: photoaffinity labeling of human erythrocyte ghosts, **176**, 459
p-Nitrobenzoyl groups
  covalently linked to proflavine, photocleavage of DNA, **181**, 1266
2-Nitro-4-carboxyphenyl-*N,N*-diphenylcarbamate
  effect on anti-IgE-induced histamine release from peritoneal mast cells (rat), **181**, 1313
Nitrosation
  proficient denitrifying bacteria, detection in biological fluids with mono- and polyclonal antibodies to nitrosating enzyme, **176**, 262
Nitrosyl groups
  transfer from nitrite to azide in denitrifying bacteria, nitric oxide-dependent catalysis, **175**, 901
Nitroxide radicals
  pulmonary clearance, ESR measurement *in vivo* (mouse), **177**, 874
  with sulfur–sulfur bond, in EPR monitoring of enzymatic activity *in situ* (bollworm larva), **179**, 520
NK-1 receptors
  pulmonary, cDNA, isolation and characterization (human), **180**, 1110
NOE, *see* Nuclear Overhauser effect
Noradrenaline, *see* Norepinephrine
Norepinephrine
  containing chromaffin cells, presence of muscarinic receptors (bovine), **177**, 913
Nuclear factors
  binding to glucocorticoid regulatory region of α-1-acid glycoprotein promoter, characterization (rat), **176**, 1326
  type 1, binding site, and cAMP-responsive elements, in phospho*enol*pyruvate carboxykinase gene promoter, interaction with hepatocyte nucleoprotein (rat), **181**, 367
Nuclear lamina
  hepatic, organization, developmental changes (mouse), **179**, 1082
Nuclear magnetic resonance
  ^{13}C, in analysis of hepatic pyruvate carboxylase activity in tumor-bearing rats, **179**, 366
  conformation of tetrapeptide Pro–D-Phe–Pro– Gly in aqueous solution, **177**, 271
  ^{19}F
    in analysis of fluoride interactions with superoxide dismutase and hemoglobin in erythrocytes (human), **174**, 163
    fluorinated visual pigment analogs, **179**, 1337
  ^{1}H
    conformations of sugar pucker of 2′,3′-dideoxynucleosides with anti-HIV activity, **179**, 386
    exchangeable protons of pyridoxal phosphate-dependent enzymes, **178**, 385
    ferrocytochrome *c*-551: corrected assignments (*Pseudomonas aeruginosa*), **178**, 309
    lipid extracts from hepatic mitochondria (rat), **179**, 904
    manno-oligosaccharides released from phosphopeptidomannan (*Candida albicans*), **181**, 1251
    met-azido myoglobin, heme resonance assignments (horse), **175**, 515
    solution conformation of Le^{x} group in oligosaccharide lacto-*N*-fucopentaose, **180**, 1214
  ^{23}Na and ^{31}P, in analysis of phosphate-dependent Na^{+} transport (*Streptococcus faecalis*), **181**, 74
  nucleosides, parameters, correlations and implications for conformation about glycosyl bond, **180**, 273
  ^{17}O, in estimation of cerebral blood flow and oxygen consumption *in vivo* (rabbit), **179**, 954
  ^{31}P, in analysis of
    cytosolic pH effects on phosphate transport rate during recovery from muscular exercise (human), **178**, 871
    energy state of
      chondrocytes in preosseus cartilage (pig), **180**, 216
      liver in chronic dietary iron overload (rat), **176**, 1262
    post-exercise phosphate transport kinetics in skeletal muscle *in vivo* (human), **176**, 1204
  two-dimensional, identification of amino acid substitutions in surfactin (*Bacillus subtilis*), **177**, 998
Nuclear matrix
  attachment regions near replication origin of α-globin gene domain, mapping (chicken), **177**, 265
  DNA attachment, in HD3 cells, correlation with specific protein binding sites in 1.7-kbp DNA fragment of α-globin gene domain, **179**, 512
  and intermediate filaments, networks in renal epithelial cells, modification by extracellular matrix (rat), **179**, 340
  in vitro interaction with region immediately adjacent to origin of replication of bovine papillomavirus type 1, **176**, 479
  thymic, reported activity supporting V(D)J recombination, analysis (fetal calf), **181**, 95
Nuclear Overhauser effect
  conformational studies of Mg(α,β-methylene)ATP bound to isoleucyl-tRNA synthetase, **176**, 682
Nuclear receptors
  and GTPase-linked plasma membrane receptors, structural comparison, **176**, 343
  type II, preliminary characterization and partial purification (rat uterus), **177**, 1283
Nuclease
  Ca^{2+}/Mg^{2+}-dependent, tissue distribution and role in internucleosomal DNA fragmentation and effect of Zn^{2+} (human, rat), **181**, 915
Nuclease P$_1$
  mediated fluorescence postlabeling assay of AAF-modified d(TACGTA) and bovine thymic DNA, description, **177**, 151
Nuclei
  accumulation of nascent polypeptides after heat shock (CHO cells), **176**, 1525
  cellular, presence of N-glycosylated proteins (bovine, chicken, pig), **178**, 1365

  HL-60 cells, protein phosphorylation patterns, effect of chromatin conformation (human), **180**, 329
  immunocytochemical localization of ubiquitin-activating enzyme (HeLa cells, rat tissues), **174**, 564
  isolated from rat hepatocytes, calmodulin association with, **181**, 1548
  matrix, *see* Nuclear matrix
  and membranes, lysis by cytolytic T cell clones, relationship (mouse), **179**, 1562
  neutrophil, β-subtype protein kinase C activity, enhancement by phorbol ester treatment (human), **181**, 348
  ovarian carcinoma and normal ovarian surface epithelial cells, localization of amphiregulin (human), **180**, 481
Nucleic acids
  binding by group A/B hnRNP proteins, characterization (human, mouse), **176**, 747
Nucleolin
  effect on rRNA secondary structure, **177**, 673
  proteolysis, effect of phosphorylation (3T3-F442A cells), **180**, 716
Nucleoproteins
  binding to cAMP response element in NG108-15 cells, effects of chronic exposure to morphine or ethanol, **174**, 25
  encoding brain-specific mRNA expressed in neurally differentiated embryonal carcinoma cells, sequencing (mouse), **178**, 291
  hepatocyte, interactions with cAMP-responsive elements and NF1-CTF site in phospho*enol*pyruvate carboxykinase gene promoter (rat), **181**, 367
  interaction with Alu-family DNA repeats, binding specificity (human), **178**, 613
  phosphorylation, demonstration as early event in transforming growth factor β_1 action, **175**, 816
Nucleosides
  acyclic, phosphonate analogs, inhibitory effects on HIV-1 replication in monocyte/macrophages and peripheral blood lymphocytes (human), **178**, 329
  antiviral and cytostatic analogs, deoxycytidine kinase and thymidine kinase 1 and 2 substrate specificities for, comparison, **176**, 586
  Na^+-dependent concentrative transport in carcinosarcoma cells (rat), **175**, 846
Nucleosomes
  acetylated core particles, interaction with RNA polymerase II (chicken erythrocytes), **177**, 370
Nucleotide pyrophosphatase
  effect of dexamethasone (murine plasmacytoma cells), **175**, 637
Nucleotides
  base substitutions in glucose-6-phosphate dehydrogenase-deficient individuals (human), **180**, 988
  interaction with actomyosin subfragment 1, effect of hydrostatic pressure, **180**, 552
Nucleotide sequence
  N-acetylgalactosamine-6-sulfatase cDNA (human), **181**, 677
  acid β-galactosidase gene, exon–intron junctions (mouse), **178**, 158
  α_1-acid glycoprotein cDNA (rabbit), **178**, 507
  acidic fibroblast growth factor cDNA (porcine heart), **180**, 853
  adducin 63 cDNA (rat), **177**, 939
  adenylylcyclase partial cDNA (human brain), **179**, 455
  α_{1A} adrenergic receptor cDNA (human), **179**, 1485
  aldolase C gene (rat), **174**, 1035
  angiotensin II receptor cDNA (rat), **177**, 299
  arylphorin cDNA and gene (*Calliphora vicina*), **177**, 963
  azurocidin cDNA (human neutrophils), **177**, 688
  biliary glycoprotein cDNAs (human leukocytes), **176**, 578
  calcium-binding polypeptide cDNA: protein similarity to calcineurin (rat testis), **180**, 1476
  calgizzarin cDNA (rabbit lung), **181**, 644
  cAMP-dependent protein kinase regulatory subunit RIβ cDNA (human), **176**, 166
  CAP18 cDNA: lipopolysaccharide-binding protein (rabbit), **179**, 170
  cathepsin D cDNA (rat liver), **179**, 190
  C4b-binding protein α-chain gene: analysis of 5′ flanking region (human), **174**, 222
  cDNA encoding common precursor for putative hemorrhagic protein and rhodostomin (snake venom), **181**, 585
  cDNA expressing functional DNA glycosylase excising 3-methyladenine and 7-methylguanine (human), **176**, 1170
  cell adhesion molecule CD44 cDNA (human reticulocytes), **178**, 1127
  chondromodulin I cDNA (fetal bovine cartilage), **175**, 971
  class theta glutathione *S*-transferase Yrs subunit cDNA (rat liver), **181**, 1294
  CLS4 gene (yeast), **181**, 604
  consensus, HIV-1 gp120 genes and Ig variable regions, **179**, 1056
  C-type natriuretic peptide gene (human), **175**, 645
  cytochrome aa_3 subunit I gene (*Halobacterium halobium*), **181**, 316
  cytochrome b_5 cDNA and pseudogene transcript (human reticulocytes), **178**, 38
  cytochrome-*c* oxidase subunit genes (*Synechococcus vulcanus*), **181**, 437
  cytochrome P450aldo and $P450_{11\beta}$ genes, 5′-flanking regions (rat), **180**, 1187
  cytochrome P450 IIC24 cDNA (rat), **180**, 645
  cytochrome P450 steroid hydroxylase gene (*Rhizopus nigricans*), **178**, 1078
  dopamine D_3 receptor alternative transcripts (human, rat), **180**, 1031
  EB4-PSV gene isolated from *Dictyostelium* gene disruption transformant without library construction, **181**, 884
  elongation factor 1β cDNA (human), **177**, 312
  endothelin receptor ET_A cDNA (human), **180**, 1265; **181**, 184
  endothelin receptor ET_B cDNA (human liver), **177**, 34; **178**, 248
  enoyl-CoA hydratase:3-hydroxyacyl-CoA dehydrogenase bifunctional enzyme cDNA (human), **178**, 1084
  epidermal cell differentiation inhibitor gene (*Staphylococcus aureus*), **174**, 459

episialin gene promoter (mouse), **181**, 121
fibroblast growth factor receptor cDNA (murine SC-3 breast cancer cells), **176**, 31
follicle-stimulating hormone receptor cDNA (human), **175**, 1125
fructose 6-phosphatase,2-kinase:fructose 2,6-bisphosphatase isozyme cDNAs (bovine heart), **180**, 470
β-1,4-galactosyltransferase gene (human), **176**, 1269
glutathione synthetase large subunit gene (*Schizosaccharomyces pombe*), **181**, 430
glutathione transferase subunit 1 gene (fruit fly), **178**, 1205
glycophorin A gene constructed by recombinant PCR technique (mouse), **177**, 202
GM$_2$ activator protein cDNA (human), **177**, 1217
growth hormone cDNA (turkey), **173**, 967; *erratum*, **175**, 729
H$^+$-ATP synthase import signal peptide and mature coupling factor 6 cDNA (human), **178**, 793
H$^+$-ATP synthase subunit b import precursor cDNA (human), **178**, 1014
hck tyrosine kinase gene (rat), **181**, 1137
hepatitis C virus cDNAs: distribution of multiple virus types in Japan, **181**, 279
histamine H2 receptor gene (human), **178**, 1386
HIV-1 nef protein gene, homology with human thyrotropin receptor gene, **181**, 498
H$^+$,K$^+$-ATPase β subunit cDNA (human gastric mucosa), **180**, 39
H-protein cDNA (human liver), **176**, 711
H-protein gene exon/intron boundary (human), **178**, 1072
human thyrotropin receptor gene, homology with HIV-1 nef protein gene, **181**, 498
insulin-like growth factor-binding protein
  cDNA (human osteosarcoma), **176**, 219
  IGFBP-2 gene (human), **176**, 1250
  IGFBP-3 cDNA (bovine), **177**, 1025
insulin-like growth factor I mRNA (human), **175**, 507
insulin-like growth factor I receptor promoter region (human), **177**, 1113
interferon-γ DNA, intron-free (pig), **180**, 1408
lactoferrin mRNA (bovine), **180**, 75
laminarinase gene (*Clostridium thermocellum*), **181**, 507
LCAT gene sense strand of exon 6, **178**, 460
lecithin:cholesterol acyltransferase gene, normal and proband (human), **181**, 933
leukocidin S-component gene (methicillin-resistant *Staphylococcus aureus*), **181**, 138
leukotriene A$_4$ hydrolase cDNA (mouse), **176**, 1516
lignin peroxidase gene from white-rot fungus *Trametes versicolor*, **179**, 428
luciferase gene (*Photobacterium phosphoreum*), **176**, 541
lysosomal membrane 85-kDa sialoglycoprotein cDNA (rat liver), **178**, 444
α-1,3-mannosyl-glycoprotein β-1,2-*N*-acetylglucosaminyltransferase gene (human), **176**, 608
O^6-methylguanine-DNA-methyltransferase cDNA (rat hepatoma cells), **177**, 597
muscle-type tropomyosin cDNA (human epithelial cells), **177**, 1068
myelin-associated glycoprotein gene: exon–intron junctions and 5′-flanking region (mouse), **178**, 282
α-myosin heavy chain gene 5′ exon structure (human heart), **179**, 1255
necdin cDNA: brain-specific nucleoprotein expressed in neurally differentiated P19 cells (mouse), **178**, 291
NK-1 receptor cDNA (human lung), **180**, 1110
NK-2 receptor gene (human lung), **177**, 8
partial
  arylamine *N*-acetyltransferase genes (human liver), **177**, 1252
  glutamic acid decarboxylase cDNA (human brain, pancreatic islets), **176**, 1239
  phosphofructokinase cDNA (human), **180**, 197
  thromboxane synthase cDNA (human), **177**, 286
pectin lyase gene (*Erwinia carotovora* Er), **176**, 321
peripheral myelin protein P0 cDNA (human fetus), **180**, 515
peripheral myelin protein P2 cDNA (human fetus), **181**, 204
phosphofructokinase 1 gene (*Thermus thermophilus*), **176**, 1313
platelet activating factor cDNA (human), **180**, 105
pregnancy-specific β$_1$-glycoprotein type II cDNA (human), **176**, 1532
preprocarboxypeptidase A cDNA (bovine pancreas), **175**, 110
preproendothelin-1 cDNA (rat), **175**, 44
proteasome subunit XC3 cDNA (*Xenopus laevis*), **178**, 1233
ras p21-like G protein cDNA (rat liver), **177**, 1224
retinoic acid-induced heparin-binding protein cDNA (chicken), **175**, 617
rhodanese cDNA (human), **180**, 887
rhodopsin cDNA (lamprey), **174**, 1125
ribophorin II cDNA (rat), **176**, 1482
ribosomal protein L17 cDNA (rat), **178**, 322
RNA polymerase II subunit gene, C-terminal domain (*Plasmodium berghei*), **180**, 1350
sepiapterin reductase cDNA (human), **179**, 183
serotonin 5-HT2 and 5-HT1C receptor cDNAs (human), **181**, 1469
serum amyloid A
  cDNA (rabbit liver), **178**, 68
  gene (rabbit), **180**, 1258
spermidine/spermine *N*^{1}-acetyltransferase full-length cDNA (human), **179**, 407
S-100 protein α- and β-subunit genes, comparison of 5′ flanking regions (human), **175**, 185; *erratum*, **177**, 894
substance P receptor cDNA (human), **179**, 1232
testosterone 6β-hydroxylase gene 5′-flanking region (rat), **177**, 68
thermophilic chaperonin operon of PS3 bacterium, **179**, 565
thromboxane A synthase cDNA (human platelets), **178**, 1479
tissue factor cDNA (bovine), **181**, 1145
tracheo-bronchial mucin cDNA (human), **175**, 414
transglutaminase cDNA (human keratinocytes), **175**, 906

  trypsin gene (*Streptomyces griseus*), **181**, 707
  type II cAMP-dependent protein kinase regulatory subunit RIIβ gene, promoter and first exon (mouse), **178**, 221
  tyrosine hydroxylase cDNA (murine brain), **176**, 1610
  vacuolar H^+-ATPase 16-kDa subunit cDNA (murine cerebellum), **176**, 1062
  xeroderma pigmentosum group A cDNA (chicken, frog, fruit fly), **181**, 1231
  Zn-α_2-glycoprotein cDNA (human prostate), **177**, 696
Nutrients
  differential regulation of phosphorylating and non-phosphorylating forms of $NADP^+$-dependent glyceraldehyde-3-phosphate dehydrogenase (*Chlorella fusca*), **181**, 1077

O

Obesity
  and diabetes, associated glucose transporter gene expression in liver and muscle, analysis (rat), **175**, 995
Octreotide
  and bombesin, inhibition of DNA synthesis in thyroid lobes *in vitro* (rat), **178**, 520
  effect on (Ca,Mg)ATPase in anterior pituitary (rat), **178**, 1492
Ofloxacin
  resistance in *Pseudomonas aeruginosa* mutants, association with elevated drug extrusion across inner membrane, **178**, 1043
Okadaic acid
  induction of vimentin hyperphosphorylation in primary fibroblasts (human), **177**, 1165
  inhibition of
    bone resorption in neonatal calvaria *in vitro* (mouse), **178**, 758
    carbachol-induced catecholamine secretion in cultured bovine adrenal medullary cells, **174**, 77
    lipoprotein-supported corticosterone production in adrenal cells (rat), **179**, 726
    myoblast fusion in culture (chicken embryo), **176**, 1044
  stimulation of
    ATP-dependent actin–myosin interaction, mechanism (bovine smooth muscle), **177**, 1155
    nerve growth factor-sensitive S6 kinase (PC12 cells), **177**, 624
Oleic acid
  effect on CTP:phosphocholine cytidylyltransferase translocation in HL-60 cells, **176**, 157
2′,5′-Oligoadenylates
  binding and activation of RNase L, effect of purine 8-substitution, **176**, 769
Oligodeoxynucleotides
  antisense
    against early growth response gene-1, inhibition of endothelin-1-induced myocardial protein synthesis (rat), **181**, 22
    to retinoblastoma and p53 transcripts, cooperative effect on life span extension in human diploid fibroblasts, **179**, 528
Oligodeoxyribonucleotides
  phosphorothioate analogs, synthesis and inhibitory effects on HIV replication (human T cells), **179**, 1614
Oligonucleotides
  binding to hepatoblastoma and T cell membranes at acidic pH (human), **181**, 1343
  duplex containing MDBP site from human *hsp70* promoter, end-filling, inhibition of protein–DNA complex formation, **178**, 927
  site-directed mutagenesis, in analysis of role of cysteine in activity of glutathione transferase P (7-7) (rat), **179**, 790
Oligopeptides
  synthetic, thyrotropin receptor sequence-derived, binding to Graves' immunoglobulin and inhibition of thyroid stimulating antibody (human), **178**, 165
Oligosaccharides
  asparagine-linked, in equine chorionic gonadotropin and luteinizing hormone β-subunits with identical amino acid sequence, structural analysis, **174**, 940
  mucin-type, with sialyl-Le^a structure, from human colonic cancer cells, characterization, **178**, 1429
  trisialylated, primary structure (human milk), **177**, 720
  underivatized, analysis by matrix-assisted laser desorption mass spectrometry, **177**, 644
Oligospermia
  associated overexpression of superoxide dismutase and lack of surface thiols in spermatozoa (human), **174**, 510
Olive oil
  dietary, with adriamycin-induced oxidative stress, effects on hepatic cytochrome oxidase induction (rat), **181**, 375
Oncostatin M
  stimulation of urokinase-type plasminogen activator in synovial fibroblasts (human), **180**, 652
ONO-5046
  biochemical and pharmacological properties as human neutrophil elastase inhibitor, **177**, 814
Oocytes
  in analysis of bombesin receptor subtypes (*Xenopus laevis*), **176**, 79
  Ca^{2+}-dependent chloride currents, induction by inositol tetrakisphosphates as second messengers (*Xenopus laevis*), **179**, 641
  C- and N-terminal deletion mutants of rat serotonin HT2 receptor in, characterization (*Xenopus laevis*), **178**, 1421
  endogenous chloride conductance, regulation, role of Ca^{2+} and cAMP (*Xenopus laevis*), **180**, 1377
  expression of vasopressin V2 receptor by LLC-PK1 porcine kidney cell mRNA (*Xenopus laevis*), **174**, 149
  functional expression of transcobalamin II cDNA (*Xenopus laevis*), **181**, 1151
  germinal vesicles, *ras*-induced breakdown, inhibition by *rap*-1B protein (*Xenopus laevis*), **174**, 1

immature, damage from hypothermia, protective effects of fish antifreeze proteins (bovine), **180**, 566
ras-p21-induced maturation, inhibition by peptide from p21 GAP-binding domain and by azatyrosine (*Xenopus laevis*), **181**, 1378
rat lymphocyte potassium channel RGK5 expressed in, current inactivation, role of histidine in channel pore (*Xenopus laevis*), **179**, 1384

OPC-21268
  effect on vascular action of vasopressin in smooth muscle cells *in vitro* (rat), **178**, 707

Opioid receptors
  selectivity reversal in deltorphin tetrapeptide analogs, **178**, 110
  type δ
    deltorphin affinity for, role of carboxyl group in position 4 (rat), **180**, 1290
    high affinity and selectivity of [D-Ala^2]deltorphin II analogs: role of hydrophobic valine residues, **180**, 822
    and μ-, ligand binding domain similarities and additional address subsite on δ receptor, analysis with dermenkephalin and deltorphin I (rat brain), **179**, 1161
  type K, and α-adrenergic receptors, effects on phosphoinositide turnover in cardiomyocytes, comparison (rat), **179**, 972

Organogels
  lecithin, as matrices for transdermal transport of drugs, **177**, 897

Organogenesis
  associated cytochrome P4501A1 isoforms, mRNA, PCR detection in conceptive tissues (rat), **178**, 236

Ornithine decarboxylase
  activity in L929 cells, effect of coherence time of applied magnetic field, **178**, 862
  encoding gene
    expression in macrophage-like cell line RAW264, synergistic induction by lipopolysaccharide and cAMP, **175**, 48
    position-independent aberrant expression in transgenic mouse, **180**, 262
  evidence for inactive plasma membrane-associated precursor in *Musca domestica* embryos, **174**, 497
  expression in hepatoma cell line, effect of interferon-α (human), **178**, 378
  hepatic, stimulation by dexamethasone or laparotomy, prevention by adrenergic blockade (rat), **174**, 915
  and sulfated glycoprotein 2, mRNA accumulation patterns in phytohemagglutinin-stimulated lymphocytes: relationship of cell proliferation to cell death (human), **180**, 59
  synthesis, regulation by spermidine, role of GC-rich sequence, **178**, 815

Osteoarthritis
  chondrocytes from affected cartilage, calmodulin-dependent collagenase and proteoglycanase activities (human), **174**, 1204

Osteoblasts
  effects of thrombin: structure–function relationships (human, rat), **174**, 181
  IGF I-induced stimulation, inhibition by intact truncated insulin-like growth factor-binding protein IGBP-3 (human, rat), **179**, 579
  isolated, bradykinin- and thrombin-induced prostaglandin E_2 biosynthesis, effect of haptoglobin (mouse), **178**, 343
  MC3T3-E1
    alkaline phosphatase
      activity, and collagen synthesis, effects of bone morphogenetic proteins, **174**, 96
      inhibition by 1,25-dihydroxyvitamin D_3, modulation by murine recombinant leukemia inhibitory factor, **175**, 577
    chemotaxis and DNA synthesis, enhancement by platelet-derived growth factor B chain homodimer, **175**, 745
    expression of helix–loop–helix DNA-binding protein negative regulator Id in early and confluent cells, effect of dexamethasone (mouse), **180**, 1194
    proliferation
      monocyte-mediated effects of elevated extracellular calcium levels, **181**, 1425
      in presence of human monocytes, effect of estradiol-17β (mouse), **178**, 866
    release of interleukin-1 and -6 in culture, effect of parathyroid hormone (mouse), **179**, 236
    transforming growth factor β-induced gene expression of monocyte chemoattractant JE (mouse), **180**, 1130
  and osteoclasts, relationships in bone resorption (chicken), **179**, 634
  UMR 106
    osteoclast resorption-stimulating activity, association with cell surface and/or extracellular matrix (rat), **181**, 67
    proliferation, regulation by parathyroid hormone, linkage to cAMP-dependent protein kinase activation, **177**, 365

Osteoclast resorption-stimulating activity
  association with osteoblast cell surface and/or extracellular matrix (rat), **181**, 67

Osteoclasts
  calcitonin-induced quiescence, selective antagonism by human calcitonin gene-related peptide-(Val^{8}Phe^{37}) (rat), **179**, 134
  cultured, binding of parathyroid hormone (chicken), **174**, 1217
  digestion of collagen, suppression by Z-Phe–AlaCH$_2$F selective inhibition of cysteine proteinases (rabbit calvariae), **178**, 178
  formation *in vitro*, induction by macrophage colony-stimulating factor (mouse), **177**, 526
  isolated, activities of cathepsin B and L (chicken, rat), **179**, 63
  and osteoblasts, relationships in bone resorption (chicken), **179**, 634
  related cells, differentiation in bone marrow cultures exposed to 1,25-dihydroxyvitamin D_3 (human), **176**, 1189

Osteopontin
  function as substrate for guinea pig hepatic transglutaminase and human factor XIII, **177**, 1205

  mRNA, homology with 2B7 mRNA (rat), **177**, 867
Ouabain
  inhibition of Na$^+$/K$^+$-ATPase, effect on vasopressin-induced Na$^+$ increase in vascular smooth muscle cells (rat), **177**, 1247
  stimulation of atrial natriuretic peptide synthesis and secretion by cardiocytes (rat), **176**, 875
Ovary
  progestin synthesis, lipoprotein-incorporated pregnenolone fatty acid esters as substrate, analysis (porcine granulosa cells), **179**, 1576
  prolactin receptor mRNAs, induction regulation and expression (rat), **181**, 219
Oxetanocin G
  inhibition of human cytomegalovirus replication, mechanism, **176**, 805
Oxidase
  superoxide-generating, inhibition by iodonium biphenyl in cell-free system, analysis (bovine neutrophils), **175**, 143
Oxidation, *see also* Autoxidation
  copper-catalyzed, low-density lipoprotein susceptibility to, reduction by eicosapentaenoic acid ethyl ester ingestion (rabbit), **175**, 61
  dihydroriboflavin, coupling to formation of higher valence states of hemeproteins, **181**, 197
  enkephalins by horseradish peroxidase, **179**, 147
  low-density lipoproteins in presence of endothelial cells or Cu^{2+}: identification of major products, **176**, 431
  NAD(P)H by hydrogen peroxide (*Escherichia coli*), **178**, 54
  very-long-chain fatty acids in dermal fibroblast peroxisomes (human), **178**, 842
Oxidative burst
  in FMLP-stimulated neutrophils, inhibition by serum amyloid A (human), **176**, 1100
Oxidative stress
  adriamycin-induced, in rats fed dietary olive oil, effects on hepatic cytochrome oxidase induction, **181**, 375
Oxodiene
  formation during lipoxygenase-catalyzed reaction: occurrence of dioxygenase and fatty acid lyase activities in single protein (vetch), **180**, 1002
Oxophenylarsine
  inhibition of insulin-dependent glucose transport in soleus muscle (rat), **176**, 201
  regulation of arachidonic acid metabolism (murine lymphoma, rat hepatic C-9 cells), **178**, 641
Oxygen
  cerebral, consumption estimation by ^{17}O NMR *in vivo* (rabbit), **179**, 954
  diffusion near heme binding site of horseradish peroxidase, **178**, 104
  microsomal consumption, daunorubicin-augmented, attenuation by calcium channel antagonists (rat), **179**, 1101
  photosystem I-mediated uptake, heat-induced stimulation, role of superoxide dismutase (spinach), **174**, 696
  polyphasic reduction to water by purified cytochrome-*c* oxidase, **176**, 150
  reactive species
    damage to cells, protective effect of atrial natriuretic factor: roles of cGMP, calcium, and G proteins, **174**, 549
    ultraviolet induction in hepatic microsomes via photosensitive organic hydroperoxide (rat), **175**, 129
Oxygenase
  and peroxidase, activities in porphobilinogen oxygenase and horseradish peroxidase, analysis by phenylhydrazine treatment, **180**, 360
ω-6 Oxygenase
  activation *in vivo* in skin (human), **180**, 98
Oxygenation
  hyperbaric, immunosuppressive effect on macrophages (mouse), **179**, 886
Oxysterols
  insertion into normal and sickle red blood cell membranes, effects on phospholipid packing, **180**, 730
Oxytocin
  gene promoters in bovine and rat, comparative estrogen responsiveness, **175**, 117
  induction of uterine smooth muscle contraction in Ca^{2+}-free medium without myosin light chain phosphorylation (rat), **176**, 122
  plasma levels, effects of interleukins (rat), **174**, 1189

P

PAF, *see* Platelet-activating factor
Palmitate
  conjugated monoclonal IgA antibody specific for 2,4-dinitrophenyl, B cells decorated with, differentiation, inhibition by triamcinolone acetonide (human), **179**, 1276
  effects on glucose transport in adipocytes and skeletal muscle: mechanism of glucose transport stimulation in adipocytes (rat), **177**, 343
Pancreas, *see also* Acinar cells, Beta cells, Islet cells
  calbindin-D$_{28K}$ levels, augmentation by 1,25-dihydroxyvitamin D$_3$ (chicken), **176**, 1057
  perfused, amylin secretion: dissociation from insulin and abnormal elevation in insulin-resistant diabetic rat, **180**, 782
Panicle
  young, pp70 protein phosphorylation in extract, characterization (rice), **175**, 467
Papain
  inhibition by plasma thiostatin, role of carbohydrate: destruction of inhibitor activity by deglycosylation (rat), **179**, 927
Papillomavirus
  shuttle vector
    homologous recombination in, effect of relative orientation of substrate sequences (bovine), **174**, 305
    illegitimate recombination in site-specific manner (bovine), **179**, 251
  type 1, region immediately adjacent to origin of replica-

tion, *in vitro* interaction with nuclear matrix (bovine), **176**, 479

Paraquat
  resistant and susceptible tobacco plants, emission of ultraweak light from dark-adapted leaves, comparison, **178**, 438

Parathyroid cells
  secretion of parathyroid hormone *in vitro*, inhibition by PTH fragment 1–34 (bovine), **178**, 953

Parathyroid hormone
  analog (8–84), expression in *Escherichia coli*, direction by internal ribosome-binding site, **181**, 481
  binding to cultured osteoclasts (chicken), **174**, 1217
  effect on release of interleukin-1 and -6 from cultured osteoblastic cells (mouse), **179**, 236
  fragment 1–34, inhibition of PTH secretion in cultured parathyroid cells (bovine), **178**, 953
  induced homologous desensitization in UMR-106 cells, role of intracellular calcium increase, **176**, 1033
  regulation of osteoblast proliferation, linkage to cAMP-dependent protein kinase activation, **177**, 365
  related protein, induced hypercalcemia, blockage by interleukin-4 *in vivo* (mouse), **178**, 694
  stimulated cAMP production in UMR-106 cells, desensitization induced by phorbol ester, **176**, 764

Parkinson's disease
  brain of affected patients, identification of 2-methyl- and 1,2-dimethyl-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline, **177**, 603
  distinct clustering of point mutations in mtDNA of affected patients, **176**, 938
  and mitochondrial encephalomyopathy, mtDNA from patients, comparison with idiopathic cardiomyopathy patients, **177**, 518

Particles
  polystyrene sulfate, size separation in solutions of methylhydroxypropyl-cellulose of different chain lengths, **180**, 1070

Partition coefficients
  fluorescent probes with phospholipid membranes, **181**, 166

Partitioning
  anticancer drugs in biomembranes, spectrophotometric measurement, **176**, 1079

Parvalbumin
  chicken muscle, distinction from avian thymic hormone, **176**, 328
  identification in thymus (chicken), **177**, 881
  tissue-specific, from muscle and thymus, comparison and evolutionary significance (chicken), **181**, 226

Patch clamp analysis
  partially purified ion channel from hepatic mitochondria (rat), **175**, 305

Pathogenesis
  exotoxin A, role of C-terminal amino acid residues (*Pseudomonas aeruginosa*), **180**, 1498

PCR, *see* Polymerase chain reaction

Pea albumin 2
  and vitronectin, amino acid sequence comparison, **176**, 1000

Pectin lyase
  gene, nucleotide sequence (*Erwinia carotovora* Er), **176**, 321

Pentoxifylline
  inhibition of superoxide anion production by polymorphonuclear leukocytes, role of adenosine receptors (human), **180**, 53

Pepsin A
  gastric secretion, inhibition by basic fibroblast growth factor (rat), **175**, 527
  peptide hydrolysis, slow step after bond cleavage identified by solvent deuterium isotope effects (pig), **176**, 65

Pepstatin
  accumulation in bovine vascular endothelial cells and effect on endothelin-1 processing, **177**, 1006

Peptidases
  cell-surface, comparative susceptibility of LH-RH and antagonist Antide, **176**, 25
  degradation of ACTH(4–10) and synthetic analog semax (rat blood), **176**, 741

Peptide mapping
  activation-associated marker proteins from macrophage cell lines, **176**, 882; *erratum*, **177**, 895

Peptides
  N-acetylated, inhibition of farnesyl transferases (IM-9, Molt-4 cells), **181**, 729
  activation, of pancreatic procarboxypeptidase A, key role in bovine procarboxypeptidase A-S6 ternary complex, **181**, 449
  amelogenin, leucine-rich, product of alternative splicing of amelogenin gene primary transcript (bovine), **174**, 1306
  amylin or calcitonin gene-related peptide fragments, reversal of amylin-induced inhibition of ^{14}C-glycogen accumulation (rat muscle), **181**, 116
  antigenic, antisense sequences, detection in MHC class II molecules, **175**, 207
  antisense, to ovine prolactin, interactions with sense peptide and oPRL, **180**, 1312
  [A^{103,106,108}] antistasin 93–119, inhibition of specific binding of antistasin to sulfatide [Gal(3-SO$_4$)β1-1Cer], **181**, 246
  APLHK, EHIPA, and GAPL, analysis: hydropathically equivalent peptide mimics of glycoprotein IIb/IIIa fibrinogen-binding domain, **180**, 1446
  Arg^{2410}–Lys^{2423}, of insulin-like growth factor II receptor, G protein activation, effects of single residue substitutions, **179**, 10
  atrial, degrading enzyme, isolation and characterization (bovine kidney), **175**, 886
  calcitonin gene-related, *see* Calcitonin gene-related peptide
  chemotactic, from *Icaria* sp., and [Lys^7] analog, differential effects on neutrophils, **175**, 165
  cleavage specificity of serine proteinase from rat hepatic microsomes, **175**, 1152
  corticostatic, isolation from bone marrow and characterization (guinea pig), **180**, 558
  defined mixtures, synthesis and screening, in rapid identification of HIV protease inhibitors, **181**, 402

- derived from
  - GAP-binding domain of *ras*-p21 protein, inhibition of p21-induced maturation of *Xenopus* oocytes, **181**, 1378
  - N- and C-termini of HIV-1 protease, inhibition of HIV-1 reproduction, **179**, 847
  - thrombin receptor amino terminus, elevation of intracellular calcium and stimulation of prostacyclin production in endothelial cells (human), **179**, 1656
- diuretic hormone-related, identification and characterization (*Locusta migratoria*), **179**, 1036
- diuretic, isolation and identification (tobacco hornworm), **181**, 927
- eel intestinal pentapeptide, structure and function, **180**, 828
- gastrin-releasing, *see* Gastrin-releasing peptide
- growth hormone-releasing, *see* Growth hormone-releasing peptide
- hirulog, with scissile bond replacements resistant to thrombin cleavage, characterization, **177**, 1049
- homologous to β-amyloid, Gln for Glu substitution, acceleration of amyloid fibril formation, **179**, 1247; *erratum*, **180**, 1528
- human thyrotropin receptor, chicken antibodies to, generation and characterization, **174**, 399
- hydrolysis by porcine pepsin, slow step after bond cleavage identified by solvent deuterium isotope effects, **176**, 65
- laminin-related, inhibitory effects on experimental metastasis (mouse), **174**, 1159
- membrane fusion-active, N-terminus, modification, blockade of fusion activity, **179**, 1050
- model, -Lys–Leu- bond, identification of cleaving metallopeptidase from brain: processing of Alzheimer A4/β-amyloid protein precursor (human), **179**, 1148
- natriuretic, *see specific types*
- P(45-56), substrate for initiation factor-2 kinases, synthesis, **178**, 430
- phosphatase-resistant, derived from myelin basic protein, application in assay of protein kinase C in crude tissue extracts (rat), **180**, 694
- Pro–D-Phe–Pro–Gly, conformational analysis in aqueous solution, **177**, 271
- RGD-containing, cyclic, effects on tumor cell adhesion and metastasis (mouse), **177**, 74
- serine and threonine residues, O-glycosylation, effect of flanking sequences, **180**, 1024
- signal, cleavable, for peroxisomal targeting, amino-terminal presequence of peroxisomal 3-ketoacyl-CoA thiolase precursor as, **181**, 947
- from simian immunodeficiency virus gp32 N-terminal domain, fusogenic activity, **175**, 872
- synthetic
  - antibodies
    - differentiation of long and short isoforms of D$_2$ dopamine receptor, **179**, 824
    - in identification of four human CD46 isoforms (rabbit), **180**, 1091
  - carba-analogs of heat-stable bacterial enterotoxin, preparation and biological properties, **176**, 958
  - C3d-derived, enhancement of *in vitro* phosphorylation of Raji cell 105-kDa protein (human), **175**, 823
  - containing insulin receptor autophosphorylation sites, phosphorylation by receptor tyrosine kinase at tyrosines 1158, 1162, and 1163, **174**, 772
  - derived from phosphorylase kinase β-subunit phosphorylation site, characterization as protein kinase C substrate, **176**, 1454
  - fimbrial protein segments, immunobiological activities (*Porphyromonas gingivalis*), **180**, 1335
  - mutant, retinal cGMP-phosphodiesterase γ subunit, in analysis of PDEγ function (bovine), **181**, 306
  - rat thyrotropin receptor-derived, in identification of TSHR immunogenic region, **179**, 319
- tissue plasminogen activator propeptide, activity of derivative (human), **179**, 1289
- TRH-like, pGlu–Glu–ProNH$_2$, presence in pituitary and absence in reproductive tract (pig), **181**, 1557

Peptidyl-prolyl isomerase
- cyclophilin-associated, catalytic efficiency, reduction by Trp^{121}-to-Ala^{121} mutation (human), **176**, 1142

Perfusion
- liver, ortho- and retrograde, associated glucose output and flow, differential effects of C3a (rat), **176**, 1218

Permeability
- dermal vessel, enhancement by vascular permeability factor, role of glycosylation (guinea pig), **179**, 1568

Peroxidase
- fluorogenic substrate dihydrotetramethylrosamine, evaluation *in vitro* and in *Amoeba proteus*, **175**, 387
- and hydrogen peroxide, albumin fragmentation by sulfite in presence of, role of sulfate radicals, **176**, 1306
- and oxygenase, activities in porphobilinogen oxygenase and horseradish peroxidase, analysis by phenylhydrazine treatment, **180**, 360
- thyroid, specific human Fab fragment, generation by cloning thyroid lymphocyte-derived Ig genes in bacteriophage λ library, **179**, 372

Peroxidation
- lipids, *see* Lipid peroxidation

Peroxisomes
- fibroblast
  - oxidation of very-long-chain fatty acids (human), **178**, 842
  - role in cholesterol synthesis (human), **181**, 537
- hepatoma cell, import of enoyl-CoA hydratase:3-hydroxyacyl-CoA dehydrogenase bifunctional enzyme *in vitro* (human), **178**, 1084
- renal, alanine–glyoxylate aminotransferase forms in, description (chicken, pigeon), **176**, 1450
- targeting, cleavable signal peptide for, role of amino-terminal presequence of peroxisomal 3-ketoacyl-CoA thiolase precursor (rat), **181**, 947

Pertussis toxin
- –biotin conjugate, synthesis and characterization, **179**, 1464
- blockage of melatonin-induced inhibition of forskolin-stimulated cerebral adenylate cyclase (chicken), **178**, 786

  identification of G_o protein α-subunit as 39-kDa substrate, **175**, 473
  induced alteration in electrophoretic mobility of G proteins, role of ADP-ribosylation, **180**, 1227
  inhibition of autophosphorylation and activation of insulin receptor kinase, **181**, 1479
  sensitive G protein regulating islet cAMP content, mediation of α-adrenergic inhibition of pancreatic beta cell replication and insulin secretion (rat), **180**, 152
P-glycoprotein
  mediated vinblastine secretion, transepithelial, inhibition by forskolin derivatives (MDCK cells), **181**, 671
pH
  acidotic, protection against anoxia/reoxygenation injury to cardiac myocytes (neonatal rat), **179**, 798
  cytosolic, effect on phosphate transport rate during recovery from muscular exercise, ^{31}P NMR study (human), **178**, 871
  effects on
    hemoglobin function (water buffalo), **177**, 956
    rate constants, ion selectivity, and thermodynamic properties of fluorescent calcium and magnesium indicators, **177**, 184
    skeletal muscle relaxation with diazo-2 (*Rana temporaria*), **181**, 1337
  intracellular
    effect on tyrosine- and serine/threonine-protein kinase distribution in erythrocytes (human), **178**, 1021
    high values in pancreatic adenocarcinoma cells from cystic fibrosis patient, decrease by retrovirus-mediated CFTR gene transfer, **180**, 342
  9.5, human carbonic anhydrase II structural properties at, X-ray crystallographic study, **181**, 579
  selective modulation of protein kinase FA antagonistic activities, **176**, 145
Phagocytosis
  erythro-, *see* Erythrophagocytosis
  individual zymosan particles by macrophages, associated single pulses of $[Ca^{2+}]_i$ (mouse), **177**, 460
  liposomes, complement-dependent, suppression by GM$_1$ ganglioside and sulfatide, **176**, 866
  macrophage, function after phagocytosis mediated by Fc or complement receptors, comparison (rat), **180**, 268
  neutrophil, stimulation by A23187, concomitant activation of myeloperoxidase (rat), **176**, 364
  opsonized yeast particles by neutrophils, associated formation of diacylglycerol (human), **177**, 948
Phalloidin
  stabilization of actin, differential scanning calorimetric study, **181**, 542
Phanerochaete chrysosporium
  ligninase-mediated degradation of azo dyes, role of veratryl alcohol, **178**, 1056
  manganese peroxidase
    active, heterologous expression with baculovirus expression system (Sf9 cells), **179**, 897
    mediated degradation of high-molecular-weight chlorolignin, **178**, 1092
Phase separation
  temperature-induced, in presence of decyltetraoxyethylene: resolution of *Rhodocyclus gelatinosus* photoreceptor unit components, **177**, 1107
Phenobarbital
  induction of cytochrome P450IIB in hepatocytes, effect of interleukin-6 (rat), **178**, 1049
Phenoloxidase
  activation by lysolecithin (lobster hemolymph), **176**, 1371
L-Phenylalanine mustard, *see* Melphalan
Phenylarsine oxide, *see* Oxophenylarsine
Phenylephrine
  inhibition of pancreatic beta cell replication and insulin secretion, mediation by pertussis toxin-sensitive G protein regulating islet cAMP content (rat), **180**, 152
  and U-50,488H, effects on phosphoinositide turnover in cardiomyocytes, comparison (rat), **179**, 972
Phenylhydrazine
  treatment of porphobilinogen oxygenase and horseradish peroxidase, in analysis of dual oxygenase and peroxidase activities, **180**, 360
Phenylnorstatine
  as transition state element in HIV-1 protease substrate analog inhibitors, stereochemical requirements, **180**, 181
Phenylstatine
  isomers, HIV-1 protease inhibitors containing, binding by protease, stereochemistry, **180**, 187
Phenytoin
  and tolbutamide, hydroxylation by human hepatic cytochrome P4502C9 expressed in COS cells, **175**, 1112; *erratum*, **180**, 1527
Pheromones
  a factor, conformation, effect of *S*-prenylation of Cys^{12} (yeast), **181**, 1125
Phleomycin
  resistance, conferral by *ble* gene of *Streptoalloteichus hindustanus*: selectable marker for *Dictyostelium discoideum*, **180**, 1403
Phorbol 12,13-dibutyrate
  differential recovery of protein kinase C α and ϵ isozymes in mesangial cells after long-term treatment (rat kidney), **180**, 1422
  effects on portal veins from hypertensive and normotensive rats, **176**, 1552
Phorbol 12-myristate 13-acetate
  activation of c-*fos* transcription in T cells, mediation by dyad symmetry element (human), **181**, 353
  effects on
    subcellular distribution of protein kinase C isoforms α, β, and ζ (human platelets), **178**, 878
    vascular permeability factor mRNA levels in U937 cells (*Escherichia coli*), **180**, 572
  enhancement of neutrophil nuclear β-subtype protein kinase C activity (human), **181**, 348
  induction of
    desensitization of PTH-stimulated cAMP production in UMR-106 cells, **176**, 764
    inflammation, stimulation by *N,N*-diethyl-2-[4-(phenylmethyl)phenoxy] ethanamine hydrochloride (murine epidermis), **179**, 1297

    - interleukin-1 receptor phosphorylation at single threonine residue (mouse), **177**, 61
    - promiscuous cytolytic activity by T cells, inhibition by protein kinase C inhibitor H-7 (mouse), **179**, 720
  - inhibition of erythropoietin production, association with down-regulation of protein kinase C α isoenzyme in hepatoma cells (human), **179**, 1441

- Phosphatase
  - resistant substrate derived from myelin basic protein, application in assay of protein kinase C in crude tissue extracts (rat), **180**, 694
- Phosphate
  - dependent Na^+ transport, ^{23}Na and ^{31}P NMR analysis (*Streptococcus faecalis*), **181**, 74
  - inorganic, post-exercise transport kinetics in skeletal muscle, *in vivo* NMR study (human), **176**, 1204
  - internucleotide, linkage, effect on base stacking in 3′–5′ and 2′–5′ RNA: CD spectroscopic study of RNA hexamer AACCUU, **180**, 1251
  - transport rate during recovery from muscular exercise, correlation with cytosolic pH, ^{31}P NMR study (human), **178**, 871
- Phosphatidic acid
  - accumulation in pancreatic islets, synergistic stimulation by glucose and carbachol (rat), **180**, 960
  - and diacylglycerol, role in neutrophil superoxide release: divergent effects of propranolol (human), **175**, 423
- Phosphatidyl bisphosphate
  - inhibition of F-actin capping by cap32/34, **181**, 833
- Phosphatidylcholine
  - role in antigen-induced diacylglycerol formation in RBL-2H3 cells, **177**, 336
- Phosphatidylcholine–sterol acyltransferase
  - encoding gene
    - 5′ flanking region, functional analysis (human), **180**, 1469
    - missense mutation in exon 6, identification in LCAT deficiency (human), **178**, 460
  - familial deficiency, complete, formation by single nucleotide insertion in LCAT gene (human), **181**, 933
- Phosphatidylethanol
  - formation in stimulated HeLa cells expressing human m1 muscarinic acetylcholine receptor gene, **176**, 453
- Phosphatidylethanolamine
  - in HeLa cells, binding of *Chlamydia* spp., **175**, 1082
- Phosphatidylinositol
  - turnover, and functional responses in FcεR1 signalling pathway, role of tyrosine kinase (RBL-2H3 cells), **179**, 551
- Phosphatidylinositol 4,5-bisphosphate
  - activation of protein kinase C, role in Na^+/H^+ antiport down-regulation and cell proliferation, **175**, 852
- Phosphatidylinositol-3-kinase
  - activation by insulin via insulin receptor types A and B, **174**, 123
- Phosphatidylinositol-4-phosphate
  - phosphorylation by protein kinase C proteolytic fragment, **176**, 1007
- Phosphatidylinositol 3,4,5-trisphosphate
  - production in platelets, stimulation by thrombin (human), **174**, 524
- Phosphatidylserine
  - inhibition of iron-dependent lipid peroxidation, **179**, 1077
  - role in MI–MII equilibrium of rhodopsin (bovine), **176**, 915
- Phosphofructokinase 1, *see* 6-Phosphofructokinase
- 6-Phosphofructokinase
  - cDNA, isolation and sequence (human platelets), **180**, 197
  - gene cloning and sequencing (*Thermus thermophilus*), **176**, 1313
  - phosphorylation by Ca^{2+}/calmodulin and cAMP-dependent protein kinases (ovine heart), **174**, 1255
  - polymorphonuclear leukocyte, kinetic studies (human), **178**, 672
- Phosphoinositidase C
  - cell membrane, topological regulation (human), **178**, 773
- Phosphoinositides
  - α_1-adrenergic-stimulated breakdown in cultured cardiomyocytes: diacylglycerol production and composition in docosahexaenoic acid supplemented cells (rat), **174**, 869
  - breakdown in cultured endothelial cells, role in endothelin-3 stimulation of nitric oxide production (bovine), **174**, 228
  - hormone- and mastoparan-stimulated turnover in hepatocytes, effect of okadaic acid (rat), **179**, 852
  - synthesis and breakdown in pancreatic acinar cells, comparative effects of epidermal growth factor and carbachol (rat), **178**, 780
- Phospholipase A_2
  - activation in hepatic macrophages: synergistic effect of Mg^{2+} and Ca^{2+} (rat), **175**, 532
  - Ca^{2+}-dependent, stimulation by diacylglycerol (ovine spermatozoa), **176**, 294
  - group II
    - cytokine- and forskolin-induced synthesis in mesangial cells, prevention by dexamethasone (rat), **180**, 46
    - 14-kDa, detection in seminal plasma (human), **178**, 1505
    - inhibitors, suppression of lysophosphatidylserine-dependent degranulation of peritoneal mast cells (rat), **181**, 714
    - recombinant human, overexpression in C127 fibroblasts, enhancement of stimulated arachidonic acid release, **178**, 1298
    - synthesis and secretion in mesangial cells, stimulation by interleukin-1β, tumor necrosis factor, or forskolin (rat), **174**, 268
  - group II-like, induction by lipopolysaccharide in liver of BCG-primed rats, **174**, 1077
  - pH-dependent, role in loss of plasma membrane integrity during chemical hypoxia in hepatocytes (rat), **174**, 654
  - porcine, expressed in *Escherichia coli*, purification, **176**, 371
  - purification and properties (bovine platelets), **174**, 189; *erratum*, **175**, 359

  regulation by G proteins in pancreatic zymogen granule membranes, **177**, 22
Phospholipase C
  coupled prostaglandin $F_{2\alpha}$ receptors, detection on astrocytes (rat), **178**, 946
  linked G proteins, role in Ca^{2+}-dependent amylase secretion by pancreatic acini (rat), **174**, 536
  stimulation by insulin, mediation by human insulin receptor isotypes A and B, comparison, **181**, 566
Phospholipase Cα
  phosphatidylinositol-specific, inactive endoplasmic reticulum protein highly homologous to, covalent binding of halothane metabolite, **178**, 679
Phospholipase Cγ1
  interaction with nerve growth factor-binding pp140$^{c\text{-}trk}$ through enzyme *src* homology domain, **179**, 217
Phospholipase D
  activation
    antigen-induced, in peritoneal mast cells, role of protein kinase C (rat), **175**, 159
    by GTPγS-dependent protein factor (human granulocytes), **175**, 236
    by phorbol ester in vascular smooth muscle cells (rat), **179**, 1070
    in stimulated HeLa cells expressing human m1 muscarinic acetylcholine receptor gene, **176**, 453
Phospholipids
  degradation in isolated heart, stimulation by endothelin-1 (rat), **174**, 952
  in DMPC/bacteriorhodopsin vesicles produced by detergent free method, composition, **180**, 939
  sn-2-ω-hydroxycarboxylate-containing, identification in cerebral lipid extract (bovine), **177**, 466
  membranes composed of, partition coefficients of fluorescent probes with, **181**, 166
  packing in normal and sickle red blood cell membranes, effects of inserted oxysterols, **180**, 730
Phosphopeptidomannan
  manno-oligosaccharides released from, ^{1}H NMR analysis (*Candida albicans*), **181**, 1251
Phosphoprotein phosphatase
  calmodulin-dependent, calcineurin, catalytic subunit genes, chromosomal mapping (human), **181**, 252
  type 2A, inhibition by dopamine agonists (rat brain), **176**, 737
Phosphoproteins
  nuclear, 42-kDa, preferential binding to promoter-containing single-stranded DNA (*Chironomus tentans*), **176**, 1565
  Op18, role in cell proliferation (human), **179**, 1649
  pp60$^{c\text{-}src}$, fibroblast form from Y79 cells, detection of serine phosphorylation, **178**, 764
Phospho*enol*pyruvate carboxykinase (ATP)
  gene promoter, cAMP-responsive elements and NF1-CTF site, interaction with hepatocyte nucleoprotein (rat), **181**, 367
  mRNA, 3′ end, binding to cytosolic protein from cultured rat hepatocytes: role in mRNA stabilization, **177**, 1273
Phosphoramidon
  competitive inhibition of cytosolic endothelin-converting enzyme (bovine endothelial cells), **176**, 860
  effects on
    local formation and degradation of endothelin-1 in airway tissues (guinea pig), **179**, 830
    pressor response to big endothelin-1 in isolated mesenteric artery (rat), **177**, 1127
  inhibition of big endothelin-1 conversion to endothelin-1 in
    cerebral arteries after intracisternal administration (dog), **178**, 24
    cultured endothelial cells (bovine), **174**, 779
  sensitive endothelin-converting enzyme, substrate structural requirement for specific conversion: role of big endothelin-1 C-terminal region (bovine), **180**, 1019
Phosphorothioates
  based analogs of oligodeoxyribonucleotides, synthesis and inhibitory effects on HIV replication (human T cells), **179**, 1614
Phosphorylase kinase
  analysis in I/Strain neonatal skeletal muscle with deficiency in α/α′ subunit mRNAs (mouse), **179**, 707
  continuous fluorometric assay (rabbit muscle), **174**, 344
  digestion by HIV-1 protease, **178**, 892
  β-subunit phosphorylation site, derived synthetic peptide, characterization as protein kinase C substrate, **176**, 1454
Phosphorylation
  apoprotein A-1 by protein kinase C in absence of cofactors, **179**, 599
  auto-, *see* Autophosphorylation
  basic fibroblast growth factor by protein kinase C: identification of cryptic site, **175**, 31
  calmodulin-dependent protein kinase IV by cAMP-dependent protein kinase, **180**, 191
  cAMP-dependent, rough endoplasmic reticulum proteins from liver, effect on GTP-dependent membrane fusion (rat liver), **179**, 463
  cAMP response element-binding protein CRE-BP1 by cAMP-dependent protein kinase and protein kinase C (human), **181**, 629
  cellular component of Raji cells, enhancement by C3d-derived synthetic peptide (human), **175**, 823
  CYP2B1 and CYP2E1 in isolated hepatocytes, hormonal effects (rat), **174**, 37
  defective, role in infantile α-*N*-acetylgalactosaminidase deficiency (human), **175**, 1097
  and dephosphorylation
    cyclic, rhodopsin in bovine retina, mediation by protein kinase FA, **178**, 1306
    modulation of polypeptide inverse temperature transition, **178**, 539
  effect on proteolysis of nucleolin from 3T3-F442A cells, **180**, 716
  elongation factor EF-2 on tyrosine, serine, and threonine (chicken embryo), **175**, 400
  extracellular 67-kDa polypeptide reacting with anti-MYC antisera in primary hepatocyte cultures (rat), **180**, 631
  Fra-2 protein in chicken embryo fibroblasts, stimulation by serum, **174**, 934

heat shock protein hsp27
  diminished levels in infant acute lymphoblastic leukemia (human), **175**, 134
  in myelomonocytic leukemia cells, association with differentiation induced by leukemia inhibitory factor/D-factor (mouse), **176**, 979
high-mobility-group protein 14 at Ser 20, inhibition of HMG 14 enhancement of linear DNA ligation, **174**, 660
hyaluronate-binding protein in rat histiocytoma, analysis, **177**, 1291
hyper-, *see* Hyperphosphorylation
initiation factor 2 at serine-51, associated inhibition of peptide chain initiation in reticulocyte lysates (rabbit), **176**, 993
insulin receptor at serine/threonine sites, insulin-stimulated, analysis, **179**, 962
insulin-sensitive, myelin basic protein phosphorylation on tyrosine residues (rat brain), **179**, 392
interleukin-1 receptor at single threonine residue, induction by phorbol ester (mouse), **177**, 61
light-induced, phosrestins I and II in *Drosophila* photoreceptor *in vivo*, comparison, **177**, 1306
myosin light chain, absence during oxytocin-induced contraction of uterine smooth muscle in Ca^{2+}-free medium (rat), **176**, 122
nitric oxide synthase by
  Ca^{2+}- and calmodulin-dependent protein kinase II and protein kinase C, effects on NO synthase activity (rat brain), **180**, 1396
  protein kinase A (pig, rat), **181**, 921
nuclear proteins
  demonstration as early event in transforming growth factor β$_1$ action (mink lung cells), **175**, 816
  patterns in HL-60 cells, effect of chromatin conformation (human), **180**, 329
oxidative, coupled to electron transport, characterization in filarial parasite *Setaria digitata*, **177**, 318
photosystem II core complex, relationship to heterogeneity (spinach), **176**, 1298
pp70 protein in extract of young rice panicle, characterization, **175**, 467
proline-rich region in microtubule-binding domain of MAP-4 by *cdc2*/H1 histone kinase, destabilizing effect on microtubules, **179**, 1620
proteins
  at tyrosine residues: early signaling event common to Fc receptor crosslinking in human neutrophils and rat basophilic leukemia cells, **177**, 192
  in yeast mitochondria: inorganic pyrophosphate as phosphate donor, **178**, 1359
role in development of tight junctions in MDCK cells, **181**, 548
serine
  in fibroblast form of pp60$^{c\text{-}src}$ from Y79 cells, **178**, 764
  at position 378 in vitronectin by cAMP-dependent protein kinase, **179**, 655
tobacco mosaic virus-induced host-encoded protein, temporal regulation, **179**, 229
TPA responsive element motif, state in NIH3T3 transformant induced by *ret*^{TPC} (mouse), **179**, 1331
tyrosine
  essential role in microfilament assembly in B cells (human), **176**, 1424
  in vivo, *ret* oncogene products identified as membrane-bound glycoproteins, **181**, 416
tyrosine kinase pp60$^{c\text{-}src}$, stimulation by vasoactive intestinal peptide receptor-mediated signal transduction (chicken embryo), **174**, 452
vitronectin in endothelial cell substratum (human), **174**, 465
Phosphotransferase
  associated activity of casein kinase II, role in enzyme physiological function (*Drosophila melanogaster*), **181**, 524
Phosphotyrosine
  recognition, role of highly conserved eight-amino-acid sequence in SH2-containing proteins, **180**, 1490
Phosrestin
  types I and II, differential light-induced phosphorylation in *Drosophila* photoreceptor *in vivo*, **177**, 1306
Photoaffinity labeling
  corpora allata allatostatin receptor proteins (*Diploptera punctata*), **181**, 736
  in detection of cannabinoid receptors (mouse), **176**, 492
  human erythrocyte ghosts with 5-nitro-2-[*N*-3-(4-azidophenyl)-propylamino]-benzoic acid, **176**, 459
  tubulin, rhizoxin derivatives as probe, **178**, 558
Photoaffinity probes
  fluorescent, for retinoic acid receptors, design and preparation, **179**, 259
Photobehavioral responses
  Chlamydomonas reinhardtii, essential role of retinal isomerization at 13-ene, **178**, 1273
Photochemistry
  primary, in isolated thylakoid membranes, enhancement by proline inhibition of photoinhibitory damage (*Brassica juncea*), **181**, 1238
Photocleavage
  DNA by *p*-nitrobenzoyl group covalently linked to proflavine, **181**, 1266
Photoreceptors
  components, resolution by temperature-induced phase separation in presence of decyltetraoxyethylene (*Rhodocyclus gelatinosus*), **177**, 1107
  phosrestins I and II, differential light-induced phosphorylation *in vivo* (*Drosophila melanogaster*), **177**, 1306
Photosystem I
  mediated oxygen uptake, heat-induced stimulation, role of superoxide dismutase (spinach), **174**, 696
Photosystem II
  core complex heterogeneity, relationship to phosphorylation (spinach), **176**, 1298
  electron donor *N,N*-diethylhydroxylamine (beet spinach), **179**, 1127
Phycobiliproteins
  C-phycocyanin, energy transfer kinetics, analysis by pump-probe techniques (*Westiellopsis prolifica*), **179**, 558

- Phytase
  - inactivation, role of arginine modification by 1,2-cyclohexanedione (*Aspergillus ficuum*), **178**, 45
- Phytohemagglutinin
  - stimulated lymphocytes
    - proliferation, associated induction of DNA polymerase β (human), **181**, 623
    - sulfated glycoprotein 2 and ornithine decarboxylase mRNA accumulation patterns: relationship of cell proliferation to cell death (human), **180**, 59
- Pinacidil
  - effect on basilar artery smooth muscle cells, mediation by Ca^{2+}-activated K$^+$ channels (rat), **181**, 172
- Pits
  - coated, and asialoglycoprotein receptors, redistribution to substratum during hepatocyte adhesion to galactoside surfaces, **180**, 1304
- Pituitary
  - anterior
    - (Ca,Mg)ATPase activity, effects of somatostatin and analogs RC-160 and SMS 201-995 (rat), **178**, 1492
    - and hypothalamus, membranes, specific binding of growth hormone-releasing peptide, demonstration and characterization (rat), **178**, 31
  - detection of TRH-like peptide pGlu-Glu-ProNH$_2$ (pig), **181**, 1557
  - hormone secretion in culture, effects of endothelin-3 (rat), **174**, 338
  - intermediate lobe, coordinate regulation of mRNA levels of pro-opiomelanocortin and candidate processing enzymes PC2 and PC3 (rat), **179**, 1311
- Pituitary cells
  - anterior pituitary, follicle-stimulating hormone secretion, suppression by recombinant human follistatin mutants (rat), **179**, 352
  - GH1, thyroid hormone receptor expression, retinoic acid-induced decrease (rat), **181**, 9
  - GH$_4$C$_1$
    - calcium homeostasis, effects of thapsigargin (rat), **177**, 551
    - cytosolic free calcium levels and prolactin secretion, effects of platelet-activating factor (rat), **174**, 424
    - TRH-induced influx of extracellular Ca^{2+}, evidence (rat), **180**, 860
- Placenta
  - derived vesicles, clathrin-coated, assay of associated GTP-binding proteins (human), **174**, 197
  - and liver, derived monoamine oxidase A, differences in substrate specificities (human), **181**, 1084
- Placental cells
  - tPA30-1, secretion of human chorionic gonadotropin, enhancement by human macrophage colony-stimulating factor, **178**, 1099
- Placental protein 11
  - and vitronectin, amino acid sequence comparison, **176**, 1000
- Plants
  - protection from microbial pathogens by animal myeloperoxidase, evaluation, **178**, 1202
- Plasma, *see also* Blood, Serum
  - arginine vasopressin and oxytocin levels, effects of interleukins (rat), **174**, 1189
  - beta-cell tropin levels, measurement in lean and genetically obese mice and Zucker rats, **174**, 767
  - brain natriuretic peptide levels and molecular forms (rat), **177**, 40
  - carnitine levels, free and total, analytical method (human), **176**, 1617
  - detection of benzodiazepines (human), **175**, 1042
  - glucose levels in fasted anesthetized rats, comparative effects of amylin and glucagon, **181**, 1288
  - immune complexes in systemic lupus erythematosus patient, demonstration of extrinsic DNA, **174**, 323
  - platelet responses to thrombin, inhibition by DUP 714 (human), **179**, 1500
  - seminal, *see* Seminal plasma
- Plasma membrane receptors
  - GTPase-linked, and nuclear receptors, structural comparison, **176**, 343
- Plasma membranes
  - cerebral, glycoprotein fraction, insulin-sensitive myelin basic protein phosphorylation on tyrosine residues (rat), **179**, 392
  - diabetic, elevated protein-tyrosine-phosphatase levels (human placenta, rat liver), **180**, 463
  - fibroblast
    - insulin stimulation of phospholipase C, mediation by human insulin receptor isotypes A and B, comparison (rat), **181**, 566
    - permeability, effect of A23187 (mouse), **178**, 830
  - HeLa cell
    - electron transport, effects of monoclonal antibodies to transferrin receptor, **176**, 1437
    - NADH oxidase and Na$^+$/H$^+$ antiport, activation by lactoferrin, **176**, 498
  - hepatic
    - canalicular, ATP-dependent glucuronide transport (rat), **176**, 622
    - electron transport, effects of monoclonal antibodies to transferrin receptor (rat), **176**, 1437
    - NADH oxidase and Na$^+$/H$^+$ antiport, activation by lactoferrin (rat), **176**, 498
  - hepatoblastoma, binding of oligonucleotides at acidic pH (human), **181**, 1343
  - hepatocyte, loss of integrity during chemical hypoxia, role of pH-dependent phospholipase A$_2$ (rat), **174**, 654
  - intestinal, Ca-pump mRNA, effect of vitamin D (rat), **179**, 749
  - K562 cell, NADH oxidase and Na$^+$/H$^+$ antiport, activation by lactoferrin (human), **176**, 498
  - mononuclear leukocyte, high-affinity binding of aldosterone (human), **181**, 1306
  - neuronal cell, Ca^{2+} entry, comparative roles of thapsigargin- and inositol trisphosphate-sensitive intracellular Ca^{2+} pools (mouse, rat), **180**, 1518
  - nucleated cells, associated thioredoxin-related protein, identification, **175**, 123
  - parotid acinar cell, permeability enhancement by mastoparan, role of G protein activation (rat), **177**, 802

  platelet, signal-initiating protein CD9, association with small GTP-binding proteins (human), **179**, 401
  sperm, endogenous activity of cyclic nucleotide-dependent protein kinase (sea urchin), **180**, 1436
  T cell, binding of oligonucleotides at acidic pH (human), **181**, 1343
Plasmin
  denaturation, relationship to kringle domains (human), **178**, 360
  and plasminogen activators, comparative inactivation by cyclopeptidic suicide substrate (human), **178**, 352
Plasminogen
  activation, effect of kringles, fibrinogen degradation products, and lysine (human), **178**, 360
Plasminogen activator
  in bovine microvascular endothelial cells, induction by vascular endothelial growth factor, **181**, 902
  and plasmin, comparative inactivation by cyclopeptidic suicide substrate (human), **178**, 352
  substrate specificity (human), **174**, 432
  tissue-type
    kringle-2 domain, localization of plasminogen activator inhibitor-1 binding site, **178**, 1160
    signal and propeptide processing: activity of pro-tPA derivative (human), **179**, 1289
  urokinase-type
    growth factor-like effect on renal cells (human), **176**, 1408
    in synovial fibroblasts, stimulation by oncostatin M (human), **180**, 652
Plasminogen activator inhibitor-1
  binding site localization in kringle-2 domain of tissue-type plasminogen activator, **178**, 1160
  induction in bovine microvascular endothelial cells by
    chondrocyte-derived transforming growth factor β, **176**, 633
    vascular endothelial growth factor, **181**, 902
  production in articular cartilage and chondrocytes, inhibition by interleukin-1 (human), **174**, 251
  recombinant, active and latent forms, spectroscopic conformational study, **175**, 437
Plasminogen activator inhibitors
  cyclopeptidic suicide substrate, comparative inactivation of plasminogen activators and plasmin, **178**, 352
Plasmodium falciparum
  single parasites in infected blood, detection method, **175**, 179
Platelet-activating factor
  analog 1-acyl-2-[^{3}H]acetyl-*sn*-glycero-3-phosphocholine, synthesis by vascular endothelial cells (human), **176**, 1557
  antagonist YM264, effects on puromycin-induced nephropathy (rat), **176**, 781
  effects on cytosolic free calcium levels and prolactin secretion in GH_4C_1 cells (rat), **174**, 424
  1-*O*-hexadecyl molecular species, synthesis by tracheal epithelial and vascular endothelial cells (human, sheep), **177**, 357
  mediated hypotension, elicitation by magnetic fields after intravenous injection with iron beads (rat), **180**, 315
  production by neutrophils, differential effects of neutrophil-activating peptide/IL-8 and fMLP or C5a (human), **176**, 972
  stimulated arachidonic acid release from peritoneal macrophages, role of extracellular calcium (mouse), **180**, 1036
Platelet-activating factor receptors
  distribution in kidney (guinea pig), **177**, 54
  evidence for presence on alveolar macrophages (human), **177**, 704
  functional
    cDNA characterization (human), **180**, 105
    high-level expression on B lymphoblastoid cell line (human), **180**, 1318
  gene expression, induction during HL-60 cell differentiation (human), **181**, 1580
Platelet-derived growth factor
  AA-homodimer, and transforming growth factor β, stimulation in vascular smooth muscle cells (rat), **178**, 1451
  A-chain
    gene activation, dissociation from mitogenic responses in neonatal vascular smooth muscle cells (rat), **181**, 617
    mRNA, regulated expression in saphenous vein smooth muscle cells *in vitro* (human), **180**, 519
  BB-homodimer, enhancement of chemotaxis and DNA synthesis in MC3T3-E1 cells, **175**, 745
  stimulated fibroblasts, formation pathway of D-3 phosphate-containing inositol phospholipids (mouse), **175**, 568
  stimulation of vascular smooth muscle cell migration mediated by induction of endogenous basic fibroblast growth factor, **174**, 1260
Platelets
  activation
    regulation, role of 12*S*-hydroxyeicosatetraenoic acid (bovine), **179**, 345
    thrombin-induced, multiple pathways, differentiation by desensitization and thrombin exosite inhibitor (human), **181**, 636
  adhesion to leukocytes via GMP-140/PADGEM protein, enhancement by interleukin-1β and interferon-γ (human), **179**, 756
  carrier density and turnover rate of Na^+/H^+ exchanger, estimation with 5-(*N*-methyl-*N*-[^{3}H]isobutyl)-amiloride (human), **176**, 639
  cytosolic Ca^{2+} levels, effects of collagen and antiplatelet agent (human), **177**, 888
  differential translocation of protein kinase C isoforms α, β, and ζ in response to phorbol ester (human), **178**, 878
  function, inhibition by high-density lipoprotein from patient with apolipoprotein E deficiency, **181**, 1331
  glycolysis, stimulation by inositol phosphoglycan (human), **180**, 1041
  glycoprotein IIIb-deficient, normal binding to thrombospondin (human), **179**, 985
  occurrence and biochemical properties of proteasome and endogenous activator (human), **178**, 256

  predominant localization of circulating protease nexin-2/amyloid β-protein precursor (human), **175**, 15
  production of phosphatidylinositol 3,4,5-trisphosphate, stimulation by thrombin (human), **174**, 524
  protein-tyrosine phosphorylation
    induced by ionophore A23187, analysis (human), **174**, 922
    induction by wheat germ agglutinin (human), **174**, 1154
  responses to thrombin, inhibition by DUP 714 (human), **179**, 1500
  secretion of prosaposin (human), **176**, 668
  selectin GMP-140-expressing, binding to sialosyl-Le^a and -Le^x, effect of sulfated glycans (human), **181**, 1223
  signal-initiating membrane protein CD9, association with small GTP-binding proteins (human), **179**, 401
  from spontaneously hypertensive rats, cytosolic free Ca^{2+} levels and thrombin-induced changes, effects of erythropoietin, **177**, 991
  surface, immunodetection of von Willebrand factor propolypeptide (human), **176**, 1571
Platinum
  deposition at photosynthetic membrane surfaces within whole cyanobacterial cells: implications for hydrogen generation, **175**, 1029
Pleiotropin
  related endothelial cell growth factor, mitogenic properties (bovine brain), **180**, 145
Plicamycin
  lack of binding to left-handed poly(dG-m^5dC) in presence of Mg^{2+}, **177**, 511
Podophyllotoxin
  effect on IW32 erythroleukemia cell differentiation: expression of c-*myc* proto-oncogene (mouse), **179**, 1241
Polarized light scattering
  monitoring of changes in DNA superhelical density, **177**, 1313
Poly(ADP-ribose) polymerase, *see* NAD^+ ADP-ribosyltransferase
Poly(ADP-ribose) synthetase
  exogenous gene, expression in macrophages, inhibitory effect on MHC class II antigen induction by interferon-γ (mouse), **175**, 685
Polyamines
  analogs, effects on extent and fidelity of *in vitro* protein synthesis, **176**, 1383
  binding by casein kinase II, analysis, **180**, 945
  and casein kinase II, interaction in response of adrenocortical cells to ACTH (bovine), **180**, 623
  intracellular levels, effect on proliferation of *Leishmania mexicana*, **180**, 797
Polymerase chain reaction
  with allele-specific priming, mutation detection in Leber's hereditary optic neuropathy (human), **175**, 631
  amplification of RNA in formalin-fixed paraffin-embedded tissues (human), **174**, 176
  in assay of extra-renal renin mRNA (rat), **179**, 25
  based exon amplification, in cloning of genomic interferon-γ DNA for expression in *Escherichia coli* (pig), **180**, 1408
  in detection of
    allele-specific transcripts of low-density lipoprotein receptor gene in individuals with heterozygous familial hypercholesterolemia, **178**, 1319
    interleukin and IL-1 receptor mRNAs in human heart, **181**, 520
    organogenesis-stage cytochrome P4501A1 in conceptive tissues (rat), **178**, 236
    transforming growth factor β mRNA in articular chondrocytes (human), **180**, 602
  and gel electrophoresis, genotyping of apolipoprotein B 3′ hypervariable region by, comparison, **181**, 846
  in homology cloning of aspartic proteases from endocrine cell line, **177**, 920
  recombinant, in construction of full-length glycophorin A gene (mouse), **177**, 202
Polymerization
  tubulin, inhibition by mitoxantrone, mechanism (bovine brain), **180**, 118
Polymorphisms
  single-strand conformation, *see* Single-strand conformation polymorphism
Polymorphogenesis
  blue light-induced, role of G proteins: signal transduction in *Coprinus congregatus*, **179**, 1225
Polyneuropathy
  hereditary, detection of tranthyretin Arg 58 mutant in affected patient by nonisotopic single-strand conformation polymorphism analysis, **180**, 380
Polynucleotides
  with alternating purine-pyrimidine sequences, identification of unique B structures, **174**, 1313
  d(TACGTA), interstrand crosslinking upon reaction with *trans*-diamminedichloroplatinum(II), **175**, 537
  specificity of guanylic RNases for, **177**, 630
Polypeptides
  99-kDa, antiserum to, effect on taurocholic acid uptake by ileal brush border membrane vesicles (rat), **179**, 204
  calcium-binding, similar to calcineurin β-subunit, cDNA cloning and sequencing (rat testis), **180**, 1476
  cytokeratin, crosslinked, demonstration in transplantable hepatoma cells (rat), **176**, 441
  DDT-binding, designed, structure–function studies, **179**, 1212
  extracellular, 67-kDa, reacting with anti-MYC antisera, synthesis and phosphorylation in primary hepatocyte cultures (rat), **180**, 631
  inverse temperature transition, modulation by phosphorylation and dephosphorylation, **78**, 539
  islet amyloid, *see* Islet amyloid polypeptide
  nascent, nuclear accumulation after heat shock (CHO cells), **176**, 1525
  transferrin-related, 41-kDa, production by HL-60 cells: cell growth stimulatory activity, **176**, 473
Polyposis
  familial adenomatous, chromosome 5 with encoding gene, tumor-suppressive activity (human), **174**, 298

Polyriboinosinic:polyribocytidylic acid
  induction of viral resistance in preimplantation bovine embryos, **175**, 10
Polysaccharides
  microbial, HS-142-1, inhibition of atrial natriuretic peptide binding to guanylyl cyclase-containing ANP receptor (*Aureobasidium* sp.), **176**, 949
Polystyrene sulfate
  particles, size separation in solutions of methyl-hydroxy-propyl-cellulose of different chain lengths, **180**, 1070
Pores
  with lymphocyte potassium channel, histidine residue in, role in inactivation of current through channel (rat), **179**, 1384
  nonspecific mitochondrial inner membrane, sensitivity to cyclosporin, modulation by ADP at carboxyatractyloside-sensitive and -insensitive sites (rat liver), **180**, 33
Porphobilinogen oxygenase
  dual oxygenase and peroxidase activities, analysis by phenylhydrazine treatment (wheat germ), **180**, 360
Porphyrins
  inhibition of splenic lymphocyte proliferation *in vitro* (mouse), **174**, 313
Post-translational processing
  human atriopeptin in rat pheochromocytoma cells, **176**, 1232
Potassium
  high, enhancement of arginine vasopressin-induced cAMP production in renal papillary collecting tubule cells (rat), **177**, 840
Potassium channels
  agonists cromakalim and pinacidil, effects on basilar artery smooth muscle cells, mediation by Ca^{2+}-activated K^+ channels (rat), **181**, 172
  ATP-sensitive
    in coronary artery smooth muscle cells, blockade by angiotensin II (pig), **181**, 700
    pre- and post-synaptic, in substantia nigra, activation by cromakalim (rat), **174**, 909
  glibenclamide-sensitive, role in angiotensin II-hypersensitive contraction and ANF refractoriness of glomeruli in low-sodium rats, **181**, 871
  lymphocyte, RGK5, current inactivation in, role of histidine in channel pore (rat), **179**, 1384
  regulation of prolactin secretion in GH_4C_1 cells by induction of extracellular calcium influx (rat), **180**, 112
Potassium currents
  forskolin and verapamil-sensitive, detection in tracheal epithelial cells (human), **179**, 1155
  in intestinal smooth muscle cells, inhibition by acetylcholine, modulation by β-agonists (rabbit), **179**, 327
Potentiation
  long-term, evoked synaptic potentials and population spike in hippocampal CA1 neurons, effects of adenosine A_2 receptor antagonist CP-66713 (guinea pig), **181**, 1010
Prasterone
  effect on attacks of lactating female intruders by castrated males: implications for brain neurosteroids (mouse), **174**, 892
Pravastatin
  effects on IGF-I-induced Ca^{2+} influx and DNA synthesis in FRTL-5 cells, **177**, 17
  tissue selectivity *in vivo* (rat), **158**, 667; *erratum*, **174**, 1053
Prazosin
  effect on DNA polymerase α in proliferatively activated hepatocytes (rat), **177**, 973
Preadipocytes
  3T3-L1, adipogenic differentiation, inhibition by endothelin-1, **177**, 854
Pregnancy
  role of gastrin releasing peptide-related immunoreactive substance (rat), **180**, 455
Pregnancy-specific β_1-glycoprotein
  type II, cDNA cloning and sequencing (human), **176**, 1532
Pregnenolone
  fatty acid esters, lipoprotein-incorporated, action as substrate for ovarian progestin synthesis (porcine granulosa cells), **179**, 1576
S-Prenylation
  Cys^{12}, effect on conformation of **a**-factor (yeast), **181**, 1125
Prenyl diphosphates
  inhibition of farnesyl transferases (IM-9, Molt-4 cells), **181**, 729
Pressure
  hydrostatic
    effect on interaction of actomyosin subfragment 1 with nucleotides, **180**, 552
    induced damage of yeast cells, protective effects of deuterium oxide, dimethyl sulfoxide, and heat shock, **174**, 1141
Proalbumin
  selective processing, characterization by site-directed mutagenesis (rat), **175**, 690
Probes
  apohorseradish peroxidase-complexed, oxygen quenching: oxygen diffusion near HRP heme binding site, **178**, 104
Procarboxypeptidase A
  pancreatic, activation peptide, key role in bovine procarboxypeptidase A-S6 ternary complex, **181**, 449
Procathepsin E
  autocatalytic processing to cathepsin E: structural comparison of precursor and activated forms (human stomach), **175**, 152
Procoagulants
  HLA-DR as, identification (human ovarian carcinoma), **178**, 467
Procollagen
  type III, predominance over type I procollagen on cell surface of pulmonary fibroblasts (rat), **174**, 1048
Profilin
  primary structure (*Tetrahymena pyriformis*), **175**, 543
Proflavine
  covalently linked *p*-nitrobenzoyl group, photocleavage of DNA, **181**, 1266

Progesterone
  ovarian synthesis
    effect of basic fibroblast growth factor (rat luteal cells), **178**, 393
    lipoprotein-incorporated pregnenolone fatty acid esters as substrate (porcine granulosa cells), **179**, 1576
Progesterone receptors
  non-genomic, on sperm head, cell-surface localization (human), **181**, 331
  presence in mammary tumors, correlation with naltrexone antitumor activity (rat), **175**, 625
Progestin, *see* Progesterone
Prolactin
  and hydrocortisone, effects on epidermal growth factor mRNA content in mammary glands (mouse), **181**, 1063
  interactions with sense and antisense peptides (sheep), **180**, 1312
  secretion in
    GH_4C_1 cells
      effect of platelet-activating factor (rat), **174**, 424
      regulation by potassium channels via induction of extracellular calcium influx (rat), **180**, 112
    pituitary cell culture, inhibition by endothelin-3 (rat), **174**, 338
  stimulation of hypothalamic protein kinase C (rat), **176**, 660
Prolactin receptors
  –chorionic gonadotropin receptor–TSH receptor chimeras, sites of interaction with immunoglobulins from Graves' disease and idiopathic myxedema patients and TSH, comparison, **179**, 70
  ovarian, mRNAs, induction regulation and expression (rat), **181**, 219
Prolidase, *see* Proline dipeptidase
Proline
  conserved positioning in membrane-spanning helices of ion channel proteins, **175**, 733
  enhancement of primary photochemistry in isolated thylakoid membranes by inhibition of photoinhibitory damage (*Brassica juncea*), **181**, 1238
  region in MAP-4 microtubule-binding domain rich in, phosphorylation by *cdc2*/H1 histone kinase, destabilizing effect on microtubules, **179**, 1620
  synthesis in *Desulfovibrio desulfuricans*, role of L-Δ^1-pyrroline-5-carboxylate reductase, **179**, 1088
Proline dipeptidase
  active site, detection of guanidinyl and carboxylate groups (swine kidney), **180**, 401
Prolyl aminopeptidase
  identity with leucyl aminopeptidase: structural and immunological evidence, **178**, 1459
Prolyl 4-hydroxylase
  α subunit, and collagen I α1 and α2 chains, encoding mRNAs in growing tendon fibroblasts, correlation of steady-state levels (chicken embryo), **174**, 169
Promoters
  acid α-glucosidase gene, identification (human), **176**, 1509
  α-1-acid glycoprotein, glucocorticoid regulatory region, binding of nuclear factors (rat), **176**, 1326
  alternative, role in tissue-specific and dexamethasone-inducible expression of bone/liver/kidney/placenta alkaline phosphatase gene (rat), **176**, 1149
  bacteriophage T7, based multicopy vectors, directed gene expression at single copy rates in absence of T7 RNA polymerase, **181**, 1056
  bipartite internal, tRNA gene, binding to transcription factor IIIC, physical effects on intervening DNA (yeast), **176**, 826
  collagen α1(I) and α2(I), coordinately expressed, conservation of binding sites for regulatory factors (mouse), **177**, 538
  episialin gene, sequencing (mouse), **181**, 121
  hsp70, MDBP site, oligonucleotide duplex with, end-filling, inhibition of protein–DNA complex formation, **178**, 927
  insulin-like growth factor I receptor gene, analysis (human), **177**, 1113
  interphotoreceptor retinoid-binding protein, human, retina-specific expression in transgenic mice, conferral by 212 bp of 5′-flanking region, **181**, 159
  lecithin cholesterol acyl transferase gene, functional analysis (human), **180**, 1469
  for liver/bone/kidney-type alkaline phosphatase gene exon 1B, characterization: cell- and tissue-specific expression (mouse), **179**, 1352
  liver-specific proximal, location on aldolase B gene (rat), **176**, 722
  minimal, of glutathione transferase π gene, identification (human), **176**, 233
  α-myosin heavy chain, regulation by thyroid hormone, assessment by *in vivo* DNA transfer (rat heart), **179**, 1269
  normal, role in illegitimate transcription in specific and nonspecific cells, **178**, 553
  oxytocin gene, in bovine and rat, comparative estrogen responsiveness, **175**, 117
  phospho*enol*pyruvate carboxykinase gene, cAMP-responsive elements and NF1-CTF site, interaction with hepatocyte nucleoprotein (rat), **181**, 367
  type II cAMP-dependent protein kinase regulatory subunit RIIβ, molecular cloning and characterization (mouse), **178**, 221
Pro-opiomelanocortin
  and candidate processing enzymes PC2 and PC3, mRNA, coordinate regulation in pituitary intermediate lobe (rat), **179**, 1311
Propeptides
  amino acid sequences, common motif: role as sorting signal at trans-Golgi face, **174**, 586
Prophenoloxidase
  activation in hemolymph, protease inhibitor controlling, purification (*Locusta migratoria*), **179**, 841
Propranolol
  divergent effects on neutrophil superoxide release: role of phosphatidic acid and diacylglycerol (human), **175**, 423
  inhibition of
    pancreatic beta cell replication and insulin secretion,

      mediation by pertussis toxin-sensitive G protein regulating islet cAMP content (rat), **180**, 152
    renal Na$^+$/H$^+$ exchanger (rat), **175**, 311
Prosaposin
  isolation and characterization from milk (human), **181**, 286
  secretion by platelets (human), **176**, 668
Prostacyclin
  production in vascular endothelial cells, stimulation by
    14-amino acid peptide derived from amino terminus of cleaved thrombin receptor (human), **179**, 1656
    neuropeptide Y (pig), **179**, 309
  release from aortic endothelial cells, induction by endothelin-1 (bovine), **177**, 171
Prostacyclin receptors
  differential regulation of ATP- and thrombin-induced [Ca^{2+}]$_i$ increases in mastocytoma cells (mouse), **176**, 102
Prostaglandin D$_2$
  binding protein, solubilization from porcine temporal cortex, **174**, 364; *erratum*, **175**, 1165
Prostaglandin E$_2$
  bradykinin- and thrombin-induced biosynthesis in isolated osteoblasts, effect of haptoglobin (mouse), **178**, 343
  cytokine- and forskolin-induced synthesis in mesangial cells, prevention by dexamethasone (rat), **180**, 46
  interleukin-1-induced synthesis in calvarial bone, potentiation by bradykinin (neonatal mouse), **175**, 775
  mediation of increase in EGF-induced c-*myc* expression in hepatocytes (rat), **178**, 1240
Prostaglandin endoperoxide synthase
  inhibition by anacardic acids, **176**, 775
Prostaglandin E$_2$ receptors
  downregulation in regenerating liver, physiological significance (rat), **176**, 226
Prostaglandin F$_{2\alpha}$
  mediation of increase in EGF-induced c-*myc* expression in hepatocytes (rat), **178**, 1240
  production in corpus luteum, stimulation by basic fibroblast growth factor (rat), **178**, 393
Prostaglandin F$_{2\alpha}$ receptors
  coupled to phospholipase C, detection on astrocytes (rat), **178**, 946
Prostaglandin F synthase
  pulmonary, expression in *Escherichia coli* (bovine), **181**, 272
Prostaglandin I$_2$
  interleukin-1-induced synthesis in calvarial bone, potentiation by bradykinin (neonatal mouse), **175**, 775
Δ^{12}-Prostaglandin J$_2$
  induction of cell cycle arrest at G$_1$ phase, comparison with effects of heat shock (human neuroblastoma cells), **179**, 1662
Prostaglandins
  antagonism of tumor necrosis factor-stimulated fibroblast proliferation (human), **174**, 758
  formation from 17R(18S)epoxyeicosatetraenoic acid in simian seminal vesicles, **178**, 1444
Prostate
  androgen receptor expression, autoregulation: immunohistochemical and *in situ* hybridization analysis (mouse, rat), **177**, 488
Protamine
  enhancement of linear DNA ligation, **174**, 660
Protamine kinase
  cAMP-independent, purification and characterization (*Candida lipolytica*), **175**, 500
  cdc2/H1, microtubule destabilization via phosphorylation of proline-rich region in microtubule-binding domain of MAP-4, **179**, 1620
Proteases, *see* Proteinases
Protease nexin-2
  identification as platelet-specific protein in blood (human), **175**, 15
Proteasome
  and endogenous activator, purification and biochemical properties (human platelets), **178**, 256
  subunit XC3, deduced primary structure and mRNA expression during early development (*Xenopus laevis*), **178**, 1233
Proteinase 3
  neutrophil-associated, inhibition by elafin, **174**, 6
Proteinase B
  role in chitin synthetase 1 function (yeast), **174**, 204
Proteinase inhibitors
  Bowman–Birk, *see* Bowman–Birk inhibitor
  controlling prophenoloxidase activation in hemolymph, purification (*Locusta migratoria*), **179**, 841
  effects on hepatic CMP-sialic acid:lactosylceramide α2-3 sialyltransferase: implications for enzyme purification (rat), **175**, 325
  for HIV proteinase, rapid identification by synthesis and screening of defined peptide mixtures, **181**, 402
  suppression of phorbol ester-enhanced X-ray-induced C3H10T1/2 cell transformation, role of protein kinase C, **176**, 18
Proteinases
  3C, coxsackievirus, incorporation into β-galactosidase: expression of functional β-galactosidase in *Escherichia coli*, **177**, 243
  calcium-activated, from Alzheimer disease brain, cleavage of amyloid β-protein at N-terminus, **174**, 790
  characterization of *Porphyromonas gingivalis* hemagglutinin as, **178**, 336
  cystatin family II domains with inhibitory activities against, identification, **175**, 1070
  Do, requirement for bacterial survival at high temperatures: identity with *htrA* gene product (*Escherichia coli*), **176**, 730
  HIV-1
    bacterial expression as part of autocleaving fusion protein: purification of 99-residue proteinase, **175**, 784
    binding to inhibitors containing isomers of phenylstatine, stereochemistry, **180**, 187
    digestion of phosphorylase kinase and calcium-free calmodulin, **178**, 892
    inhibition by
      L-694,746, **181**, 1456
      non-peptide dicarboxylates, **176**, 241

    potent inhibitors with antiviral activities *in vitro*, **175**, 914
    role in synthesis of proviral DNA, **179**, 17
    substrate analog inhibitors containing phenylnorstatine as transition state element, **180**, 181
  human T-cell leukemia virus type I, expression in *Escherichia coli*, **181**, 1281
  multicatalytic, activation by and binding to sulfated galacto- and lactosylceramides (human erythrocytes), **174**, 1133
  produced by *Bacteroides gingivalis*, inhibition by human salivary histatin, **174**, 625
Protein disulfide isomerase
  expression in hepatic epithelial cells, effect of transforming growth factor β1 (rat), **174**, 478
Protein-glutamine γ-glutamyltransferase
  cDNA cloning and sequencing (human keratinocytes), **175**, 906
  induction by retinoic acid in tracheal 2C5 cells, role of retinoic acid nuclear receptors (rat), **175**, 344
  osteopontin function as substrate (guinea pig liver), **177**, 1205
  tissue, induction by retinoids in NIH-3T3 cells, **175**, 1119
Protein kinase
  5′-AMP-activated, phosphorylation of acetyl-CoA carboxylase, regulatory role: mimicry by ATP-depleting agents, **181**, 1486
  Ca^{2+}/calmodulin, phosphorylation of ovine cardiac phosphofructokinase, **174**, 1255
  cAMP-dependent, *see* Protein kinase A
  cyclic nucleotide-dependent, endogenous activity in plasma membranes from sea urchin sperm, **180**, 1436
  eEF-2-specific Ca^{2+}- and calmodulin-dependent, increased activity during S-phase in Ehrlich ascites cells, **180**, 1372
  hexokinase activity as, characterization (rat brain), **177**, 1101
  phosphorylation of glial fibrillary acidic protein, assay with monoclonal antibody to phosphorylated GFAP, **175**, 1144
  serine/threonine-
    distribution in erythrocytes, effect of intracellular pH changes (human), **178**, 1021
    role in insulin-stimulated phosphorylation of insulin receptor *in vivo* (CHO.T cells), **179**, 962
Protein kinase II
  Ca^{2+}/calmodulin-dependent
    inhibitor KN-93, effect on dopamine content in PC12h cells, **181**, 968
    phosphorylation of vimentin, Ser-82 as unique site, **175**, 955
    potent and preferential inhibition by K252a and derivative KT5926, **181**, 423
    and protein kinase C, phosphorylation by, role in modulation of nitric oxide synthase activity (rat brain), **180**, 1396
    role in tyrosine hydroxylase phosphorylation and activation (PC12h cells), **176**, 1051
Protein kinase IV
  calmodulin-dependent, phosphorylation by cAMP-dependent protein kinase, **180**, 191
Protein kinase A
  activation, role in
    inhibition of osteoblast proliferation by parathyroid hormone-related hormone, **179**, 97
    parathyroid hormone regulation of osteoblast proliferation, **177**, 365
  phosphorylation of
    cAMP response element-binding protein CRE-BP1 (human), **181**, 629
    inositol 1,4,5-trisphosphate receptor at serines 1755 and 1589, **175**, 192
    nitric oxide synthase from porcine and rat cerebellum, **181**, 921
    ovine cardiac phosphofructokinase, **174**, 1255
    *rap*1 protein *in vitro* and in intact fibroblasts: lack of effect on *rap*2 protein, **175**, 430
    serine^{378} in vitronectin, **179**, 655
    smg p21, initiation of *smg* GDS-induced activation of *smg* p21, **177**, 1319
  regulatory subunit RIβ, cDNA cloning and sequencing and tissue distribution (human), **176**, 166
  type II, RIIβ subunit, promoter region, molecular cloning and characterization (mouse), **178**, 221
Protein kinase C
  activation
    in aortic smooth muscle cells, stimulation by endothelin (bovine), **162**, 381; retraction, **180**, 1164
    and calcium mobilization, role in A23187-induced protein-tyrosine phosphorylation in platelets (human), **174**, 922
    inhibition of mitogenic responses in neonatal vascular smooth muscle cells, role of growth-related genes (rat), **181**, 617
    by phosphatidylinositol 4,5-bisphosphate, role in Na$^+$/H$^+$ antiport down-regulation and cell proliferation, **175**, 852
  apoprotein A-1 as cofactor-independent substrate, **179**, 599
  and Ca^{2+}- and calmodulin-dependent protein kinase II, phosphorylation by, role in modulation of nitric oxide synthase activity (rat brain), **180**, 1396
  catalytic fragment, modulation of G protein GTPase activity (human brain), **174**, 593
  in crude tissue extracts, assay with phosphatase-resistant substrate (rat), **180**, 694
  down-regulation in fibroblasts, relationship to phosphorylating activity (mouse), **176**, 1227
  effect of
    fecapentaene-12 (rat brain), **176**, 505
    FK-506-binding protein FKBP (bovine brain), **180**, 846
  inhibition by calphostin C, requirement of light (rat brain), **176**, 288
  inhibitor H-7, differential effects on specific and phorbol ester-induced promiscuous cytolytic activity by T cells (mouse), **179**, 720
  intracellular distribution during mitogenic stimulation with insulin-like growth factor I and bombesin, temporal changes (Swiss 3T3 cells), **177**, 480

isoforms
    α, down-regulation in hepatoma cells, association with inhibition of erythropoietin production by phorbol ester (human), **179**, 1441
    α, β, and ζ, differential translocation in platelets in response to phorbol ester (human), **178**, 878
    α and ϵ, differential recovery after long-term phorbol ester treatment in mesangial cells (rat kidney), **180**, 1422
    β, purified from neutrophil nuclei, activity enhancement by phorbol ester treatment (human), **181**, 348
    activation of NADPH oxidase (murine macrophages), **177**, 1033
macrophage, improved selectivity of RO 31-7549 and RO 31-8220 over staurosporine for, **181**, 396
myristoylated alanine-rich substrate, decreased expression in transformed BALB/c 3T3 cells, **178**, 494
neutrophil, effects of staurosporine and H-7 (human), **178**, 423
overproducing HT29 cells, growth modulation by hexamethylene bisacetamide, **181**, 809
partial mediation of transactivation of 12-*O*-tetradecanoylphorbol-13-acetate responsive element by oncogenic C-*erb*B-2 protein, **178**, 724
phosphorylation of
    basic fibroblast growth factor: identification of cryptic phosphorylation site, **175**, 31
    cAMP response element-binding protein CRE-BP1 (human), **181**, 629
    coagulation factor II, **176**, 1123
proteolytic fragment, *in vitro* phosphorylation of phosphatidylinositol-4-phosphate (rat brain), **176**, 1007
role in
    antigen-induced phospholipase D activation in peritoneal mast cells (rat), **175**, 159
    bradykinin-induced $[Ca^{2+}]_i$ oscillation in polyoma middle T-transformed NIH3T3 cells, **176**, 813
    Ca^{2+}-independent contraction of uterine smooth muscle (rat), **179**, 487
    suppression of phorbol ester-enhanced X-ray-induced C3H10T1/2 cell transformation by protease inhibitors, **176**, 18
stimulation by prolactin (rat hypothalamus), **176**, 660
synergistic activation by arachidonic acid and diacylglycerol *in vitro* and in *Hermissenda* neurons *in vivo* (rat), **179**, 1522
synthetic peptide substrate derived from phosphorylase kinase β-subunit phosphorylation site, characterization (rat brain), **176**, 1454
type II, association with membrane skeleton from isolated nerve growth cones (rat), **178**, 751
Protein kinase C inhibitors
  effects on stress protein synthesis during erythrophagocytosis (human), **180**, 308
Protein kinase FA
  antagonistic activities, selective modulation by heparin and pH, **176**, 145
  cyclic phosphorylation–dephosphorylation of rhodopsin in bovine retina, **178**, 1306
  stimulation by insulin (3T3-L1 cells), **177**, 1019

Protein phosphatase, *see* Phosphoprotein phosphatase
Proteins
  28- and 36-kDa, in brain, recognition by monoclonal antibodies immunoprecipitating ω-conotoxin receptor (bovine, chicken), **181**, 59
  52-kDa, putative component of import machinery for mitochondrial protein-precursor in liver, purification (rat), **180**, 450
  60-kDa, associated with human placental sialidase and cross-reacting with anti-saposin antibodies, characterization, **177**, 1211
  92-kDa, identification in Vinca alkaloid-resistant ovarian cancer cells (human), **180**, 334
  105-kDa, in Raji cells, *in vitro* phosphorylation, enhancement by C3d-derived synthetic peptide (human), **175**, 823
  A2, bacteriophage T5-encoded, amino acid sequence, **177**, 1240
  activation-associated markers, peptide mapping and expression in macrophage cell lines, **176**, 882; *erratum*, **177**, 895
  activin-binding, production by granulosa cells *in vitro* (rat), **176**, 413
  acylation by long-chain fatty acids, stimulation by insulin (rat adipocytes), **177**, 797
  amphiregulin-associated, produced by TPA-treated MCF-7 cells, amino acid sequence, **179**, 572
  amyloid, *see* Amyloid
  amyloidosis-related, 85-kDa, purification from patients on chronic hemodialysis and partial characterization, **176**, 1037
  androgen-binding, 56-kDa, identity with aldehyde dehydrogenase (human genital skin fibroblasts), **175**, 831
  antifreeze, protection of cell and cell membranes from hypothermic damage (ocean pout, sea raven, winter flounder), **180**, 566
  antigenic, specific for *Salmonella typhi*, demonstration, **181**, 301
  ATP-binding heat-inducible, 37-kDa, identification as glyceraldehyde-3-phosphate dehydrogenase (BALB/c 3T3 cells), **176**, 59
  B2, ribonucleotide reductase, mixed valent state of iron cluster (*Escherichia coli*), **176**, 705
  bacteriophage M13 coat, viable transmembrane mutants, preparation by site-directed mutagenesis, **180**, 687
  band 3, isolated cytoplasmic domain, binding of calcium at physiological salt concentration and neutral pH (human), **174**, 975
  bile acid-transporting, 14-kDa, identification as gastrotropin (rat ileum), **177**, 1147
  biotinylated, endogenous, identification in *Dictyostelium discoideum*, **174**, 990
  bone morphogenetic, *see* Bone morphogenetic proteins
  CAAT/enhancer-binding, transactivation of insulin receptor gene (human), **174**, 721
  calcineurin B-related, testis-specific, cDNA cloning (rat), **179**, 1325
  calcium-binding
    cGMP-sensitive, evidence for presence in rod outer segments (bovine retina), **176**, 70

  inhibiting myosin light chain kinase, purification (*Physarum polycephalum*), **176**, 564
  membrane-associated, purification from spermatogenic cells and characterization (rat), **176**, 1358
  60-kDa, similar to mammalian calreticulin, expression in frog brain, **175**, 444
calmodulin-binding, high-molecular-weight, tissue distribution (bovine), **181**, 493
cAMP response element-binding, CRE-BP1, phosphorylation by cAMP-dependent protein kinase and protein kinase C (human), **181**, 629
CAP18, lipopolysaccharide-binding, cDNA sequence (rabbit), **179**, 170
cap32/34, F-actin capping by, requirement of heterodimeric conformation and inhibition by phosphatidyl bisphosphate, **181**, 833
CAS2, homologous to murine *b* locus protein, gene mapping to chromosome 9p22–pter (human), **178**, 227
C4b-binding, α-chain gene organization (human), **174**, 222
CD46, identification of four isoforms with anti-peptide antibodies (human), **180**, 1091
cellular retinoic acid-binding
  transgenic mice with ectopic expression of, production and analyses, **179**, 210
  type 2, mRNA, overexpression in psoriatic skin, demonstration by *in situ* hybridization (human), **180**, 204
c-*erbB*-2-encoded, active, induction of short-term growth of murine FDC-P2 cells after interleukin-3 depletion, **181**, 981
chloride channel, sarcoplasmic reticulum, purification (rabbit muscle), **176**, 38
ClpB gene-encoded, α and β_3, copurification with anaerobic reductase from *Escherichia coli*, **180**, 1222
CLS4/CDC24 gene-encoded, *DBL*-homologous region, role in Ca^{2+}-modulated bud assembly (yeast), **181**, 604
c-*myc*
  antisense mRNA oligomer, growth inhibition of keratinocytes without differentiation induction (human), **174**, 287
  levels in hepatoma cell line, reduction by interferon-α-induced inhibition of putrescine synthesis (human), **178**, 378
cobalamin-binding, synthesis and secretion (opossum kidney cells), **179**, 543
composition of myelin bodies isolated from renal cortex of gentamicin-treated rats, **181**, 894
connective tissue, degradation by pneumococcal serine proteases, **175**, 1023
core
  proteochondroitin, secreted by rat and bovine aortic smooth muscle cells, N-terminal sequence homology with pre-propeptide region of biglycan core protein from human bone, **175**, 706
  proteoglycan, synthesizing cell populations in early limb bud, identification (chicken), **174**, 688
cystine-rich basic, heparin-binding, isolation and partial characterization (bovine platelets), **174**, 70
cytoplasmic and plasma membrane substrates for insulin receptor, reverse-phase chromatography of trypsin digests, **176**, 1402
cytosolic, from cultured rat hepatocytes, binding to 3′ end of phospho*enol*pyruvate carboxykinase mRNA: role in mRNA stabilization, **177**, 1273
DNA-binding
  expression in melanocytes and melanoma cells, relationship to differential genomic susceptibility (mouse), **178**, 1036
  55-kDa nuclear, purification (HeLa cells), **174**, 542
  helix–loop–helix, negative regulator Id, expression in early and confluent osteoblastic $MC3T3E_1$ cell line, effect of dexamethasone (mouse), **180**, 1194
  methylated, site in human *hsp70* promoter, oligonucleotide duplex with, end-filling, inhibition of protein–DNA complex formation, **178**, 927
  sequence-specific, interaction with regulatory regions of histone H3 and H4 genes (wheat), **176**, 1593
  ultraviolet damage-specific, demonstration in xeroderma pigmentosum complementation group E (human), **175**, 1139
–DNA interactions *in vitro*, mapping in 1.7-kbp DNA fragment of α-globin gene domain, **179**, 512
dystrophin-related, localization in fetal and denervated skeletal muscles in normal and *mdx* mice, **180**, 1179
encoded by cloned *ADH6* gene, enzymatic properties (human), **181**, 743
endoplasmic reticulum inactive, highly homologous to phosphatidylinositol-specific phospholipase C-α, covalent binding of halothane metabolite, **178**, 679
endothelin-1-binding, complex with ET-1, detection by low-temperature gel electrophoresis, **176**, 392
epidermal cell differentiation inhibitor, gene cloning and sequencing (*Staphylococcus aureus*), **174**, 459
fiber cell-specific, 94-kDa, defect in lens of inherited microphthalmic mutant *Elo* mouse, **179**, 1175
filament-forming, 49K, citrate synthase activity (*Tetrahymena thermophila*), **174**, 1028
fimbrial subunit
  purification, characterization, and immunolocalization (*Porphyromonas gingivalis*), **175**, 713
  synthetic peptide segments, immunobiological activities (*Porphyromonas gingivalis*), **180**, 1335
FK506-binding
  effect on protein kinase C (bovine brain), **180**, 846
  sequence comparison with ryanodine receptor (rabbit muscle), **178**, 1288
  stabilization by ligand binding, **179**, 741
four-disulfide core family, identification of *WDNM1* gene product as member, **176**, 247
Fra-2, phosphorylation in chicken embryo fibroblasts, stimulation by serum, **174**, 934

G, *see* G proteins
β-galactoside-binding
  overexpressed during glucocorticoid-induced cell death, cDNA clone, isolation (CEM C7 cells), **178**, 746
  overexpression, association with fibroblast transformation (mouse), **179**, 272

GDP/GTP exchange, stoichiometric interaction with *smg* p21, regulation of *smg* p21 translocation between membrane and cytoplasm, **174**, 1095
GDS, *see* GDP dissociation stimulator
glial fibrillary acidic, phosphorylation by protein kinase, assay with monoclonal antibody to phosphorylated GFAP, **175**, 1144
glucose-transporting, *see* Glucose transporters
GM$_2$ activator, cDNA isolation, sequencing, and expression (human), **177**, 1217
GMP-140/PADGEM, mediated platelet adhesion to leukocytes, enhancement by interleukin-1β and interferon-γ (human), **179**, 756
green heme-binding, and flavin reductase, evidence for identical protein components (bovine erythrocytes), **178**, 315
growth hormone-binding, mRNA, identification in liver (rat), **180**, 489
GTPase-activating
  toward *ras* p21, neurofibromatosis type 1 gene product identification as, **177**, 83
  related domain, neurofibromatosis type 1 mRNA with 63-base insert in region coding for, expression by brain tumors (human), **181**, 955
GTP-binding, *see* G proteins
GTPγS-dependent factor, activation of phospholipase D (human granulocytes), **175**, 236
H-, *see* H-protein
heat shock, *see* Heat shock proteins
HeLa nuclear, binding to regulatory element -1430/-1327 of human proliferating cell nucleolar protein P120 gene, purification, **180**, 805
heme, formation of higher valence states, coupling of dihydroriboflavin oxidation to, **181**, 197
hemorrhagic, putative, and rhodostomin, common precursor, cDNA cloning and sequence analysis (snake venom), **181**, 585
heparin-binding
  19-kDa, regulation by retinoic acid (chicken embryo), **174**, 708
  retinoic acid-induced, cDNA cloning and sequencing (chicken), **175**, 617
hepatic microsomal, autoimmune antibodies, occurrence with fulminant hepatitis (LEC rat), **179**, 1134
high-mobility-group 14, enhancement of linear DNA ligation, inhibition by HMG 14 phosphorylation at Ser 20, **174**, 660
HIV-1 72-amino acid nucleocapsid protein NCp7, large-scale chemical synthesis in active form, **180**, 1010
hnRNP, group A/B, nucleic acid binding characteristics (human, mouse), **176**, 747
hsp70-binding, isolation from muscle, method (bovine), **178**, 1
hst-1, with transforming growth factor activity, structural analysis, **174**, 404
hyaluronate-binding, autophosphorylation *in vitro* and enhanced phosphorylation in rat histiocytoma, **177**, 1291
hydrogen carrier, *see* H-protein
induction kinetics in exponentially growing organisms (*Escherichia coli*), **180**, 913
insulin-like growth factor-binding
  bone-derived, role in IGF-II fixing in bone (human), **176**, 756
  cDNA cloning and sequencing (human osteosarcoma), **176**, 219
  IDF45/mIGFBP-3, binding sites on chick embryo fibroblasts (mouse), **179**, 495
  IGFBP-1, demonstration of cell growth inhibitory activity, **174**, 673
  IGFBP-2, gene structure and chromosomal localization (human), **176**, 1250
  IGFBP-3
    cDNA cloning and sequencing (bovine), **177**, 1025
    intact truncated, inhibition of IGF I-induced stimulation of osteoblasts (human, rat), **179**, 579
    recombinant expressed in CHO cells, purification and characterization (human), **178**, 625
  purification from U-2 osteosarcoma cells, **176**, 213; *erratum*, **177**, 895
interphotoreceptor retinoid-binding, retina-specific expression from promoter in transgenic mice, conferral by 212 bp of 5′-flanking region, **181**, 159
ion channel, membrane-spanning helices, conserved positioning of proline residues, **175**, 733
iron-binding, identified in liver, purification and characterization (rat), **181**, 409
Jun-B, expression in primary B cells mediated by surface immunoglobulin receptor (mouse), **175**, 77
liver fatty acid-binding, *in situ* binding of fatty acids, analysis with 3-[^{125}I]iodo-4-azido-N-hexadecylsalicylamide (human, rat), **180**, 407
lysophosphatidic acid-binding, cytosolic, stimulation of mitochondrial glycerophosphate acyltransferase (rat liver), **175**, 339
mammalian spermatid-specific, TP2, identification as zinc metalloprotein with two finger motifs (rat), **179**, 1491
mannose 6-phosphate-containing, sorting in NIH-3T3 cells, effect of insulin-like growth factor II overexpression (mouse), **179**, 108
megakaryocyte differentiation-inducing, purification from fibrous histiocytoma cell line: N-terminal sequence homology with activin A (human), **174**, 1163
melatonin-binding, affinity labeling (hamster brain), **178**, 1147
membrane-associated maternal, xlcaax-1, cDNA identification (*Xenopus laevis*), **179**, 1635
MetR, binding site on *met*H gene, identification (*Escherichia coli*), **175**, 1057
microtubule-associated, MAP-4, microtubule-binding domain, phosphorylation by *cdc2*/H1 histone kinase, destabilizing effect on microtubules, **179**, 1620
mitochondrial, precursors, import machinery for, purification of putative 52-kDa component (rat liver), **180**, 450
myelin basic, *see* Myelin basic protein
Na$^+$/H$^+$ antiporter, IGF-I-induced activation, relationship to intracellular Ca^{2+} mobilization (porcine thyroid cells), **177**, 113
Na$^+$/H$^+$ exchanger
  carrier density and turnover rate in platelets, estimation

with 5-(*N*-methyl-*N*-$[^3H]$isobutyl)amiloride (human), **176**, 639
renal, inhibition by β-adrenergic antagonists (rat), **175**, 311
nef, HIV-1, and human thyrotropin receptor, nucleotide and amino acid homology, **181**, 498
neuroendocrine 7B2, two encoding mRNAs differing by one codon, production by alternate splicing (human), **174**, 156
neu, specific activating factor, isolation from ATL-2 cell conditioned medium and characterization (human), **179**, 1536
N-glycosylated, presence in cell nuclei (bovine, chicken, pig), **178**, 1365
nonstructural NS1 from bluetongue virus serotype 17, full-length expression in *Escherichia coli*, **180**, 994
nuclear, *see* Nucleoproteins
nuclear factors binding AP-1, AP-2, AP-3, and NF-I/CTF enhancer elements, differential expression in various lung cancer cell types (human), **180**, 1064
oncogenic C-*erb*B-2, transactivation of 12-*O*-tetradecanoylphorbol-13-acetate responsive element, partial mediation by protein kinase C, **178**, 724
osteogenic, OP-1, mRNA expression: high levels in kidney (mouse), **179**, 116
P2, of peripheral myelin, cDNA isolation and sequencing (human), **181**, 204
24p3, identification as member of lipocalins, **180**, 69
p11, and annexin II, increases in PC12 cells correlated with differentiation, **177**, 1188
p21, *ras*-encoded, induction of *Xenopus* oocyte maturation, inhibition by peptide from p21 GAP-binding domain and by azatyrosine, **181**, 1378
p27rex, HTLV-I, stabilization of interleukin-2 receptor α-subunit mRNA: role of *p27rex* nucleolar localization signal, **175**, 98
p33 ADP-ribose acceptor, localization in polymorphonuclear cell granules in hepatic interlobular connective tissue (chicken), **180**, 64
p68, host-encoded, tobacco mosaic virus-induced phosphorylation, temporal regulation (*Nicotiana tabacum*), **179**, 229
p72^{syk}, protein-tyrosine kinase activity, stimulation by wheat germ agglutinin (porcine splenocytes), **180**, 1325
p80 region of bovine viral diarrhea virus, expression as recombinant protein and identification of specific antibodies in bovine sera, **178**, 1326
parathyroid hormone-related
induced hypercalcemia, blockage by interleukin-4 *in vivo* (mouse), **178**, 694
inhibition of osteoblast proliferation, role of cAMP-dependent protein kinase activation, **179**, 97
peripheral myelin structural, P0, isolation and sequencing of encoding cDNA (human fetus), **180**, 515
phosphorylated, 60-kDa, purification and characterization (fetal human bone), **174**, 439
phosphorylation in yeast mitochondria: inorganic pyrophosphate as phosphate donor, **178**, 1359
pp70, phosphorylation in extract of young rice panicle, characterization, **175**, 467
pp140$^{c\text{-}trk}$, nerve growth factor binding to, stimulation of association with *src* homology domain of phospholipase C γ1, **179**, 217
precursors with paired basic amino acids, sequence requirements for proteolytic cleavage (COS cells), **179**, 1181
prostaglandin D_2-binding, solubilization from porcine temporal cortex, **174**, 364; *erratum*, **175**, 1165
prostatic secretory, and immunoglobulin binding factor, structural identity (human seminal plasma), **180**, 356
rap-1, phosphorylation by protein kinase A *in vitro* and in intact fibroblasts: lack of kinase effect on *rap*2 protein, **175**, 430
rap-1B, inhibition of *ras*-induced germinal vesicle breakdown in *Xenopus* oocytes, **174**, 1
RAS family, evolutionary grouping, **176**, 1130
ras, induced germinal vesicle breakdown in *Xenopus* oocytes, inhibition by *rap*-1B protein, **174**, 1
ras p21, related rat hepatic G protein, cDNA cloning and characterization, **177**, 1224
resembling G protein α subunits, identification in muscle (locust), **180**, 1075
retinoid-binding, low-molecular-weight, purification from chick embryo skin, **175**, 1064
Rev, HIV-1, functional conversion to HTLV-1 Rex by mutation, **178**, 1226
rho, GDP dissociation inhibitor for, tissue and subcellular distributions (rat), **175**, 199
*rho*A p21, geranylgeranyltransferase for, partial purification and characterization (bovine brain), **175**, 720
rhodostomin, and putative hemorrhagic protein, common precursor, cDNA cloning and sequence analysis (snake venom), **181**, 585
ribosomal
acidic, association on ribosomes, role of bilateral hydrophobic zipper structure (yeast), **174**, 1318
L17, primary structure (rat), **178**, 322
L23, primary structure (rat), **178**, 1153
L38, primary structure (rat), **175**, 551
S18, primary structure (rat), **178**, 1212
S28, primary structure (rat), **179**, 314
rough endoplasmic reticulum, cAMP-dependent phosphorylation, effect on GTP-dependent membrane fusion (rat liver), **179**, 463
S-100, α- and β-subunit genes, structure and chromosomal assignment (human), **175**, 185; *erratum*, **177**, 894
SecA, purification and structural characterization (*Escherichia coli*), **174**, 211
seminal fluid, bioactive, characterization (bovine), **179**, 1006
separation and purification in dimethyl sulfoxide, **176**, 1462
serum amyloid, *see* Serum amyloid
SH2-containing, highly conserved 8-amino acid sequence, role in recognition of phosphotyrosine site, **180**, 1490
sigma subunit of DNA-directed RNA polymerase, footprint reexamination (*Escherichia coli*), **177**, 140

smg p21
  phosphorylation by protein kinase A, initiation of *smg* GDS-induced activation of *smg* p21, **177**, 1319
  stoichiometric interaction with GDP/GTP exchange protein, regulation of *smg* p21 translocation between membrane and cytoplasm, **174**, 1095
smg p25A, GDP dissociation inhibitor for, tissue and subcellular distribution, antibody-based study (rat), **174**, 556
SP1, amino acid substitutions in zinc finger domain, alteration of binding to SP1 cognate target site (human), **175**, 333
Ssc, primary structure and expression (*Salmonella typhimurium*), **173**, 53; *erratum*, **174**, 1054
streptavidin-containing chimeric, construction of expression vectors for, **176**, 571
stress, synthesis during erythrophagocytosis, effects of flavonoids and protein kinase C inhibitors (human), **180**, 308
thermostability, augmentation by cycloheximide (CHO cells), **177**, 575
thioredoxin-related, associated with plasma membranes, identification, **175**, 123
thyroid hormone-binding, cytosolic, identification of monomeric rat pyruvate kinase subtype M_1 as, **179**, 668
trans-acting, LF-B1, role in expression of liver-type pyruvate kinase in insulinoma cells (rat), **181**, 259
transcortin-binding, isolation from syncytiotrophoblast membranes and properties (human), **177**, 834
trifluoroacetylated adducts, partial processing in Kupffer cells of halothane-treated rats, **175**, 256
3,5,3′-triiodo-L-thyronine-binding
  cytosolic, purification and characterization (rat kidney), **174**, 1084
  NADPH-dependent cytosolic, *in vivo* and *in vitro* levels, effects of active vitamin D_3 (rat), **177**, 388
uncoupling, purified/reconstituted mitochondrial, differential interaction with fatty acids and fatty acyl CoA esters (hamster brown adipose tissue), **175**, 1104
venom, biosynthesis and subsequent processing in homologous and heterologous systems (wasp), **178**, 213
X, hepatitis B virus, full-length and truncated versions, transactivation of c-*myc* proto-oncogene, **176**, 985
xeroderma pigmentosum group A complementing, human, cloning and sequencing of homologs from chicken, frog, and fruit fly, **181**, 1231
yeast, reactivity with antibodies to mammalian apolipoproteins, **174**, 631
zinc finger
  antibody to, identification in patient with paraneoplastic cerebellar degeneration, **178**, 198
  GAL4, spectroscopic studies of DNA-binding site (yeast), **175**, 492
  SP1, interactions with DNA, modulation by transition metals, **176**, 551
Protein synthesis
  inhibition, superinduction of 2,3,7,8-tetrachlorodibenzo-*p*-dioxin-inducible aldehyde dehydrogenase expression (rat hepatoma cells), **180**, 953
  initiation in perfused liver, impairment by inhibition of microsomal calcium sequestration (rat), **177**, 1082
  in vitro, effects of polyamine analogs on extent and fidelity, **176**, 1383
  in lymphoma cells, effects of L-phenylalanine mustard (human), **176**, 717
  myocardial, endothelin-1-induced, inhibition by antisense oligonucleotide against early growth response gene-1 (rat), **181**, 22
  peptide chain initiation in reticulocyte lysates, inhibition associated with initiation factor 2 phosphorylation at serine-51 (rabbit), **176**, 993
Protein-tyrosine kinase
  distribution in erythrocytes, effect of intracellular pH changes (human), **178**, 1021
  in erythropoietin- and interleukin-3-induced signal and differentiation signals, comparison (mouse), **181**, 1103
  hck, cDNA, identification from megakaryocytes (rat), **181**, 1137
  induction in platelets
    by ionophore A23187, analysis (human), **174**, 922
    by wheat germ agglutinin (human), **174**, 1154
  insulin receptor-associated
    autophosphorylation and activation, inhibition by pertussis toxin, **181**, 1479
    cytoplasmic and plasma membrane substrates, reverse-phase chromatography of trypsin digests, **176**, 1402
    phosphorylation of tyrosines 1158, 1162, and 1163 on synthetic dodecapeptide, **174**, 772
  neutrophil, soluble and membrane-bound, inhibition by staurosporine (human), **178**, 423
  $p56^{lck}$
    expressed in lymphocytes, styryl-based inhibitors, analysis (human), **180**, 1048
    thymic, phosphorylation of cerebral myelin basic protein at Tyr^{67} (bovine), **178**, 1393
  $p72^{syk}$, stimulation by wheat germ agglutinin (porcine splenocytes), **180**, 1325
  $pp60^{c\text{-}src}$, phosphorylation, stimulation by vasoactive intestinal peptide receptor-mediated signal transduction (chicken embryo), **174**, 452
  role in phosphatidylinositol turnover and functional responses in FcεR1 signalling pathway (RBL-2H3 cells), **179**, 551
Protein-tyrosine kinase receptors
  human, gene overexpression in murine C127 cells: characterization of encoded products, **177**, 90
Protein-tyrosine phosphatase
  homologs in skeletal muscle, identification by amplification of conserved cDNA sequences (rat), **178**, 1291
  identification as 180-kDa plasma membrane insulin receptor substrate and elevated levels in diabetic plasma membranes (human placenta, rat liver), **180**, 463
Protein Z
  interaction with thrombin, species differences (bovine, human), **178**, 801
Proteochondroitin
  core protein secreted by rat and bovine aortic smooth mus-

cle cells, N-terminal sequence homology with prepropeptide region of biglycan core protein from human bone, **175**, 706

Proteoglycanase
  calmodulin-dependent, activity in chondrocytes from osteoarthritic cartilage (human), **174**, 1204

Proteoglycans
  core protein, synthesizing cell populations in early limb bud, identification (chicken), **174**, 688
  free chains, expression in keratinocytes, endothelium, and mesenchymal cells (bovine, chicken, human, mouse), **179**, 1281
  gene expression, changes during matrix-induced bone formation (rat), **177**, 427
  granule, processing, uncoupling from mast cell degranulation (dog), **179**, 140

Proteolysis
  brain natriuretic peptide by neutral endopeptidase, species-specific sites (human, pig, rat), **175**, 22
  carnitine palmitoyltransferase by nagarse and trypsin, inhibition by malonyl-CoA, **178**, 600
  insulin-like growth factor-binding protein-3-specific, role in control of IGF signalling to bone cells, **179**, 579
  nucleolin from 3T3-F442A cells, effect of phosphorylation, **180**, 716
  post-translational, streptokinase C-terminal residues, role of leader sequence, **174**, 282
  precursors with paired basic amino acids, sequence requirements (COS cells), **179**, 1181
  stimulated by ATP and ATP + ubiquitin, analysis in liver and Yoshida ascites hepatoma (rat), **179**, 1400
  thrombin-mediated, hirulog peptides with scissile bond replacements resistant to, characterization, **177**, 1049
  tissue plasminogen activator: activity of pro-tPA derivative (human), **179**, 1289

Prothrombin
  phosphorylation by protein kinase C, **176**, 1123

Protons
  exchangeable, of pyridoxal phosphate-dependent enzymes, ^{1}H NMR spectra, **178**, 385

Proton transport
  active, vanadate-inhibitable, physiological role: model for distal urinary acidification (turtle bladder epithelium), **180**, 1505

Protoplasts
  tobacco mosaic virus-induced phosphorylation of host-encoded protein, temporal regulation (*Nicotiana tabacum*), **179**, 229

Protoporphyria
  erythropoietic, associated ferrochelatase gene, identification of two point mutations (human), **181**, 594

Protoxin
  toxic moiety, conformational change upon activation (*Bacillus thuringiensis*), **179**, 933

Pseudogenes
  dopamine D5, transcription (human brain), **181**, 16
  α1→3 galactosyltransferase, sequence homologous to, identification in human genomic DNA, **175**, 986

Pseudomonas aeruginosa
  ofloxacin resistance in mutants, association with elevated drug extrusion across inner membrane, **178**, 1043

PSK
  enhancement of lymphokine-activated killer cell cytotoxicity against human retinoblastoma cells *in vitro*, **174**, 107

Psoriasis
  affected skin, overexpression of cellular retinoic acid-binding protein type 2 mRNA, demonstration by *in situ* hybridization (human), **180**, 204

Pteridine
  synthesis regulation in natural killer-like cell line YT, **176**, 1430

PTH, *see* Parathyroid hormone

Pump-probe techniques
  in analysis of energy transfer kinetics of C-phycocyanin from *Westiellopsis prolifica*, **179**, 558

Purine-nucleoside phosphorylase
  inhibitor CI-972, inhibition of human MOLT-4 lymphoblasts, **178**, 1351

Purines
  in DNA and RNA, absolute electron affinities, determination from reversible reduction potentials, **180**, 841

Puromycin
  induced nephropathy, effects of YM264 (rat), **176**, 781
  inhibition of protein synthesis, superinduction of TCDD-inducible aldehyde dehydrogenase expression (rat hepatoma cells), **180**, 953

Putrescine
  synthesis, inhibition by interferon-α, effects on c-*myc* protein levels and DNA synthesis in hepatoma cell line (human), **178**, 378

Pyridinium
  potentially neurotoxic metabolite, identification in urine of schizophrenic patients treated with haloperidol, **181**, 573

Pyridoxal 5′-diphospho-5′-adenosine
  affinity labeling of NADPH oxidase: inactivation of enzyme (human neutrophils), **181**, 1259

Pyrimidines
  in DNA and RNA, absolute electron affinities, determination from reversible reduction potentials, **180**, 841

Pyroglutamate
  identification as heavy chain N-terminal residue of native and recombinant hepatocyte growth factor (human), **175**, 660

Pyrophosphate
  inorganic, *see* Inorganic pyrophosphate

L-Δ^1-Pyrroline-5-carboxylate reductase
  role in synthesis of proline in *Desulfovibrio desulfuricans*, **179**, 1088

Pyruvate
  inhibition of pyruvate dehydrogenase complex, characterization (*Escherichia coli*), **176**, 517

Pyruvate carboxylase
  genes encoding two isozymes, identification (yeast), **176**, 1210
  hepatic, activity in tumor-bearing rats, ^{13}C NMR study, **179**, 366

- Pyruvate dehydrogenase complex
  - inhibition by pyruvate, characterization (*Escherichia coli*), **176**, 517
- Pyruvate kinase
  - L-type
    - expression in insulinoma cells: role of *trans*-acting protein LF-B1 (rat), **181**, 259
    - gene expression in hepatoma cells and liver, relationship to LF-B1 gene expression, **176**, 1074
  - M_1-type, monomeric, purification and analysis of thyroid hormone-binding and kinase activity (rat), **179**, 668
- 6-Pyruvoyl tetrahydropterin
  - stereostructure and quantum chemical properties, computer studies, **176**, 52

Q

- Quinacrine
  - suppression of lysophosphatidylserine-dependent degranulation of peritoneal mast cells (rat), **181**, 714
- Quinones
  - role in electron transport in filarial parasite *Setaria digitata*, **174**, 386
- Quinuclidines
  - antagonistic toward substance P, selectivity and specificity, **176**, 894

R

- Radiation
  - electromagnetic, extremely low frequency, electric and magnetic field components, effects on transcription (HL-60 cells), **174**, 742
  - gamma, effect on N^3-methyladenine-DNA-glycosylase and O^6-methylguanine-DNA-methyltransferase RNA transcripts in hepatoma cells (rat), **176**, 1086
  - X, induced transformation in C3H10T1/2 cells, phorbol ester enhancement, suppression by protease inhibitors: role of protein kinase C, **176**, 18
- Radiochemical assay
  - mevalonate-5-diphosphate decarboxylase, modification (rat liver), **181**, 1449
- Radioimmunoassay
  - glycine-extended biosynthetic intermediate form of vasoactive intestinal polypeptide precursor (rat), **178**, 173
- Ranitidine
  - effects on melanogenesis and proliferation in cultured melanoma cells (human, mouse), **177**, 545
- RC-160
  - effect on (Ca,Mg)ATPase in anterior pituitary (rat), **178**, 1492
- RDC4 receptors
  - orphan, cDNA, encoding of 5-HT_{1D} serotonin receptor, **180**, 1460
- Recombination
  - homologous, in bovine papillomavirus shuttle vector: effect of relative orientation of substrate sequences, **174**, 305
  - illegitimate, in bovine papillomavirus shuttle vector: high level of site specificity, **179**, 251
  - V(D)J
    - associated RAG-2 gene, expression in central nervous system tumor cell lines (mouse), **181**, 151
    - reported thymic nuclear matrix activity supporting, analysis (fetal calf), **181**, 95
- Reconstitution
  - functional, $GABA_A$ receptor purified from brain (bovine), **179**, 1259
- Reduction
  - polyphasic, oxygen to water by purified cytochrome-*c* oxidase, **176**, 150
  - post-translational, cytochrome P450IIE by substrate CCl_4, **179**, 449
- Reduction potentials
  - reversible, in determination of absolute electron affinities of purines and pyrimidines in DNA and RNA, **180**, 841
- Regeneration
  - liver after partial hepatectomy
    - associated hepatocyte growth factor mRNA expression (rat), **177**, 559
    - associated prostaglandin E_2 receptor down-regulation, physiological significance (rat), **176**, 226
    - role of hepatocyte growth factor (rat), **177**, 330
- Regulatory signals
  - for bacteriophage T4 genes, chimeric phage for estimation, construction method, **179**, 620; *erratum*, **180**, 462
- Relaxing factor
  - L-arginine-derived, production in aortic smooth muscle cells, induction by interleukin-1β (rat), **176**, 114
- Renin
  - mRNA, extra-renal, assay by polymerase chain reaction (rat), **179**, 25
- Reoxygenation
  - –anoxia injury to cardiac myocytes, protection by acidotic pH (neonatal rat), **179**, 798
- Reperfusion
  - –ischemia, in isolated perfused liver, associated oxygen radical production, monitoring by luminol-enhanced chemiluminescence (rat), **174**, 217
- Replication
  - in chicken erythroblast cells, correlation with specific protein binding sites in 1.7-kbp DNA fragment of α-globin gene domain, **179**, 512
  - HIV-1 in lymphoid cell cultures, effect of TCDD, **179**, 46
- Resistance
  - methicillin, encoding gene, Southern hybridization analysis of deletion (*Staphylococcus aureus*), **176**, 1319
  - monensin and nigericin, increase in fibroblasts after viral transformation (mouse, rat), **174**, 483
  - multidrug
    - conferring P-glycoprotein, independence from genistein inhibition of breast cancer cell growth (human), **179**, 661

    - in cultured cells, relationship to growth state-dependent cytotoxicity of *N*-dodecylimidazole, **176**, 1377
  - ofloxacin, in *Pseudomonas aeruginosa* mutants, association with elevated drug extrusion across inner membrane, **178**, 1043
  - phleomycin, conferral by *ble* gene of *Streptoalloteichus hindustanus*: selectable marker for *Dictyostelium discoideum*, **180**, 1403
  - thyroid hormone, generalized, induction by single base mutation in hormone binding domain of thyroid hormone receptor β gene (human), **178**, 606
  - viral, chemical induction in preimplantation bovine embryos, **175**, 10

Resorption
  - bone, *see* Bone resorption

Respiration
  - mitochondrial, effect of amylrhodamine (rat liver), **175**, 1010

Respiratory enzyme deficiency
  - fatal infantile, induction by point mutation in mitochondrial tRNA^{thr} gene (human), **176**, 1112

Respiratory system
  - airways
    - endothelin-1-induced contractions *in vitro*, role of Na$^+$/H$^+$ exchange (guinea pig), **175**, 583
    - mucin gene expression following infection and irradiation (rat), **181**, 1

Restriction endonucleases
  - in analysis of mitochondrial DNA in colorectal tumors (human), **180**, 85

Restriction fragment length polymorphisms
  - insulin receptor and insulin genes, analysis for co-segregation with essential hypertension (human), **181**, 486

Restriction map
  - arylamine *N*-acetyltransferase genes (human liver), **177**, 1252
  - cytochrome P450 steroid hydroxylase gene (*Rhizopus nigricans*), **178**, 1078

Reticulocytes
  - cDNA library, detection of cell adhesion molecule CD44 (human), **178**, 1127
  - and liver, cytochrome b_5 mRNAs, isolation from single gene (human), **178**, 38

Retina
  - isolated rod outer segments, Ca^{2+} release: evidence for cGMP-sensitive Ca^{2+}-binding protein (bovine), **176**, 70
  - nitric oxide synthesis (bovine), **180**, 920
  - rhodopsin, cyclic phosphorylation–dephosphorylation by protein kinase FA (bovine), **178**, 1306
  - specific expression, from interphotoreceptor retinoid-binding protein promoter in transgenic mice, conferral by 212 bp of 5′-flanking region, **181**, 159
  - spreading depression, demonstration of associated heat production (bullfrog, toad), **174**, 293

Retinal
  - isomerization at 13-ene, essential role in *Chlamydomonas reinhardtii* photobehavioral responses, **178**, 1273

Retinoic acid
  - all-*trans*- and *cis*-forms, differential effects on nuclear retinoic acid receptor mRNA levels in lung and liver (rat), **180**, 1137
  - altered growth response in NRK cells expressing human c-*fos* gene, **181**, 1273
  - binding protein, cellular, type 2, overexpression of mRNA in psoriatic skin, demonstration by *in situ* hybridization (human), **180**, 204
  - effect on histamine H_2 receptors on gastric carcinoma cells (human), **176**, 1027
  - induced heparin-binding protein, cDNA cloning and sequencing (chicken), **175**, 617
  - induction of
    - HL-60 cell differentiation, enhancement by barbiturates (human), **178**, 263
    - tissue transglutaminase in tracheal 2C5 cells, role of retinoic acid nuclear receptors (rat), **175**, 344
  - reduction of thyroid hormone receptor expression in pituitary GH1 cells (rat), **181**, 9
  - regulation of 19-kDa heparin-binding protein from chicken embryo, **174**, 708

Retinoic acid receptors
  - fluorescent and photoaffinity labeling probes for, **179**, 259
  - nuclear
    - expression in adipose tissue (rat), **176**, 1539
    - fluorescent probes: molecular measures for ligand binding pocket (HeLa cells), **180**, 249
    - mRNA levels in lung and liver, differential effects of all-*trans*-retinoic acid and *cis*-retinoic acid (rat), **180**, 1137
    - role in transglutaminase induction by retinoic acid in tracheal 2C5 cells (rat), **175**, 344
  - subtype-specific ligands, 6′-substituted naphthalene-2-carboxylic acid analog, characterization, **179**, 1554
  - transcripts in umbilical vein endothelial cells, characterization (human), **179**, 32

Retinoids
  - binding protein, low-molecular-weight, purification from chick embryo skin, **175**, 1064
  - induction of tissue transglutaminase in NIH-3T3 cells, **175**, 1119

Retinopathy
  - in diabetes mellitus patients, role of vitamin B$_6$ deficiency, **179**, 615

Retinoylation
  - cytokeratins in normal epidermal keratinocytes, analysis (human), **180**, 393

Retroviruses
  - mediated CFTR gene transfer to pancreatic adenocarcinoma cells from cystic fibrosis patient, reduction of intracellular pH (human), **180**, 342

Reverse transcriptase, *see* RNA-directed DNA polymerase

RFLP, *see* Restriction fragment length polymorphisms

RH 5849
  - effects on ecdysone 20-monooxygenase (*Manduca sexta*), **176**, 522

Rhizoxin
  - derivatization for fluorescent and photoaffinity labeling of tubulin, **178**, 558

Rhodanese, *see* Thiosulfate transferase
Rhodopsin
  cDNA, isolation and characterization (lamprey), **174**, 1125
  cyclic phosphorylation–dephosphorylation in bovine retina by protein kinase FA, **178**, 1306
  MI–MII equilibrium, role of phosphatidylserine (bovine), **176**, 915
Ribavirin
  potentiation of 2′,3′-dideoxyinosine inhibition of HIV replication in peripheral blood lymphocytes, **178**, 563
1-β-D-Ribofuranosyl-1,2,4-triazole-3-carboxamide, *see* Ribavirin
Ribonuclease 65
  spermidine-dependent, activity in FM3A cell extracts, requirement of tRNA lacking 3′ terminus, **178**, 1247
Ribonuclease L
  binding and activation by 2′,5′-oligoadenylates, effect of purine 8-substitution, **176**, 769
Ribonucleases
  guanylic, specificity for polynucleotide substrates, **177**, 630
Ribonucleotide reductase
  anaerobic, copurification with ClpB proteins (*Escherichia coli*), **180**, 1222
  B2 protein, mixed valent state of iron cluster (*Escherichia coli*), **176**, 705
  in TA3 mammary tumor cells, inactivation by nitric oxide, **179**, 442
Ribophorin II
  cDNA cloning and sequencing and gene chromosomal localization (rat), **176**, 1482
Ribose
  –ADP moiety, acceptor protein p33, localization in polymorphonuclear cell granules in hepatic interlobular connective tissue (chicken), **180**, 64
Ribosomes
  acidic ribosomal protein association on, role of bilateral hydrophobic zipper structure (yeast), **174**, 1318
  internal binding site of parathyroid hormone analog (8–84), direction of hormone expression in *Escherichia coli*, **181**, 481
  L23 protein, primary structure (rat), **178**, 1153
  S18 protein, primary structure (rat), **178**, 1212
  S28 protein, primary structure (rat), **179**, 314
RNA
  AACCUU hexamers, 3′–5′ and 2′–5′, base stacking in, role of internucleotide phosphate linkage, **180**, 1251
  antisense, inhibition of pre-mRNA splicing *in vitro*, effect of RNA containing sequences complementary to
    exons, **179**, 1593
    introns, **179**, 1600
  B2-containing, modulation during induced differentiation of erythroleukemia cells (mouse), **175**, 91
  detection in formalin-fixed paraffin-embedded tissues by PCR amplification (human), **174**, 176
  heterogeneous nuclear, associated proteins, group A/B, nucleic acid binding characteristics (human, mouse), **176**, 747
  induction kinetics in exponentially growing organisms (*Escherichia coli*), **180**, 913
  messenger
    acidic fibroblast growth factor, amplification and sequencing (porcine heart), **180**, 853
    activin receptors, expression during early embryogenesis and effect of expression level on body axis formation (*Xenopus laevis*), **181**, 684
    albumin, estrogen-regulated destabilization, role of translation (*Xenopus laevis*), **174**, 825
    2B7, cloning and characterization: distinction of smooth muscle cell phenotypes *in vitro* and homology with osteopontin mRNA (rat), **177**, 867
    brain-specific nuclear protein expressed in neurally differentiated embryonal carcinoma cells, sequencing (mouse), **178**, 291
    calcineurin catalytic subunit, molecules encoding two isoforms, differential distribution in brain (rat), **174**, 393
    calcitonin/calcitonin gene-related peptide I, precursor, alternative processing, deregulation by point mutation, **178**, 985
    c-*fos* and c-*jun*, hepatic levels, increase associated with aging (rat), **178**, 1485
    c-kit ligand, expression in Sertoli cells (mouse), **176**, 910
    class I MHC H-2K^k, increased production in neurons in trisomy 16 fetuses, relationship to neural dysgenesis (mouse), **179**, 102
    c-myc
      antisense oligomer, growth inhibition of keratinocytes without differentiation induction (human), **174**, 287
      expression in adipose tissue, muscle, and liver, effect of dietary manipulation (chicken), **180**, 1
    collagen I α1 and α2 chains and prolyl 4-hydroxylase α-subunit, correlation of steady-state levels in growing tendon fibroblasts (chicken embryo), **174**, 169
    αB-crystallin
      increment in brain of patient with infantile-type Alexander's disease, **179**, 1030
      levels in skeletal muscle, effects of mechanical tension and denervation (rat), **181**, 1323
    cytochrome b_5, hepatic and reticulocyte, isolation from single gene (human), **178**, 38
    cytokines, cerebral levels, effects of kainic acid (rat), **176**, 593
    dihydrolipoyl transacylase, in thiamine-responsive maple syrup urine disease, 17-bp insertion and missense mutation, **174**, 804
    endothelin-1, expression in EA.hy 926 endothelial hybrid cells (human), **181**, 529
    epidermal growth factor, expression in mammary glands, effect of lactogenic hormones (mouse), **181**, 1063
    exon 5-deleted, encoding of functional interleukin-2 receptor α-subunit, (human T cells), **180**, 1390
    fibroblast growth factor receptor, levels in murine mammary tumor cells, up-regulation by basic FGF or testosterone, **174**, 136
    fibronectin, changes in splicing with *in vitro* passage (human fibroblasts), **178**, 620

- follistatin, ontogeny of steady-state levels in tissues, prediction of organ-specific functions (rat), **180**, 223
- β-1,4-galactosyltransferase, expression in human cell lines and structural analysis, **176**, 1269
- glucose transporters
  - GLUT1 and GLUT4, solution hybridization assay (rat), **179**, 1420
  - GLUT4, and encoded protein, divergent levels in skeletal muscle of insulin-resistant rats, **181**, 240
  - tissue levels, alteration during endotoxic shock (rat), **176**, 535
- glycine decarboxylase, three-base deletion, induction of nonketotic hyperglycinemia (human), **174**, 1176
- growth hormone-binding protein, identification in liver (rat), **180**, 489
- hepatocyte growth factor, expression in regenerating liver after partial hepatectomy (rat), **177**, 559
- insulin-like growth factor I, complete nucleotide sequence (human), **175**, 507
- insulin-like growth factor II, specific endonucleolytic cleavage (human, mouse), **179**, 1509
- insulin receptor, steady-state level, down-regulation by insulin (human), **175**, 520
- integrin, analysis in human and rodent tumor cells, **176**, 108
- interleukin-2 receptor α-subunit, stabilization by HTLV-I *p27rex* protein: role of *p27rex* nucleolar localization signal, **175**, 98
- intestinal plasma membrane Ca-pump, effect of vitamin D (rat), **179**, 749
- intrinsic factor-cobalamin receptor, translation *in vitro* (rat kidney), **177**, 751
- lactase and sucrase, modulation by cortisone and thyroxine (suckling rat), **180**, 174
- lactoferrin, sequence, analysis, and expression in mammary gland (bovine), **180**, 75
- N^3-methyladenine-DNA-glycosylase, increase in hepatoma cells treated with DNA-damaging agents (rat), **176**, 1086
- O^6-methylguanine-DNA-methyltransferase, increase in hepatoma cells treated with DNA-damaging agents (rat), **176**, 1086
- MHC class II antigen-associated invariant chain, detection in small intestine (mouse), **179**, 1642
- mitotin, expression at constant levels during cell cycle (Raji, WISH cells), **177**, 395
- Na$^+$/glucose cotransporter-1, and protein, distribution on crypt–villus axis of small intestine (rabbit), **181**, 1208
- neuroendocrine protein 7B2, two types differing by one codon, production by alternate splicing (human), **174**, 156
- neurofibromatosis type 1 gene, with 63-base insert in region coding for GTPase activating protein-related domain, expression by brain tumor (human), **181**, 955
- nuclear retinoic acid receptors, levels in lung and liver, differential effects of all-*trans*- and *cis*-retinoic acids (rat), **180**, 1137
- organogenesis-stage cytochrome P4501A1, detection in conceptive tissues by PCR (rat), **178**, 236
- ornithine decarboxylase
  - GC-rich sequence, role in spermidine regulation of ODC synthesis, **178**, 815
  - and sulfated glycoprotein-2 mRNA, accumulation patterns in phytohemagglutinin-stimulated lymphocytes: relationship of cell proliferation to cell death (human), **180**, 59
- osteogenic protein OP-1, tissue expression: high levels in kidney (mouse), **179**, 116
- ovarian prolactin receptors, multiple forms, induction regulation and expression (rat), **181**, 219
- phospho*enol*pyruvate carboxykinase, 3′ end, binding to cytosolic protein from cultured rat hepatocytes: role in mRNA stabilization, **177**, 1273
- phosphorylase kinase α/α' subunit, deficient skeletal muscle in I/Strain neonatal and adult mice, enzyme activity, **179**, 707
- platelet-derived growth factor A-chain, regulated expression in saphenous vein smooth muscle cells *in vitro* (human), **180**, 519
- preproendothelin-1, tissue distribution (rat), **175**, 44
- pro-opiomelanocortin and candidate processing enzymes PC2 and PC3, coordinate regulation in pituitary intermediate lobe (rat), **179**, 1311
- proteasome subunit XC3, expression during *Xenopus* embryogenesis, **178**, 1233
- renin, extra-renal, assay by polymerase chain reaction (rat), **179**, 25
- retinoic acid receptors in umbilical vein endothelial cells, characterization (human), **179**, 32
- sarcoplasmic reticulum Ca^{2+}-ATPase, diabetes-induced decrease in cardiomyocytes (rat), **178**, 906
- sucrase and lactase, modulation by cortisone and thyroxine (suckling rat), **180**, 174
- sulfated glycoprotein-2
  - accumulation in thymocytes upon dexamethasone-induced cell death (rat), **175**, 810
  - and ornithine decarboxylase mRNA, accumulation patterns in phytohemagglutinin-stimulated lymphocytes: relationship of cell proliferation to cell death (human), **180**, 59
- thyroglobulin, heterogeneous transcription pattern in thyroid (human), **178**, 586
- thyrotropin receptor, thyroglobulin, and thyroid peroxidase, levels in neoplastic thyroid tissues (human), **174**, 1148
- transforming growth factor β, detection in articular chondrocytes by polymerase chain reaction (human), **180**, 602
- vascular permeability factor, levels in U937 cells, effects of cytokines and inducing agents (human), **180**, 572
- vasopressin V2 receptor, from LLC-PK1 porcine kidney cells, expression in *Xenopus* oocytes, **174**, 149

purines and pyrimidines in, absolute electron affinities, determination from reversible reduction potentials, **180**, 841

reverse transcription intermediate for marked LINE transposon, evidence in tumoral cells (rat), **181**, 863

- ribosomal
  - secondary structure, effect of nucleolin, **177**, 673
  - 16S, scanning tunneling microscopy in water, **178**, 1280
- 65-nucleotide, requirement for spermidine-dependent endoribonuclease activity in murine FM3A cells, **176**, 1163
- transfer
  - effects of lymphocyte activation (rat), **180**, 638
  - gene internal promoters, bipartite, binding to transcription factor IIIC, physical effects on intervening DNA (yeast), **176**, 826
  - incorporation into normal and mutant HIV-1, **174**, 1272
  - isoleucine, formation in liver, stimulation by spermine: correlation with structural change of acceptor stem (rat), **177**, 745
  - lacking 3′ terminus, requirement for spermidine-dependent RNase 65 activity in FM3A cell extracts, **178**, 1247
  - $\text{Met-tRNA}_f^{\text{Met}}$, requirement for eIF-2–GDP conversion to eIF-2–GTP by eIF-2B, **181**, 1500
  - mitochondrial, tRNA^{thr} gene point mutation, induction of fatal infantile respiratory enzyme deficiency (human), **176**, 1112
  - tRNA^{Lys}, mitochondrial DNA carrying mutation in, quantitation in MERRF patients, **179**, 880
  - valine, identity determinants (*Escherichia coli*), **177**, 619

RNA-directed DNA polymerase
- equine infectious anemia virus, purification and kinetic characterization, **180**, 1365
- HIV-1
  - heterodimeric, crosslinking of substrates exclusively to p66 subunit, **174**, 785
  - inhibition by asterriquinone and analogs, **174**, 56
- template primer sites, inhibitory binding of adenosine diphosphoribosyl transferase, **180**, 496

RNA polymerase
- bacteriophage T7, reporter, gene expression from multicopy T7 promoter vectors in absence of, **181**, 1056

RNA polymerase II
- gene cloning and analysis of C-terminal domain (*Plasmodium berghei*), **180**, 1350
- interaction with acetylated nucleosomal core particles (chicken erythrocytes), **177**, 370

RNA synthesis
- in cerebral mitochondria, age-dependent decrease (rat), **176**, 645

RO 31-7549
- and RO 31-8220, improved selectivity for protein kinase C over staurosporine in macrophages, **181**, 396

RO 31-8220
- and RO 31-7549, improved selectivity for protein kinase C over staurosporine in macrophages, **181**, 396

RO 31-8959
- inhibition of simian immunodeficiency virus growth in C8166 cells, **176**, 180

RU486, *see* Mifepristone

Rubrerythrin
- intrapeptide sequence homology: identification of potential ligands to di-iron site (*Desulfovibrio vulgaris*), **181**, 337

Rumen
- production of benzodiazepine-like compounds (bovine), **181**, 1048

Ruthenium red
- prevention of glutathione efflux from tumor cells induced by calcium chelation, **176**, 276

Ryanodine receptors
- quantitation in skeletal muscle, heart, and brain (rabbit), **175**, 858
- sequence analysis: comparison with FK506-binding protein (rabbit muscle), **178**, 1288

S

Saccharomyces cerevisiae
- acidic ribosomal protein association on ribosomes, role of bilateral hydrophobic zipper structure, **174**, 1318
- Ca^{2+}-modulated bud assembly, role of *CLS4/CDC24* gene product *DBL*-homologous region, **181**, 604
- chitin synthetase 1 function, role of proteinase B, **174**, 204
- function of rat hepatic thyroid hormone receptor β1 as constitutive activator: role of domains D, E, and F in hormone-independent transcription, **178**, 1167
- galactose-dependent expression of recombinant aequorin, **174**, 115
- hydrostatic pressure damage, protective effects of deuterium oxide, dimethyl sulfoxide, and heat shock, **174**, 1141
- mitochondrial uptake of bridged bis-methylpyridinium aldoximes and induction of petite phenotype, **179**, 992

Saliva
- statherin, boundary lubricant properties (human), **180**, 91

Salmonella typhi
- specific antigenic protein, demonstration, **181**, 301

Salmonella typhimurium
- acetohydroxy acid synthase expression in *gyrB* mutant, effect of isoleucine, **178**, 934

Saposin
- antibodies, cross-reacting 60-kDa protein associated with human placental sialidase, characterization, **177**, 1211

Sarafotoxin
- containing cationic clusters within α-helical structure, activation of GTP-binding proteins (snake venom), **178**, 400
- type S6c, discrimination between endothelin-1 receptor subtypes (rat), **175**, 556

Sarcomeres
- Z-line region, location of titin C-terminus, **176**, 189

Sarcoplasmic reticulum
- chloride channels, purification of 100-kDa protein (rabbit muscle), **176**, 38
- reduction in Ca^{2+}-induced Ca^{2+} release after endotoxin administration (canine heart), **174**, 1248
- –T-tubule complex, calcium release, effects of dihydropyridines (rabbit muscle), **175**, 271; *erratum*, **176**, 549

Sarilesin
  and other peptide and non-peptide angiotensin receptor ligands, inhibition of bovine brain calmodulin-dependent cGMP phosphodiesterase, **179**, 85
Sarmesin
  and other peptide and non-peptide angiotensin receptor ligands, inhibition of bovine brain calmodulin-dependent cGMP phosphodiesterase, **179**, 85
Scanning tunneling microscopy
  erythrocyte membranes (human), **181**, 600
  imaging of living cell surface topography, **177**, 636
  16S rRNA in water, **178**, 1280
Scatter factor
  and hepatocyte growth factor from embryonic lung fibroblasts, comparison (human), **180**, 765
Scavenger receptors
  heterogeneity, evidence: clearance of monomeric and polymeric fractions of formaldehyde-treated albumin by hepatic endothelial and Kupffer cells (rat), **180**, 23
Schisanhenol
  effect on antitumor activity of adriamycin (mouse), **178**, 207
Schizophrenia
  urine of haloperidol-treated patients, identification of potentially neurotoxic pyridinium metabolite, **181**, 573
Schizosaccharomyces pombe
  glutathione synthetase large subunit gene, cloning and sequencing, **181**, 430
  synthesis of cadystins, induction by tetramethylthiuram disulfide or dimethyldithiocarbamate, **176**, 1068
Scl-70
  –topoisomerase I, negative regulation by zinc and endogenous macromolecule (human, rat), **178**, 414
Scopolamine
  transdermal transport, lecithin organogels as matrices for, **177**, 897
Second messengers
  accumulation in NG108-15 cells, effect of lithium, **174**, 606
Secretase
  Alzheimer amyloid protein precursor secreting enzyme, sequence specificity (COS-1 cells), **179**, 1670
Secretory pathway
  regulated, role in processing of β-amyloid precursor protein (murine pituitary cells), **181**, 513
Selectins
  GMP-140, binding to sialosyl-Le^a and -Le^x, effect of sulfated glycans (human platelets), **181**, 1223
Selenium deficiency
  associated increase in lymphocyte 12-hydroxy-5,8,10,14-eicosatetraenoic acid production (bovine), **181**, 389
  effect on transcription of selenium-dependent glutathione peroxidase gene (rat), **181**, 1431
Semax
  and ACTH(4–10), degradation by blood enzymes (rat), **176**, 741
Seminal plasma
  derived bioactive seminal fluid protein, characterization (bovine), **179**, 1006
  detection of 14-kDa group II phospholipase A_2 (human), **178**, 1505
Sendai virus
  infection, and SO_2 irritation, effects on mucin gene expression in airways (rat), **181**, 1
Senecionine
  detoxification in tissues by flavin-containing monooxygenase (guinea pig), **178**, 546
Senescence
  cellular, role of RB and p53 genes: cooperative effect of antisense oligomers (human fibroblasts), **179**, 528
Sepiapterin reductase
  cDNA, cloning and sequencing (human), **179**, 183
Serine
  phosphorylation in fibroblast form of pp60$^{c\text{-}src}$ from Y79 cells, **178**, 764
  position 379 in vitronectin, phosphorylation by cAMP-dependent protein kinase, **179**, 655
  position 406 in Ig μ heavy chain, Asn substitution, effect on glycosylation at Asn-402 (mouse), **179**, 1627
  residues in peptides, O-glycosylation, effect of flanking sequences, **180**, 1024
D-Serine dehydratase
  exchangeable protons, ^{1}H NMR spectra (human), **178**, 385
L-Serine dehydratase
  encoding gene, identification of glucocorticoid- and cAMP-responsive elements (rat), **176**, 385
Serine proteinase
  hepatic microsomal, specific cleavage of arginyl peptide bonds at basic amino acid pairs (rat), **175**, 1152
  pneumococcal, degradation of connective tissue proteins, **175**, 1023
  70-kDa, soluble, from C3H/10T1/2 cells, inhibition by Bowman–Birk inhibitor, **178**, 856
Serine proteinase inhibitors
  squamous cell carcinoma antigen as member (human), **181**, 51
Serine–pyruvate aminotransferase
  gene, point mutation in coding region, induction of primary hyperoxaluria type I (human), **176**, 1093
Serotonin
  edema-promoting actions, inhibition by calcitonin gene-related peptide (hamster, human, rat), **180**, 1429
  stimulation of calcium influx in adrenal zona glomerulosa cells *in vitro* (rat), **179**, 979
Serotonin receptors
  5-HT1C and 5-HT2, cDNA cloning and sequencing (human), **181**, 1469
  5-HT1D, encoding by orphan RDC4 receptor cDNA, **180**, 1460
  HT2, rat-derived, N- and C-terminal deletion mutants, characterization in *Xenopus* oocytes, **178**, 1421
Serotype specificity
  determining genomic region in *Vibrio cholerae* O1, identification, **175**, 679
Sertoli cells
  expression of mRNA for c-kit ligand (mouse), **176**, 910

Serum, *see also* Blood, Plasma
  basic fibroblast growth factor levels, increase in renal cell carcinoma patients, **180**, 386
  detection of anti-carbohydrate antibodies recognizing HIV glycoproteins (human), **177**, 279
  1,25-dihydroxyvitamin D levels, augmentation by bisphosphonate YM175 via stimulation of renal 1-hydroxylase activity (rat), **180**, 1172
  identification of
    antibodies to p80 region of bovine viral diarrhea virus (bovine), **178**, 1326
    insulin-like growth factor-binding proteins by NH_2-terminal amino acid sequence (pig), **181**, 1131
  stimulation of *fra*-2 gene transcription and Fra-2 protein phosphorylation in chicken embryo fibroblasts, **174**, 934
Serum albumin
  calcium-binding sites, analysis with terbium(III) as fluorescent probe (bovine), **177**, 474
  cationized, macrophage cell-surface binding sites for, identification (bovine), **181**, 787
Serum amyloid A
  cDNA, cloning and nucleotide sequence (rabbit liver), **178**, 68
  gene cloning, characterization, and sequence analysis (rabbit), **180**, 1258
  inhibition of oxidative burst reaction in FMLP-stimulated neutrophils (human), **176**, 1100
  type 1, isoelectric focusing variant in family of Turkish origin, characterization, **181**, 1097
Setaria digitata
  electron transport-coupled oxidative phosphorylation in, characterization, **177**, 318
  electron transport system, role of quinones, **174**, 386
Sex differences
  hydroxysteroid sulfotransferase-a gene expression in liver (rat), **175**, 1051
Shope fibroma virus
  T2 open reading frame, encoding of soluble form of tumor necrosis factor receptor, **176**, 335
Sialidase
  associated 60-kDa protein capable of cross-reacting with anti-saposin antibodies, characterization (human placenta), **177**, 1211
Sialoglycoproteins
  85-kDa, in lysosomal membranes, cDNA clone, isolation and sequencing (rat liver), **178**, 444
Side-chain cleavage reaction
  high-density lipoprotein cholesterol as mechanistic probe for, **179**, 161
Signal peptidase I
  intermolecular degradation *in vitro* (*Escherichia coli*), **181**, 650
Signal transduction
  α_1-adrenergic and muscarinic-cholinergic pathways, role in inositol 1,4,5-trisphosphate production in parotid acini (rat), **176**, 1291
  CD36-mediated, induction in monocytes by anti-CD36 antibodies: comparison with effects of anti-thrombospondin antibodies (human), **175**, 263
  common pathway for tumor necrosis factor-induced interleukin-6 expression and cytotoxicity in L929 cells, **178**, 993
  in *Coprinus congregatus*: role of G proteins in blue light polymorphogenesis, **179**, 1225
  in interferon-γ induction of HLA class I antigen expression on Huh 6 cells: analysis of pathways, **177**, 610
  in metamorphoses, eclosion hormone-mediated, role of cyclic GMP (silkworm), **180**, 881
  for TSH or thyroid stimulating antibody, role of N-terminal region of thyrotropin receptor, **178**, 733
  vasoactive intestinal peptide receptor-mediated, stimulation of tyrosine kinase $pp60^{c\text{-}src}$ phosphorylation (chicken embryo), **174**, 452
Simian immunodeficiency virus
  gp32 N-terminal domain peptides, fusogenic activity, **175**, 872
  growth in C8166 cells, inhibition by Ro 31-8959, **176**, 180
Simian sarcoma virus
  transformation of normal renal fibroblasts, association with increased basic fibroblast growth factor expression (rat), **180**, 423
Simvastatin
  6′ chiral center, metabolic inversion, analysis (dog, rat), **181**, 1508
  tissue selectivity *in vivo* (rat), **158**, 667; *erratum*, **174**, 1053
Single-strand conformation polymorphism
  nonisotopic, in detection of transthyretin Arg 58 mutant in hereditary polyneuropathy (human), **180**, 380
Skeletal muscle
  adult, encoding gene ASM1, expression and assignment to chromosome 11p15 (human), **180**, 1241
  amylin-induced inhibition of ^{14}C-glycogen accumulation, reversal by amylin or CGRP fragments (rat), **181**, 116
  carbon-centered and hydrogen radicals in, decrease with vitamin E supplementation (rat), **179**, 859
  cathepsin D isozymes with different specificities, detection (macaque), **176**, 798
  αB-crystallin mRNA levels, effects of mechanical tension and denervation (rat), **181**, 1323
  expression of *c-myc* mRNA, effect of dietary manipulation (chicken), **180**, 1
  fast- and slow-twitch, expression of same calreticulin isoform (rabbit), **177**, 979
  fetal and denervated, in normal and *mdx* mice, localization of dystrophin-related protein, **180**, 1179
  gastrocnemius
    glucose transporter gene expression in obese and diabetic rats, **175**, 995
    phosphate transport rate during post-exercise recovery, correlation with cytosolic pH, ^{31}P NMR study (human), **178**, 871
  glucose transport, effects of palmitate (rat), **177**, 343
  from insulin-resistant rats, divergent levels of glucose transporter GLUT4 mRNA and proteins, **181**, 240
  from I/Strain neonatal and adult mice, deficient in phosphorylase kinase α/α′ subunit mRNAs, enzyme activity, **179**, 707
  post-exercise phosphate transport kinetics, *in vivo* NMR study (human), **176**, 1204

  - protein-tyrosine phosphatases, identification by amplification of conserved cDNA sequences (rat), **178**, 1291
  - relaxation with diazo-2, effects of changes in pH (*Rana temporaria*), **181**, 1337
  - ryanodine receptors, quantitation (rabbit), **175**, 858
  - single fibers, glycerinated, troponin C–I–T complex in, replacement with bovine cardiac troponin T (rabbit), **181**, 1022
  - soleus, insulin-dependent glucose transport, inhibition by phenylarsine oxide (rat), **176**, 201
  - tissue homogenates, detection of dystrophin by polyacrylamide gel electrophoretic immunochemical assay (human, mouse, rat), **181**, 1164

- SK&F 96365
  - inhibition of calcium responses to endothelin-1 in NG108-15 smooth muscle cells, **177**, 1141
- Skin
  - cholesterol 7α- and 7β-hydroperoxides as aging markers, identification (rat), **178**, 242
  - microvascular permeability, enhancement by vascular permeability factor, role of glycosylation (guinea pig), **179**, 1568
  - ω-6 oxygenase *in vivo* activation (human), **180**, 98
  - psoriatic, overexpression of cellular retinoic acid-binding protein type 2 mRNA, demonstration by *in situ* hybridization (human), **180**, 204
  - transdermal transport of drugs, lecithin organogels as matrices for, **177**, 897
- S6 kinase
  - nerve growth factor-sensitive, stimulation by okadaic acid (PC12 cells), **177**, 624
- Smooth muscle
  - aortic
    - Ca^{2+} uptake characteristics of inositol 1,4,5-trisphosphate-sensitive and -insensitive Ca^{2+} pools (pig), **174**, 1183
    - phospholipase D activation by phorbol ester (rat), **179**, 1070
  - carotid, detection of endothelin converting enzyme (bovine), **174**, 446
  - contractions
    - support by unphosphorylated myosin, **178**, 967
    - sustained, in response to bombesin, role of heat shock protein hsp27 (rabbit), **181**, 1192
    - tachykinin-induced, blockade by spantide II and quinuclidine CP-96,345, comparison (guinea pig, rabbit), **178**, 297
  - tracheal, field stimulation-induced contractions and acetylcholine release, effects of L-N^G-nitro-arginine (guinea pig), **179**, 1017
  - uterine
    - Ca^{2+}-independent contraction, role of protein kinase C (rat), **179**, 487
    - oxytocin-induced contraction in Ca^{2+}-free medium without myosin light chain phosphorylation (rat), **176**, 122
  - vascular
    - biotransformation of organic nitrates to nitric oxide, **180**, 286
    - detection of myosin heavy chain isoform MHC$_3$ (pig), **176**, 1365
- Smooth muscle cells
  - aortic
    - 1,2-diacylglycerol levels and protein kinase C activation, stimulation by endothelin (bovine), **162**, 381; retraction, **180**, 1164
    - ecto-ATPase and ecto-ADPase activities in cultured cells, role of ATP diphosphohydrolase (bovine), **180**, 1200
    - mitogenesis and proliferation, inhibition by clearance receptor-binding atrial natriuretic peptides (rat), **179**, 1606
    - proliferation, stimulation by lactosylceramide (rabbit), **181**, 554
    - vascular action of vasopressin, effect of OPC-21268 *in vitro* (rat), **178**, 707
  - basilar arterial, effects of K$^+$ channel agonists cromakalim and pinacidil, mediation by Ca^{2+}-activated K$^+$ channels (rat), **181**, 172
  - coronary, ATP-sensitive K$^+$ channels, blockade by angiotensin II (pig), **181**, 700
  - elastin gene expression, effect of β-aminopropionitrile (rat), **179**, 939
  - ileal, K$^+$ current, inhibition by acetylcholine, modulation by β-agonists (rabbit), **179**, 327
  - NG108-15, calcium responses to endothelin-1, inhibition by SK&F 96365, **177**, 1141
  - phenotypes, *in vitro* distinction by 2B7 mRNA (rat), **177**, 867
  - saphenous vein, platelet-derived growth factor mRNA, regulated expression *in vitro* (human), **180**, 519
  - vascular
    - A10, detection of endothelin-metabolizing neutral endopeptidase in membranes (rat), **176**, 423
    - big endothelin-1 conversion to endothelin-1 by two types of metalloproteinases (pig), **178**, 899
    - gene expression, modulation by high- and low-density lipoproteins (human), **178**, 1465
    - growth induction by angiotensin II, effect of atrial natriuretic polypeptide (rat), **176**, 1601
    - hyperpolarization by hydrogen peroxide (pig), **176**, 378
    - inositol trisphosphate and tetrakisphosphate levels, increase by *in vitro* stretch (rat pulmonary artery), **180**, 982
    - migration, stimulation by PDGF mediated by induction of endogenous basic fibroblast growth factor (bovine), **174**, 1260
    - mitogenic responses, dissociation from activation of growth-related genes (neonatal rat), **181**, 617
    - nitric oxide release (human), **180**, 907
    - production of L-arginine-derived relaxing factor, induction by interleukin-1β (rat), **176**, 114
    - proliferation, inhibition by C-type natriuretic peptide (rat), **177**, 927
    - responses to transforming growth factor β hybrid molecule (bovine), **175**, 589
    - stimulation of platelet-derived growth factor AA-homodimer and transforming growth factor β in, analysis (rat), **178**, 1451
    - vasopressin-induced increase in Na$^+$ levels, effect of Na$^+$/K$^+$-ATPase inhibition (rat), **177**, 1247

SMS 201-995, *see* Octreotide
Sodium
  activation of sugar binding to melibiose permease, abolishment by Asp55 mutation in enzyme putative helix II (*Escherichia coli*), **178**, 1176
  coupled ATP synthesis in *Vibrio parahaemolyticus* mutant lacking H^+-translocating ATPase activity, **179**, 224
  –hydrogen antiport
    activation by lactoferrin (K562 cells), **176**, 498
    down-regulation, role of protein kinase C activation by phosphatidylinositol 4,5-bisphosphate, **175**, 852
  –hydrogen exchange, role in
    acetylcholine-induced aortic relaxation (rat), **177**, 407
    endothelin-1-induced contractions of tracheal and bronchial strips (guinea pig), **175**, 583
  intracellular free, assay in myocytes with sodium-binding benzofuran isophthalate (guinea pig), **175**, 611
  levels in vascular smooth muscle cells, vasopressin-induced increase, effect of Na^+/K^+-ATPase inhibition (rat), **177**, 1247
  phosphate-dependent transport, ^{23}Na and ^{31}P NMR analysis (*Streptococcus faecalis*), **181**, 74
  role in glucagon-like peptide$_{(7-36)}$amide-stimulated insulin secretion in pancreatic islets (rat), **179**, 701
Sodium azide
  regulation of intracellular acetyl-CoA carboxylase: mimicry of action of 5′-AMP-activated protein kinase, **181**, 1486
Sodium/glucose cotransporter
  SGLT1, and mRNA, distribution on crypt–villus axis of small intestine (rabbit), **181**, 1208
Solubilization
  Na^+,K^+-ATPase by detergent, associated conformational transitions, fluorescent monitoring, **174**, 63
  prostaglandin D_2-binding protein from porcine temporal cortex, **174**, 364; *erratum*, **175**, 1165
Solution hybridization assay
  glucose transporters GLUT1 and GLUT4 mRNAs (rat), **179**, 1420
Solutions
  methyl-hydroxypropyl-cellulose of different chain lengths, polystyrene sulfate particles in, size separation, **180**, 1070
Somatostatin
  and analogs RC-160 and SMS 201-995, effects on (Ca,Mg)ATPase in anterior pituitary (rat), **178**, 1492
  effect on amylin and insulin cosecretion in cultured islet β cells, **179**, 1
  inhibition of nicotinic receptor-activated inward current in chromaffin cells (guinea pig), **174**, 750
Spantide II
  and quinuclidine CP-96,345, comparative role in blockade of tachykinin-induced smooth muscle contractions (guinea pig, rabbit), **178**, 297
Species differences
  brain natriuretic peptide degradation, mass spectrometric analysis (human, pig, rat), **175**, 22
  glucose transporter GLUT3 gene expression (human, monkey, mouse, rabbit, rat), **174**, 470
  glycophorin proteins (human, mouse), **176**, 820
  protein Z interaction with thrombin (bovine, human), **178**, 801
Spectrophotometry
  derivative, in measurement of anticancer drug partitioning in biomembranes, **176**, 1079
Spectroscopy, *see also specific techniques*
  adenylyl sulfate reductase (*Archaeglobus fulgidus*), **181**, 342
  bacteriorhodopsin incubated in various detergent solutions: analysis of monomers, **181**, 1301
  DNA-binding site of GAL4 zinc finger protein (yeast), **175**, 492
  recombinant plasminogen activator inhibitor-1: conformational analysis of active and latent forms, **175**, 437
Spermatids
  specific mammalian protein TP2, identification as zinc metalloprotein with two finger motifs (rat), **179**, 1491
Spermatocytes
  pachytene, meiosis *in vitro* (rat), **179**, 1115
Spermatozoa
  atrial natriuretic factor, immunologic detection (mouse, rat), **180**, 437
  Ca^{2+}-dependent phospholipase A_2, stimulation by diacylglycerol (sheep), **176**, 294
  casein kinase I, purification and characterization (bovine), **179**, 592
  development, implications of spermine effects on superoxide dismutase (hamster), **177**, 420
  flagellar inner arm ATPase fraction inducing axonemal outer doublet microtubule sliding, purification and properties (sea urchin), **175**, 173
  head, cell-surface localization of non-genomic progesterone receptor (human), **181**, 331
  in oligospermic individuals, overexpression of superoxide dismutase and lack of surface thiols (human), **174**, 510
Spermidine
  dependent endoribonuclease, detection and characterization in murine FM3A cells, **176**, 1163
  regiospecifically acetylated, induction of HL60 leukemia cell differentiation (human), **180**, 591
  regulation of ornithine decarboxylase synthesis, role of GC-rich sequence, **178**, 815
Spermidine/spermine N^1-acetyltransferase
  full-length cDNA, characterization (human), **179**, 407
Spermine
  effects on spermatozoal superoxide dismutase: implications for sperm development (hamster), **177**, 420
  stimulation of isoleucine tRNA formation in liver, correlation with structural change of acceptor stem (rat), **177**, 745
Sphingolipid hydrolase
  activator proteins: prosaposin secretion by human platelets, **176**, 668
Sphingomyelin phosphodiesterase
  deficiency in Niemann-Pick disease type A, molecular basis (human), **179**, 1187
Sphingosylphosphorylcholine
  effect on growth of various mammalian cell types, **181**, 361

Spinal cord
  brain natriuretic peptide levels and molecular forms (rat), **177**, 40
Spin trapping
  light-dependent, hydroxyl radicals from erythrocytes (human), **179**, 1305
Splanchnic tissues
  endothelin-1 vasoconstrictive effects and regional extraction (human), **180**, 1298
Spleen
  nonphagocytic uptake of intravenously injected microspheres: effects of particle size and hydrophilic coating (rat), **177**, 861
Splenocytes
  and derived hybridomas, comparative production of creatine kinase BB (mouse), **179**, 1529
  expression of monocyte chemoattractant protein-1 (rat), **174**, 504
  produced tumor-enhancing activity, initial description (mouse), **179**, 675
  proliferation, suppression by β-endorphin$_{1-31}$, *N*-acetyl-β-endorphin$_{1-31}$ antagonism (mouse), **175**, 936
  protein-tyrosine kinase activity of p72^{syk}, stimulation by wheat germ agglutinin (porcine), **180**, 1325
Splicing
  pre-mRNA, inhibition by antisense RNA *in vitro*, effect of RNA containing sequences complementary to
    exons, **179**, 1593
    introns, **179**, 1600
Staphylococcus aureus
  methicillin resistance gene deletion, Southern hybridization analysis, **176**, 1319
Statherin
  salivary, boundary lubricant properties (human), **180**, 91
Staurosporine
  inhibition of protein kinase C and protein tyrosine kinase of human neutrophils, **178**, 423
  and selective protein kinase C inhibitors RO 31-7549 and RO 31-8220, functional activity in macrophages, comparison, **181**, 396
Steatosis
  juvenile visceral, associated with systemic carnitine deficiency, analysis in C3H-H-2° strain (mouse), **174**, 1090
Stems
  atrial natriuretic peptide concentrations (*Dracena godseffiana*), **179**, 695
Stereoselectivity
  cytochrome P450, fluoro group-mediated reversal: 6-fluorobenzo(c)phenanthrene conversion to K-region oxide by hepatic microsomes (rat), **181**, 1516
Steroid hydroxylase
  gene localization in *Hind*III fragment of genomic DNA (*Rhizopus nigricans*), **178**, 1078
Steroidogenesis
  role of hydrogen bonding: analysis of estradiol 17β-dehydrogenase-inhibiting heterocyclic analogs of estrone (human), **180**, 1057
Δ^{5,7}-Sterol-Δ^{7}-reductase
  identification in higher plant microsomes, **181**, 465
Sterols
  biosynthesis, regulation by 24(*R*,*S*),25-epiminolanosterol (sunflower), **177**, 566
Stomach
  cytoprotection by intracisternal injection of interleukin-1β, **174**, 1117
  gastric acid and pepsin secretion, inhibition by basic fibroblast growth factor (rat), **175**, 527
  mucosal laminin receptors, inhibition by *Helicobacter pylori* lipopolysaccharide (rat), **175**, 963
  ulceration, inhibition by central basic fibroblast growth factor (rat), **177**, 809
Streptavidin
  chimeric proteins with, construction of expression vectors for, **176**, 571
Streptokinase
  post-translational C-terminal cleavage, role of leader sequence, **174**, 282
Streptomyces misakiensis
  endothelin receptor subtype ET$_A$ antagonist, isolation, **178**, 132
Streptozocin
  induced diabetes, small intestine of affected rat, expression of glucose transporter genes, **181**, 1110
  induction of diabetes, role of nitric oxide (mouse), **178**, 913
Streptozotocin, *see* Streptozocin
Stretching
  augmentation of inositol trisphosphate and tetrakisphosphate in cultured pulmonary vascular smooth muscle cells (rat), **180**, 982
Stroke-like episodes
  and mitochondrial myopathy, encephalopathy, and lactic acidosis, associated mitochondrial DNA mutations (human), **174**, 861
Stromelysin
  gene expression, increase in skin fibroblasts from patients with severe recessive dystrophic epidermolysis bullosa, **174**, 1003
Structure–function relationships
  dermorphin and morphiceptin bioactivities: topochemical analysis, **181**, 664
  designed DDT-binding polypeptides, **179**, 1212
  lipoxin A$_4$ inhibition of leukotriene B$_4$-induced neutrophil migration, **180**, 1416
  thrombin effects on osteoblasts (human, rat), **174**, 181
Styryl
  based inhibitors of lymphocyte tyrosine protein kinase p56^{lck}, analysis (human), **180**, 1048
Substance P
  [D-Arg^1,D-Phe,D-Try^{7,9},Leu^{11}] derivative, inhibitory effect on endothelin-1 binding sites in rat cardiac membranes, **179**, 130
  and bombesin antagonists, effects on release of growth hormone by GHRP and GHRH (rat), **180**, 156
  quinuclidine antagonists, selectivity and specificity, **176**, 894
Substance P receptors
  molecular cloning, structural characterization, and functional expression (human), **179**, 1232

Subtilisin
  Carlsberg, S_1 binding site specificity, probing with boronic acids, **176**, 401
Succinate thiokinase
  hydrogenosomal, detection and characterization in *Tritrichomonas foetus* and *Trichomonas vaginalis*, **179**, 892
Sucrase
  intestinal, mRNA levels and activities, modulation by cortisone and thyroxine (suckling rat), **180**, 174
Sugars
  binding to melibiose permease, activation by Na^+, abolishment by Asp55 mutation in enzyme putative helix II (*Escherichia coli*), **178**, 1176
Sulfated glycoprotein-2
  mRNA accumulation in thymocytes upon dexamethasone-induced cell death (rat), **175**, 810
Sulfate radicals
  role in albumin fragmentation by sulfite in presence of cobalt or peroxidase/H_2O_2, **176**, 1306
Sulfatides
  [Gal(3-SO_4)β1-1Cer], specific binding of antistasin to, inhibition by fragment [$A^{103,106,108}$] antistasin 93–119, **181**, 246
  suppression of complement-dependent phagocytosis of liposomes, **176**, 866
Sulfation
  cholecystokinin by tyrosyl protein sulfotransferase, evidence for ordered reaction mechanism (rat brain), **181**, 989
Sulfhydryl-modifying agents
  comparative effects on hepatic glucocorticoid receptor interaction with agonist and antagonist steroid ligands (rat), **174**, 1239
Sulfhydryls, *see* Thiols
Sulfite
  as essential metabolite for human peripheral lymphocytes, evidence, **179**, 611
  reduction by hydrogen in reconstituted electron transfer chain from *Desulfovibrio gigas*, calcium requirement, **180**, 238
  site-specific fragmentation of albumin in presence of cobalt or peroxidase/H_2O_2, role of sulfate radicals, **176**, 1306
Sulfur
  based substrate analog inhibitors for human collagenases, synthesis and testing, **176**, 173
Sulfur dioxide
  induced irritation, and viral infection, effects on mucin gene expression in airways (rat), **181**, 1
Superoxide dismutase
  Cu,Zn-containing, human and bovine recombinant, thermostabilization by replacement of free cysteines, **181**, 474
  interactions with fluoride in erythrocytes, ^{19}F NMR study (human), **174**, 163
  overexpression in spermatozoa from oligospermic individuals (human), **174**, 510
  role in heat-induced stimulation of photosystem I-mediated oxygen uptake (spinach), **174**, 696
  spermatozoal, effects of spermine: implications for sperm development (hamster), **177**, 420
Superoxide radicals
  generating oxidase, inhibition by iodonium biphenyl in cell-free system, analysis (bovine neutrophils), **175**, 143
  generation in
    isolated perfused liver during ischemia–reperfusion, monitoring by luminol-enhanced chemiluminescence (rat), **174**, 217
    neutrophils
      effect of dibutyryl cCMP (human), **174**, 258
      inhibition by pentoxifylline, role of adenosine receptors (human), **180**, 53
  neutrophil-generated, inactivation by nitric oxide (human), **181**, 1392
  release from neutrophils, divergent effects of propranolol: role of phosphatidic acid and diacylglycerol (human), **175**, 423
Surfactin
  amino acid substitutions, identification with two-dimensional NMR (*Bacillus subtilis*), **177**, 998
Sweat glands
  localization of cystic fibrosis transmembrane conductance regulator with high-affinity antibodies (human), **181**, 36
Synaptosomes
  Ca^{2+} transients and membrane depolarization in, simultaneous measurement (rat), **181**, 797
Syncytia
  HIV-1-induced formation in cell lines, inhibition by complestatin (human), **179**, 243
Synovial cells
  interleukin-8 and monocyte chemotactic peptide gene expression, induction by interleukin-1 (human), **174**, 411
Systemic lupus erythematosus
  immune complexes in plasma of affected patient, demonstration of extrinsic DNA, **174**, 323

T

Tachykinin
  induced smooth muscle contractions, blockade by spantide II and quinuclidine CP-96,345, comparison (guinea pig, rabbit), **178**, 297
  isolation from brain and intestine (frog), **177**, 588

Tachykinin receptors
  NK-2, gene isolation and characterization (human lung), **177**, 8

Talin
  smooth muscle, binding to skeletal muscle actin, kinetics (chicken), **178**, 718

Tamoxifen
  partitioning in biomembranes, spectrophotometric measurement, **176**, 1079

Taurocholic acid
  uptake by ileal brush border membrane vesicles, effect of antiserum to 99-kDa polypeptide (rat), **179**, 204
TCDD, *see* 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin
T cells
  activated, expression of Hanganutziu–Deicher antigen (human), **181**, 310
  activation
    associated overexpression of hemopoietic specific gene encoding small G protein (human), **175**, 451
    by diacylglycerol and ionomycin, enhancement by lysophosphatidylcholine (human), **178**, 1378
  C8166, simian immunodeficiency virus growth in, inhibition by Ro 31-8959 (human), **176**, 180
  c-*fos* transcriptional activation by phorbol ester, mediation by dyad symmetry element (human), **181**, 353
  cytolytic, cloned, membranolytic and nucleolytic activities (mouse), **179**, 1562
  diphtheria toxin cytotoxicity, role of amino terminus (human), **180**, 545
  elastase, identification as constituent product, **181**, 232
  Hut78 line, plasma membrane binding of oligonucleotides at acidic pH (human), **181**, 1343
  induction of IL-8/neutrophil-activating peptide-1 gene family members, suppression by cyclosporin A (human), **181**, 179
  infection with HIV-1, inhibition by sulfated gangliosides (human), **175**, 1
  long-term cell lines, infected with HTLV-I/II, constitutive expression of c-*jun* and *jun-B* genes, **181**, 976
  membrane, GTP-binding proteins, effect of mitogen-induced activation and phorbol ester-induced differentiation (human), **178**, 138
  MT-4, HIV replication in, inhibition by phosphorothioate analogs of oligodeoxyribonucleotides (human), **179**, 1614
  potassium channel RGK5, current inactivation in, role of histidine in channel pore (rat), **179**, 1384
  specific and phorbol ester-induced promiscuous cytolytic activity, differential effects of protein kinase C inhibitor H-7 (mouse), **179**, 720
  spontaneous adherence of bovine brain myelin basic protein (human), **180**, 1125
  T4/T8 ratios in normal subjects, augmentation by coenzyme Q_{10}, relevance to patients with AIDS-related complex, **176**, 786
Temperature
  body, normal, delayed neuronal death under, effects of successive carbon monoxide exposures (mouse), **179**, 836
  effect on hemoglobin function (water buffalo), **177**, 956
  inverse transition, modulation in polypeptides by phosphorylation and dephosphorylation, **178**, 539
Teniposide
  inhibition of mitochondrial DNA topoisomerase II (bovine thymus), **176**, 690
Tension
  mechanical, skeletal muscle, effect on αB-crystallin mRNA levels (rat), **181**, 1323
Terbium
  Tb(III) as fluorescent probe in analysis of calcium-binding sites on bovine serum albumin, **177**, 474
Testis
  binding sites for 1,25-dihydroxyvitamin D_3, comparison with classical target tissue (rat), **180**, 867
  localization of immunoreactive atrial natriuretic factor (mouse, rat), **180**, 437
  specific calcineurin B-related protein, cDNA, cloning (rat), **179**, 1325
Testosterone
  in vivo regulation of apolipoprotein A-I gene expression at translational level (mouse), **181**, 1407
  up-regulation of fibroblast growth factor receptor mRNA levels in murine mammary tumor cells, **174**, 136
Testosterone 6β-hydroxylase
  gene structure (rat), **177**, 68
2,3,7,8-Tetrachlorodibenzo-*p*-dioxin
  and dexamethasone, effects on thymocyte proliferation and number, comparison (mouse), **178**, 16
  effect on HIV-1 reproduction in lymphoid cell cultures (human), **179**, 46
  increase of reliance on fats as fuel source independently of diet (chicken embryo), **174**, 1267
  inducible expression of aldehyde dehydrogenase, superinduction by inhibition of protein synthesis (rat hepatoma cells), **180**, 953
12-*O*-Tetradecanoylphorbol-13-acetate
  activation of phospholipase D in vascular smooth muscle cells (rat), **179**, 1070
  effects on 15-hydroxyprostaglandin dehydrogenase (NAD^+) synthesis and activity in erythroleukemia cells (human), **177**, 1258
  enhancement of X-ray-induced transformation in C3H10T1/2 cells, suppression by protease inhibitors: role of protein kinase C, **176**, 18
  induced protein kinase C down-regulation in fibroblasts, relationship to TPA-induced phosphorylating activity (mouse), **176**, 1227
  responsive element
    motif of, phosphorylation state and activity in NIH3T3 transformant induced by ret^{TPC} (mouse), **179**, 1331
    transactivation by oncogenic C-*erb*B-2 protein, partial mediation by protein kinase C, **178**, 724
  topological regulation of cell membrane phosphoinositidase C (human), **178**, 773
  treated breast cancer cells, produced amphiregulin-associated protein, amino acid sequence (human), **179**, 572
Tetrahydrobiopterin
  biosynthesis
    intermediate 6-pyruvoyl tetrahydropterin, stereostructure and quantum chemical properties, computer studies, **176**, 52
    role of carbonyl and aldose reductases (human), **175**, 738
N,N,N′,N′-Tetramethyl-1,4-phenylenediamine
  facile electron donor and chromophoric substrate for dopamine β-monooxygenase, **175**, 920

N,N,N′,N′-Tetramethyl-*p*-phenylenediamine dihydrochloride
  dye bypass of antimycin A block, in analysis of thyroid hormone effects on electron flow in mitochondrial *bc*$_1$ complex (rat liver), **178**, 73
Tetramethylthiuram disulfide, *see* Thiram
Tetrapeptides
  deltorphin N-terminal analogs, opioid receptor selectivity reversal, **178**, 110
Thapsigargin
  effects on calcium homeostasis in GH_4C_1 cells (rat), **177**, 551
  and inositol trisphosphate, sensitive intracellular Ca^{2+} pools, comparative roles in plasma membrane Ca^{2+} entry in neuronal cell lines, **180**, 1518
Thermogenesis
  association with spreading depression in amphibian retina, **174**, 293
Thermostabilization
  recombinant human and bovine CuZn superoxide dismutases by replacement of free cysteines, **181**, 474
Thermotolerance
  Ehrlich ascites tumor cells, induction by cisplatin, **180**, 243
Thermotropic transitions
  dihexadecylphosphatidylcholine dispersions in H_2O and D_2O, comparative temperatures between interdigitated gel phase and ripple phase, **174**, 102
Thiol proteinase
  lysosomal, MEP, sorting in NIH-3T3 cells, effect of insulin-like growth factor II overexpression (mouse), **179**, 108
Thiols
  –disulfide exchange reaction with biological disulfides, inactivation of glutathione *S*-transferase (human placenta), **174**, 580
  role in follicle-stimulating hormone interaction with FSH receptor, **176**, 1256
  spermatozoal surface, lack in oligospermic individuals (human), **174**, 510
Thioredoxin
  related protein associated with plasma membranes, identification, **175**, 123
Thioridazine
  interaction with cardiac cytochrome oxidase: enzyme activity and drug binding studies, **179**, 1063
Thiostatin
  plasma, role of carbohydrate: destruction of cysteine proteinase inhibitor activity by deglycosylation (rat), **179**, 927
Thiosulfate transferase
  cloning and sequence analysis: interspecies comparison (bovine, chicken, human), **180**, 887
Thiotransferase, *see* Glutathione–homocystine transhydrogenase
Thiram
  induction of cadystin synthesis in *Schizosaccharomyces pombe*, **176**, 1068
Threonine
  residues in peptides, O-glycosylation, effect of flanking sequences, **180**, 1024
Thrombin
  and ATP, induction of $[Ca^{2+}]_i$ increases, differential regulation by prostacyclin receptor (murine mastocytoma cells), **176**, 102
  binding to thrombin receptors, role of receptor glycosylation (murine embryonic fibroblasts), **180**, 349
  and bradykinin, induced prostaglandin E_2 biosynthesis in isolated osteoblasts, effect of haptoglobin (mouse), **178**, 343
  effects on osteoblasts: structure–function relationships (human, rat), **174**, 181
  hirulog peptides with scissile bond replacements resistant to cleavage by, characterization, **177**, 1049
  induction of
    changes in cytosolic free Ca^{2+} in platelets from spontaneously hypertensive rats, effects of erythropoietin, **177**, 991
    mitogenesis in neonatal vascular smooth muscle cells, dissociation from activation of growth-related genes (rat), **181**, 617
    platelet activation, multiple pathways, differentiation by desensitization and thrombin exosite inhibitor (human), **181**, 636
  interaction with protein Z, species differences (bovine, human), **178**, 801
  platelet responses to, inhibition by DUP 714 (human), **179**, 1500
  reaction with platelet-derived nexin, requirement of secondary recognition site in addition to catalytic site (human), **177**, 1198
  stimulation of
    phosphatidylinositol 3,4,5-trisphosphate production in platelets (human), **174**, 524
    tissue kallikrein release from neutrophils: relationship between blood coagulation and inflammation (human), **176**, 315
Thrombin receptors
  amino terminus, derived 14 amino acid peptide, elevation of intracellular calcium and stimulation of prostacyclin production in endothelial cells (human umbilical vein), **179**, 1656
  high-affinity, glycosylation, role in binding of thrombin (murine embryonic fibroblasts), **180**, 349
Thromboplastin
  cDNA cloning and amino acid sequence (bovine), **181**, 1145
Thrombospondin
  antibodies, and anti-CD36 antibodies, role in monocyte signal transduction (human), **175**, 263
  effect on monocytes: augmented luminol-enhanced chemiluminescence upon receptor triggering (human), **177**, 1087
  normal binding to glycoprotein IIIb-deficient platelets (human), **179**, 985
Thromboxane A_2
  synthesis in erythroleukemia cells (human), **180**, 8
Thromboxane synthase
  cDNA cloning and
    partial sequencing (human lung), **177**, 286
    sequencing (human platelets), **178**, 1479

Thylakoids
  N,N-diethylhydroxylamine as electron donor to photosystem II (beet spinach), **179**, 1127
  primary photochemistry, proline enhancement by inhibition of photoinhibitory damage (*Brassica juncea*), **181**, 1238
Thymidine
  [^{3}H]-labeled, uptake by DNA of thyroid lobes *in vitro*, effect of melatonin (rat), **181**, 1187
  incorporation by CCL-39 lung fibroblasts in absence of serum or growth factors, stimulation by ceruloplasmin (Chinese hamster), **180**, 790
  secretion by CEF and NIH/3T3 fibroblasts, quantification and time course, **177**, 259
Thymidine kinase
  types 1 and 2, and deoxycytidine kinase, comparative substrate specificities for antiviral and cytostatic nucleoside analogs (human spleen), **176**, 586
Thymocytes
  accumulation of sulfated glycoprotein-2 mRNA upon dexamethasone-induced cell death (rat), **175**, 810
  constitutive activation of transcription regulatory factor NF-kB (human), **181**, 80
  proliferation and number, effects of dexamethasone and TCDD, comparison (mouse), **178**, 16
Thymus
  identification of parvalbumin (chicken), **177**, 881
  nuclear matrix, reported activity supporting V(D)J recombination, analysis (fetal calf), **181**, 95
Thyroglobulin
  mRNA
    heterogeneous transcription pattern in thyroid (human), **178**, 586
    levels in neoplastic thyroid tissues (human), **174**, 1148
Thyroid
  DNA
    synthesis, inhibition by bombesin and SMS 201-995 *in vitro* (rat), **178**, 520
    [^{3}H]thymidine uptake *in vitro*, effect of melatonin (rat), **181**, 1187
  neoplastic tissues, mRNA levels of thyrotropin receptor, thyroglobulin, and thyroid peroxidase (human), **174**, 1148
  stimulating antibodies
    inhibition by thyrotropin receptor sequence-derived synthetic oligopeptide P-195 (human), **178**, 165
    related activity, possession by antibodies to
      extracellular domains of human thyrotropin receptor, **179**, 1548
      membrane-spanning region extracellular loops of human thyrotropin receptor, **181**, 1035
    signal transduction for, role of N-terminal region of thyrotropin receptor, **178**, 733
  thyroglobulin mRNA, heterogeneous transcription pattern (human), **178**, 586
Thyroid cells
  FRTL-5
    IGF-I-induced Ca^{2+} influx and DNA synthesis, effects of pravastatin (rat), **177**, 17
    thyrotropin receptor gene expression, downregulation by cytosolic calcium increases, mechanism (rat), **176**, 94
  IGF-I-induced Na^{+}/H^{+} antiporter activation and intracellular Ca^{2+} mobilization, relationship (pig), **177**, 113
Thyroid hormone receptors
  α_1, binding of triiodothyronine, competitive inhibition by fatty acids, **179**, 1011
  β, encoding gene, single base mutation in hormone-binding domain in generalized thyroid hormone resistance (human), **178**, 606
  β_1
    binding of triiodothyronine, competitive inhibition by fatty acids, **179**, 1011
    production by recombinant baculovirus-infected insect cells (human), **175**, 285
    from rat liver, function as constitutive activator in yeast: role of domains D, E, and F in hormone-independent transcription, **178**, 1167
  nuclear, reversible crosslinking induced by Zn^{2+}, effect on hormone binding (human placenta), **175**, 250
Thyroid hormones
  effects on electron flow in mitochondrial bc_1 complex, analysis by dye bypasses of antimycin A block (rat liver), **178**, 73
Thyroid peroxidase
  mRNA levels in neoplastic thyroid tissues (human), **174**, 1148
Thyrotropin
  high affinity binding site in thyrotropin receptor, mutation of Cys 390 to Ser, characterization (rat), **180**, 1118
  and immunoglobulins from Graves' disease patients and idiopathic myxedema patients, sites of interaction with TSH receptor/LH-CG receptor chimeras, comparison, **179**, 70
  with and without melatonin, effects on [^{3}H]thymidine uptake by DNA of thyroid lobes *in vitro* (rat), **181**, 1187
  secretion in pituitary cell culture, stimulation by endothelin-3 (rat), **174**, 338
  signal transduction for, role of N-terminal region of thyrotropin receptor, **178**, 733
Thyrotropin receptors
  amino-terminal region
    antibodies to, characterization (human), **177**, 145
    role in signal transduction for thyrotropin or thyroid stimulating antibody, **178**, 733
  cDNA, non-thyroid mammalian cells transfected with, bioactivity of Graves disease IgG, comparison with reference thyroid bioassay (human), **179**, 1543
  derived synthetic oligopeptide P-195, binding to Graves' immunoglobulin and inhibition of thyroid stimulating antibody (human), **178**, 165
  encoding gene
    expression in FRTL-5 cells, downregulation by cytosolic calcium increases, mechanism, **176**, 94
    structural analysis (human), **177**, 679
  extracellular domains, antibodies, possession of thyroid-stimulating activities (rabbit), **179**, 1548
  high-affinity thyrotropin binding site, mutation of Cys 390 to Ser, characterization (rat), **180**, 1118

  and HIV-1 nef protein, nucleotide and amino acid homology (human), **181**, 498
  human, chicken antibodies to derived peptides, generation and characterization, **174**, 399
  –LH-CG receptor chimeras, sites of interaction with immunoglobulins from Graves' disease and idiopathic myxedema patients and TSH, comparison, **179**, 70
  membrane-spanning region, extracellular loops, rabbit antibodies, thyroid-stimulating activities (human), **181**, 1035
  mRNA levels in neoplastic thyroid tissues (human), **174**, 1148
  prokaryotic expression and identification of immunogenic region with synthetic peptides (rat), **179**, 319
Thyrotropin-releasing hormone
  induced influx of extracellular Ca^{2+} in pituitary GH_4C_1 cells, evidence (rat), **180**, 860
  inhibition of splenic lymphocyte spontaneous proliferation (mouse), **181**, 562
  similar peptide pGlu–Glu–ProNH_2, presence in pituitary and absence in reproductive tract (pig), **181**, 1557
Thyroxine
  and cortisone, modulation of intestinal lactase and sucrase mRNA levels and activities (suckling rat), **180**, 174
  regulation of α-myosin heavy chain promoter activity, assessment by *in vivo* DNA transfer (rat heart), **179**, 1269
Tiazofurin
  and arabinose and xylose analogs, cytotoxicity to K562 cells (human), **180**, 933
Tight junctions
  development in MCDK cells, role of phosphorylation, **181**, 548
Tissue culture
  mesenteric resistance arteries, associated loss of contractility, attenuation by 1,25-dihydroxyvitamin D_3 (rat), **174**, 11
Tissue factor, *see* Thromboplastin
Tissue inhibitor of metalloprotease
  role in transforming growth factor β suppression of human fibrosarcoma cell invasiveness *in vitro*, **176**, 129
Tissues
  adipose, *see* Adipose tissue
  crude extracts, protein kinase C, assay with phosphatase-resistant substrate (rat), **180**, 694
  distribution of
    Ca^{2+}/Mg^{2+}-dependent nuclease (rat), **181**, 915
    cAMP-dependent protein kinase regulatory subunit RIβ (human, mouse), **176**, 166
    1,25-dihydroxyvitamin D_3 receptor (male rat), **181**, 611
    glucose transporters GLUT1 and GLUT3 (human, monkey, mouse, rabbit, rat), **174**, 470
    high-molecular-weight calmodulin-binding protein (bovine), **181**, 493
    immunoreactive C-type natriuretic peptide (pig), **175**, 759
    preproendothelin-1 (rat), **175**, 44
    rho GDP dissociation inhibitor (rat), **175**, 199
  extra-renal, renin mRNA, assay by polymerase chain reaction (rat), **179**, 25
  follistatin mRNA, ontogeny of steady-state levels, prediction of organ-specific functions (rat), **180**, 223
  formalin-fixed, paraffin-embedded, RNA detection by PCR amplification (human), **174**, 176
  homologous and heterologous, venom protein processing (wasp), **178**, 213
  identification of lanosterol 14α-methyl demethylase (human), **177**, 497
  osteogenic protein OP-1 mRNA expression (mouse), **179**, 116
  transgenic murine, HLA-DRα gene methylation pattern, analysis, **175**, 459
Titin
  C-terminus, location at sarcomere Z-line region, **176**, 189
Tobacco mosaic virus
  induced phosphorylation of host-encoded protein, temporal regulation, **179**, 229
Tolbutamide
  effect on amylin and insulin cosecretion in cultured islet β cells, **179**, 1
  enhancement of lipolysis in 3T3-L1 adipocytes after prolonged exposure, **181**, 1385
  and phenytoin, hydroxylation by human hepatic cytochrome P4502C9 expressed in COS cells, **175**, 1112; *erratum*, **180**, 1527
Toxic shock syndrome toxin 1
  induction of heat shock protein expression in neutrophils (human), **179**, 872
Toxins, *see also specific toxins*
  snake venom, resistance in same species: implications of molecular dissection of cholinergic binding sites (cobra), **179**, 648
Transacting factors
  silencer factor B, binding to negative element in glutathione transferase P gene, similarity to or identity with *trans*-activator LAP/IL6-DBP, **179**, 293
Transactivation
  c-*myc* proto-oncogene by full-length and truncated versions of hepatitis B virus X protein, **176**, 985
  insulin receptor gene by CAAT/enhancer-binding protein (human), **174**, 721
Transcobalamin
  cDNA, functional expression in oocytes (*Xenopus laevis*), **181**, 1151
Transcortin
  binding protein, isolation from syncytiotrophoblast membranes and properties (human), **177**, 834
Transcription
  acyl-CoA oxidase gene, induction mechanism (rat liver), **175**, 866
  ada gene, inhibitory effects of cadmium and mercury, **179**, 1517
  apolipoprotein B gene, regulation: identification of upstream suppressor site (human), **176**, 1116
  c-*fos* gene, activation by phorbol ester, mediation by dyad symmetry element (human T cells), **181**, 353
  dopamine D_3 receptor gene: shorter variants produced by different alternative splicing processes (rat), **176**, 1584
  dopamine D5 pseudogene (human brain), **181**, 16

  effects of electric and magnetic field components of extremely low frequency electromagnetic radiation (HL-60 cells), **174**, 742
  enhancement by moderate acetylation of nucleosomal core particles (chicken erythrocytes), **177**, 370
  fra-2 gene in chicken embryo fibroblasts, stimulation by serum, **174**, 934
  illegitimate, in specific and nonspecific cells, role of normal promoters, **178**, 553
  initiation in two leader exons of insulin-like growth factor I gene, occurrence from disperse versus localized sites (rat), **176**, 887
  *met*H gene, initiation site identification (*Escherichia coli*), **175**, 1057
  neutrophil elastase gene: positive and negative regulatory elements in 5′ flanking region (human), **181**, 1462
  Pit-1 transcription factor gene *in vitro*, inhibition by Pit-1 binding site 3′ to transcription start site, **177**, 790
  rDNA intergenic spacer sequences in normal and regenerating liver, comparison (rat), **176**, 1333
  reverse, RNA intermediate for marked LINE transposon in tumoral cells (rat), **181**, 863
  selenium-dependent glutathione peroxidase gene in selenium-deficient rats, **181**, 1431
  thyroglobulin mRNA, heterogeneous pattern in thyroid (human), **178**, 586
  thyroid hormone receptor-mediated activation in yeast: role of domains D, E, and F in hormone-independent transcription, **178**, 1167
Transcription factors
  IIIC, binding to tRNA gene bipartite internal promoters, physical effects on intervening DNA (yeast), **176**, 826
  CAAT, binding site, and cAMP-responsive elements, in phospho*enol*pyruvate carboxykinase gene promoter, interaction with hepatocyte nucleoprotein (rat), **181**, 367
  LF-B1, gene expression in hepatoma cells and liver, relationship to L-type pyruvate kinase gene expression, **176**, 1074
  NF-kB, constitutive activation in thymocytes (human), **181**, 80
  Pit-1, binding site 3′ to Pit-1 gene transcription start site, inhibition of transcription elongation *in vitro*, **177**, 790
  TFIIIC, specific binding to B block region of TFIIIA gene (*Xenopus laevis*), **175**, 1036
Transcripts
  allele-specific, of low-density lipoprotein receptor gene in individuals with heterozygous familial hypercholesterolemia, PCR detection, **178**, 1319
Transfection
  liposome-mediated, hepatocytes *in vivo* with exogenous DNA, subsequent DNA expression (rat), **174**, 1223
  mammalian cells with liposomes containing cationic cholesterol derivative, **179**, 280
Transferrin
  related 41-kDa polypeptide, production by HL-60 cells: cell growth stimulatory activity, **176**, 473
  secretion by breast cancer cells in different culture conditions, stimulation by cAMP (human), **177**, 1041
Transferrin receptors
  monoclonal antibodies, effects on plasma membrane electron transport, **176**, 1437
Transformants
  gene disruption, *Dictyostelium*, isolation of EB4-PSV gene: library-independent cloning of DNA adjacent to vector integration sites, **181**, 884
Transformation
  C3H10T1/2 cells, X-ray-induced, phorbol ester enhancement, suppression by protease inhibitors: role of protein kinase C, **176**, 18
  fibroblasts with murine sarcoma viruses, effect on resistance to monensin and nigericin (mouse, rat), **174**, 483
  phenotypic, NRK cells expressing human c-*fos* gene: altered response to growth factors and retinoic acid, **181**, 1273
Transforming growth factor
  epidermal growth factor-related, expression by fetal murine salivary mesenchyme cells in culture, **175**, 37
Transforming growth factor β
  active form, production by IgG- or lipopolysaccharide-stimulated monocytes (human), **174**, 885
  chondrocyte-derived, induction of plasminogen activator inhibitor-1 in microvascular endothelial cells, **176**, 633
  differential regulation of α-fetoprotein and albumin gene expression in HuH-7 hepatoma cells (human), **174**, 1294; *erratum*, **175**, 1165
  hybrid molecule, effect on vascular cells (bovine, rat), **175**, 589
  induction of monocyte chemoattractant JE gene expression in murine osteoblastic cells MC3T3-E1 (human), **180**, 1130
  modulation of eicosanoid metabolism in osteogenic osteosarcoma cells (human), **178**, 940
  mRNA, detection in articular chondrocytes by polymerase chain reaction (human), **180**, 602
  and platelet-derived growth factor AA-homodimer, stimulation in vascular smooth muscle cells (rat), **178**, 1451
  suppression of human fibrosarcoma cell invasiveness *in vitro*, mechanism, **176**, 129
  up-regulation of type VII collagen gene expression in normal and transformed epidermal keratinocytes in culture (human), **180**, 673
Transforming growth factor β_1
  effects on
    protein disulfide isomerase expression in hepatic epithelial cells (rat), **174**, 478
    vascular permeability factor mRNA levels in U937 cells (human), **180**, 572
  growth inhibitory action, association with phosphorylation of nuclear proteins, **175**, 816
Transforming growth factor β_2
  inhibition of interleukin 1β and tumor necrosis factor α induction of nitric oxide synthase in mesangial cells (rat), **175**, 372
Transforming growth factor β receptors
  high-molecular-weight, type V, expression in normal and transformed cells, **179**, 378

Transgenic organisms
  mice with ectopic expression of cellular retinoic acid-binding protein, production and analyses, **179**, 210
Transglutaminase, *see* Protein-glutamine γ-glutamyltransferase
Translation
  intrinsic factor-cobalamin receptor mRNA *in vitro* (rat kidney), **177**, 751
  role in estrogen-regulated destabilization of albumin mRNA (*Xenopus laevis*), **174**, 825
  tandem, initiation factor IF2β: purification and characterization of two active forms (*Escherichia coli*), **181**, 1572
Transmembrane signaling
  by N-formyl peptide receptor, analysis in stably transfected fibroblasts (mouse), **179**, 471
  by insulin via insulin receptor mutated at tyrosines 1158, 1162, and 1163 (human), **179**, 912
Transplatin
  interaction with thiotransferase *in vitro*, **180**, 735
Transposons
  marked LINE, reverse transcription intermediate, evidence in tumoral cells (rat), **181**, 863
Transthyretin
  Arg mutant in hereditary polyneuropathy, detection by nonisotopic single-strand conformation polymorphism analysis (human), **180**, 380
  and synthetic fragments, formation of amyloid-like fibrils *in vitro*, **175**, 1159
  variants, preparation and crystallization (human), **179**, 804
Triacylglycerol lipase
  hepatic, deficient family, compound heterozygosity for mutant enzyme, **179**, 78
Triamcinolone acetonide
  inhibition of differentiation of B cells decorated with artificial antigen receptors (human), **179**, 1276
  and RU486, binding to hepatic glucocorticoid receptor, comparative effects of SH-modifying agents (rat), **174**, 1239
Trichomonas vaginalis
  detection and characterization of hydrogenosomal succinate thiokinase, **179**, 892
Trichotoxin
  N-terminal tripeptide Aib–Gly–Aib, structural analysis, **174**, 878
Trifluororhodopsins
  and vinyl fluororhodopsins, NMR studies, **179**, 1337
Triglycerides
  hepatic secretion, effect of spontaneous diabetes (rat), **176**, 1157
Triiodophenol
  biodegradation by cell-free extracts of pentachlorophenol-degrading *Flavobacterium* sp., **174**, 43
Triiodothyronine
  binding to
    placental thyroid hormone nuclear receptor, effect of Zn^{2+}-induced reversible crosslinking of receptor (human), **175**, 250
    α_1 and β_1 thyroid hormone receptors, competitive inhibition by fatty acids, **179**, 1011
  binding protein
    cytosolic, purification and characterization (rat kidney), **174**, 1084
    NADPH-dependent cytosolic, *in vivo* and *in vitro* levels, effects of active vitamin D_3 (rat), **177**, 388
  cytosolic, binding activity of monomeric rat pyruvate kinase subtype M_1, **179**, 668
Triiodothyronine receptors
  expression in pituitary GH1 cells, retinoic acid-induced decrease (rat), **181**, 9
3-Trimethylammoniomethyl catechol
  inhibition and irreversible inactivation of bovine choline acetyltransferase, **175**, 407
Trisomy 16
  affected fetuses, neural dysgenesis and increased neuronal production of class I MHC H-2K^k mRNA and protein, relationship (mouse), **179**, 102
Tritrichomonas foetus
  detection and characterization of hydrogenosomal succinate thiokinase, **179**, 892
Tropomyosin
  muscle-type, cDNA cloning and sequencing (human epithelial cells), **177**, 1068
Troponin T
  cardiac, replacement of troponin C–I–T complex in single glycerinated rabbit skeletal muscle fibers (bovine), **181**, 1022
Trypanosoma brucei brucei
  isolation of glycoprotein of M_r 145,000 as low-density lipoprotein receptor, **178**, 185
Trypanosoma cruzi
  kinetoplast minicircle DNA replication, catenated dimers and knotted DNA structures as putative intermediates, **174**, 958
Trypsin
  gene cloning and nucleotide sequence (*Streptomyces griseus*), **181**, 707
  inactivation by human mucus proteinase inhibitor: localization of inhibitory activity in carboxy-terminal domain (bovine), **179**, 1587
  proteolysis of carnitine palmitoyltransferase, inhibition by malonyl-CoA, **178**, 600
  related activity, identification in commercial preparations of eel acetylcholinesterase, **181**, 858
L-Tryptophan
  product constituents, effects on eosinophil differentiation and IL-6 induction: role in eosinophilia–myalgia syndrome (human), **178**, 1008
  residues in cytochrome P450$_{scc}$, nanosecond fluorescence, effect of substrate binding, **181**, 1493
Tryptophanase
  exchangeable protons, ^{1}H NMR spectra (human), **178**, 385
Tryptophan:indole-lyase, *see* Tryptophanase
Tubules
  transverse, –sarcoplasmic reticulum complex, calcium release, effects of dihydropyridines (rabbit muscle), **175**, 271; *erratum*, **176**, 549

Tubulin
fluorescent and photoaffinity labeling, rhizoxin derivatives as probes for, **178**, 558
polymerization, inhibition by mitoxantrone, mechanism (bovine brain), **180**, 118
Tumor cells
basophilic leukemia RBL-2H3
and human neutrophils, Fc receptor crosslinking in, tyrosine phosphorylation as common early signaling event, **177**, 192
IgE receptor-mediated secretion, regulation by GTP-binding proteins and calcium (rat), **174**, 1064
tyrosine kinase-dependent phosphatidylinositol turnover and functional responses in FcεR1 signalling pathway (rat), **179**, 551
bladder cancer, T24, surface imaging by scanning tunneling microscopy (human), **177**, 636
B lymphoma, Raji, component protein, *in vitro* phosphorylation, enhancement by C3d-derived synthetic peptide (human), **175**, 823
breast cancer
BT-20, epidermal growth factor receptor gene expression, augmentation by 1,25-dihydroxyvitamin D_3 (human), **176**, 1
MCF-7
cathepsin D gene, identification of estrogen-responsive sequences in 5′ proximal flanking region (human), **174**, 816
estrogen binding to estrogen receptors: differential cell responses depending on type of ligand–receptor interaction (human), **174**, 276
intact, androgen receptor binding capacity, rapid homologous up-regulation (human), **181**, 383
and MCF-7-40, growth inhibition by genistein: independence from estrogen receptors and multidrug resistance gene (human), **179**, 661
produced amphiregulin-associated protein, amino acid sequence (human), **179**, 572
production of MUC1 (human), **178**, 593
transferrin secretion in different culture conditions, stimulation by cAMP (human), **177**, 1041
Burkitt's lymphoma, BHM, protein synthesis, effects of L-phenylalanine mustard (human), **176**, 717
carcinosarcoma, Walker 256, Na^+-dependent concentrative nucleoside transport (rat), **175**, 846
central nervous system-associated cell lines, RAG-2 gene expression (mouse), **181**, 151
colon adenocarcinoma
CaCo-2
antiproliferative effect of 1,25-dihydroxyvitamin D_3 and analogs, effect of extracellular calcium, **179**, 57
expression of β1,4-*N*-acetylgalactosaminyltransferase responsible for Sd^a specificity (human), **180**, 681
monolayers, active transport of amino acids by γ-glutamyl transpeptidase (human), **178**, 1028
HT29
clonal derivative HT29-SB, production of MUC1 (human), **178**, 593
protein kinase C-overproducing, growth modulation by hexamethylene bisacetamide (human), **181**, 809
colonic, detection of voltage-, calcium-, and ATP-sensitive nonselective cation channel (human), **176**, 1196
colonic cancer
Colo201, adhesion to vascular endothelium, mediation by sialyl Lewis a antigen (human), **179**, 713
LS174T, production of MUC1 and MUC2 (human), **178**, 593
LS180 and SW1116, mucin-type oligosaccharides with sialyl-Le^a structure, characterization (human), **178**, 1429
Ehrlich ascites
eEF-2-specific Ca^{2+}- and calmodulin-dependent protein kinase III, increased activity during S-phase, **180**, 1372
heat shock protein hsp25 and thermotolerance, induction by cisplatin, **180**, 243
permeabilized, glycolysis, effect of magnesium, **179**, 1000
embryonal carcinoma
derived 4CQ, synthesis of extracellular matrix consisting of entactin–fibronectin complex, **178**, 1219
P19, neurally differentiated, brain-specific nuclear protein mRNA expressed in, sequencing (mouse), **178**, 291
erythroleukemia
enhancer-dependent expression of chicken β^H-globin gene during differentiation (chicken, mouse), **177**, 97
HEL
15-hydroxyprostaglandin dehydrogenase (NAD^+) synthesis and activity, regulation by dexamethasone and phorbol ester (human), **177**, 1258
thromboxane A_2 synthesis (human), **180**, 8
IW32, differentiation, effect of podophyllotoxin: expression of c-*myc* proto-oncogene (mouse), **179**, 1241
K562
cytotoxicity of tiazofurin and arabinose and xylose analogs (human), **180**, 933
differentiation, potent induction by bufalin (human), **178**, 686
MEL
B2-containing RNA modulation during induced differentiation (mouse), **175**, 91
hexamethylenebisacetamide-induced differentiation, role of secretion and membrane binding of differentiation-enhancing factor (mouse), **179**, 153
hyperpolarization, promotion by fibronectin–integrin binding (mouse), **177**, 1266
fibrosarcoma
HT1080
invasiveness *in vitro*, suppression by transforming growth factor β, mechanism (human), **176**, 129
invasive, secretion of 68–72-kDa and 92-kDa gelatinase/type IV collagenase: comparative role in invasion (human), **181**, 1539
L929, common signal transduction pathway for tumor necrosis factor-induced interleukin-6 expression and cytotoxicity (mouse), **178**, 993
gastric carcinoma, MKN-45, detection of histamine H_2 receptors: augmentation by retinoic acid treatment (human), **176**, 1027

- glioma
  - C6, CMP-*N*-acetylneuraminate–β-galactoside α-2,3-sialyltransferase, post-translational regulation by N-glycosylation, **178**, 1437
  - T98G, expression of transfected angiotensinogen gene (human), **180**, 1103
- glucose utilization, role of post-translational modification of mitochondrial hexokinase (human, rat), **178**, 648
- HeLa
  - *Chlamydia* binding to phosphatidylethanolamine in, **175**, 1082
  - expressing human m1 muscarinic acetylcholine receptor gene, phospholipase D activation and phosphatidylethanol formation upon stimulation, **176**, 453
- hepatoma
  - expression of L-type pyruvate kinase and LF-B1 genes, relationship, **176**, 1074
  - FAZA, fibrinogen synthesis, role of fibrin fragments (rat), **175**, 562
  - H4, N^3-methyladenine-DNA-glycosylase and O^6-methylguanine-DNA-methyltransferase mRNAs, increase after treatment with DNA-damaging agents (rat), **176**, 1086
  - HepG2
    - down-regulation of protein kinase C α isoenzyme, association with inhibition of erythropoietin production by phorbol ester (human), **179**, 1441
    - expression of transfected angiotensinogen gene (human), **180**, 1103
    - peroxisomal import of enoyl-CoA hydratase:3-hydroxyacyl-CoA dehydrogenase bifunctional enzyme *in vitro* (human), **178**, 1084
    - plasma membrane binding of oligonucleotides at acidic pH (human), **181**, 1343
    - proliferation, effects of hepatocyte growth factor with deletion of kringle domains or N-terminal hairpin structure (human), **181**, 691
    - uptake of asialofetuin-tacked liposomes encapsulating interferon-γ: inhibition of hepatitis B virus replication (human), **174**, 839
  - HLF, c-*myc* protein levels and DNA synthesis, reduction by interferon-α-induced inhibition of putrescine synthesis (human), **178**, 378
  - Huh 6, interferon-γ-induced HLA class I antigen expression: analysis of signal transduction pathways, **177**, 610
  - HuH-7, α-fetoprotein and albumin gene expression, differential regulation by transforming growth factor β1 (human), **174**, 1294; *erratum*, **175**, 1165
  - Morris hepatoma 7777, transplantable, detection of crosslinked cytokeratin polypeptides (rat), **176**, 441
  - RC-3, growth inhibitory effects of recombinant tumor necrosis factor α, prevention by dexamethasone (rat), **181**, 1524
- histiocytic lymphoma, U937, vascular permeability factor mRNA levels, effects of cytokines and inducing agents (human), **180**, 572
- HL-60
  - adhesion to vascular endothelium, mediation by sialyl Lewis a antigen (human), **179**, 713
  - CTP:phosphocholine cytidylyltransferase translocation, modulation by oleic acid and antitumoral alkylphospholipid (human), **176**, 157
  - differentiation
    - associated induction of platelet-activating factor receptor gene expression (human), **181**, 1580
    - cooperative effect of 8-Cl-cAMP and granulocyte-macrophage colony-stimulating factor, **177**, 1133
    - induction by regiospecifically acetylated spermidines (human), **180**, 591
  - myeloperoxidase gene identification as primary response gene (human), **176**, 1345
  - nuclear protein phosphorylation patterns, effect of chromatin conformation (human), **180**, 329
  - production of
    - human hepatocyte growth factor, **181**, 323
    - transferrin-related 41-kDa polypeptide: cell growth stimulatory activity (human), **176**, 473
  - retinoic acid- or 1,25-dihydroxyvitamin D_3-induced differentiation, enhancement by barbiturates (human), **178**, 263
  - transcriptional activity, effects of electric and magnetic field components of extremely low frequency electromagnetic radiation (human), **174**, 742
- human and rodent, analysis of integrin mRNA, **176**, 108
- hybridoma, and parental cells, comparative production of creatine kinase BB (mouse), **179**, 1529
- insulinoma, RIN-m5F, expression of liver-type pyruvate kinase, role of *trans*-acting protein LF-B1 (rat), **181**, 259
- Jurkat, glycoprotein CD 43, expression of Tn antigen (human), **179**, 762
- leukemia
  - CEM C7, glucocorticoid-induced cell death, β-galactoside binding protein overexpressed during, cDNA clone isolation (human), **178**, 746
  - L8057, megakaryocytic differentiation, effect of erythroid differentiation factor (mouse), **181**, 1042
  - U937, adhesion of platelets via GMP-140/PADGEM protein, enhancement by interleukin-1β and interferon-γ (human), **179**, 756
- Lewis lung carcinoma C108, identification of hydroxystearic acid, **178**, 1260
- lung cancer, various cell types, differential expression of nuclear factors binding AP-1, AP-2, AP-3, and NF-I/CTF enhancer elements (human), **180**, 1064
- lung carcinoma, A549, glutathione efflux induced by calcium chelation, prevention by ruthenium red and neomycin (human), **176**, 276
- lymphoma, A/63-2, expression of alkaline phosphatase: effect of butyrate (mouse), **177**, 125
- mammary
  - SC-3, fibroblast growth factor receptor
    - cDNA cloning (mouse), **176**, 31
    - mRNA levels, up-regulation by basic FGF or testosterone (mouse), **174**, 136
  - TA3, ribonucleotide reductase activity, inactivation by nitric oxide, **179**, 442

- mastocytoma, P-815, ATP- and thrombin-induced $[Ca^{2+}]_i$ increases, differential regulation by prostacyclin receptor (mouse), **176**, 102
- melanoma
  - B16
    - adhesion and metastasis, effects of cyclic RGD peptides (mouse), **177**, 74
    - derived BL6 cells, and melanocytes, differential genomic susceptibility, relationship to expression of DNA-binding proteins (mouse), **178**, 1036
  - Cloudman S91, interactions between β-melanotropin, interleukin-1, and ultraviolet light (mouse), **175**, 839
  - melanogenesis and proliferation, effects of histamine H2 receptor antagonists (human, mouse), **177**, 545
  - NEL-MI, growth stimulation by hepatocyte growth factor/hepatopoietin A (human), **174**, 331
- myeloma, SP2 O/Ag14, and derived hybridomas, comparative production of creatine kinase BB (mouse), **179**, 1529
- myelomonocytic leukemia, M1, differentiation induced by leukemia inhibitory factor/D-factor, associated phosphorylation of heat shock protein hsp27 (mouse), **176**, 979
- neuroblastoma
  - SH-EP, enhanced *MYCN* oncogene expression, association with altered FGF receptor expression and cellular growth response to basic FGF (human), **179**, 1449
  - SH-SY5Y, forskolin-stimulated cAMP accumulation, carbachol enhancement via calmodulin activation (human), **178**, 116
- neuroblastoma × glioma NG108-15
  - calcium responses to endothelin-1, inhibition by SK&F 96365, **177**, 1141
  - chronic exposure to morphine or ethanol, effects on nuclear factor binding to cAMP response element, **174**, 25
  - second messenger accumulation, effect of lithium, **174**, 606
- neuronal cell lines, plasma membrane Ca^{2+} entry, comparative roles of thapsigargin- and IP_3-sensitive intracellular Ca^{2+} pools (mouse, rat), **180**, 1518
- osteosarcoma
  - SAOS1, osteogenic, eicosanoid metabolism, modulation by transforming growth factor β (human), **178**, 940
  - U-2, secretion of insulin-like growth factor-binding protein (human), **176**, 213; *erratum*, **177**, 895
  - UMR-106
    - proliferation inhibition by parathyroid hormone-related hormone, role of cAMP-dependent protein kinase activation, **179**, 97
    - PTH-induced homologous desensitization, role of intracellular calcium increase (rat), **176**, 1033
    - PTH-stimulated cAMP production, desensitization induced by phorbol ester (rat), **176**, 764
- ovarian cancer
  - COLO 316, production of MUC1 (human), **178**, 593
  - response to and expression of amphiregulin (human), **180**, 481
  - Vinca alkaloid resistance, associated antigenic properties: identification of 92-kDa protein (human), **180**, 334
- pancreatic adenocarcinoma, from cystic fibrosis patient, high intracellular pH, decrease by retrovirus-mediated CFTR gene transfer, **180**, 342
- pheochromocytoma
  - PC12
    - annexin II and p11 increases correlated with differentiation, **177**, 1188
    - atrial natriuretic factor receptor internalization, role of extracellular calcium (rat), **175**, 1017
    - nerve growth factor-sensitive S6 kinase activity, stimulation by okadaic acid (rat), **177**, 624
    - post-translational processing and secretion of human atriopeptin (rat), **176**, 1232
  - PC12h
    - dopamine content, effect of Ca^{2+}/calmodulin-dependent protein kinase II inhibitor KN-93 (rat), **181**, 968
    - tyrosine hydroxylase phosphorylation and activation, role of Ca^{2+}/calmodulin-dependent protein kinase II (rat), **176**, 1051
- pituitary, GH_4C_1, prolactin secretion, regulation by potassium channels via induction of extracellular calcium influx (rat), **180**, 112
- plasmacytoma, MOPC 315, nucleotide pyrophosphatase activity, effect of dexamethasone (mouse), **175**, 637
- prostate cancer, LNCaP, intracellular calcium, effects of androgen (human), **179**, 90
- retinoblastoma Y-79
  - cytotoxic effect of lymphokine-activated killer cells, enhancement by PSK (human), **174**, 107
  - fibroblast form of $pp60^{c\text{-}src}$, detection of serine phosphorylation (human), **178**, 764
- squamous carcinoma
  - RHEK, interactions between β-melanotropin, interleukin-1, and ultraviolet light (human), **175**, 839
  - SCL, expression of proteoglycan and glycosaminoglycan free chains (human), **179**, 1281
- transitional cell carcinoma of urinary bladder, metastatic potential, association with expression of carbohydrate signal sialyl dimeric Le^x antigen (human), **181**, 1218
- various types, expression of monocyte chemoattractant protein-1 (rat), **174**, 504

Tumor cytotoxic factor
- fibroblast-derived, cDNA cloning, purification, and characterization (human), **180**, 1151

Tumorigenesis
- v-Ha-*ras*-expressing murine pre-B cell line, selection for c-*myc* activation, **178**, 1343

Tumor necrosis factor
- gene expression kinetics in lipopolysaccharide-stimulated whole blood (human), **174**, 18
- induced synthesis of group II phospholipase A_2 and prostaglandin E_2 in mesangial cells, prevention by dexamethasone (rat), **180**, 46
- induction of interleukin-6 expression and cytotoxicity in L929 cells via common signal transduction pathway, **178**, 993

- recombinant precursor, purification from *Escherichia coli* (human), **179**, 683
- stimulated fibroblast proliferation, antagonism by prostaglandins (human), **174**, 758
- stimulation of group II phospholipase A_2 synthesis and secretion in mesangial cells (rat), **174**, 268
- type α
  - induction of nitric oxide synthase in mesangial cells, inhibition by transforming growth factor β_2 (rat), **175**, 372
  - mRNA levels in brain, effect of kainic acid (rat), **176**, 593
  - recombinant, growth inhibitory effects in RC-3 hepatoma cells, prevention by dexamethasone, **181**, 1524

Tumor necrosis factor receptors
- soluble form, encoding by Shope fibroma virus T2 open reading frame, **176**, 335
- for TNF-α, identification and characterization in brain (mouse), **181**, 1532

Tumors
- brain, expression of neurofibromatosis type 1 mRNA with 63-base insert in region coding for GTPase activating protein-related domain (human), **181**, 955
- colorectal
  - mitochondrial DNA, restriction enzyme analysis (human), **180**, 85
  - p53 gene mutations in, analysis (human), **177**, 901
- gastric carcinoid, membrane preparation, detection of gastrin receptors (*Mastomys natalensis*), **177**, 739
- glioma
  - D-298 MG, deletion-mutant epidermal growth factor receptor, characterization (human), **178**, 1413
  - fibroblast growth factor receptor gene expression (human), **177**, 1
  - role of p53 gene mutation (human), **180**, 1145
- histiocytoma, enhanced hyaluronate-binding protein phosphorylation (rat), **177**, 1291
- liver, expression of pp63 gene encoding insulin receptor tyrosine kinase inhibitor (rat), **180**, 967
- mammary
  - antitumor activity of naltrexone, evaluation and relationship to steroid hormone receptors (rat), **175**, 625
  - and L5178Y leukemia, growth *in vivo*, stimulation by *N*,*N*-diethyl-2-[4-(phenylmethyl)phenoxy] ethanamine hydrochloride (mouse, rat), **179**, 1297
  - rats inoculated with, hepatic pyruvate carboxylase activity, ^{13}C NMR study, **179**, 366
- melanoma, B16, growth-enhancing activity produced by murine splenocytes, description, **179**, 675
- meningioma, fibroblast growth factor receptor gene expression (human), **177**, 1
- renal cell carcinoma, associated increase in serum levels of basic fibroblast growth factor (human), **180**, 386
- suppressive activity of human chromosome 5 with familial adenomatous polyposis gene, **174**, 298
- Yoshida ascites hepatoma, proteolysis stimulated by ATP and ATP + ubiquitin, analysis (rat), **179**, 1400

Tyrosinase
- cDNA, expression in Swiss 3T3 fibroblasts, **178**, 739

Tyrosine
- phosphorylation
  - essential role in microfilament assembly in B cells (human), **176**, 1424
  - insulin-sensitive, in myelin basic protein (rat brain), **179**, 392
- replacement of proximal histidine in myoglobin by site-directed mutagenesis: mutant characterization and catalytic activities (human), **180**, 138
- residues 1158, 1162, and 1163 in
  - insulin receptor, mutations at, analysis: role of Tyr autophosphorphorylation in receptor signaling (human), **179**, 912
  - synthetic dodecapeptide containing insulin receptor autophosphorylation sites, phosphorylation by receptor tyrosine kinase, **174**, 772

Tyrosine aminotransferase
- circadian rhythm of expression, age effects (rat), **175**, 104

Tyrosine hydroxylase, *see* Tyrosine 3-monooxygenase

Tyrosine kinase, *see* Protein-tyrosine kinase

Tyrosine 3-monooxygenase
- cDNA cloning and sequencing (murine brain), **176**, 1610
- expression in *Escherichia coli* (mouse), **178**, 664
- phosphorylation and activation, role of Ca^{2+}/calmodulin-dependent protein kinase II (PC12h cells), **176**, 1051

Tyrosine peroxyl radical
- identification as initiating agent in myoglobin-induced lipid peroxidation (human), **179**, 1414

Tyrosine protein kinase, *see* Protein-tyrosine kinase

Tyrosyl protein sulfotransferase
- role in sulfation of cholecystokinin, evidence for ordered reaction mechanism (rat brain), **181**, 989

U

U-50,488H
- and phenylephrine, effects on phosphoinositide turnover in cardiomyocytes, comparison (rat), **179**, 972

Ubiquitin
- and ATP, stimulated proteolysis in liver and Yoshida ascites hepatoma, analysis (rat), **179**, 1400

Ubiquitin-activating enzyme
- immunocytochemical localization in cell nucleus (HeLa cells, rat tissues), **174**, 564

Ulceration
- gastric, inhibition by central basic fibroblast growth factor (rat), **177**, 809

Ultraviolet light
- damage-specific DNA-binding protein, demonstration in xeroderma pigmentosum complementation group E (human), **175**, 1139
- induction of oxy- and chromanoxyl free radicals in hepatic microsomes via photosensitive organic hydroperoxide (rat), **175**, 129
- and interleukin-1 and β-melanotropin, interactions in murine melanoma and human squamous carcinoma cells, **175**, 839
- solar UV-B, monitoring with biological dosimeter, **177**, 48

UMP-(1-hexadecanesulfonic) anhydride
  synthesis and inhibition of UDP-GalNAc:polypeptide galactosaminyl transferase, **175**, 668
Urea cycle
  reversible inhibition by *N,N*-diethyl-*m*-toluamide (rat), **179**, 1264
Uridine
  uptake by macrophages from various murine strains: short-term and two-step stimulation model, **177**, 1299
Uridine 5′-diphospho-*N*-acetylglucosamine
  derivative, inhibition of methylcoenzyme M methylreductase, **174**, 619
Urine
  detection of
    20-hydroxyeicosatetraenoic acid (rat), **180**, 445
    nitrosation-proficient denitrifying bacteria with mono- and polyclonal antibodies to nitrosating enzyme (human), **176**, 262
  distal, acidification: physiological role for vanadate-sensitive ATP-dependent H^+ transport (turtle bladder), **180**, 1505
  schizophrenic patients treated with haloperidol, identification of potentially neurotoxic pyridinium metabolite, **181**, 573
Uterus
  c-*fos* expression in luminal and glandular epithelia, induction by estrogen (rat), **175**, 480
  identification of high-affinity endothelin-1 subtypes (human), **180**, 475

V

Vaccinia virus
  expressed human cytochrome P450s, metabolic activation of pneumotoxin 3-methylindole, **181**, 100
  recombinant, with coding sequence for hepatitis B virus surface antigens, infected lymphocytes, production of 22-nm HBsAg particles (human), **179**, 1479
Valine
  hydrophobic residues in [D-Ala^2]deltorphin II analogs, role in high affinity and selectivity for δ-opioid receptors, **180**, 822
  tRNA, identity determinants (*Escherichia coli*), **177**, 619
Valinomycin
  effects on vanadate-sensitive and -resistant H^+ transport in vesicles from bladder epithelium (turtle), **176**, 1285
Vanadate
  sensitive ATP-dependent H^+ transport, physiological role: model for distal urinary acidification (turtle bladder epithelium), **180**, 1505
Vascular permeability factor
  mRNA levels in U937 cells, effects of cytokines and inducing agents (human), **180**, 572
  secretion and permeability-enhancing activity, role of glycosylation (guinea pig), **179**, 1568
  specific binding to vascular endothelial cells, **175**, 68
Vasoactive intestinal peptide
  precursor proVIP, glycine-extended biosynthetic intermediate form, development of specific radioimmunoassay (rat), **178**, 173
Vasoactive intestinal peptide receptors
  mediated signal transduction, stimulation of tyrosine kinase $pp60^{c\text{-}src}$ phosphorylation (chicken embryo), **174**, 452
  pancreatic acinar cell line AR42J, glycoprotein nature (rat), **179**, 176
Vasoconstriction
  aortic, effect of ammonium chloride (rat), **178**, 808
  long-lasting, induction by endothelin-1 in splanchnic and renal tissues (human), **180**, 1298
Vasopressin
  arginine, *see* Arginine vasopressin
  stimulated phosphoinositide turnover in hepatocytes, effect of okadaic acid (rat), **179**, 852
  vascular action in smooth muscle cells, effect of OPC-21268 *in vitro* (rat), **178**, 707
Vasopressin receptors
  V2, expression in *Xenopus* oocytes by LLC-PK1 porcine kidney cell mRNA, **174**, 149
Vasorelaxation
  aortic, acetylcholine-induced, role of sodium–hydrogen antiport (rat), **177**, 407
  intrapulmonary artery, induction by N^{ω}-hydroxy-L-arginine (bovine), **176**, 528
Vectors
  baculovirus transfer, expression of biologically active ovine trophoblastic interferon in insect cells, **181**, 443
  expression, construction for streptavidin-containing chimeric proteins, **176**, 571
  integration sites, adjacent genomic DNA, cloning: isolation of EB4-PSV gene from *Dictyostelium* gene disruption transformant, **181**, 884
  plasmid, expression of rat thyrotropin receptor as fusion protein in bacteria: identification of TSHR immunogenic region with synthetic peptides, **179**, 319
  shuttle, bovine papillomavirus
    homologous recombination in, effect of relative orientation of substrate sequences, **174**, 305
    illegitimate recombination in site-specific manner, **179**, 251
  T7 promoter, multicopy, gene expression at single copy rates in absence of T7 RNA polymerase, **181**, 1056
Veins
  portal, from hypertensive and normotensive rats, effects of phorbol 12,13-dibutyrate, **176**, 1552
Venom
  proteins, biosynthesis and subsequent processing in homologous and heterologous systems (wasp), **178**, 213
Verapamil
  attenuation of daunorubicin-augmented microsomal lipid peroxidation and oxygen consumption (rat), **179**, 1101
  and forskolin, sensitive K^+ current, detection in tracheal epithelial cells (human), **179**, 1155
Veratryl alcohol
  role in degradation of azo dyes by *Phanerochaete chrysosporium* ligninase, **178**, 1056

Vesicles
  bladder epithelium, vanadate-sensitive and -resistant H^+ transport, effects of valinomycin (turtle), **176**, 1285
  brush border membrane
    ileal, taurocholic acid uptake, effect of antiserum to 99-kDa polypeptide (rat), **179**, 204
    leucine and aspartic acid uptake, differential inhibition by *Bacillus thuringiensis* δ-endotoxin (*Manduca sexta* midgut), **181**, 1089
  DMPC/bacteriorhodopsin, produced by detergent-free method, phospholipid composition and physical properties, **180**, 939
  pancreatic microsomal, inositol 1,4,5-trisphosphate- and caffeine-sensitive calcium pools in, GTP-induced connection, increase by H^+ uptake, **180**, 755
  placental, clathrin-coated, assay of associated GTP-binding proteins (human), **174**, 197
  secretory, targeting of propeptides to, role of common sequence motif, **174**, 586
  seminal, metabolism of 17R(18S)epoxyeicosatetraenoic acid to prostaglandins (monkey), **178**, 1444
  T-tubule–sarcoplasmic reticulum, calcium release, effects of dihydropyridines (rabbit muscle), **175**, 271; *erratum*, **176**, 549
Vesicular stomatitis virus
  resistance of preimplantation bovine embryos to, chemical induction, **175**, 10
Vibrio cholerae
  serotype O1, identification of genomic region determining specificity, **175**, 679
Vibrio parahaemolyticus
  mutant lacking H^+-translocating ATPase activity, Na^+-coupled ATP synthesis in, **179**, 224
Vimentin
  hyperphosphorylation in okadaic acid-treated primary fibroblasts (human), **177**, 1165
  phosphorylation by Ca^{2+}/calmodulin-dependent protein kinase II, Ser-82 as unique site, **175**, 955
Vinblastine
  transepithelial secretion mediated by P-glycoprotein, inhibition by forskolin derivatives (MDCK cells), **181**, 671
Vinyl fluororhodopsins
  and trifluororhodopsins, NMR studies, **179**, 1337
Viruses, *see specific viruses*
Vitamin B_6
  deficiency, role in retinopathy in diabetes mellitus patients, **179**, 615
Vitamin D
  effect on intestinal plasma membrane Ca-pump mRNA (rat), **179**, 749
Vitamin D_3
  active, effects on *in vivo* and *in vitro* levels of NADPH-dependent cytosolic triiodothyronine-binding protein (rat), **177**, 388
  metabolites, effects on cytosolic calcium in cultured mesangial cells, single cell analysis (rat), **180**, 833
Vitamin E
  deficiency, pathological role in myocytolysis in cardiomyopathic hamster strain, **181**, 145
  derivatives, inhibition of microsomal lipid peroxidation (rat liver), **174**, 1103
  supplemented diet, associated decrease in carbon-centered and hydrogen radicals in skeletal muscle (rat), **179**, 859
Vitronectin
  B16 melanoma cell adhesion to, effects of cyclic RGD peptides, **177**, 74
  crosslinking and phosphorylation in endothelial cell substratum (human), **174**, 465
  and placental protein 11 and pea albumin 2, amino acid sequence comparison, **176**, 1000
  serine^{378} in, phosphorylation by cAMP-dependent protein kinase (human), **179**, 655
VM-26, *see* Teniposide
von Willebrand factor
  and coagulation factor VIII, binding affinity, definition (human), **180**, 231
  human, carbohydrate analysis with horseradish peroxidase-conjugated lectins, **178**, 1253
  propolypeptide, immunodetection on platelets (human), **176**, 1571

W

Water
  and D_2O, dihexadecylphosphatidylcholine dispersions in, comparative thermotropic transitions between interdigitated gel phase and ripple phase, **174**, 102
  formation via polyphasic reduction of oxygen by purified cytochrome-*c* oxidase, **176**, 150
Wheat germ agglutinin
  induction of protein-tyrosine phosphorylation in platelets (human), **174**, 1154
  stimulation of protein-tyrosine kinase activity of $p72^{syk}$ (porcine splenocytes), **180**, 1325

X

Xeroderma pigmentosum
  complementation group A gene XPAC, cloning and sequencing of homologs from chicken, frog, and fruit fly, **181**, 1231
  complementation group E, demonstration of ultraviolet damage-specific DNA-binding protein (human), **175**, 1139
X-ray crystallography
  study of human carbonic anhydrase II structural properties at pH 9.5, **181**, 579
X-ray diffraction
  recombinant interferon-γ, preliminary studies (rabbit), **178**, 634
2-β-D-Xylofuranosylthiazole-4-carboxamide
  cytotoxicity to K562 cells (human), **180**, 933

Y

Yeast artificial chromosomes
  derived clone in region of human mcf-2 gene, fidelity, **181**, 877

Yeasts, *see also specific yeasts*
  opsonized particles, phagocytosis by human neutrophils, associated formation of diacylglycerol, **177**, 948
YM175
  augmentation of serum 1,25-dihydroxyvitamin D by stimulation of renal 1-hydroxylase activity (rat), **180**, 1172
YM264
  effects on puromycin-induced nephropathy (rat), **176**, 781

Z

Zidovudine
  administration to mice, subsequent guanosine conversion to 8-hydroxyguanosine in hepatic mitochondrial DNA, **176**, 87
  and 2′,3′-dideoxynucleosides, 5′-triphosphates, differential inhibition of DNA polymerase γ (bovine testis), **179**, 776
Zinc
  association with insulin-degrading enzyme (human placenta, rat liver, muscle), **181**, 1398
  and cadmium, additive induction of metallothionein (LLC-PK1 cells), **177**, 224
  effect on Ca^{2+}/Mg^{2+}-dependent nuclease tissue distribution and associated internucleosomal DNA fragmentation (human, rat), **181**, 915
  induced reversible crosslinking of placental thyroid hormone nuclear receptor, effect on hormone binding (human), **175**, 250
  negative regulation of human and rat topoisomerase I, **178**, 414
Zona glomerulosa cells
  calcium influx, stimulation by serotonin *in vitro* (rat adrenal gland), **179**, 979
Zymogen granules
  pancreatic
    cholecystokinin-stimulated Cl^- conductance, effects of epidermal growth factor and calcium omission (rat), **181**, 827
    membranes
      associated low-molecular-weight GTP-binding proteins (rat), **174**, 600
      phospholipase A_2, regulation by G proteins, **177**, 22
Zymosan
  particles, individual phagocytosis by macrophages, associated single pulses of $[Ca^{2+}]_i$ (mouse), **177**, 460
  stimulated arachidonic acid release from peritoneal macrophages, role of extracellular calcium (mouse), **180**, 1036
